

City of Enumclaw

Area: 041

Residential Revalue for 2015 Assessment Roll

Situated between the plateau farmlands and the Cascade Mountains in southeast King County is the pleasant, rural community known as the City of Enumclaw. Homes were built between 1900 to the present with over 25% of the homes built in the 1990s. Over 50% of the improved parcels are of average quality construction. The City of Enumclaw boasts good views of Mt. Rainier and the Cascade Mountains. The area is serviced by a range of local commercial businesses, parks, schools and a local hospital.

Lloyd Hara
Assessor

Dear Property Owners:

Property assessments for the 2015 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2015 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you.

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara
Assessor

Glossary for Improved Sales

Condition: Relative to Age and Grade

1= Poor	Many repairs needed. Showing serious deterioration.
2= Fair	Some repairs needed immediately. Much deferred maintenance.
3= Average	Depending upon age of improvement; normal amount of upkeep for the age of the home.
4= Good	Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain.
5= Very Good	Excellent maintenance and updating on home. Not a total renovation.

Residential Building Grades

Grades 1 - 3	Falls short of minimum building standards. Normally cabin or inferior structure.
Grade 4	Generally older low quality construction. Does not meet code.
Grade 5	Lower construction costs and workmanship. Small, simple design.
Grade 6	Lowest grade currently meeting building codes. Low quality materials, simple designs.
Grade 7	Average grade of construction and design. Commonly seen in plats and older subdivisions.
Grade 8	Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
Grade 9	Better architectural design, with extra exterior and interior design and quality.
Grade 10	Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
Grade 11	Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
Grade 12	Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
Grade 13	Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.

Executive Summary

City of Enumclaw - Area 041

Physical Inspection

Appraisal Date: 1/1/2015
Previous Physical Inspection: 2009
Number of Improved Sales: 348
Range of Sale Dates: 1/1/2012 – 12/31/2014 Sales were time adjusted to 1/1/2015

Sales - Improved Valuation Change Summary:						
	Land	Improvements	Total	Mean Sale Price	Ratio	COD
2014 Value	\$91,200	\$152,800	\$244,000			9.89%
2015 Value	\$90,000	\$170,600	\$260,600	\$278,200	93.5%	7.95%
\$ Change	-\$1,200	+\$17,800	+\$16,600			
% Change	-1.3%	+11.6%	+6.8%			

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The 2015 COD of 7.95% is an improvement from the previous COD of 9.89%. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%. The resulting COD meets or exceeds the industry assessment standards. Sales from 1/1/2012 to 12/31/2014 (at a minimum) were considered in all analysis. Sales were time adjusted to 1/1/2015

Population - Improved Valuation Change Summary:			
	Land	Improvements	Total
2014 Value	\$92,900	\$145,000	\$237,900
2015 Value	\$91,300	\$157,700	\$249,000
\$ Change	-\$1,600	+\$12,700	+\$11,100
% Change	-1.7%	+8.8%	+4.7%

Number of one to three unit residences in the population: 3,249

Physical Inspection Area:

State law requires that each property be physically inspected at least once during a 6 year revaluation cycle. During the recent inspection of Area 041 – City of Enumclaw, appraisers were in the area, confirming data characteristics, developing new valuation models and selecting a new value for each property for the assessment year. For each of the subsequent years, the previous property values are statistically adjusted during each assessment period. Taxes are paid on total value, not on the separate amounts allocated to land and improvements.

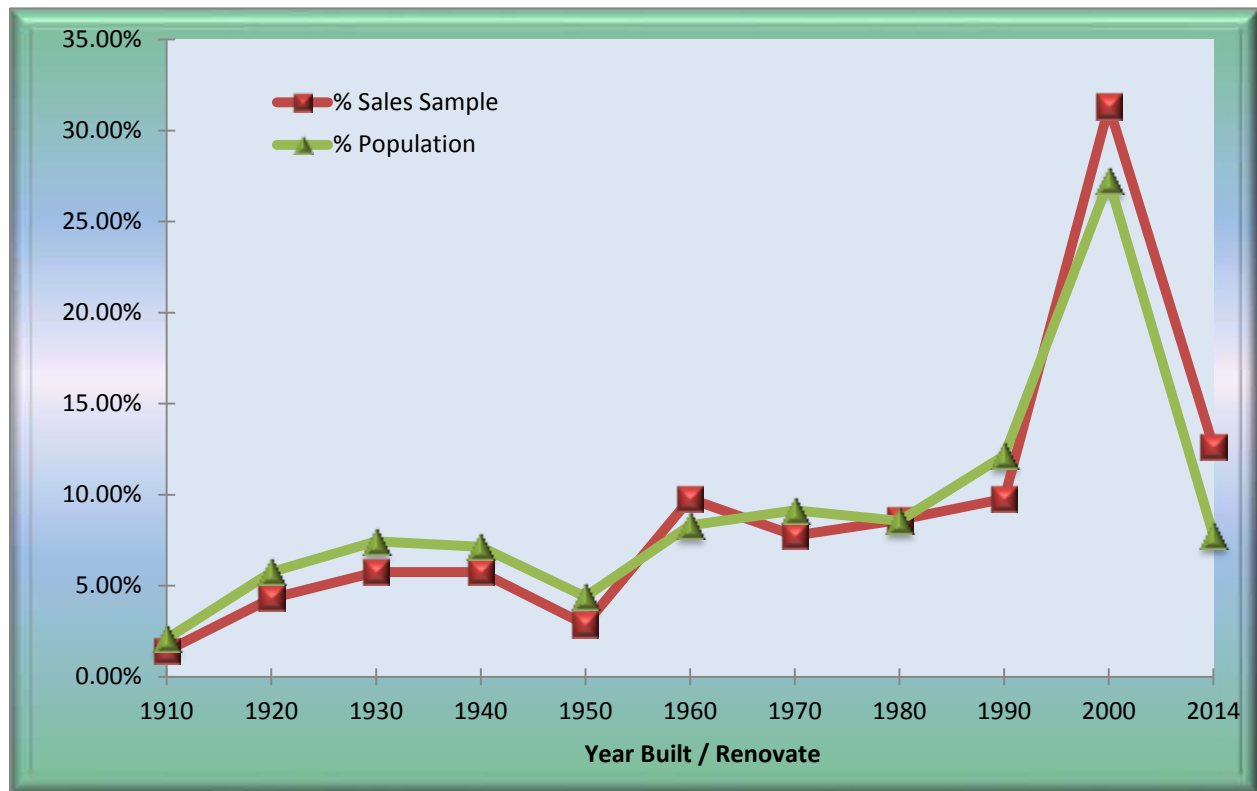

Sales Sample Representation of Population Year Built or Renovated

Sales

Year Built/Ren	Frequency	% Sales Sample
1910	5	1.44%
1920	15	4.31%
1930	20	5.75%
1940	20	5.75%
1950	10	2.87%
1960	34	9.77%
1970	27	7.76%
1980	30	8.62%
1990	34	9.77%
2000	109	31.32%
2014	44	12.64%
	348	

Population

Year Built/Ren	Frequency	% Population
1910	68	2.09%
1920	187	5.76%
1930	242	7.45%
1940	232	7.14%
1950	143	4.40%
1960	270	8.31%
1970	297	9.14%
1980	278	8.56%
1990	395	12.16%
2000	885	27.24%
2014	252	7.76%
	3,249	

The sales sample frequency distribution follows the population distribution very closely with regard to Year Built or Renovated. This distribution is ideal for both accurate analysis and appraisals.

Sales Sample Representation of Population Above Grade Living Area

Sales

AGLA	Frequency	% Sales Sample
500	1	0.29%
1,000	29	8.33%
1,500	117	33.62%
2,000	126	36.21%
2,500	39	11.21%
3,000	30	8.62%

The sales sample frequency distribution follows the population distribution very closely with regard to Building Grades. This distribution is ideal for both accurate analysis and appraisals.

Physical Inspection Process

Effective Date of Appraisal: January 1, 2015

Date of Appraisal Report: May 13, 2015

Appraisal Team Members and Participation

The valuation for this area was done by the following Appraisal Team. The degree of participation varied according to individual skill in relevant areas and depending on the time they joined the team.

- Carolyn Liepelt – Appraiser II: Team lead, scheduling, coordination, valuation model development and testing. land and total valuation appraisals. Sales verification, physical inspection and report writing.
- Joel Ledbetter – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection, land valuation model development, land and total valuation.
- Terry White – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection, land valuation model development, land and total valuation.

Sales Screening for Improved Parcel Analysis

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2014
5. Existing residences where the data for 2014 is significantly different than the data for 2015 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with land values of \$10,000 or less posted for the 2014 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

(See the attached Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis for more detailed information)

Highest and Best Use Analysis

As If Vacant: Market analysis of the area, together with current zoning and current and anticipated use patterns, indicate the highest and best use of the overwhelming majority of the appraised parcels is single family residential. Any other opinion of highest and best use is specifically noted in our records, and would form the basis for the valuation of that specific parcel.

As If Improved: Where any value for improvements is part of the total valuation, we are of the opinion that the present improvements produce a higher value for the property than if the site was vacant. In appraisal theory, the present use is therefore the highest and best (as improved) of the subject property, though it could be an interim use.

Standards and Measurement of Data Accuracy

Sales were verified with the purchaser, seller or real estate agent where possible. Current data was verified via field inspection and corrected. Data was collected and coded per the assessor's residential procedures manual.

Physical Inspection Process... Continued

We maintain uniformity with respect to building characteristics such as year-built, quality, condition, living area, stories, and land characteristics such as location (sub-area and plat), lot size, views, and waterfront. Other variables that are unique to the specific areas are also investigated. This approach ensures that values are equitable for all properties with respect to all measurable characteristics, whether the houses are larger or smaller, higher or lower quality, remodeled or not, with or without views or waterfront, etc.

Special Assumptions and Limiting Conditions

The sales comparison and cost approaches to value were considered for this mass appraisal valuation. After the sales verification process, the appraiser concluded that the market participants typically do not consider an income approach to value. Therefore the income approach is not applicable in this appraisal as these properties are not typically leased, but rather owner occupied. The income approach to value was not considered in the valuation of this area.

The following Departmental guidelines were considered and adhered to:

- Sales from 1/1/2012 to 12/31/2014 (at minimum) were considered in all analyses.
- Sales were time adjusted to 1/1/2015.
- This report is intended to meet the requirements of the Uniform Standards of Professional Appraisal Practice Standard 6.

Area Information

Name or Designation

Area 041 - City of Enumclaw

Boundaries

The northern boundary of Area 41 is SE 424th Street. The western boundary follows south along 244th Avenue SE to Highway 410 (Enumclaw-Buckley Road). From there, the southern boundary follows Highway 410 NE to Warner Avenue/SE 456th Street, continuing east to 284th Avenue SE. The boundary then goes south to SE 464th Street, then east below the King County Fair Grounds, then north along the eastern perimeter of the Fair Grounds and the Enumclaw Golf Course and continuing north to SE 424th Street.

Maps

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description

According to the 2013 census the population of Enumclaw is just under 11,500. The City was homesteaded in the late 1800's, incorporated in 1913 and boasts many well cared for homes built as early as 1900. Enumclaw is roughly forty minutes east of Tacoma and over one hour southeast of Seattle. It is accessed by Highway 169 from the north, Highway 164 from the northwest and Highway 410 from east to west through the town. Approximately two-thirds of the residential parcels are located within the City limits of Enumclaw and the balance in unincorporated King County. Services such as police, fire, hospital, schools, grocery stores, restaurants and other small business activities are available within the City limits.

Enumclaw contains 3,600 total properties of which 3,364 are improved and 236 are vacant. The parcels located in unincorporated King County are primarily acreage in nature and the long term use would be farming and pasture land. Lot sizes in Area 41 range from less than 3500 square feet to just over 155 acres. The primary view characteristics are of Mt. Rainier and the Cascade foothills. Several plats have good views from each lot, which is considered in the base land value. The Newaukum Creek runs across the northwestern portion of the area, with Boise Creek at the southwestern portion. Environmental and sensitive area restrictions include wetlands, stream, topography, easements and one hundred year flood plain.

There is a rich diversity of homes within the City of Enumclaw. They were built from 1900 to the present, with over 600 of the City's homes built prior to 1930. Homes in the area are predominately owner occupied and well cared for. The quality of construction ranges from grade 4 homes to grade 11 homes. The total living area ranges from 470 to 6,730 square feet. Homes grades 6-8 are most prevalent in the area, with an overwhelming majority being average quality, grade 7 homes. These homes average just under 1,700 square feet of total living area.

Approximately 35% of the homes in the area have been built since 1990. A large part of the construction took place between the years of 1990 to 1995, when 880 single family residences were built. The rapid development led to shortages with water and sewer availability. In response, the City implemented a water moratorium in April 1995. Development of new plats and single family

Area Information... Continued

residences dropped dramatically. The City of Enumclaw built a new wastewater treatment plant which was completed in November, 2008. The moratorium that formerly limited new construction was officially lifted on January 6, 2009. Due to market constraints and lack of demand, since the beginning of 2009 to present, less than 80 new homes have been built.

Land Valuation

Area 41 is small and diverse with a total of 3,600 properties of which 236 are vacant. Platted sites range in size from 1,706 square feet to 69,140 square feet and non-platted lots from 1,850 square feet to 155.65 acres. Platted lots were valued by site, with values ranging from \$82,000 to \$130,000. Non-platted lots were valued by size, with values ranging from \$51,000 to \$762,000. Final land values included consideration for positive impacts such as views and the negative impacts such as traffic and sensitive areas.

Vacant sales from 1/1/2012 to 12/31/2014 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2015. However there were only 3 single parcel vacant land sales in Area 41 that took place during this time period and one multi-parcel sale. Therefore additional vacant sales were sought in neighboring area 40-1. All land sales were physically inspected and verified in the field with effort to contact the buyer or seller when necessary or possible. The characteristics of each sale were compared and categorized, for the purpose of estimating land values and establishing adjustments for additional amenities or impacts affecting value. The land allocation and land abstraction methods were also incorporated in the land model analysis for additional support and validation since land sales were limited. The most influential characteristics identified affecting sales price included lot size, views, topography, traffic, access, sensitive areas, utility access and location.

Land Model

Model Development, Description and Conclusions

In considering the many property types within Area 41, additional support and validation from the land allocation and land abstraction methods were incorporated in the land model analysis. These methods were invaluable in validating land values where vacant land sales were limited. Overall, values and ratios from both methods were found to be compatible with the vacant land sales and considered reliable in helping to determine the final land values. Additional adjustments to all sites were applied for positive attributes such as views and negative adjustments for inferior attributes such as traffic nuisance and topography. These adjustments are based on analyzing matched vacant and improved sales combined with years of appraisal experience and knowledge in the area. For example, vacant sales in Area 41 indicated a \$12,000 upward adjustment for a good Mount Rainier view verses a non-view site. Match paired sales indicated an \$8,000 downward adjustment for high traffic impact.

A list of vacant sales used and those considered not reflective of market are included in the following sections.

Land Value Model Calibration

LOT SQUARE FOOTAGE	ACREAGE	BASE LAND VALUE
3,000	0.07	\$65,000

Adjustments to Land Values

NEGATIVE IMPACTS	REDUCTION TO BASE LAND VALUE
Easements	-5% to -10%
Topography	-5% to -50%
Non-Perc/Non-Buildable	-75% to -80%
Sensitive Areas	-5% to -30%
Access	-10% to -50%
Water Problems	-5% to -45%
Flood Plain	-5% to -90%

TRAFFIC NOISE	REDUCTION TO BASE LAND VALUE
Moderate - and site is vacant or street borders front of home	-\$3,000
Moderate - and street borders side or rear of home	-\$2,000
High - and site is vacant or street borders front of home	-\$8,000
High - and street borders side or rear of home	-\$5,000

POSITIVE IMPACTS	ADDITIVE TO BASE LAND VALUE
MOUNT RAINIER VIEW	
Average	+\$4,000
Good	+\$12,000
Excellent	+\$20,000
CASCADES MOUNTAINS VIEW	
Good	+\$3,000
Excellent	+\$6,000
TERRITORIAL VIEW	
Good	+\$2,000
Excellent	+\$4,000

Land Value Model Calibration... Continued

NDR PROPERTIES – NO DEVELOPMENT RIGHTS
If one or more homes are situated on the site, then site is valued using the Land Schedule
(Zoning already restricts these parcels to one dwelling per unit – typically RA10, A10 or A35 zoning)
If currently vacant with no reserved home site, then site is valued using the Land Schedule minus \$75,000.

Adjustments are applied in this order:

1) % Adjustments

2) Dollar Amount Adjustments

Land Value Calculation Sample:

A one acre tax lot is calculated at **\$130,000** per the tax lot land schedule, +/- any other land adjustments. If this parcel has **-10%** taken off for topography, is situated on a street with moderate traffic (**-\$3,000** per schedule) with an average view of Mount Rainer (**+\$4,000**), and a good Territorial view (**+\$2,000**), the adjusted calculated land value would be as follows:

$\$130,000 * .90 = \$117,000 - \$3,000 + \$4,000 + \$2,000 = \$120,000$ (truncated)

Improved Parcel Valuation

Improved Parcel Data:

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited. Sales are listed in the "Improved Sales Used In This Physical Inspection Analysis" and "Improved Sales Removed From This Physical Inspection Analysis" sections of this report. Additional information may reside in the Assessor's Real Property Database, Assessor's procedures, Assessor's "field" maps, Revalue Plan, separate studies, and statutes.

The Assessor maintains a cost model, which is specified by the physical characteristics of the improvement, such as first floor area, second floor area, total basement area, and number of bathrooms. The cost for each component is further calibrated to the 13 grades to account for quality of construction. Reconstruction Cost New (RCN) is calculated from adding up the cost of each component. Depreciation is then applied by means of a percent good table which is based on year built, grade, and condition, resulting in Reconstruction Cost New less Depreciation (RCNLD). The appraiser can make further adjustments for obsolescence (poor floor plan, design deficiencies, external nuisances etc.) if needed. The Assessor's cost model generates RCN and RCNLD for principal improvements and accessories such as detached garages and pools.

The Assessor's cost model was developed by the King County Department of Assessments in the early 1970's. It was recalibrated in 1990 to roughly approximate Marshall & Swift's square foot cost tables, and is indexed annually to keep up with current costs.

Model Development, Description and Conclusions:

Most sales were field verified and characteristics updated prior to model development. Sales were time adjusted to 1/1/2015.

The analysis of this area consisted of a systematic review of applicable characteristics which influence property values. In addition to standard physical property characteristics, characteristics that indicated possible significance in the marketplace were determined to be land, age, grade, condition and building cost and a building plat. The many charts, graphs, statistical reports and diagnostic tools available were used to determine which specific variables would be used in the valuation model. Through this process an EMV valuation model was derived for the whole area. The analysis showed the following variables needed to be included in the valuation model:

- Base land
- Age
- RCN (replacement cost new)
- Elk Meadows Plat-Majors 230970 and 230971
- Condition

After the models were developed, numerous plats including their amenities and characteristics were analyzed further. As a result of this thorough investigation, additional adjustments were made to these plats. In addition, supplemental models such as cost or market adjusted cost were developed to address parcels outside the parameters of the main valuation formula. Any additional adjustments not covered in supplement models and exceptions are noted in the notes field of that particular parcel.

A list of improved sales used and those considered not reflective of market are included in the following sections.

Improved Parcel Total Value Model Calibration

Variable	Definition
Sale Day	Time Adjustment
BaseLandC	2015 Adjusted Base Land Value
Bldg RcnC	Building Replacement Cost New
GoodYN	Improvement Condition = Good
VGoodYN	Improvement Condition = Very Good
Majors 230970 & 230971	Majors = 230970 & 230971
+Accy Rcnld (constrained)	Accessory Cost New Less Depreciation

Multiplicative Model

$(1-0.05) * (EXP . 1.27262701234544 - 0.0775297169425385 * AgeC + 0.407174043989326 * BaseLandC$
 $+ 0.507974000757567 * BldgRcnC + 0.0203816091585175 * GoodYN - 0.0577399524106448 *$
 $Maj230970_971 + 0.000258245502553017 * SaleDay + 0.0724387202252666 * VGoodYN) + (Accy$
 $RCNLD)*1000$

EMV values were not generated for:

- Buildings with grade less than 3
- Building two or greater. (EMV is generated for building one only.)
- If total EMV is less than base land value
- Lot size less than 100 square feet
- Buildings with obsolescence

Of the improved parcels in the population, 2,471 parcels increased in value. They were comprised of 28 single family residences on commercially zoned land and 2443 single family residences or other parcels.

Of the vacant land parcels greater than \$1000, 66 parcels increased in value. Tax exempt parcels were excluded from the number of parcels increased.

Supplemental Models and Exceptions

AREA ADJUSTMENTS:

Grade 4 homes with lots sizes < 2,000 SF or Grade 4 homes with lots sizes > 10,000 SF = RCNLD
Grade 4 homes with lots sizes > 2,000 SF and < 10,000 SF = RCNLD * 1.15
Grade 9 homes = EMV * 1.05
Grade >= 10 built or renovated after 1990 = Total EMV * 1.10
Grade >= 10 built or renovated prior to 1990 = Total EMV * 1.20
Homes in Fair Condition = RCNLD
Large farms, greater than ten acres, with multiple improvements = RCNLD
Improvements with Obsolescence = Base Land Value + (Imp EMV Less % Obsolescence)
Improvements with Percent Complete = Base Land Value + (Imp EMV * % Complete)
Improvements with Mobile home built prior to 1990 = EMV + (MH RCNLD * 2)
Improvements with Mobile home built in or after 1990 = EMV + (MH RCNLD)
Multiple improvements on one parcel = EMV of Imp #1 + RCNLD of Additional Improvements
Accessory only = Base Land Value + Accessory RCNLD

PLAT ADJUSTMENTS:

Major 800610 (Stevensons Garden Trs) - For those parcels located on Stevenson just off Highway 410 & surrounded by commercial properties = Total EMV * .90
Major 855680 (Takoba which is a premier plat built in the early 2000's) = EMV * 1.10
Major 814131, 814131 & 814132 (Suntop Div 1, 2A & 2B which is a new plat, currently under construction) = Total EMV * .88

Mobile Home Data:

There were a total of 22 properties with mobile homes in Area 41, with 14 of these serving as the main residence. There was only 1 mobile home sale in Area 41.

For Mobile Homes the Assessor uses residential costs from Marshall & Swift, from the September prior to the Assessment year (i.e. Marshall & Swift's September 2014 update for the 2015 Assessment Year). The cost model specifies physical characteristics of the mobile home such as length, width, living area, class, condition, size, year built. Reconstruction Cost New (RCN) is calculated from adding up the cost of each component. Depreciation is then applied by means of a percent good table which is based on year built, class, and condition, resulting in Reconstruction Cost New less Depreciation (RCNLD).

Mobile Home Total Value Model Calibration

A market adjusted cost approach was used to appraise mobile homes.

For mobile homes built prior to 1990:

$$\text{Land} + (\text{Mobile Home RCNLD} * 2.0) + \text{Accy RCNLD}$$

For mobile homes built in or after 1990:

$$\text{Land} + \text{Mobile Home RCNLD} + \text{Accy RCNLD}$$

Area 041 Market Value Changes Over Time

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2015**.

For example, a sale of \$475,000 which occurred on October 1, 2013 would be adjusted by the time trend factor of 1.125, resulting in an adjusted value of \$534,000 ($\$475,000 \times 1.125 = \$534,375$) – truncated to the nearest \$1000.

SaleDate	Adjustment (Factor)	Equivalent Percent
1/1/2012	1.327	32.7%
2/1/2012	1.317	31.7%
3/1/2012	1.307	30.7%
4/1/2012	1.296	29.6%
5/1/2012	1.286	28.6%

8/1/2014	1.040	4.0%
9/1/2014	1.032	3.2%
10/1/2014	1.024	2.4%
11/1/2014	1.016	1.6%
12/1/2014	1.008	0.8%
1/1/2015	1.000	0.0%

Area 041 Market Value Changes Over Time

The time adjustment formula for Area 041 is: $1/\text{EXP}(0.000258245502553017 * \text{SaleDay})$
 $\text{SaleDay} = \text{SaleDate} - 42005$

Results

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 93.5% . The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2015 assessment year (taxes payable in 2016) results in an average total change from the 2014 assessments of +4.7%. This increase is due partly to market changes over time and the previous assessment levels.

A Ratio Study was completed just prior to the application of the 2015 recommended values. This study benchmarks the prior assessment level using 2014 posted values (1/1/2014) compared to current adjusted sale prices (1/1/2015). The study was also repeated after the application of the 2015 recommended values. The results show an improvement in the COD from 9.89% to 7.95%.

The Appraisal Team recommends application of the Appraiser selected values, as indicated by the appropriate model or method.

Note: More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.

USPAP Compliance

Client and Intended Use of the Appraisal:

This mass appraisal report is intended for use by the public, King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others for other purposes is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

Definition and date of value estimate:

Market Value

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 Wn. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65,66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

Highest and Best Use

RCW 84.40.030

All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.

An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.

USPAP Compliance...Continued

WAC 458-07-030 (3) True and fair value -- Highest and best use.

Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

Date of Value Estimate

RCW 84.36.005

All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.

RCW 36.21.080

The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

Property Rights Appraised: Fee Simple

Wash Constitution Article 7 § 1 Taxation:

All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.

Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914)

...the entire [fee] estate is to be assessed and taxed as a unit...

Folsom v. Spokane County, 111 Wn. 2d 256 (1988)

...the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee...

The Dictionary of Real Estate Appraisal, 3rd Addition, Appraisal Institute.

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Assumptions and Limiting Conditions:

1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.
2. No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
3. No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge the taxpayer to retain an expert in the field and submit data affecting value to the assessor.

USPAP Compliance...Continued

8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
11. An attempt to segregate personal property from the real estate in this appraisal has been made.
12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.
15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

Scope of Work Performed:

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.

Certification:

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

USPAP Compliance...Continued

- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- The area(s) physically inspected for purposes of this revaluation are outlined in the body of this report.
- The individuals listed below were part of the "appraisal team" and provided significant real property appraisal assistance to the person signing this certification. Any services regarding the subject area performed by the appraiser within the prior three years, as an appraiser or in any other capacity is listed adjacent their name.
- To the best of my knowledge the following services were performed by the appraisal team within the subject area in the last three years:

Joel Ledbetter

- Data Collection
- Sales Verification
- Appeals Response Preparation
- Land and Total Valuation
- New Construction Evaluation

Terry White

- Data Collection
- Sales Verification
- Appeals Response Preparation
- Land and Total Valuation
- New Construction Evaluation

- Any services regarding the subject area performed by me within the prior three years, as an appraiser or in any other capacity is listed adjacent to my name.
- To the best of my knowledge the following services were performed by me within the subject area in the last three years:

Carolyn Liepelt

- Data Collection/Assessment Reviews
- Sales Verification
- Appeals Response Preparation / Review
- Physical Inspection Model Development and Report Preparation
- Land and Total Valuation
- New Construction Evaluation

Lloyd Hara

As we start preparations for the 2015 property assessments, it is helpful to remember that the mission and work of the Assessor's Office sets the foundation for efficient and effective government and is vital to ensure adequate funding for services in our communities. Maintaining the public's confidence in our property tax system requires that we build on a track record of fairness, equity, and uniformity in property assessments. Though we face ongoing economic challenges, I challenge each of us to seek out strategies for continuous improvement in our business processes.

Please follow these standards as you perform your tasks.

- Use all appropriate mass appraisal techniques as stated in Washington State Laws, Washington State Administrative Codes, Uniform Standards of Professional Appraisal Practice (USPAP), and accepted International Association of Assessing Officers (IAAO) standards and practices.
- Work with your supervisor on the development of the annual valuation plan and develop the scope of work for your portion of appraisal work assigned, including physical inspections and statistical updates of properties;
- Where applicable, validate correctness of physical characteristics and sales of all vacant and improved properties.
- Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total in compliance with applicable laws, codes and DOR guidelines. The Jurisdictional Exception is applied in cases where Federal, State or local laws or regulations preclude compliance with USPAP;
- Develop and validate valuation models as delineated by IAAO standards: Standard on Mass Appraisal of Real Property and Standard on Ratio Studies. Apply models uniformly to sold and unsold properties, so that ratio statistics can be accurately inferred to the entire population.
- Time adjust sales to January 1, 2015 in conformance with generally accepted appraisal practices.
- Prepare written reports in compliance with USPAP Standard 6 for Mass Appraisals. The intended users of your appraisals and the written reports include the public, Assessor, the Boards of Equalization and Tax Appeals, and potentially other governmental jurisdictions. The intended use of the appraisals and the written reports is the administration of ad valorem property taxation.
