Welcome to the 2012 Construction & Demolition Guide! This guide attempts to gather the essential information that a construction and demolition contractor working in King County needs at the jobsite to greatly minimize the amount of materials leaving their jobsite as waste. Additional information is available at www.GreenTools.us and shortcuts to finding this information on-line have been included throughout this directory. We hope this guide will help connect you to the information and services you need.

How to use this Directory

Directory Information

This directory is a listing of area recyclers compiled from information provided to the King County Solid Waste Division and the City of Seattle. King County and Seattle provide this list of service providers as a courtesy to the public and do not endorse or guarantee the quality of the services offered or provided. Updates to this information are reflected in King County's What do I do with…? online searchable directory (www.greentools.us search: WDIDW). Check Yellow Pages for additional resources.

No pricing information has been included in this directory.

Please call recyclers in these listings for prices and service details.

QR Codes ( ) and Search Suggestions

In an effort to reduce the cost of producing this guide and the amount of paper that would be needed, we decided to put a lot of the information on the Internet. To save you from having to type in excessively long web site addresses we have included, wherever applicable, suggestions on how to do an Internet search to find the information or, if you happen to have a smart phone – a QR code which can be scanned and which will take you directly to the suggested web site.

Portable Device App

The listings in this directory are also available via the iRecycle app that Earth 911 developed.

web search: irecycle app

Questions?

King County – Call the King County Solid Waste Division at 206-296-4464. You may also find answers to commonly asked questions on the King County GreenTools website at www.greentools.us.

Seattle – Call the Resource Venture hotline at 206-389-7304 or visit their website at www.resourceventure.org.

Useful Information

Demolition/Deconstruction Permitting

All demolition/deconstruction performed in **King County** requires a permit from the Puget Sound Clean Air Agency **206-343-8800**

Demolition/deconstruction performed in **unincorporated areas of King County** also requires a permit from the Department of Development and Environmental Services. **206-296-6600**

Demolition/deconstruction performed in the **City of Seattle**, requires a permit from Seattle's Department of Planning and Development **206-684-8850**

Hazardous Waste

The Business Waste Hazards Line **206-296-3976**

How Do I Recycle C&D the Right Way?[1]

Why Recycle?

- to reduce your costs (recycling is generally less expensive than disposal)
- earn LEED and Built Green points
- conserve materials and protect the environment
- create local jobs and businesses (your future clients), and to make the world a better place for your children and grandchildren
- to comply with bans

Some municipalities, such as the City of Seattle, ban certain C&D materials from disposal, requiring that these materials be recycled.

If I recycle, am I required to have a container for garbage?

Yes. All projects generate some materials that are not recyclable and those materials must go into a properly marked solid waste container for disposal. This is required by Washington State Code - WAC 173-345-040.

Does the container for garbage have to be as big as the container for recyclables?

No. Most of the materials you generate are likely recyclable. You will probably need a much smaller container for disposal, but it should be proportional to the size of the project and the amount of non recyclable waste generated. The vast majority of materials from new construction can be recycled if properly managed.

Do I need to have separate containers for each kind of recyclable, like metal and wood?

No. Recyclables do not have to be separated from each other at the job site. They can be mixed together in the recycling box, if the service you have hired allows (or requires) this. However, you must be sure that the materials going into the recycling box are actually being recycled by the facility where your materials are hauled to for processing. Also, you may find financial benefits from separating the recyclables by specific materials. You can shop around to determine which arrangement and service works best for you.

Can I have one company haul my garbage and have a different company haul my recyclables?

Yes. Absolutely. There are no state restrictions regarding who can haul recyclable C&D materials.

Can my "recycler" provide and haul the garbage container, too?

Maybe yes, maybe no. It depends on what jurisdiction your project is in. Only "G-certificated" or municipal-contracted garbage haulers can haul solid waste for disposal. These companies have their garbage rates and services reviewed and set by the Washington Utilities and Transportation Commission (WUTC) or are under contract with a local municipality. Your solid waste container must be hauled by a G-certificated hauler or garbage collection company under contract with a city or town if you don't haul it yourself. In the City of Seattle, for example, only Waste Management can be paid to haul construction and demolition waste for disposal. Other transporters are not allowed to haul solid waste for disposal, but are allowed to haul incidental amounts (less than 10%) of solid waste that are contained within loads of recyclable materials.

Can my "garbage hauler" provide and haul the recycling container, too?

Yes. Many of the garbage haulers also provide recycling services. However, you are not obligated to use your garbage hauler for recycling services.

Can I haul the garbage myself?

Yes. You can take your garbage directly to a C&D debris drop-off facility. In Seattle and King County, these include privately operated facilities operated by Waste Management Inc. or Allied Waste Management, and publically operated transfer stations. However, transfer stations in Seattle and King County will only accept small loads of waste C&D and will not accept loads brought in dump trucks, dumpsters or roll-off containers. In Snohomish County all types of C&D containers and vehicles are accepted at the county's transfer stations.

Can I haul the recycling container myself?

Yes. You can take your recyclables directly to a C&D processing facility or recycler yourself. Just be sure to only take materials to a location that accepts those materials for recycling, and please be sure that you are not trying to recycle loads that contain non-recyclable materials. Less than 10 percent incidental non-recyclable waste is usually tolerated in a load but you should be aiming for 100% recyclable materials. As discussed above, whether you haul it yourself or hire a service, non-recyclable waste needs to be separated from recyclable C&D materials and the non-recyclable waste must go to a C&D disposal facility.

1 The basis for this text was provided by Snohomish County Solid Waste

Do I have more than one option for who can haul my solid waste for disposal?

In most cases, there is only one WUTC G-certificated or municipal-contracted hauler authorized to collect solid waste for disposal in a given area, and this hauler is your only option unless you haul it yourself. For information on the hauler serving your jobsite contact the applicable solid waste agency listed below. (In some areas there may be additional haulers authorized to collect non-putrescible materials for disposal.)

- King County Solid Waste 206-296-6542
- Pierce County Solid Waste 253-798-2179
- City of Seattle (Resource Venture) 206-389-7304
- Snohomish County Solid Waste 425-388-3425
- City of Tacoma Solid Waste. 253-591-5543

Do I have more than one option for who can haul my recyclables for recycling?

Yes. There is open competition for the hauling of clean recyclables and a number of businesses provide this service. You can research recycling services by looking through this directory or going to the King County "What Do I Do With . . . ?" database (go to your favorite search engine and enter: King County WDIDW).

How do I know what is recyclable?

The facility that your materials are going to should provide you with a specific list of current materials that they will recycle. You should know what exactly they do and don't recycle at the time your materials are going to them.

Why does it seem like what is recyclable is always changing?

Not all transporters and facilities have the same markets, the facilities do not all recycle the same set of materials, and markets change from month to month. Many materials are technically capable of being recycled but, due to market issues at any specific time, may not be collected for recycling.

What if workers put non-recyclables in the recycling container?

You will need to clean out the non-recyclable materials before the container can be hauled. You should feel confident that the container contains no more than 10 percent non-recyclable materials. It will then be important to work with employees and subcontractors to ensure that the problem does not persist.

Does wood waste used for energy count toward diversion rates?

Burning wood for energy does not typically qualify as recycling. However, wood waste destined for energy use, at a permitted facility, is considered by some governments as beneficial use and, as such often counts toward diversion rates – depending on the rating system used.

How do I know that the recyclables are really being recycled?

The service you hire should be specific about what materials they can accept for recycling and provide you with clear instructions and information to use with your employees. If you are not provided this information, you should request it and ask for details on what is and is not recycled by the service provider.

How can I get my workers and contractors to put the right materials in the right box?

The recycling service you hire should provide you with signage and instructions to give employees and subcontractors that show what can be recycled and what must be put in the garbage container. If they don't provide this information as part of their service, you should shop around. Using this information, you will need to make sure that the waste/recycling handling is done correctly, just as you oversee the correct procedures for the rest of the project. Downloadable recycling signage and other contractor education tools are available from King County GreenTools and Seattle Public Utilities' Resource Venture.

Hot Issue Q&A: Asphalt Shingles

Q: Can asphalt pavement be made with recycled asphalt shingles?

A: Yes. Processing asphalt shingles and using the ground product in hot mix asphalt pavement is slowly gaining traction in Washington State. Currently there are only a few asphalt shingle recycling facilities in the state. However, we expect to see the number increase as demand for recycled asphalt pavement grows. The asphalt content in a roofing shingle typically ranges from 20-30%, depending on age and other factors. Reclaiming the asphalt from shingles offers a cost-effective alternative for a portion of the virgin asphalt used in paving mixes.

Asphalt Roofing

A few companies in the Puget Sound region accept asphalt shingles (composite roofing) for recycling. These shingles are composed of a felt mat saturated with asphalt and have small rock granules added. Check C&D drop-off facility listings below for additional companies that accept this material. More information on asphalt shingle recycling can be found here: www.greentools.us search: LinkUp shingles

Evergreen Shingle Recycling 425-482-0266
6405 233rd Place SE, Woodinville, WA 98072
Email: ESRWashington@gmail.com Website: www.evergreenshinglerecycling.com
Hours: Call Pick-up, drop-off Businesses, residents
Accepted: Call for details.
Restrictions: No asbestos!

Email: info@unitedrecyclingco.com Website: www.unitedrecyclingco.com
Hours: Monday - Friday: 7:00 AM - 5:00 PM Saturday: 8:00 AM - 4:00 PM Pick-up, drop-off Businesses, residents
Accepted: Commingled and source seperated C&D materials
Restrictions: Call for details.

Waste Management - Cascade Recycling Center.....800-592-9995 x14
14020 NE 190th St., Woodinville, WA 98072
Email: pnwbccmservices@wm.com Website: www.wmnorthwest.com/cascaderecycling
Hours: Mon-Thurs: 6am-9:30pm; Fri: 6am-6:30pm; and Sat: 8am-4:30pm Drop-off only Businesses Only
Accepted: Commingled and source seperated C&D materials
Restrictions: Materials must be brought in trucks with mechanical offloading capabilities. Call for more information.

Waste Management - Eastmont Recycling Center 866-962-9253
7201 W Marginal Way SW, Seattle, WA 98106
Email: customerservice@wmnorthwest.com Website: www.wmnorthwest.com
Hours: Mon-Fri: 6:30am-6pm and Sat: 8am-4pm Drop-off only Businesses Only
Accepted: Commingled and source seperated C&D materials
Restrictions: Materials must be brought in trucks with mechanical offloading capabilities. Call for more information.

Waste Management - Recycling Northwest 866-962-9253
355 H St. NW, Auburn, WA 98001
Email: customerservice@wmnorthwest.com Website: www.wmnorthwest.com
Hours: Mon-Fri:7am-4pm Drop-off only Businesses Only
Accepted: Commingled and source seperated C&D materials
Restrictions: Materials must be brought in trucks with mechanical offloading capabilities. Call for more information.

C&D Debris Haulers

These companies provide collection services for both separated and mixed loads of C&D materials. Job sites must have a separate garbage container. Materials are hauled to local C&D material drop-off facilities. If contractors wish for their C&D material to be recycled they must specifically request this service and require documentation.

Allied Waste Services - Commercial Services & Sales.....206-332-7777
Email: N/A Website: www.disposal.com
Hours: Mon - Fri: 8am - 5pm Pick-up only Businesses, residents
Accepted: Commingled and source seperated C&D materials. Containers available.
Restrictions: Call for details

What's New?

Snohomish County adopted new regulations in 2011 that affect C&D disposal.

Highlights include the following:

- all waste generated within Snohomish County must be disposed of in the Snohomish County Disposal System
- intermodal containers are not permitted on job sites for waste disposal
- loads of recyclable materials may not contain more that 10% incidental and accidental waste for disposal

More information can be found here….
web search: Snohomish 2011 CDL Code

Benchmark Recycling, Inc. **253-565-1565**
3024 S Mullen St., Tacoma, WA 98409
Email: info@benchmarkrecycling.com Website: www.benchmarkrecycling.com

Hours: Mon.-Fri: 7am-5pm Pick-up only Businesses Only
Accepted: Commingled and source seperated C&D materials
Restrictions: Call for more information.

Carpet

The local infrastructure for carpet recycling is still being developed but local options are available. Carpet must be free of contaminants and protected from moisture if it is to be recycled. Many carpet sellers and installers in the region will help you recycle. Many carpet manufacturers offer recycling referrals as well. Ask about carpet recycling when you do business with them.

Need An Update?

Website: www.recovery1.com
Hours: Mon-Fri: 6am - 10:30pm Drop-off only Business
Accepted: Accepts carpet.
Restrictions: Call for details.

The Carpet Collectors **916-626-3311**
Beaverton, OR
Email: info@carpetcollectors.com Website: www.carpetcollectors.com
Pick-up onlyBusiness
Accepted: Call for details
Restrictions: Call for details

Hot Issue Q&A: Carpet

Q: What's new in carpet recycling in the Pacific Northwest?

A: In the last two years, the first carpet recycling facilities have opened in the Pacific Northwest, offering services that have been almost exclusively available only in the southern states where carpet manufacturing is based. Carpet must be removed in a way that prevents contamination by water, excessive construction or demolition dust, paint splatter and asbestos. Carpet can be recycled into a wide range products, including carpet fiber and backing, engineered products such as car and electronics parts, and erosion control products.

Drywall, sheetrock, wallboard & plaster

Drywall is an internal wall material made of a sheet of gypsum covered on both sides with a paper facing and a paperboard backing. Drywall is also referred to as gypsum board, wallboard, plasterboard and sheetrock.

Plaster is a mixture of cement or gypsum plaster with sand, perlite or vermiculite, and sometimes lime, to form an interior wet wall system when applied to lath work or plasterboard. **Check C&D drop-off facility listings (page 7) for additional companies that accept this material.**

Lloyd Enterprises, Inc. **253-874-6692**
80 5th Ave., Milton, WA 98354
Email: sales@lloydenterprisesinc.com Website: www.lloydenterprise.com
Hours: Mon-Fri: 7am - 5pm Sat: 7:30am - 3pm Pick-up, drop-off Businesses, residents
Accepted: Gypsum wallboard

New West Gypsum Inc. **604-534-9925**
1321 54th Ave. E, Fife, WA 98424
Email: fife@nwgypsum.com Website: www.nwgypsum.com
Hours: Mon-Fri 7am - 5pm Pick-up, drop-off Businesses Only
Accepted: Gypsum wallboard
Restrictions: Call for details. Not open to the public. Please call in advance to set-up an account.

Renton Concrete Recyclers **206-772-2278**

Email: seattlesf@yahoo.com Website: N/A
Hours: Monday - Saturday: 9 am - 5 pm Pick-up, drop-off Businesses, residents
Accepted: Mixed plastics and other types of plastics

Hot Issue Q&A: Concrete On-Site Recycling

Q: Can it be cost effective, and in compliance with state and local regulations, to recycle asphalt and/or concrete on-site?

A: Yes, asphalt and concrete can be used in both structural and non-structural applications as long as it is processed (usually crushed) to meet the required specifications for the application, and does not contain materials or coatings that could negatively impact soil, groundwater, surface water, or air quality. Certain additional requirements do apply to the use of recycled concrete as a fill aggregate or as an aggregate in new concrete (e.g. it must be placed above the level of the water table when used as fill). However, the practice of processing and using these materials on-site is often more cost effective than having the "waste" material hauled off and having new material brought onto the site. More information is available at www.greentools.us.

Rigid Foam Insulation Board

Solid foam sheets, usually made of EPS, XPS, XEPS, ISO, or a composite. The foam comes in a range of thicknesses and may, or may not, have foil backing on 1 or 2 sides. Usually used as insulation under roofs, on walls, or under foundations.

Nationwide Foam Inc. 888-820-2760
Email: info@nationwidefoam.com Website: www.nationwidefoam.com
Hours: Mon - Fri: 7am - 7pm EST Pick-up only Businesses, residents
Accepted: Rigid foam insulation - EPS, XEPS, ISO, Composite, EPDM, PVC and TPO Membrane from tear-off FLAT ROOF industrial jobsites.

Rubble and Soil (asphalt, brick, and concrete)

Rubble includes asphalt, pavement, brick, concrete, porcelain, rock, and soil. Many companies accept rubble for recycling at their facilities, many provide collection services, and there are a few companies that provide on-site crushing services. Check C&D drop-off facility listings (page 7) for additional companies that accept this material.
