WHAT KING COUNTY IS DOING

King County has convened the **Heroin and Prescription Opiate Addiction Task Force** that includes individuals from across many disciplines who will come together over a period of six months to develop both short and long-term strategies to prevent abuse and addiction, prevent overdose, and improve access to different types of treatment for opioid addiction. For more information, visit: kingcounty.gov/heroin-opioids-task-force

Equity and Social Justice Charge

The Task Force will apply an Equity and Social Justice (ESJ) lens to all of its work. We acknowledge that the “War on Drugs” has disproportionately adversely impacted some communities of color, and it is important that supportive interventions now not inadvertently replicate that pattern. Interventions to address the King County heroin and opiate problem will or could affect the health and safety of diverse communities, directly and indirectly (through re-allocation of resources). Measures recommended by the Task Force to enhance the health and well-being of heroin and opiate users or to prevent heroin and opiate addiction must be intentionally planned to ensure that they serve marginalized individuals and communities. At the same time, the response to heroin and opiate use must not exacerbate inequities in the care and response provided among users of various drugs.

Equity and Social Justice Charge (Continued)

All recommendations by the Taskforce will be reviewed using a racial impact statement framework. The Task Force will not seek to advance recommendations that can be expected to widen racial or ethnic disparities in health, healthcare, other services and support, income, or justice system involvement. Whenever possible, these concerns should lead to broadening the recommendations of the Task Force, rather than leaving behind interventions that are predicted to enhance the health and well-being of heroin and opiate users.

PREVENTION

Increase awareness of the possible adverse effects of opioid use, including overdose and opioid use disorder.

Promote safe storage and disposal of medications.

**take back
YOUR MEDS**

Work with schools and health care providers to improve screening practices so we can prevent and identify opioid use.

TREATMENT EXPANSION

Make buprenorphine more accessible and available in communities with the greatest need.

Make treatment on demand available for all types of substance-use disorders.

Alleviate artificial barriers placed upon opioid treatment programs.

USER HEALTH SERVICES & OVERDOSE PREVENTION

Continue to distribute naloxone kits to reverse the effects of heroin overdose to more locations such as treatment providers, homeless shelters, law enforcement, and first responders.

Create at least two locations where adults with substance-use disorders will have access to on-site services while safely consuming opioids or other substances under the supervision of trained healthcare providers.
