Commercial Revalue

2012 Assessment roll

AREA 65

King County, Department of Assessments Seattle, Washington

Lloyd Hara, Assessor

Department of Assessments Accounting Division

500 Fourth Avenue, ADM-AS-0740 Seattle, WA 98104-2384

(206) 205-0444 FAX (206) 296-0106 Email: assessor.info@kingcounty.gov http://www.kingcounty.gov/assessor/ Lloyd Hara Assessor

Dear Property Owners:

Property assessments for the 2012 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2012 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you.

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara Assessor

Executive Summary Report

Appraisal Date 1/1/2012 for the 2012 Assessment Year

Geographic Area Name: Central and So. Kent, Covington, Maple Valley

Black Diamond, Enumclaw and Unincorporated King County

Previous Physical Inspection: 1/2011

Sales – Improved Summary:

Number of Sales: 25

Range of Sales Dates: 01/01/2009 - 12/31/2011

Sales – Ratio Study Summary:

	Assessed Improved Value	Sale Price	Ratio	COD
2011 Mean Value	\$1,082,400	\$1,186,700	91.2%	8.83%
2012 Mean Value	\$1,131,500	\$1,186,700	95.3%	3.10%
Change	49,100		4.10%	-5.73%
% Change	4.54%		4.50%	-64.89%

^{*}COD is a measure of uniformity, the lower the number the better the uniformity. The negative figure –64.89% actually represents an improvement.

Sales used in Analysis: All improved sales which were verified as good that did not have characteristic changes between the date of sale and the date of appraisal were included in the analysis.

Population - Parcel Summary Data:

	Land	Imps	Total
2011 Value	\$869,139,767	\$1,472,022,633	\$2,341,162,400
2012 Value	\$892,277,100	\$1,487,492,100	\$2,379,769,200
Percent Change	+3.00%	+1.05%	+1.65%

Number of Parcels in the Population: 1985 including vacant parcels but excluding specialty parcels.

Conclusion and Recommendation:

^{**}Time adjustments were not made to sales due to lack of sales activity to accurately consider time trend analysis.

Since the values recommended in this report improve uniformity, assessment level and equity, we recommend posting these values for the 2012 assessment year.

The value increase is primarily due to the following factors:

- 1. New construction or completion of remodeling projects.
- 2. Use conversions from residential to commercial.
- 3. Parcel transfers between the commercial and residential divisions.
- 4. Major zoning changes such as mining and forestry to mixed-use commercial in Black Diamond, Covington, Enumclaw, and Maple Valley
- 5. The comparison of contaminated value to market value for contaminated properties.
- 6. Segregations or mergers of parcels which change the overall size and valuation basis for a parcel.

•

Analysis Process

Effective Date of Appraisal: January 1, 2012

Date of Appraisal Report: April 10, 2012

The following appraiser did the valuation for geographic area 65:

Highest and Best Use Analysis

As if vacant: Market analysis of this area, together with current zoning and current anticipated use patterns, indicate the highest and best use of the majority of the appraised parcels as commercial. Any opinion not consistent with this is specifically noted in our records and considered in the valuation of the specific parcel

As if improved: Based on neighborhood trends as well as both demographic and current development patterns, the existing buildings represent the highest and best use of most sites. The existing use will continue until land value, in its highest and best use, exceeds the value of the entire property in its existing use and the cost to remove the improvements. We find that the current improvements do add value to the property, in most cases, and are therefore the highest and best use of the property. In those properties where the property is not at its highest and best use, a nominal value of \$1,000.00 is assigned to the improvements.

Interim Use: In many instances a property's highest and best use may change in the foreseeable future. A tract of land at the edge of a city might not be ready for immediate development, but current growth trends may suggest that the land should be developed in a few years. Similarly, there may not be enough demand for a specific type of commercial property to justify the construction at the present time, but increased demand may be expected within five years. In such situations, the immediate development of the site or conversion of the improved property to its future highest and best use is usually not financially feasible.

The use to which the site is put until it is ready for its future highest and best use is called an interim use. Thus, interim uses are current highest and best uses that are likely to change in a relatively short time.

Standards and Measurement of Data Accuracy: Each sale was verified with the buyer, seller, real estate agent or tenant when possible. Current data was verified and corrected when necessary via field inspection.

Special Assumptions and Limiting Conditions

All three approaches to value were considered in this appraisal.

The following Departmental guidelines were considered and adhered to:

- This report intends to meet the requirements of the Uniform Standards of Professional Appraisal Practice, Standard 6.
- Time adjustments were not made to sales due to lack of sales activity with which to consider for time trend analysis

IDENTIFICATION OF THE AREA: AREA 65

Name: Cities of KENT, BLACK DIAMOND, COVINGTON, ENUMCLAW, MAPLE VALLEY, and UNINCORPORATED KING COUNTY

BOUNDARIES:

Area 65 was reconfigured this year. The neighborhood boundaries will be changed next year and the current parcel distribution within this area will be adjusted. Area 65 encompasses the southeast corner of King County. Approximate boundaries can be described as follows: It is bounded on the west by the West Valley Highway commonly known as Highway 181, Washington Avenue, 68th Avenue South, and the Green River. The northerly boundary is SE 208th Street. The eastern boundary is the King / Kittitas County border. And finally, the southern boundary is the King / Pierce County border.

Maps:

A general map of the area is included under the map tab of the area report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

AREA DESCRIPTION:

Area 65 is the second largest commercial geographic area in King County. It contains approximately 570 square miles or one fourth of the county's geographic area. Approximately 40 square miles are incorporated within the cities of Black Diamond, Covington, Enumclaw, southern Kent, and Maple Valley leaving the remaining portion or approximately 530 square miles, unincorporated. This geographic area is predominantly rural.

Kent is the largest city in area 65 but only the central and southern portions lie within this area's boundaries. Neighborhoods 20 and 30 include the city of Kent. The predominant commercial development in these two neighborhoods, are comprised of warehousing, light manufacturing, and office / retail commercial space. However, Kent is also aggressively trying to attract medium and high density housing. A portion of Kent's downtown corridor in neighborhood 30 was rezoned in hopes of stimulating development of multi and cluster family housing. The Kent City Council also passed an ordinance that waived the city's portion of property taxes for 6 years for businesses that obtain building permits for multifamily housing approved prior to 1/1/2015.

East of the aforementioned lies neighborhood 40; it has more of the residential area of Kent. The primary commercial properties in this neighborhood include multi-family, office, and retail space. Neighborhood 50 encompasses the cities of Covington and Maple Valley along with a portion of unincorporated King County. This remains the fastest growing neighborhood of area 65. Commercial properties in neighborhood 50 primarily consist of retail and office space.

Neighborhoods 60 and 65 are largely unincorporated. Commercial properties in this area are generally owner occupied. As a result income data is sparse. Neighborhood 60 includes only one incorporated city, Black Diamond. Predominate commercial properties in area 60 are owner occupied office, retail, farming, and recreational. Neighborhood 65 was recently added to Area 65 from Area 60. It is similar in character to neighborhood 60. Most commercial properties are owner occupied and are of the same types of enterprises. Neighborhood 65 also includes one small city, Enumclaw.

The following chart shows the parcel count by neighborhood including the specialty land parcels in Area 65.

Area-Neighborhood	Parcel Count
65-20	138
65-30	456
65-40	483
65-50	436
65-60	313
65-65	690
Total	2518

Area 65-20: South Kent Valley

Neighborhood 20 encompasses the southern portion of the city of Kent. It is bounded on the north by Walnut Street. Walnut Street lies approximately a quarter mile north of South 259th Street. The western boundary is the West Valley Highway. The southern boundary is South 277th Street (the Auburn city limits) and it is bounded on the east by Green River Road and the commercial development breaks that lie east of Central Avenue. A significant portion of this neighborhood is located in a floodplain, although the city is taking significant steps to mitigate the potential impacts. Working with the Army Corps of Engineers and FEMA, the City of Kent is building five levees that they hope will enable them, to have their area removed from floodplain designation. In addition to the aforementioned, one third of the commercial building sites have sensitive area impacts. Commercial development includes industrial / warehouse type properties. Unfortunately, economic stagnation continues to slow development. In 2011, sale prices of warehouse and industrial properties were sparse with little change in value from 2010. There was also limited new construction in 2011.

Area 65-30: Central Downtown Kent

Neighborhood 30 lies north of neighborhood 20. It is bounded on the north by West James Street, on the west by the West Valley Highway, on the south by Walnut Street and on the east by the commercial breaks that lie east of Central Avenue. Neighborhood 30 contains the central business area of the City of Kent. Primary commercial development includes: major retail, government service buildings, (and their supporting commercial enterprises), and some multi-family housing.

The City of Kent rezoned a portion of this neighborhood for development of high and medium density housing. Thus far, there have been few active permits for multi-family housing but two new developments are nearing completion on Central Avenue just north of this neighborhood.

Current development beginning in 2011:

- The City entered into a 2 year lease / option agreement with a developer to demolish the Kent parking garage and construct a 164 unit apartment building with 3,700 square feet of retail space.
- Five levees on the Green River were/ are being repaired according to FEMA guidelines.

Area 65-40: Kent East Hill

Neighborhood 40 is bounded on the north by SE 225th Street, on the west by the commercial breaks east of Central Avenue, on the south by SE 277th Street and on the east by 150th Avenue SE. It envelops Kent's East Hill and Lake Meridian

commercial areas. The predominant commercial properties in this neighborhood are office / retail and multi-family housing. Most commercially improved parcels are located along SR 515, which is commonly referred to as Benson Highway and SR 516 or SE Kent-Kangley Road. Multifamily dwellings are located on smaller arterials just off the aforementioned thoroughfares.

Commercial development in 2011was sparse, but includes the following:

 Significant improvements were made to the retail center on the southeast corner of 104th Ave. SE and SE 240th Street. The center is now almost completely occupied after being severely vandalized.

Area 65-50: Covington and Maple Valley

Neighborhood 65-50 is a larger geographic area. It is bounded on the north by SE 216th Street, the west by 150th Avenue SE, the south by SE 277th Street and on the east by the commercial breaks that lie east of the Maple Valley / Black Diamond Highway. This neighborhood includes the cities of Covington and Maple Valley as well as an area of unincorporated King County. Covington and Maple Valley have shown steady growth after they were incorporated in 1997. Both cities are expanding their commercial corridors which include two medical hospitals and their supporting commercial industries, office / retail developments and multi-family housing.

Covington:

Covington is a significant retail corridor for many residents in southeast King County. The commercial area is supported by two medical centers, MultiCare and Valley Medical. In late spring 2011 MultiCare broke ground on a new regional emergency facility. After it is complete, in early 2012, MultiCare plans to add a birthing center. Valley Medical Center also purchased over five acres to build a competing regional emergency facility.

Commercial Development in 2011 includes:

- MultiCare expanded the hospital and added a 24,000 square foot, 24 hour emergency facility. The project should be complete by spring 2012.
- Apex Medical Office was completed.
- Elephant Car Wash will be completed by early spring 2012
- Fred Meyer added a fueling station to the Costco / Fred Meyer retail area

Maple Valley:

Maple Valley has almost twice the population of Covington. Commercial properties are generally comprised of office and retail businesses. Most

commercially improved parcels are located along the Maple Valley / Black Diamond Highway and on SE Kent Kangley Road. In December 2010 a zoning change for the Four Corners area (the area where the two previously mentioned streets intersect) was completed and in 2011 Fred Meyer broke ground on the largest, new retail project in the Central Puget Sound Reagion.¹ The new development is called Maple Valley Town Square.

Also in Maple Valley, negotiations regarding the sale and development of the 156 acre parcel owned by King County known as the "donut hole" have begun. There are five potential developers hoping to purchase and develop the property. Maple Valley closed the first phase which required the potential developers to submit "requests for qualifications" (RFQ). Those requests are currently being reviewed.

Commercial development in 2011 includes:

- April 14, 2011 construction began on Maple Valley Town Square. It will include approximately 240,000 square feet of retail space. The improvement will be anchored by Fred Meyer; 70 percent of the nonanchored line retail space has been leased. It is scheduled to be completed before summer 2012
- A new improvement housing a coffee shop and wine bar was added to Sawyer Village

Area 65-60: Black Diamond and Rural SE King County

This is an easterly and rural neighborhood. Neighborhood 60 is bounded on the north by SE 208th Street, on the west by the commercial breaks east of the Maple Valley / Black Diamond Highway, on the south by the Green River Road, and on the east by the King / Kittitas County line. It includes one incorporated area, the City of Black Diamond; and the unincorporated towns of Cumberland, Ravensdale, and Selleck. Neighborhood 60 encompasses some of King County's old mining and logging towns and is predominantly made up of owner occupied commercial enterprises. Commercial development includes farming, mining, limited office / retail, and recreational properties. Approximately one-third of the total parcels have sensitive area impacts.

Black Diamond:

The City of Black Diamond has seen little growth over the last several years however, a building moratorium was lifted at the end of 2008. In 2009 a new comprehensive plan was adopted by the city. Yarrow Bay in conjunction with the

¹ Kidder Mathews-Real Estate Market Review, Seattle Retail 2011 3rd Quarter report

city agreed to develop a large area within the city. The proposed development will take approximately 15 years to complete and will be implemented in four phases. It will include single family residences, multi-family and/or cluster housing, commercial space with office / retail space, an industrial area, and government services.

Development was stalled in 2011 because of law suits brought by three citizen groups against Yarrow Bay. Both sides agreed to fast track the law suits and on December 27th, 2011 the Washington State Court of Appeals sided with Yarrow Bay. Development was scheduled to begin in early 2012 but the citizen's groups are appealing that decision.

Area 65-65: Enumclaw and Rural SE King County

Neighborhood 65 is bounded on the north by SE 384th Street, the west by 180th Avenue SE, south by the King / Pierce County boundary and on the east by the King / Kittitas County line. Like neighborhood 60, this area is predominantly rural and unincorporated. The primary commercial development includes dairy farming, office / retail, and recreational properties. Neighborhood 65 includes the City of Enumclaw and a portion of the unincorporated town of Green Water.

Enumclaw

The City of Enumclaw is the regional market place for Southeast King and Northeast Pierce County. It offers a wide range of services, including a hospital, large super markets, automobile showrooms, restaurants and motels. Three state highways serve the City of Enumclaw and neighborhood 65: SR-164, SR-169 and SR-410. SR-164 links Enumclaw with Auburn which has access to Highway 167 (the Valley Freeway) and Interstate 5 to the west. SR-169 travels north from Enumclaw to Renton and Interstate 405. SR-410 connects Enumclaw with Tacoma on the west and winds around Mt Rainier to Yakima on the east.

PHYSICAL INSPECTION AREA:

Neighborhood 60 was physically inspected for the 2012 assessment year as required by WAC 458- 07-015 4 (a). An exterior observation of the properties was made to verify the accuracy and completeness of property characteristic data that affect value. Rental information was obtained from the renters or property agents when possible and some data was obtained from various publications. Neighborhood 60 was described in detail in the previous sections.

PRELIMINARY RATIO ANALYSIS:

A Preliminary ratio study was done prior to revaluation. The study included sales of improved parcels and showed a Coefficient of Variation (COV) of 12.59% and a Coefficient of Dispersion (COD) of 8.83%. The assessment level as indicated by the weighted mean was 91.2%. A ratio study was repeated after application of the 2012 recommended values. The results are included in the validation section of this report. They show an improvement in the COV from a previous 12.59% to 3.71%. The COD has improved from 8.83% to 3.10%. The assessment level, weighted mean was raised from 91.2% to 95.3%.

SCOPE OF DATA

LAND VALUE DATA

Vacant commercial land sales in Area 65 dated 1/1/2009 to 12/31/2011 were given primary consideration. Due to limited market activity, older sales as well as transactions from neighboring areas were considered; these sales do not appear in the list of "Vacant Sales for Area 65 Used", but can be found in adjoining commercial area reports. Eleven arm's length, land sales closed during this period. These sales were given primary consideration for valuing land as of 1/1/2012. Older sales were given less weight. Active listings were considered as well. Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sale Identification Section. Information from the sales is analyzed and investigated by the appraiser to determine if they are legitimate "arm's length" transactions.

IMPROVED PARCEL TOTAL VALUE DATA:

Like land sales, improved sales' information is obtained from excise tax affidavits and initially reviewed by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. Property characteristics are verified for all sales if possible. An exterior observation of the properties was made to verify the accuracy and completeness of property characteristic data that affect value. Sales are listed in the "Sales Used" and "Sales Not Used" sections of this report. Additional information may reside in the Assessor's Real Property Database, Assessor's procedure manual, Assessor's "field" maps revalue plan, separate studies, and statutes.

Land Sales Analysis by Neighborhood:

Sales from 2009, 2010, and 2011 of vacant commercial properties were analyzed to determine if changes in the assessed value of land was warranted for the 2012 assessment year. The transactions listed below are the basis for land valuation in the area. If there were no current land sales, previous years' land sales were used along with sales in other similar neighborhoods to support the current valuation.

Sales of commercial land in southeast King County adversely impacted by wetlands or sensitive areas were also studied. Impacted portions of said properties were valued between \$0.50 and \$2.00 a square foot depending on

location, jurisdictions' development requirements, and severity of impact. Non-impacted portions were valued at market.

Neighborhood 65-20

Two land sales occurred in this neighborhood between 1/1/2009 to 12/31/2011

- E # 2482742: This parcel was purchased for \$925,000 or \$9.92 a square foot. It is a larger industrial property that abuts the Green River. At the time of sale the property had an older warehouse that was subsequently torn down. The property will be used as part of a levee to prevent damage if the Howard Hansen Dam were to fail.
- E # 2477242: This parcel was purchased for \$1,975,000 or \$1.33 a square foot. It is a large open space parcel along the Green River that is currently being leased by a nursery. The property has a greenhouse but the city plans to tear it down. This site will serve as a buffer for water runoff in case of a flood.

Land values in this neighborhood remained largely unchanged. Industrial land values ranged from \$5.00 to \$11.00 a square foot. Likewise commercial land values were equalized from \$7.25 to \$14 a square foot

Neighborhood 65-30

There were no land sales in this neighborhood.

Land values for commercially zoned property (retail and office) remained unchanged, with similarly zoned properties equalized between \$12 and \$15 a

square foot, multi-family land was equalized at \$8 a square foot and Industrial properties also remained unchanged between \$6 and \$8 a square foot.

Neighborhood 65-40

One sale occurred in this neighborhood between 1/1/2009 and 12/31/2011.

• E # 2492274: This parcel was purchased for \$1,600,000 or \$27.77 a square foot. It is a 57,614 square foot corner site and is zoned CC, Community Commercial. The subject is located on the southeast corner of SE Kent-Kangley Road and 132nd Avenue SE.

Land values remained largely unchanged in this neighborhood. Commercially zoned property was equalized between \$8 and \$25 a square foot depending on the location. Multi-family properties were valued between \$5 and \$8 a square foot.

Neighborhood 65-50

Six land sales occurred in this neighborhood between 1/1/2009 and 12/31/2011.

- E # 2463776: This parcel was purchased for \$625,000 or \$9.07 a square foot. It is a multi-parcel sale with two commercially zoned properties on the north side of SE Kent-Kangley Road. The property totals 68,924 square feet and is approximately one and half miles west of the commercial corridor in Covington.
- E # 2442763: The subject was purchased for \$195,000 or \$1.70 a square foot. It is a raw, wetland, parcel adjacent to multi-family and commercially zoned properties on SE Wax Road on the south side of SE Kent-Kangley in Covington. It is 114,998 square feet.
- E # 2485327: This parcel was purchased for \$350,000 or \$7.80 a square foot. It is a raw, landlocked parcel located southeast of the MultiCare Medical Center. It is 44,845 square feet and is zoned MC, Mixed Commercial.
- E # 2470071: This parcel was purchased for \$5,009,400 or \$11.50 a square foot. It is located close to Costco. The site is 435,600 square feet and is zoned TC, Town Center
- E # 2520443: This parcel was purchased for \$1,100,000 or \$9.06 a square foot. The sale included two properties on the north side of the Maple Valley / Black Diamond Highway. The property has no frontage on

the Highway and totals 121,371 square feet. It is zoned BP, Business Park

 E # 2512633: This property was purchased for \$700,000 or \$16.87 a square foot. It is a pad in Covington where the purchaser paid the entire sales' price in cash. The site is 41,498 square feet and is zoned MC, Mixed Commercial

Land values remained largely unchanged in 2011, except where equalization occurred. Commercially zoned properties were valued between \$7 and \$25 a square foot. High and medium density residential property values were equalized between \$5.50 and \$7 a square foot depending on the zoning. Industrial and agricultural properties largely remained unchanged and were equalized taking into account location, zoning, and size.

Neighborhood 65-60

Two sales occurred in this neighborhood between 1/1/2009 and 12/31/2011.

- E #2451570: The sales' price for the parcels involved was \$595,052 or \$2.22 a square foot. The subject is 267,894 square feet in Black Diamond consisting of three parcels with three different zonings. This is part of the land purchased by Yarrow Bay.
- E # 2451563: The sales' price for the properties involved was \$8,462,847 or \$2.31 a square foot. The subject includes 3,657,733 square feet in Black Diamond consisting of portions from 15 parcels with several different zones. It was also purchased by Yarrow Bay for future development.

Land located in Black Diamond with commercial zoning saw a modest increase in value when new zoning took effect. Industrial property was valued from \$0.50 to \$1.00 a square foot, residential land was valued between \$0.30 and \$6.00 a square foot, and agricultural and mining land values ranged from \$0.20 to \$1.00 a square foot. Commercial property values ranged from \$1.00 to \$10.00 a square foot.

Neighborhood 65-65

There were no land sales in this neighborhood.

Land values in this neighborhood were equalized. Industrially zoned properties ranged from \$3.00 to \$5.50 a square foot, commercially zoned property (retail and office) was valued at \$10 a square foot, and property zoned for multi-family

was valued between \$1.00 and \$6.00 a square foot. Any adjustments made to land values were done so to improve equalization.

Land Value Conclusions, Recommendations, and Validation.

Land values were assessed using the Sales Comparison approach. Sales were analyzed based on zoning, size, location and development potential. Changes were made using recent land sales to achieve equalization in neighborhoods in accordance with zoning, size and location. In the absence of sales in a neighborhood, sales in other similar neighborhoods were considered. Appraiser judgment prevails in all decisions regarding individual parcel valuation. The appraiser may adjust for particular characteristics and conditions as they occur in the valuation area.

The total recommended land value for the 2012 Assessment year is \$900,710,600. The total 2011 Assessment year land value for this area was \$879,312,100. The percent change increase from the 2011 assessed value to the 2012 recommended assessed value is 2.43%. The increase in land values is due primarily to the equalization in Enumclaw and the rezoning that occurred in Covington, Maple Valley and Black Diamond.

Area 65	2011 Total Land	2012 Total Land	\$ Increase	% Change
Land Values	\$879,312,100	\$900,710,600	\$21,398,500	2.43%

A list of vacant land sales used and those considered not reflective of market are included in the following section as well as a table summary of land values.

Improved Parcel Total Values:

Improved Value Data:

Improved commercial sales dating from January 1, 2009 to December 31, 2011 were considered in the valuation of Area 65's improved properties. Twenty-nine (29) arm's length, improved sales occurred during this period. Four sales were not used in the analysis for statistical ratio purpose. These sales were excluded due to the change in building characteristics after the sale or the improvements' change of use. The sales were obtained from Excise Tax Records, Costar, Brokers and Agents. All of the sales used in Area 65, were fair market, "armslength" transactions reflecting market conditions. These sales were organized by market segments based on predominant use. The sales' analysis reflected a market price per square foot of net rentable area. The sales' price range served to establish a general upper and lower market boundary for the various property types within each subject area.

Sales comparison approach model description:

The sales comparison approach reflects the principles of supply and demand, balance, externalities, and substitution. This approach is preferred when there is adequate sales data. The model for sales comparison is based on the following characteristics from the Assessor's records: commercial use, neighborhood, year built, effective year, building quality, and net rentable area. A search was made for sales data that most closely fit the subject property within each geographic area. These sales were organized by market segments based on predominant use. Each segment reflected a market price per square foot of net rentable area. The sales' price range established an upper and lower market boundary for the various types within each subject area.

Sales comparison calibration

Calibration utilized in the sales comparison approach was established via an analysis of sales within each neighborhood. Neighborhoods were treated independent of one another as dictated by the market. Individual prices were applied based on various characteristics deemed appropriate by each market. Specific variables and prices for each neighborhood are discussed in more detail above.

Cost approach model description

The Marshall & Swift Commercial Cost estimator was used to calculate the cost approach on all improved properties. Depreciation was based on studies completed by the Marshall & Swift Valuation Service. The cost was adjusted to the western region of the United States and then specifically to the Seattle area.

Cost estimates were relied upon when valuing: schools, churches, government service buildings, park improvements, and serve as value indicators for new construction projects, and for smaller owner occupied improvements where no income data or comparable market sales exist.

Cost calibration

Each appraiser valuing new construction can individually calibrate the Marshall-Swift Valuation system. The system is built in the Real Property Application and calibrated to the area being valued.

Income capitalization approach model description

Income tables were developed for all neighborhoods in Area 65 for income capitalization. The list of tables created for each neighborhood is contained in the appendix to this report. "No income" tables are added to note certain properties that are excluded from income analysis. Examples of those types of properties include: churches, schools, fire stations, and special use properties where no income information exists.

Income approach calibration

The tables were calibrated after setting economic rents, vacancy, expenses, and capitalization rates by using adjustments based on size, effective age, and quality of construction as recorded in the Assessor's records.

<u>Income:</u> Income parameters were derived from the market place through published sources (i.e. OfficeSpace.Com, Commercial Brokers Association, Costar, Multiple Corporate Real Estate Websites, etc.), financial information submitted in appeals, data collected from leases during physical inspection and opinions expressed by real estate professionals active in the market.

<u>Vacancy</u>: Vacancy rates were derived mainly from published sources tempered by personal observation.

<u>Expenses:</u> Expense ratios were derived from published sources and personal knowledge of the area's rental practices. Within our income valuation models, the assessor generally used triple net expenses.

<u>Capitalization Rates:</u> Capitalization rates were determined by local published market surveys, such as CoStar, Real Estate Analytics, The American Council of Insurance Adjustors, Colliers International, Integra Realty Resources, and Korpaz. Other national reports include; Grubb & Ellis Capital Mkt. Update, Emerging Trends in Real Estate, Urban Land Institute, and Cushman & Wakefield. The effective age and condition of each building contributes to the capitalization rate applied in the model. For example; a building in poorer condition with a lower effective year built (let say, 1960) will typically warrant a

higher capitalization rate, and a building in better condition and a higher effective year built (let say, 2010) will warrant a lower capitalization rate.

The Income Approach was considered a reliable approach to valuation throughout Area 65 for improved property types where income and expense data is available to ascertain market rates. Income parameters were derived from the market place through interviews with lessees, rent rolls, market rental surveys, sales, and various real estate publications and / or websites.

Interviews with tenants in the field usually yield rental and expense information only. As a supplement, lease information is gathered from Costar and other commercial real estate websites. In order to calibrate a credible income model, it is necessary to consider data from recognized published sources to assist in developing capitalization rates. These publications tend to report data that is considered relevant to institutional-grade CBD and suburban real estate.

The above tables recap the rates as reported by these publications:

All parcels were individually reviewed to select which approach to value best reflects market value. All of the factors used to establish value by the model were subject to adjustment. The income approach to value was considered to be a reliable indicator of value for the majority of improved properties.

However, the market approach was used for the following commercial properties: daycares, mobile home parks, commercial condominiums, single family residences converted to offices, and newer, higher quality, line retail buildings with less than 10,000 square feet. A market study of the previous types of properties was conducted. Sales analysis showed that values for daycares ranged between \$180 and \$200 per square foot. Generally daycares that are part of a national chain and are of higher quality were valued at a higher price. Mom and Pop daycares were valued at the lower end. A copy of the sales used is on file in the Assessor's office.

Mobile home parks were valued at a market rate of price per pad. The Assessor analyzed mobile home park sales and determined the following brackets per pad: double wide pads range from \$50,000 to \$65,000 per pad depending on the location and condition of the site, single wide pads were valued between \$35,000 to \$50,000 per pad depending on location and condition of the site, and RV pads were valued at \$25,000 a pad. A compilation of mobile home parks sales used in this analysis is on file in the Assessor's office.

Studies of commercial condominium sales, single family residences converted to offices, and newer, higher quality line retail with less than 10,000 square feet was also conducted by the Assessor's office. After sales were analyzed it was determined that commercial condominiums should be valued at a market rate between \$125 and \$200 a square foot depending on the location, age, and quality of the improvement. Single family residences converted to offices were valued between \$175 and \$250 a square foot, depending on the quality and condition of the improvement. And finally newer, higher quality, line retail buildings with less than 10,000 square feet were valued between \$300 and \$350 a square foot. Again copies of the sales used are on file at the Assessor's office. Ratio studies were done for the entire geographic Area 65. The results show compliance with IAAO standards with regard to uniformity and overall assessment level.

The tables used are included in the addenda of this report. The following is a brief summary (and may vary by location and individual property) of the stratification of these parameters for the major property types:

Neighborhood	Property Type	Rent Range	Vacancy & Credit Loss	Expense Range	Capitalization Rate Range
20	Office	\$11 to \$17.50	15%	10%	7 to 7.75%
20	Retail	\$14 to \$25	10 to 20%	10%	7.25 to 8%
	Warehouse	\$4.25 to \$7	6%	6 - 8%	6.5 to 7.5%
	Restaurants	\$12 to \$24	10%	10%	8 to 8.75%
30	Office	\$13.50 to \$20	20%	15%	7.5 to 8.5%
30	Retail	\$12 to \$25	15%	10%	8 to 8.5%
	Warehouse	\$4.25 to \$7	6%	6 - 8%	6.5 to 7.25%
	Restaurants	\$13 to \$22	10%	10%	8%
40	Office	\$13.50 to \$20	20%	15%	7.5 to 8%
40	Retail	\$12.50 to \$22	15%	10%	7.5 to 8.25%

65	Retail	\$12 to \$18	7%	10%	6 to 9%
	Warehouse	\$3 to \$4.80	10%	10%	6 to 9%
	Restaurants	\$10 to \$17	5%	10 - 20%	6 to 8.5%

Reconciliation

A ratio study was created for Area 65. Application of the total value model described above results in improved equity between predominant use types, building quality, net rentable area, and effective age of buildings. The resulting assessment level is 95.3%.

Equity between improved parcels has been improved as shown by the improvement in the C.O.V. from 12.59% to 3.71%, the C.O.D. from 8.83% to 3.10% and the assessment level was raised from 91.2% to 95.3%. The findings are presented both in the executive summary and in the 2011 and 2012 ratio analysis charts and are shown on the chart below:

	2011 Ratio	2012 Ratio	Change
Assessment Level	91.20%	95.3%	+4.10
Coefficient of Dispersion	8.83%	3.10%	-5.73
Coefficient of Variation	12.59%	3.71%	-8.88
Standard Deviation	11.89%	3.55%	-8.34
Price Related Differential	1.04	1.00	-0.04

All parcels were individually reviewed by the area appraiser for correctness of the table application. Each appraiser can adjust any or all of the factors used to establish value by the model. The market rents, as established by the income model, were used as a guide in establishing the income rental rates used. The rental rates applied vary somewhat but fall within an acceptable range of variation from the established guideline. An administrative review of the selected values was made by Marie Ramirez, Senior Appraiser for quality control purposes.

Model Validation

Total Value Conclusions, Recommendations and Validation:

Area 65	Year 2011	Year 2012	Difference	% Change
Total	\$2,329,229,403	\$2,378,978,000	\$49,748,597	+2.14%

The total assessed value for assessment year 2011 was \$2,339,229,403. The total recommended assessed value for the 2012 assessment year is \$2,378,978,000. Although some property values were adjusted to equalize; overall, assessed values saw little to no change.

Area 65	Year 2011	Year 2012	Difference	% Change
Taxable Values	\$1,746,303,103	\$1,787,057,100	\$40,753,997	+2.33%
Exempt Values	\$582,926,300	\$591,920,900	\$8,994,600	+1.54%
Total Assessed	\$,2329,229,403	\$2,378,978,000	\$49,748,597	+2.14%

USPAP Compliance

Client and Intended Use of the Appraisal:

This mass appraisal report is intended for use by the public, King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others for other purposes is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

Definition and date of value estimate:

Market Value

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 Wn. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65,66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

Highest and Best Use RCW 84.40.030

All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.

An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.

WAC 458-07-030 (3) True and fair value -- Highest and best use.

Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

Date of Value Estimate

RCW 84.36.005

All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.

RCW 36.21.080

The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

Property Rights Appraised: Fee Simple

Wash Constitution Article 7 § 1 Taxation:

All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.

Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914) ... the entire [fee] estate is to be assessed and taxed as a unit...

Folsom v. Spokane County, 111 Wn. 2d 256 (1988)

...the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee...

The Dictionary of Real Estate Appraisal, 3rd Addition, Appraisal Institute.

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Assumptions and Limiting Conditions:

1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.

- No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
- No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
- 4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
- 5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
- 6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
- 7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge the taxpayer to retain an expert in the field and submit data affecting value to the assessor.
- 8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
- 9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
- 10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
- 11. An attempt to segregate personal property from the real estate in this appraisal has been made.
- 12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
- 13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
- 14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.

15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

Scope of Work Performed:

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.

CERTIFICATION:

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the
 development or reporting of predetermined value or direction in value that favors
 the cause of the client, the amount of the value opinion, the attainment of a
 stipulated result, or the occurrence of a subsequent event directly related to the
 intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- The area(s) physically inspected for purposes of this revaluation are outlined in the body of this report.

- The individuals listed below were part of the "appraisal team" and provided significant real property appraisal assistance to the person signing this certification. Any services regarding the subject area performed by the appraiser within the prior three years, as an appraiser or in any other capacity is listed adjacent their name.
- The reported analyses, opinions and conclusions were developed, and this report prepared, in conformity with the requirements of the Code of Professional Ethics and the Standards of Professional Practice of the Appraisal Institute.
- I certify that the use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have/have not completed the continuing education program of the Appraisal Institute.
