**Assessor**

Dear Property Owners:

Property assessments for the 2012 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2012 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

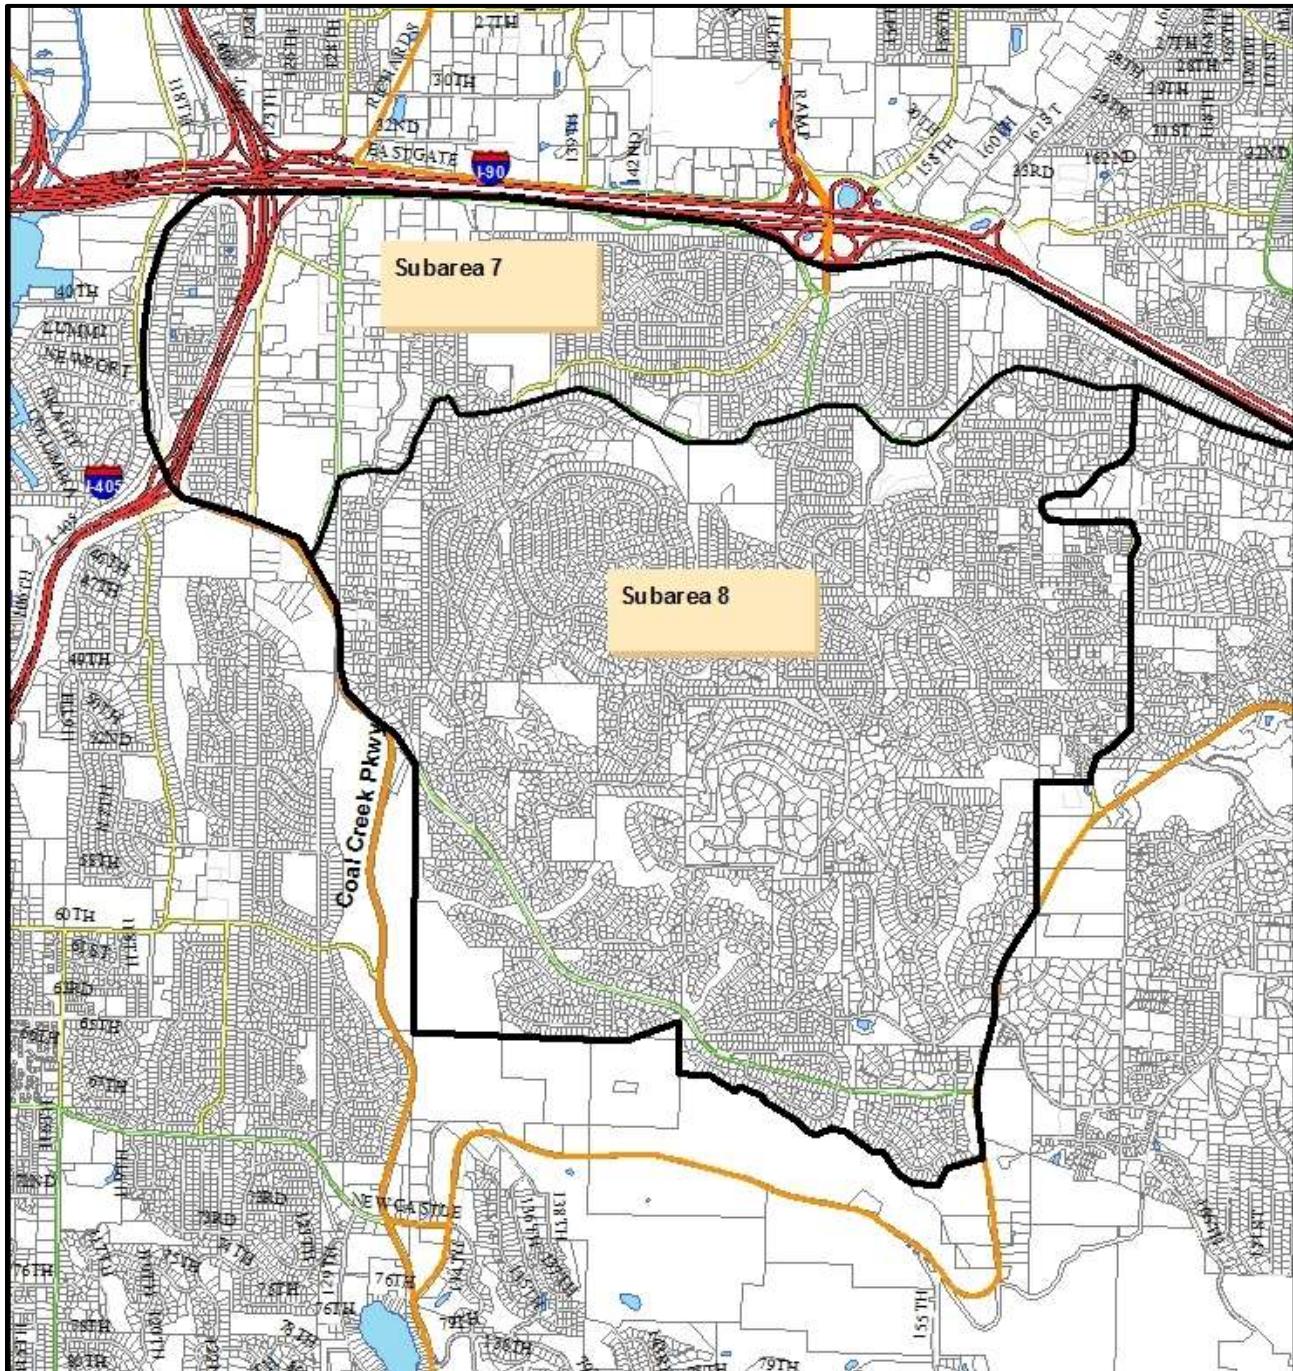

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

  
Lloyd Hara  
Assessor

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

Sales of new homes built over the last few years are over represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

## **Sales Screening for Improved Parcel Analysis**

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. Commercial zoned with residential improvements from lack of representation.
5. New construction where less than a 100% complete house was assessed for 2011
6. Existing residences where the data for 2011 is significantly different than the data for 2012 due to remodeling
7. Parcels with improvement values, but no characteristics
8. Parcels with either land or improvement values of \$25,000 or less posted for the 2011 Assessment Roll
9. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
10. Others as identified in the sales removed list

*(See the attached Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis for more detailed information)*

## ***Identification of the Area***

### **Name or Designation:**

Area 31---Eastgate / Factoria

### **Boundaries:**

The general boundaries beginning from the north are Interstate 90, to the West is 120th Ave SE and Coal Creek Parkway. To the South is Coal Creek which runs between Coal Creek Parkway and Lakemont Blvd SE, the eastern boundaries are Lakemont Blvd and 164 Way.

### **Maps:**

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

### **Area Description:**

Area 31 is located in the southern section of the City of Bellevue – This is a very homogenous, diverse and desirable area with outstanding access to I-90 and I-405. It provides excellent commutes to many recreational areas and major commercial centers of Bellevue, Seattle and Issaquah. Located in the west part of Subarea 7 is Newport High School; this school has been consistently rated in the nation's top 50 and is highly sought out. Houses typical to this area were built from 1950 to the present, with quality of construction from grade 7 through 13 and total living area from just under 1,000 square feet to over 9,000 square feet. Home sales range from \$250,000 to \$2,500,000 providing a variety of neighborhoods and housing from entry level to luxury living. Most of area 31 has been developed and platted into single family sites but still remaining are some larger sites with potential for development. This includes larger improved sites where zoning will allow segregation of additional sites and a few larger/acreage parcels that can support multiple sites.

Subarea 7 is located at the north end of area 31 just south and mostly east of the intersection of I-90 and I-405. The Factoria shopping/business center is within the subarea boundaries. The average year built is 1964, the average grade is 7 and the average adjusted sale price is \$377,000. Some parcels enjoy nice westerly views but this is not the norm of this subarea since it lies at lower elevations of area 31.

One of the great qualities of this area is the incredible views; Subarea 8 has some of the most spectacular views on the Eastside and all of the Seattle area. This includes scenes of Lake Washington and Lake Sammamish, a distant Puget Sound, the Cascade and Olympic mountains (including Mt. Rainier & Baker), and the cities of Seattle and Bellevue. The average year built is 1979, the average grade is 9 and the average adjusted sale price is \$646,000.

While reviewing the area boundaries some common relationship between the numerous plats and groups of properties became evident; out of which 8 neighborhoods were established. The following is a general description of each neighborhood:

- Neighborhood 1 – is located at the north end of the area and east of the Factoria shopping center between I-90 and Newport Way. The typical grade is 7, built in 1958 and the average adjusted sale price is \$343,000. This area has very few views and is the entry level market for home buyers and rental investments in Area 31.

- Neighborhood 2 – is also located in 2 sections at the northern end of the area. One is adjacent to I-405 on the western side and the other is located at the northeast corner just south of Newport way. The typical grade is 7, built in 1967 and the average adjusted sale price is \$431,000. There are very few views, houses are larger and new than in neighborhood 1
- Neighborhood 3 – is found in large sections on the western and central eastern portion of the area. The majority of homes are grade 8, built in the mid 70's, the average adjusted sale price is \$525,000. This is where a majority of short platting has occurred and where housing grades and year built ranges the most.
- Neighborhood 4 – runs through the central and southern portion of the area; with a few locations on the eastern side. The typical grade is 9, built in 1983 and the average adjusted sale price is \$636,000. There many view properties, mostly in the average to good range.
- Neighborhood 5 – is located in the central and eastern portion of the area. The typical grade is 10, built in 1989 and the average adjusted sale price is \$756,000. Mostly high quality plats and some very good views.
- Neighborhood 6 – This is the plat of "Somerset" at the west central portion of the area, where the majority of excellent views are located. The typical grade is 9, built in 1971 and the average adjusted sale price is \$746,000. This is a high demand location with many homes having been remodeled and updated.
- Neighborhood 7 – is located towards the south and eastern portion of the area. The typical grade is 11, built in 1992 and the average adjusted sale price is \$939,000. These are the Premium Plats of high grade homes and fantastic views.
- Neighborhood 8 – is located at the south central part of the area. This is called "Hilltop" a unique, one of a kind plat of estate size lots and older custom homes in the architectural style of Frank Lloyd Wright. The typical grade is 9, built in 1957 and the average adjusted sale price is \$738,000.

A map showing each neighborhood is included on page 17.

### ***Land Valuation***

Vacant sales from 1/2009 to 1/2012 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2012. There are a total of 7147 parcels in Area 31; of which 6830 are improved with single family homes and 312 are vacant or may include an accessory improvement.

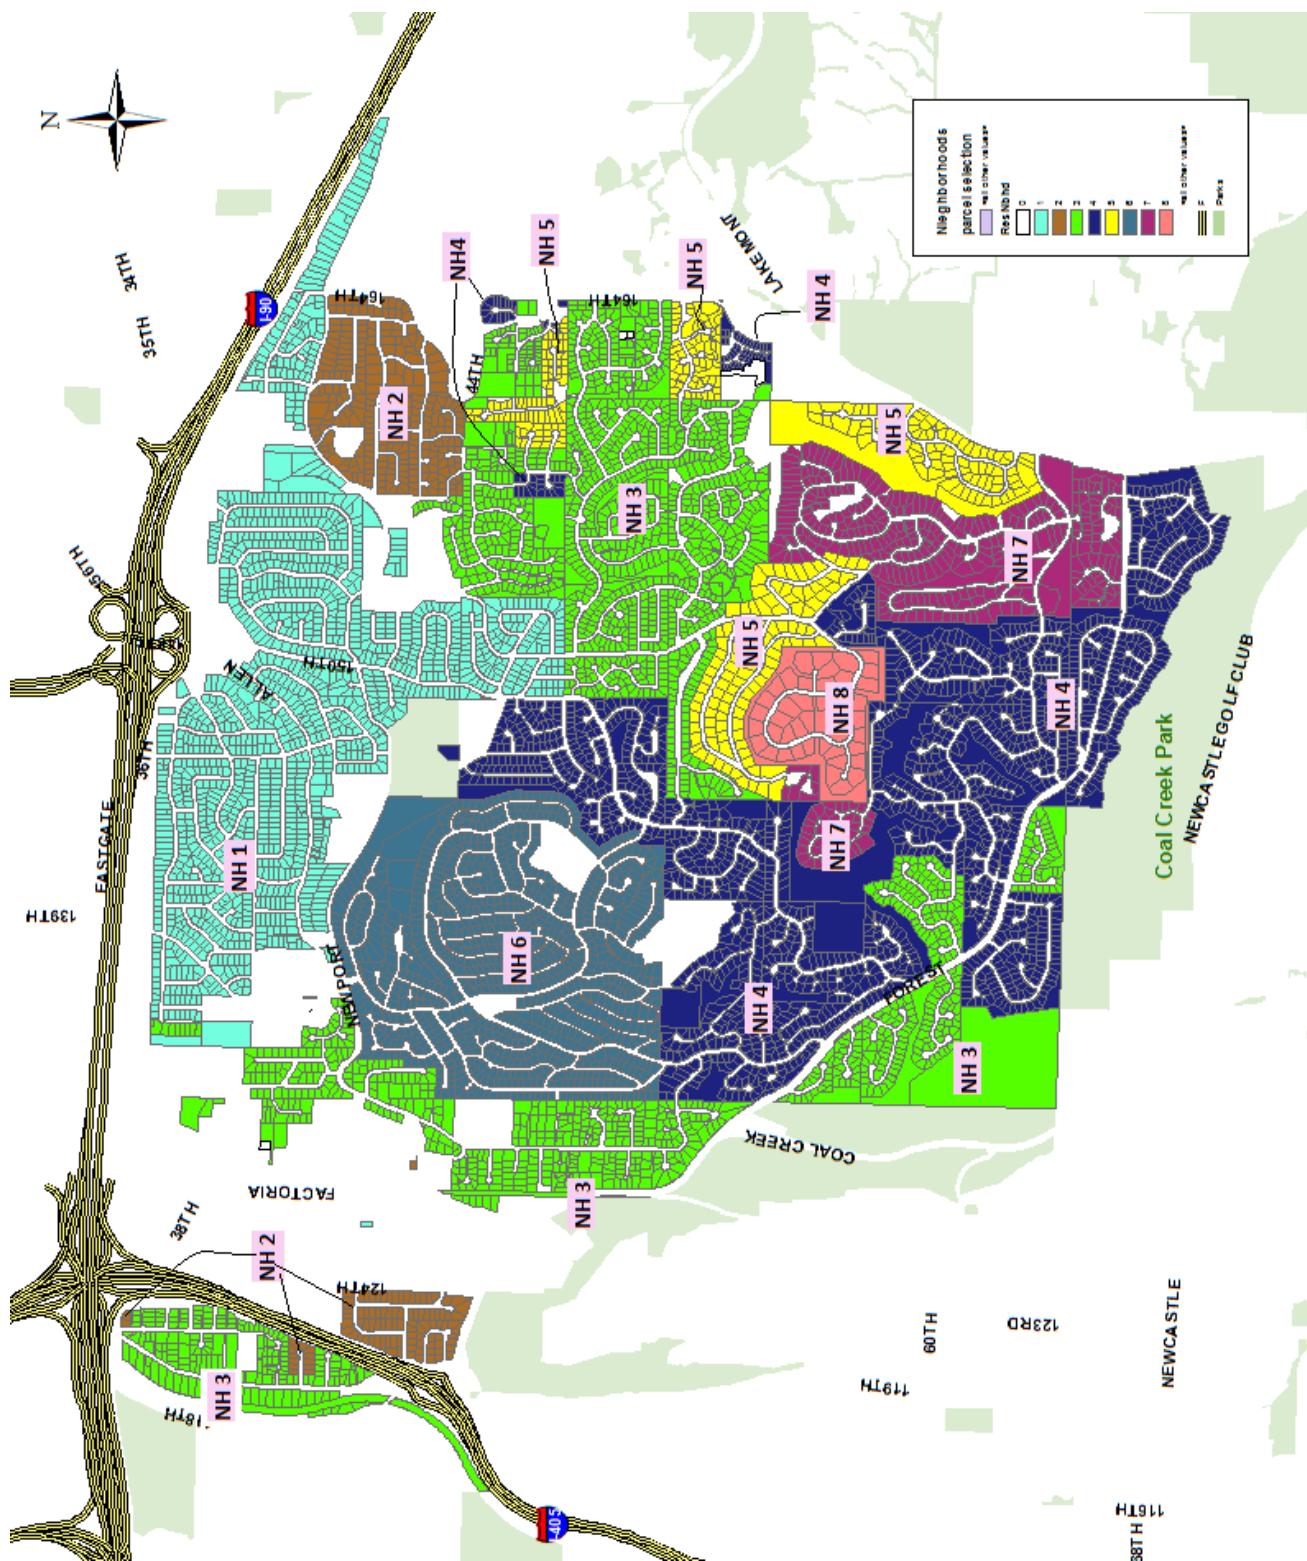

There were 20 vacant land sales available in area 31 to build a land model of which 15 sales were non-view, 3 sales had views, one multi parcel sale at \$600,000 for 2 sites and 1 sale included preliminary approval for a 4 lot short plat. The sales were sufficient to support the non-view values in the land model. Of the 2 vacant view sales; one has an average view while the other has very good views. Considering the small sales sample of view properties additional support was sought out via searches for paired sales and sales from competing areas with unreliable results. Therefore in order to supplement and support a land model the land allocation and land abstraction methods were reviewed. In determining a land allocation ratio within area 31, the sales in a new plat were observed where a land ratio of 34% was reasonably assumed. This percentage applied for a new 3,000 square foot grade 9 house on a standard non-view platted lot.

Overall, the land values and ratios obtained from both methods compared favorably and supported the available vacant land sales.

Generally, land allocation ratios and land values tended to increase as improvements became older, lots became larger or views increased. This was evident in the older neighborhoods 1 through 4, 6 and 8 where land ratios rose to a high of 59% of total value. The ratios and land values tended to decrease as a house became newer, larger and higher in quality; as in newer neighborhoods 5 and 7 where land ratios went to a low of 29%. The resulting land values and ratios were within acceptable ranges when observed in each neighborhood; with view properties having higher ratio dispersions than the non-view properties.

The eight neighborhoods mentioned in the previous section were established due to their common relationship in year built, grade/quality of construction, average selling price and similarity of amenities. In consideration of the uniqueness in each neighborhood a standard neighborhood baseland value was given. The baseland values were then adjusted for all positive and/or negative impacts that affect the property value. These impacts include view, power lines, sensitive areas, topography, traffic noise, lot sizes smaller or larger than typical for the neighborhood and easements. Since platting is still taking place on larger sites their development potential has been considered; most of this activity has been in the northern half of the area.

## ***Improved Parcel Valuation***

### **Improved Parcel Data:**

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited.

The analysis of this area consisted of a systematic review of applicable characteristics which influence property values. In addition to standard physical property characteristics, the analysis showed neighborhoods 4 and 6 (described on page 14), homes in very good condition, the plat named "West Summit" (major 928600) and the plat named "Lakemont Place" (major 413970) were influential in the market.

After the model was developed neighborhood plats were analyzed further. Amenities and characteristics recognized in the market were also adjusted for in the valuation. As a result of this more thorough investigation several adjustments were made to these neighborhood plats.

The EMV model excluded properties having multiple houses; these were valued by adding the RCNLD of the additional houses to the calculated EMV of land and building #1.

## ***Area 31 Market Value Changes Over Time***

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2012**.

*For example, a sale of \$525000 which occurred on August 1, 2009 would be adjusted by the time trend factor of 0.959, resulting in an adjusted value of \$503,000 (\$525000 X .959=\$503,475 – rounded to the nearest \$1000.*

## **Results**

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 91.7%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2012 assessment year (taxes payable in 2013) results in an average total change from the 2011 assessments of +2.2%. This increase is due partly to market changes over time and the previous assessment levels.

**Note:** More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.
