

### South Site Project Update: Crews clean siphons week of Feb. 4 and begin restoring West Commodore Way right-of-way

Crews completed the new 84-inch siphon pipe under Salmon Bay between the Ballard and Interbay areas of Seattle and have begun work to re-line the twin 36-inch wood siphons that have served the area for over 80 years.

To prepare for re-lining the existing siphons, crews will clean the existing siphons from the construction area in the Salmon Bay Marine Center the week of Feb. 4. **Near neighbors may experience possible odors during this work.**

Crews will also begin restoring the right-of-way on the south side of West Commodore Way in front of the project site (*see map*). There will be **no parking in this area for up to one month** while crews complete the restoration work.

#### What to Expect at the South Site:

- Possible odors from siphon cleaning week of Feb. 4
- No parking on West Commodore Way right-of-way in front of the project site (*see map*)
- High level of activity involving crews, trucks and equipment; noise and dust typical of a construction site
- Increased truck traffic near the work site and in the Salmon Bay Marine Center Parking lot
- Typical work hours Monday through Friday from 7 a.m. to 6 p.m.; longer weekday hours and Saturday work possible
