

## PROJECT TEAM

## PUBLIC

### Evaluate Approaches to CSO Control in Basins

- On-site treatment
- Peak flow reduction
- Storage
- Convey/treat

*Learn more about the problem and control approaches*

### Identify and Evaluate a Broad Range of Alternatives for Each Basin

- Alternatives=approach+potential Site
- All technically feasible alternatives considered

*Attend community meetings and provide input*

### Short list and Refine Alternatives for Each Basin

- Short list based on comprehensive criteria
- Further develop/refine most favorable alternatives

*Attend community meetings and provide input*

**WE ARE HERE**

### Decide on a Proposal for Each Basin

King County decides on proposals for environmental review

*Learn about proposals and opportunities to provide input*

### SEPA (State Environmental Policy Act) Public Comment Period

Threshold determination issued

*Provide comments during public comment period*

### Regulatory Review and Approval Period

- Agency comment and approval
- Basis for design

*Agencies confirm public participation process*

### Proceed to Facility Design Phase

Design level detail added

*Public coordination continues through design/construction*
