How to Live Green

Making a difference -
household by household

Caring for our environment is an important part of our quality of life both for today and for future generations. We hear the words “climate change”, “sustainable communities” and “environmentalism” but what do they mean to us in our every day life?

Our May 10 town hall meeting is all about breaking down these issues into easy and practical ways each of us can alter our behaviors to improve our environment.

Reducing your household’s negative effect on the environment can be as simple as bringing your own reusable bags to the grocery store or joining neighbors to clean up our community. Please join me at *10:00 A.M. on May 10 at Bellevue City Hall* as we learn from local experts about consumer choices for green living.
