

King County contractor crews in Myrtle Edwards Park starting week of August 17

During the week of August 17, 2009, King County Wastewater Treatment Division (WTD) contractors will begin restoring landscaping in Myrtle Edwards Park. This restoration work is the final phase of King County's 2008 emergency repairs on the Elliott West Combined Sewer Overflow (CSO) facilities in the park.

Project Overview

King County contractors will reseed damaged lawns and plant trees around the Denny Way Regulator Station in Myrtle Edwards Park north of the Olympic Sculpture Garden. Work will occur typically on weekdays between 7 a.m. – 5 p.m. and be complete by October 1, 2009.

Construction trailers and equipment staged in the park during the project may obstruct the pedestrian walkway along the shoreline south of the work site. Truck traffic to and from the work site will at times be on the access road/bike path along the park's eastern border.

Bicyclists and pedestrians will have to share the western asphalt pathway when trucks are present in the park. To protect public safety traffic control personnel will detour bike and pedestrian traffic away from the eastern pathway and escort trucks as they pass through the park to the work site. King County urges park users to remain alert and cautious near the work site.

What to Expect

- Restoration work at the Denny Way Regulator in Myrtle Edwards Park.
- Temporary restricted public access to some park areas on or near the work site.
- Increased noise, activity and heavy equipment from the construction site.
- Increased truck traffic on the park access road along the park's eastern edge. To protect public safety, traffic control personnel will escort trucks through the park.
