List of Store Locations:

See authorized "[Store Locations](#)". At this time only NAPA company stores are authorized contract suppliers for NAPA. NAPA will be adding independent NAPA store locations in the future. Independent stores are required to sign the "Dealer Agreement" as required by the Office of State Procurement, agreeing to the terms of this contract.

A Word of Caution: If a NAPA location is not listed in this document, they are not an authorized contract source.

Point of Contact:

Account Set up is required with the awarded contractor you wish to utilize prior to placement of your first order or to utilize their on-line ordering pricing site. Exceptions are if you held an account with NAPA or CarQuest as they were on the previous contract. Please call or email "[Primary Local Contact](#)" listed above to establish accounts/user name/passwords.

Store Contacts available on the "Store Location" page.

FOB/SHIPPING COSTS:

Product delivered through Contractors distribution, is FOB Destination with cost of freight included in the cost of the product (No Charge).

(See below for freight charges & pricing that falls outside the scope of this "Just-In-Time" contract)

Cost of freight when product is delivered from locations other than the NAPA store?

NAPA uses the Distribution Center and sister stores with no additional freight cost incurred. After exhausting all local means of supply and with the purchasers' authorization, the search would continue to wherever source can be found to supply the part. Now additional charges may apply. If purchaser states they need it tomorrow costly overnight freight charges could be incurred. If there is no great hurry the item could be added to normal order cycle and delivered however many days later when it arrives. No added charges would be incurred. Freight charges incurred will vary depending upon the delivery time requested by the customer.

There is a time where the Just-in-Time price may change. After exhausting all supply channels for the original part, the purchaser may direct us to "just find what I need, I don't care if it is the same brand". In this case the end cost would change proportionally to the actual cost of acquisition. The percentage from cost would not change but the end cost may either be higher or lower than the original price quoted.

Geographic area which the contractor will deliver within 1 hour

See authorized "Store Locations" for area served

Most of the larger stores now have a tracking system in place. The expected delivery times are entered by specific account number. The drivers are then dispatched, according to pre-entered expected times and upon return, the actual time of delivery, written on the invoice is entered. If the time falls outside the established parameters, a report is generated for the managers use, to identify and correct the problem.

Many NAPA company stores use a 3-mile delivery radius. Because of the small area covered, the one-hour delivery time is not usually a problem. The dispatch system is used, as backup, to track and correct problems created by others sources.

Cost of freight when product is delivered from locations other than the NAPA store?

NAPA uses the Distribution Center and sister stores with no additional freight cost incurred. After exhausting all local means of supply and with the purchasers' authorization, the search would continue to wherever source can be found to supply the part. Now additional charges may apply. If purchaser states they need it tomorrow costly overnight freight charges could be incurred. If there is no great hurry the item could be added to normal order cycle and delivered however many days later when it arrives. No added charges would be incurred. Freight charges incurred will vary depending upon the delivery time requested by the customer.

There is a time where the Just-in-Time price may change. After exhausting all supply channels for the original part, the purchaser may direct us to "just find what I need, I don't care if it is the same brand". In this case the end cost would change proportionally to the actual cost of acquisition. The percentage from cost would not change but the end cost may either be higher or lower than the original price quoted.

Geographic area which the contractor will deliver within 1 hour

See authorized "Store Locations" for area served

Most of the larger stores now have a tracking system in place. The expected delivery times are entered by specific account number. The drivers are then dispatched, according to pre-entered expected times and upon return, the actual time of delivery, written on the invoice is entered. If the time falls outside the established parameters, a report is generated for the managers use, to identify and correct the problem.

Many NAPA company stores use a 3-mile delivery radius. Because of the small area covered, the one-hour delivery time is not usually a problem. The dispatch system is used, as backup, to track and correct problems created by others sources.

ORDERING INFORMATION:

Federal ID No.: 58-0254510

List of Store Locations: See authorized "Store Locations". At this time only NAPA company stores are authorized contract suppliers for NAPA. NAPA will be adding independent NAPA store locations in the future. Independent stores are required to sign the "Dealer Agreement" as required by the Office of State Procurement, agreeing to the terms of this contract.

A Word of Caution: If a NAPA location is not listed in this document, they are not an authorized contract source.

Point of Contact: Account Set up is required with the awarded contractor you wish to utilize prior to placement of your first order or to utilize their on-line ordering pricing site. Exceptions are if you held an account with NAPA or CarQuest as they were on the previous contract. Please call or email "Primary Local Contact" listed above to establish accounts/user name/passwords.

Store Contacts available on the "Store Location" page.

FOB/SHIPPING COSTS: Product delivered through Contractors distribution, is FOB Destination with cost of freight included in the cost of the product (No Charge).
(See below for freight charges & pricing that falls outside the scope of this "Just-In-Time" contract)

Cost of freight when product is delivered from locations other than the NAPA store?

NAPA uses the Distribution Center and sister stores with no additional freight cost incurred. After exhausting all local means of supply and with the purchasers' authorization, the search would continue to wherever source can be found to supply the part. Now additional charges may apply. If purchaser states they need it tomorrow costly overnight freight charges could be incurred. If there is no great hurry the item could be added to normal order cycle and delivered however many days later when it arrives. No added charges would be incurred. Freight charges incurred will vary depending upon the delivery time requested by the customer.

Geographic area which the contractor will deliver within 1 hour

There is a time where the Just-in-Time price may change. After exhausting all supply channels for the original part, the purchaser may direct us to "just find what I need, I don't care if it is the same brand". In this case the end cost would change proportionally to the actual cost of acquisition. The percentage from cost would not change but the end cost may either be higher or lower than the original price quoted.

See authorized "Store Locations" for area served

Most of the larger stores now have a tracking system in place. The expected delivery times are entered by specific account number. The drivers are then dispatched, according to pre-entered expected times and upon return, the actual time of delivery, written on the invoice is entered. If the time falls outside the established parameters, a report is generated for the managers use, to identify and correct the problem.

Many NAPA company stores use a 3-mile delivery radius. Because of the small area covered, the one-hour delivery time is not usually a problem. The dispatch system is used, as backup, to track and correct problems created by others sources.

List of Store Locations:

See authorized "Store Locations". At this time only NAPA company stores are authorized contract suppliers for NAPA. NAPA will be adding independent NAPA store locations in the future. Independent stores are required to sign the "Dealer Agreement" as required by the Office of State Procurement, agreeing to the terms of this contract.

A Word of Caution: If a NAPA location is not listed in this document, they are not an authorized contract source.

Point of Contact:

Account Set up is required with the awarded contractor you wish to utilize prior to placement of your first order or to utilize their on-line ordering pricing site. Exceptions are if you held an account with NAPA or CarQuest as they were on the previous contract. Please call or email "Primary Local Contact" listed above to establish accounts/user name/passwords.

Store Contacts available on the "Store Location" page.

FOB/SHIPPING COSTS:

Product delivered through Contractors distribution, is FOB Destination with cost of freight included in the cost of the product (No Charge).

(See below for freight charges & pricing that falls outside the scope of this "Just-In-Time" contract)

Cost of freight when product is delivered from locations other than the NAPA store?

NAPA uses the Distribution Center and sister stores with no additional freight cost incurred. After exhausting all local means of supply and with the purchasers' authorization, the search would continue to wherever source can be found to supply the part. Now additional charges may apply. If purchaser states they need it tomorrow costly overnight freight charges could be incurred. If there is no great hurry the item could be added to normal order cycle and delivered however many days later when it arrives. No added charges would be incurred. Freight charges incurred will vary depending upon the delivery time requested by the customer.

There is a time where the Just-in-Time price may change. After exhausting all supply channels for the original part, the purchaser may direct us to "just find what I need, I don't care if it is the same brand". In this case the end cost would change proportionally to the actual cost of acquisition. The percentage from cost would not change but the end cost may either be higher or lower than the original price quoted.

Geographic area which the contractor will deliver within 1 hour

See authorized "Store Locations" for area served

Most of the larger stores now have a tracking system in place. The expected delivery times are entered by specific account number. The drivers are then dispatched, according to pre-entered expected times and upon return, the actual time of delivery, written on the invoice is entered. If the time falls outside the established parameters, a report is generated for the managers use, to identify and correct the problem.

Many NAPA company stores use a 3-mile delivery radius. Because of the small area covered, the one-hour delivery time is not usually a problem. The dispatch system is used, as backup, to track and correct problems created by others sources.

Billing address:
