## 26 In the Cover Letter, on the second page, amend as follows:

- 27 Looking forward, the State, local jurisdictions, and regional partners will soon be reviewing the required
- timelines for comprehensive plan updates and how that relates to timing of growth forecasts, Buildable
- 29 Lands Reports, updates to the multicounty planning policies and growth allocations, and updates to
- 30 countywide planning policies and growth targets. The County will be involved in this work and will
- 31 determine how it affects our own Comprehensive Plan ((update cycle)) update schedule to ensure
- 32 alignment with the broader growth management framework timelines. Review of the King County
- 33 Comprehensive Plan ((update cycle)) update process will also evaluate scheduling major updates in odd
- 34 calendar years, in consideration of the County's biennial budget cycle.<sup>1</sup>
- 35 <u>1 The work to review the Comprehensive Plan update schedule was completed in 2018 and 2020, through Ordinance</u>
- 36 <u>18810 and this ordinance.</u>
- 37

25

38 In the Executive Summary, on page ES-6, amend as follows:

# 39 Plan Elements

# 40 Chapters of the Comprehensive Plan

#### Chapter 1

#### **Regional Growth Management Planning**

King County's growth management policies and regulations are consistent and work in coordination with the Growth Management Act, Multicounty and Countywide Planning Policies, and other technical plans.

#### Chapter 2

#### **Urban Communities**

With the majority of King County residents living and working in the urban area, this chapter includes policies that guide urban development with the goal of creating healthy, sustainable communities.

#### Chapter 3

#### **Rural Areas and Natural Resource Lands**

King County's Rural Area and Natural Resource Lands are crucial for sustaining quality of life for county residents into the future. This chapter focuses on protecting these assets from urban development, promoting sustainable economic development and supporting rural communities.

#### Chapter 8

#### Transportation

Recognizing that availability of safe, accessible and efficient transportation options has significant implications for the quality of life of all county residents, this chapter addresses how King County will distribute investments equitably.

#### Chapter 9

#### Services, Facilities & Utilities

The provision of services, facilities and utilities should be concentrated in areas of density and at levels that can support existing and future demand. This chapter addresses how such crucial infrastructure should be developed.

#### Chapter 10

#### **Economic Development**

In its commitment to foster a prosperous, diverse and sustainable economy, the County recognizes that it must support actions and programs promote the success of both businesses and the workforce.

#### Chapter 4

#### Housing and Human Services

The availability of adequate and affordable housing has become one of the most pressing issues facing King County today. This chapter contains policies regarding the provision of housing and services for all residents.

#### Chapter 5

#### Environment

King County's natural environment comprises various unique and valuable assets. This chapter contains King County's approach to environmental protection, conservation, restoration and sustainability.

#### Chapter 6

#### Shorelines

Shorelines require particular focus and management given both their immense value and fragility. This chapter contains King County's Shoreline Master Program, which aims to protect and conserve this unique natural resource.

#### Chapter 7

41

#### Parks, Open Space & Cultural Resources

This chapter addresses King County's approach to conserving and maintaining its expansive open space system, which includes numerous local and regional parks, and trails, and its cultural resources and historic properties.

#### Chapter 11

#### Community Service Area Subarea Planning

This chapter includes policies that recognize the unique <u>land use</u> characteristics of particular unincorporated communities, provides significant historical context and describes the new subarea planning program.

#### Chapter 12

**Implementation((-&)), Amendments & Evaluation** This chapter describes how the policies should be implemented and monitored, major actions that will occur to implement the plan, the procedure for ((amending)) updating the plan and the role of zoning in the planning process.

#### Appendices

Integral to the vision and goals of the Comprehensive Plan are the detailed inventories, forecasts, financial plans and Urban Growth Area analysis required by the Growth Management Act. A set of technical appendices are adopted as part of the plan to meet Growth Management Act requirements.

#### Regulations

The King County Comprehensive Plan is implemented through adopted regulations, including the King County zoning Code and other Code titles. All development must meet the requirements of the Code.

42	In Chapter 1	Regional Growth Management Planning, on page 1-4, amend as follows:
43		
44	RP-102	King County shall actively solicit public participation from a wide variety of
45		sources in its planning processes, including the development, (( <del>amendment</del> ))
46		update, and implementation of its plans.
47		
48	In Chapter 1	Regional Growth Management Planning, on page 1-5, amend as follows:
49		
50	RP-106	(( <del>Except for Four-to-One proposals, )</del> ) King County shall not (( <del>expand</del> )) <u>amend</u>
51		the Urban Growth Area prior to the Growth Management Planning Council
52		taking action on the proposed (( <del>expansion of</del> )) <u>amendment to</u> the Urban Growth
53		Area.
54		

55	RP-107	King County shall not forward to the Growth Management Planning Council for
56		its recommendation any proposed (( <del>expansion of</del> )) <u>amendment to</u> the Urban
57		Growth Area unless the proposal was:
58		a. Included in the scoping motion for a King County Comprehensive Plan
59		update;
60		b. An area zoning study of the proposal was included in the public review
61		draft of a proposed King County Comprehensive Plan update; (( <del>or</del> ))
62		c. Subjected to the hearing examiner process for site specific map
63		amendments as contemplated by the King County Code <u>; or</u>
64		d. Initiated as a Four-to-One proposal through King County's Docket process.
65		
66	In Chapter	1 Regional Growth Management Planning, on page 1-9, amend as follows:
67	In addition to s	ubarea plans and area zoning and land use studies, King County's land use planning also includes
68	other planning	processes. These include Comprehensive Plan policy directed subarea studies, such as the
69	establishment o	f new community business centers, adjusting Rural Town boundaries, or assessing the feasibility of
70	zoning reclassif	ications in urban unincorporated areas. Subarea studies are focused on specific areas of the County,
71	but do not look	at the range of issues that a subarea plan would include. In some cases, an area zoning and land use
72		ce to meet the requirements of the policies. In addition, there are Site Specific Land Use
73	Amendments <sup>5</sup> a	nd Zone Reclassifications, <sup>6</sup> which are site specific processes that involve County staff review and
74	recommendatio	ns, a public hearing and recommendation by a Hearing Examiner and a decision by County Council.
75		consistent with the Comprehensive Plan or be proposed with ((amendments during the Plan update
76	<del>process</del> )) <u>a Plan</u>	update.
77		
78		
79		
80		Code 20.08.170-Site Specific Land Use Amendments
81	<sup>6</sup> Per King County	Code 20.08.160-Reclassification
82		
83 84	In Chapter	1 Regional Growth Management Planning, on page 1-11, amend as follows:
85	The Growth W	lanagement Act allows (( <del>local</del> )) <u>updates to</u> comprehensive plan <u>s</u> (( <del>amendments to be</del>
86		nce each year. In King County, ((those)) the annual ((amendments)) update allows limited
87		recearly year. In King County, ((mose)) <u>inc</u> annual ((aniencinems)) <u>update</u> anows inniced r, except for once every eight years. Then, during the "Eight Year Cycle review process,")) The
88		ate, which aligns the timing with Growth Management Act review and update requirements,
89		tive changes to policies and amendments to the Urban Growth Area boundary (( <del>can</del> )) to be
90		adopted. A smaller-range of substantive changes to policies and amendments to the Urban
90 91		boundary may also be considered at the midpoint of the eight-year update ((cycle)) schedule, but
1	GIUWIII AICA L	bundary may also be considered at the intepoint of the eight-year update ((eyete)) schedule, but

92	only if authorized by motion. These provisions are detailed in King County Code Title 20.18. Additional
93	information and policies are found in Chapter 12, Implementation, Amendments and Evaluation.
94	
95	In Chapter 1 Regional Growth Management Planning, on page 1-11, amend as follows:
96	
97	Docket Request Process: Another key element of the Comprehensive Plan review and ((amendment)) update
98	process is the Docket Request Process. As required by the Growth Management Act, King County maintains a
99	docket for recording comments on the King County Comprehensive Plan and associated development
100	regulations. The process and requirements are detailed in the King County Code at 20.18.140. The County
101	reviews all requests, communicates with docket submitters, and makes recommendations to the County
102	Council by the first day of December. The docket report includes an ((e)) Executive recommendation for each
103	item.
104	
105	In Chapter 1 Regional Growth Management Planning, on page 1-22, amend as follows:
106	
107	Chapter 4: Housing and Human Services
108	The availability of adequate and affordable housing has become one of the most pressing issues facing King
109	County today. Similarly, partnering with other organizations and jurisdictions to deliver human services is a
110	critical component for creating sustainable communities and supporting environmental justice. In the 2016
111	Comprehensive Plan update, policies on these topics ((are)) were consolidated into a new chapter.
112	
113	In Chapter 1 Regional Growth Management Planning, on page 1-24, amend as follows:
114	Chapter 11: Community Service Area Subarea Planning
115	This chapter uses King County's seven Community Service Areas as the framework for its renewed subarea planning
116	program that offers long-range planning services to unincorporated communities. The majority of King County's
117	community plans are no longer in effect as separately adopted plans. <sup>7</sup> In many cases, however, the plans contain
118	valuable historical information about King County's communities and often provide background for the land uses in
119	effect today. Policies from the community plans were retained as part of the Comprehensive Plan to recognize the
120	unique characteristics of each community and to provide historical context. This chapter will be updated, where
121	appropriate, to reflect the new Community Service Area subarea plans as they are adopted.
122	
123 124 125 126 127	7 The plans currently in effect are the West Hill Community Plan, <u>Skyway-West Hill Land Use Strategy (Phase 1 of the Skyway-West Hill Subarea Plan)</u> , White Center Community Action Plan, Fall City Subarea Plan, and the Vashon-Maury Island Community Service Area Subarea Plan.
128	In Chapter 1 Regional Growth Management Planning, on page 1-25, amend as follows:

#### 130 Chapter 12: Implementation, Amendments and Evaluation

- 131 The Comprehensive Plan policies, development regulations and Countywide Planning Policy
- 132 framework have been adopted to achieve the growth management objectives of King County and the
- 133 region. This chapter describes the ((e))<u>C</u>ounty's process for ((amending)) updating the Comprehensive
- 134 Plan and outlines and distinguishes the annual ((eycle)), midpoint ((eycle)), and ((the)) eight-year ((eycle
- 135 amendments)) updates. The chapter identifies a series of major Workplan actions that will be
- 136 undertaken between the ((major update cycles)) eight-year updates to implement or refine provisions
- 137 within the Plan. This chapter further explains the relationship between planning and zoning.
- 138

139 In Chapter 1 Regional Growth Management Planning, starting on page 1-25, amend as

140 follows:

# 141 V. Technical Appendices

- 142 Integral to the vision and goals of the Comprehensive Plan are the detailed inventories, forecasts, finance plans
- 143 and Urban Growth Area analysis required by the Growth Management Act. Four technical appendices

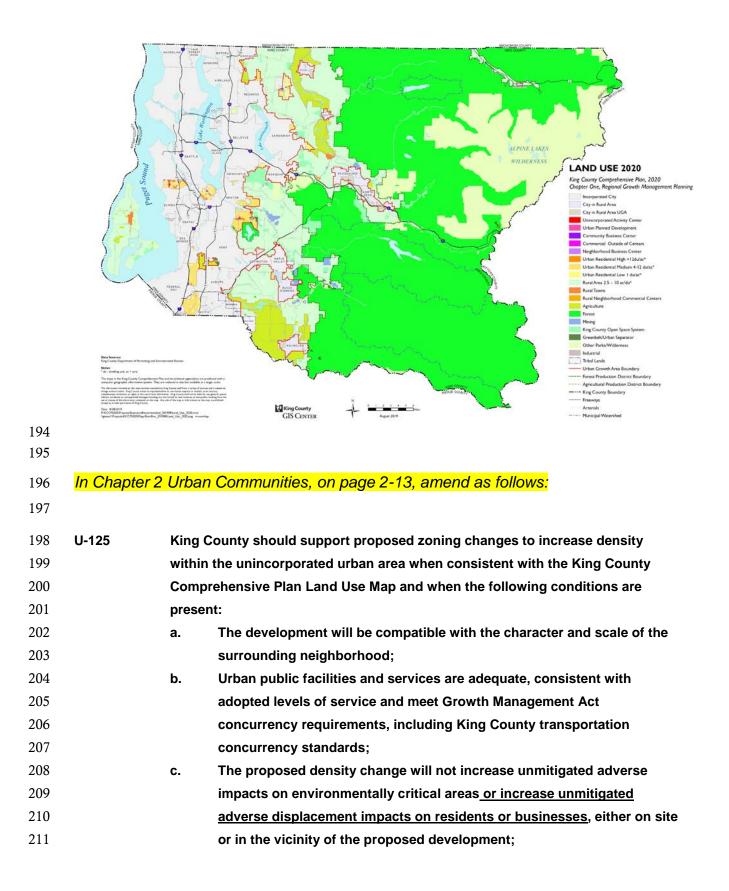

144 (Volume 1) are adopted as part of the plan to implement these Growth Management Act requirements (RCW

- 145 36.70A.070, 36.70A.110, 36.70A130). Technical Appendices A, B, C, and D were updated in 2008, 2012,
- 146 ((and)) 2016, and 2020.
- 147

#### 148 Volume 1

- 149 Technical Appendix A. Capital Facilities and Services
- 150 Technical Appendix B. Housing
- 151 Technical Appendix C. Transportation
- 152 C1. Transportation Needs Report
- 153 C2. Regional Trail Needs Report
- 154 Technical Appendix D. Growth Targets and the Urban Growth Area
- 155 ((Technical Appendix R. Public Participation Summary 2016))
- 156
- 157 Additional important information also supports the vision and goals of the Comprehensive Plan. Nine
- technical appendices (Volume 2) were prepared to provide supporting documentation to the 1994 plan:
- 159
- 160 Volume 2 (1994)
- 161 Technical Appendix D. Growth Targets and the Urban Growth Area

162	Technical Appendix E.	Washington State Laws
163	Technical Appendix F.	History of Planning in King County
164	Technical Appendix G.	Economic Development
165	Technical Appendix H.	Natural Resource Lands
166	Technical Appendix I.	Natural Environment
167	Technical Appendix J.	Potential Annexation Areas
168	Technical Appendix K.	King County Functional and Community Plans
169	Technical Appendix L.	Public Involvement Summary
170		
171	Information that supported a	amendments subsequent to 1994 is included as follows:
172		
173	Volume 3	
174	Technical Appendix M.	Public Participation Summary 2000
175		
176	Volume 4	
177	Technical Appendix N.	Public Participation Summary 2004
178		
179	Volume 5	
180	Technical Appendix O.	Public Participation Summary 2008
181		
182	Volume 6	
183	Technical Appendix P.	Public Participation-Summary 2012
184	Technical Appendix Q.	School Siting Task Force Report
185		
186	Volume 7	
187	Technical Appendix R.	Public Participation Summary 2016
188	Technical Appendix S.	Public Participation Summary 2020
189		
190	In Chapter 1 Regional Gr	owth Management Planning, following page 1-26, strike the Land Use Map
191	and replace with the follow	ving:
192		
193		Land Use Map

	d. The proposed density increase will be consistent with or contribute to
	achieving the goals and policies of this comprehensive plan, and
	subarea plan or subarea study, if applicable(( <del>;</del> )) <u>,</u> or
	(( <del>e. T))<u>t</u>he development is within walking distance of transit corridors or</del>
	transit activity centers, retail and commercial activities, and is
	accessible to parks and other recreation opportunities(( <del>,</del> )) <u>; and</u>
	e. An equity impact analysis has been completed that identifies all
	potential equity impacts and displacement risk to residents or
	businesses located on or adjacent to the site proposed for zoning
	reclassification:
	1. For area zoning or zoning reclassifications initiated by the County,
	the analysis shall include, at a minimum, use of the County's Equity
	Impact Review tool.
	2. For zoning reclassifications not initiated by the County, a
	community meeting shall be held that meets the requirements of K.C.C.
	20.20.035 prior to submittal of the application. Notice of the community
	meeting should be provided, at a minimum, in the top six languages
	identified by the tier map of limited-English-proficient persons
	maintained by the office of equity and social justice and the county
	demographer.
In Chapter	2 Urban Communities, on page 2-19, amend as follows:
U-143	Common facilities such as recreation space, internal walkways that provide
	convenient and safe inter- and intra-connectivity, roads, parking (including
	secure bicycle parking), and solid waste and recycling areas with appropriate
	levels of landscaping should be included in multifamily developments.
	((Common facilities should)) Areas of multifamily buildings that are open to the
	public (such as common hallways and elevators) shall be smoke-free and
	vapor-product free to the extent allowed by state and local regulations to avoid
	exposure to (( <del>environmental</del> )) <u>secondhand</u> tobacco smoke <u>and emissions from</u>
	electronic smoking and vaping devices.
In Chapter	2 Urban Communities, starting on page 2-28, amend as follows:
Through the a	doption of the 2000 King County Comprehensive Plan ((2000 Update)) update, King County
	urban designation of the Bear Creek Urban Planned Development area. In addition to the
	U-143

- reasons that led the ((e))<u>C</u>ounty (and the region) to originally include this area within the ((e))<u>C</u>ounty's Urban
- 250 Growth Area, when the ((e))<u>C</u>ounty adopted the 2000 update, it noted that: two sites within this area had
- 251 been approved for urban development after the adoption of the original Growth Management Act
- 252 Comprehensive Plan; significant infrastructure improvements had been made at these sites; and the ultimate
- 253 development of these sites was proceeding in accordance with issued permit approvals. The existence of these
- urban improvements further supported a conclusion that this area is characterized by urban growth within the
- 255 meaning of the Growth Management Act and was therefore appropriately included within the ((e))<u>C</u>ounty's
- 256 Urban Growth Area.
- 257

### 258 In Chapter 2 Urban Communities, starting on page 2-32, amend as follows:

259

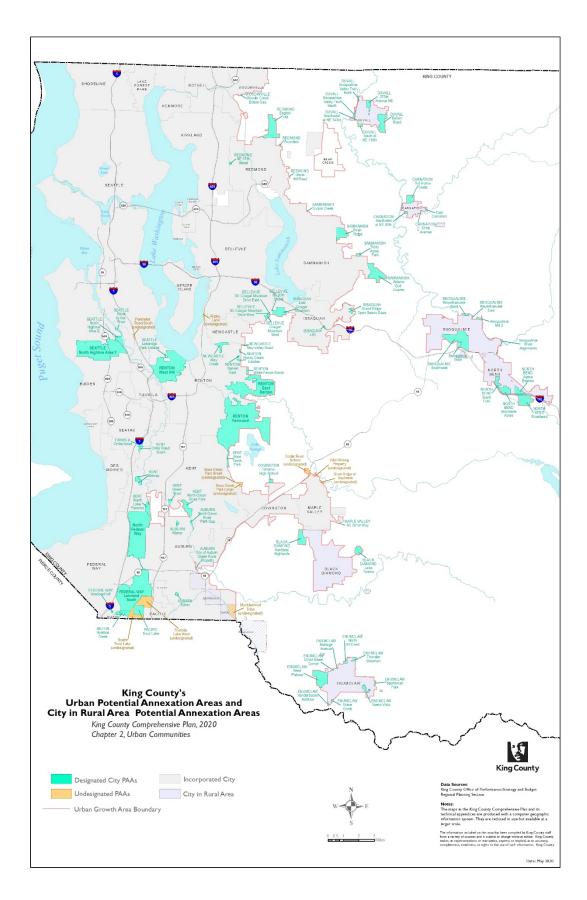

260 While urban separators complement the regional open space system by helping to define urban communities, 261 the King County Four-to-One Program provides an opportunity to add land to the regional open space system 262 through the dedication of permanent open space. The Four-to-One Program has been recognized as an 263 innovative land use technique under the Growth Management Act<sup>3</sup> and for King County, the purpose of the 264 program is to ((create)) contribute to the creation of a contiguous band of open space, running north and south 265 along the ((main)) original 1994 Urban Growth Area Boundary. Since its inception in 1994, just over ((1,300)) 266 <u>360</u> acres have been added to the Urban Growth Area while nearly ((4,500)) <u>1,400</u> acres of permanent open 267 space have been conserved. Changes to the Urban Growth Area through this program are processed as Land 268 Use Amendments to the King County Comprehensive Plan, subject to the provisions in King County Code 269 chapter 20.18.

- 270
- 271 U-185 Through the Four-to-One Program, King County shall actively pursue 272 dedication of open space along the original Urban Growth Area line adopted in 273 the 1994 King County Comprehensive Plan. Through this program, one acre of 274 Rural Area zoned land may be added to the Urban Growth Area for residential 275 development in exchange for a dedication to King County of four acres of 276 permanent open space. ((Land added to the Urban Growth Area for drainage 277 facilities that are designed as mitigation to have a natural looking visual 278 appearance in support of its development, does not require dedication of 279 permanent open space.)) In some cases, such as for provision of affordable 280 housing or for protection of properties eligible as high conservation value 281 properties, the County may approve modifications to the four-to-one ratio. The 282 total area added to the Urban Growth Area as a result of the Four-to-One 283 Program shall not exceed 4,000 acres. 284

285	U-186	King County shall evaluate Four-to-One proposals for both quality of open
286		space and feasibility of urban development. The highest-quality proposals
287		(( <del>shall</del> )) <u>may</u> be recommended for adoption as amendments to the Urban
288		Growth Area. Lands preserved as open space shall <u>primarily be on-site, shall</u>
289		buffer the adjacent Rural Area or Natural Resource Lands from the new urban
290		<u>development,</u> (( <del>retain their Rural Area designations</del> )) and should generally be
291		configured in such a way as to connect with open space on adjacent properties.
292		
293	U-187	King County shall (( <del>use the following criteria for</del> )) <u>consider the following when</u>
294		evaluating open space in Four-to-One proposals:
295		a. Quality of fish and wildlife habitat areas;
296		b. Connections to regional open space systems <u>or other open space along</u>
297		the urban growth area boundary;
298		c. Protection of wetlands, stream corridors, ground water and water
299		bodies;
300		d. Unique natural, biological, cultural, historical, or archeological features;
301		e. ((Size of proposed open space dedication and connection to other open
302		space dedications along the Urban Growth Area line; and
303		f. The land proposed as open space shall remain undeveloped, except for
304		those uses allowed in U-188)) Size and configuration of the open space
305		improves the County's ability to efficiently manage the property or the
306		regional open space system.
307		
308	U-188	King County shall preserve the open space acquired through the Four-to-One
309		Program primarily as natural areas, passive recreation sites or (( <del>resource</del> ))
310		lands for farming or forestry. King County may allow ((the following)) additional
311		uses only if located on a small portion of the open space, provided that these
312		uses are found to be compatible with the site's natural open space values and
313		functions such as those listed in (( <del>the preceding policy:</del> )) <u>Policy U-187.</u>
314		(( <del>a. Trails;</del>
315		b. Compensatory mitigation of wetland losses on the urban designated
316		portion of the project, consistent with the King County Comprehensive
317		Plan and the Critical Area Ordinance; and
318		c. Active recreation uses not to exceed five percent of the total open space
319		area. Support services and facilities for the active recreation uses may
320		locate within the active recreation area only, and shall not exceed five
321		percent of the active recreation area. An active recreation area shall not

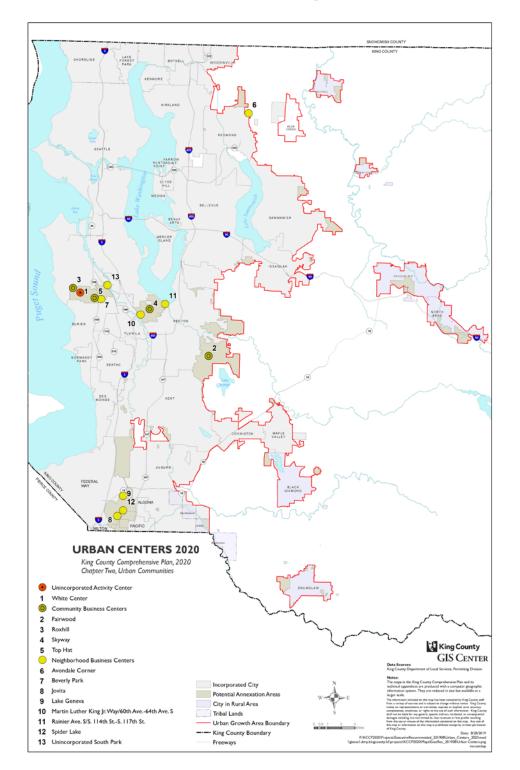

322		be used to satisfy the active recreation requirements for the urban
323		designated portion of the project as required by King County Code Title
324		<del>21A.</del> ))
325		
326	U-189	Land added to the Urban Growth Area under the Four-to-One Program shall
327		have a minimum density of four (( <del>dwellings</del> )) <u>dwelling units</u> per acre and shall
328		be physically contiguous to the original Urban Growth Area, unless there are
329		limitations due to the presence of critical areas(( <del>, and</del> )) <u>.  Four-to-One proposals</u>
330		shall be (( <del>able to be</del> )) served by sewers and other efficient urban services and
331		facilities(( <del>; provided that such sewer and other urban services and facilities</del>
332		<del>shall be</del> )) <u>that are</u> provided directly from the urban area and shall not cross the
333		open space <u>,</u> (( <del>or</del> )) Rural Area <u>,</u> or Natural Resource Lands. Drainage facilities to
334		support the urban development shall be located within the urban portion of the
335		development. Roads that support the urban development shall, to the
336		maximum extent feasible, be located within the urban portion of the
337		development; for example, the County may allow roads to be located outside of
338		the urban portion of the development to protect critical areas or for other
339		ecological benefit. ((In some cases, lands must meet affordable housing
340		requirements under this program. The total area added to the Urban Growth
341		Area as a result of this policy shall not exceed 4,000 acres.))
342		
343	U-190	((King County shall amend the Urban Growth Area to add Rural Area lands to
344		the Urban Growth Area consistent with Policy U-185 during the annual
345		Comprehensive Plan amendment process. Open space dedication shall occur
346		at final formal plat recording.)) Aland use designation and zoning classification
347		consistent with the intended use shall be established as part of the ordinance
348		that approves the Four-to-One proposal. If the applicant (( <del>decides</del> )) <u>does</u> not
349		(( <del>to</del> )) pursue urban development (( <del>or fails to record the final plat prior to</del>
350		expiration of preliminary plat approval,)) the urban properties shall be restored
351		to a Rural Area land use designation and associated zoning (( <del>during the next</del>
352		annual review of the King County Comprehensive Plan)).
353		
354	<u>U-190a</u>	For Four-to-One proposals adjacent to an incorporated area, approval of a Four-
355		to-One proposal should be coordinated with the adjacent city or town, and
356		strive to achieve an interlocal agreement with the adjacent city or town for
357		annexation of the urban portion of the proposal.
358		

359	In Chapter 2 Urban Communities, on page 2-36, amend as follows:
360	
361	Although it is the policy of the ((e)) <u>C</u> ounty to support and promote annexation, its formal ability to do so is
362	extremely limited. State laws provide the cities, county residents and property owners with the authority to
363	initiate the annexation process. A successful annexation initiative depends on establishing a collaborative and
364	ongoing dialogue between the three affected interest groups: residents, the ((e))County, and the affected city.
365	However, King County has a successful history of engaging in annexation discussions with urban
366	unincorporated area residents. Most recently, from 2008 to ((2015)) 2019, there have been six major
367	annexations:
368	• Lea Hill and Auburn West Hill into Auburn;
369	• Benson Hill into Renton;
370	• North Highline Area X into Burien;
371	• Panther Lake into Kent;
372	• Juanita-Finn Hill-Kingsgate into Kirkland; and
373	• Klahanie into Sammamish.
374	
375	In Chapter 2 Urban Communities, following page 2-39, strike the Potential Annexation
376	Areas Map and replace with the following:
377	
378	Potential Annexation Areas Map

- In Chapter 2 Urban Communities, following the Potential Annexation Areas Map, strike
   the Urban Centers Map and replace with the following:
- 382
- 383

### Urban Centers Map

n Chapter 3 Rura	I Areas and Natura	al Resource Lands,	on page 3-1,	amend as follows:

# 388

389 390

# CHAPTER 3 RURAL AREAS AND NATURAL RESOURCE LANDS

Rural King County is an essential part of the ((e))<u>C</u>ounty's rich diversity of communities and lifestyle choices, encompassing landscapes of scenic and great natural beauty. This chapter sets forth the ((e))<u>C</u>ounty's intent and policies to ensure the conservation and enhancement of rural communities and natural resource lands.

In addressing these Rural Area needs, this chapter also comprises the rural land use ((classifications)) <u>designations</u>, such as Rural Area, Rural Neighborhood Commercial Centers, and Rural Towns. It also addresses the designated Natural Resource Lands, which include lands designated Agriculture, Forest, or Mining on the Land Use Map.

2	o	1
3	9	I

# 392 In Chapter 3 Rural Areas and Natural Resource Lands, on page 3-20, amend as

## 393 <mark>follows:</mark>

394

395 In so doing, the Transfer of Development Rights Program: (1) benefits Rural Area and Natural Resource Land 396 property owners by providing them financial compensation to not develop their land, (2) directs future Rural 397 Area and Natural Resource Land development growth into urban areas, saving the County the cost of 398 providing services to rural development and yielding climate change benefits through reduced household 399 transportation-related greenhouse gas emissions, and (3) permanently preserves land through private market 400 transactions. Transfer of Development Rights can also be used to permanently protect open space and parks 401 in urban portions of the County while still focusing growth into other urban areas. 402 In Chapter 3 Rural Areas and Natural Resource Lands, starting on page 3-21, amend 403 404 as follows: 405 R-316 Eligible sending sites shall be lands designated on the King County Comprehensive Plan 406 land use map as: Rural Area (with RA-2.5, RA-5, ((and)) or RA-10 zoning), Agriculture 407 (with A zoning), Forestry (with F zoning), ((and)) Urban Separator (with R-1 zoning), 408 ((and)) or Urban Residential Medium or Urban Residential High (with R-4, R-6, R-8, R-12,

409R-18, R-24 or R-48 zoning and that are approved for Conservation Futures Tax funding).410These sites shall provide permanent land protection to create a significant public benefit.411Priority sending sites are:

412		a.	Lands in Rural Forest Focus Areas;
413		b.	Lands adjacent to the Urban Growth Area boundary;
414		с.	Lands contributing to the protection of endangered and threatened species;
415		о. d.	Lands that are suitable for inclusion in and provide important links to the
416		u.	regional open space system;
417		e.	Agricultural and Forest Production District lands;
418		6. f.	Intact shorelines of Puget Sound; ((er))
419		g.	Lands identified as important according to the Washington State Department of
420		9.	Ecology's Watershed Characterization analyses; or
421		h.	Lands contributing open space in urban unincorporated areas.
422			
423	R-317	For Tra	ansfer of Development Rights purposes only, qualified sending sites are allocated
424			pment rights as follows:
425		a.	Sending sites in the Rural Area zoned RA-2.5 shall be allocated one
426			Transferrable Development Right for every two and one-half acres of gross land
427			area;
428		b.	Sending sites in the Rural Area zoned RA-5 or RA-10 or Agricultural zoning shall
429			be allocated one Transferrable Development Right for every five acres of gross
430			land area;
431		c.	Sending sites with Forest zoning shall be allocated one Transferrable
432			Development Right for every eighty acres of gross land area;
433		d.	Sending sites with Urban Separator land use designation shall be allocated four
434			Transferrable Development Rights for every one acre of gross land area;
435		e.	Sending sites with an Urban Residential, Medium or Urban Residential, High
436			land use designation shall be allocated Transferrable Development Rights
437			equivalent to the zoning base density for every one acre of gross land area;
438		<u>f.</u>	If a sending site has an existing dwelling or retains one or more development
439			rights for future use, the gross acreage shall be reduced in accordance with the
440			site's zoning base density for the purposes of Transferrable Development Right
441			allocation; and
442		(( <del>f.</del> )) <u>q.</u>	King County shall provide bonus Transferrable Development Rights to sending
443			sites in the Rural Area as follows:
444			1. The sending site is a vacant RA zoned property and is no larger
445			than one-half the size requirement of the base density for the zone;
446			and
447			2. The sending site is a RA zoned property and is located on a
448			shoreline of the state and has a shoreline designation of
449			conservancy or natural.
450	In Chapter 3	3 Rural	Areas and Natural Resource Lands, on page 3-24, amend as
451	follows:		
452			
102			

453	R-323	The Rural and Resource Land Preservation Transfer of Development Rights Program
454		shall include, but is not limited to, the following:
455		a. In addition to the density that is allowed on a receiving site in the urban growth
456		area from the purchase of Transferrable Development Rights, the (( <del>c</del> )) <u>C</u> ounty
457		shall evaluate the climate change benefits achieved by reducing transportation
458		related greenhouse gas emissions that result from the transfer of development
459		rights from the sending site, provided that such consideration is not precluded
460		by administrative rules promulgated by the state;
461		b. In order to satisfy transportation concurrency requirements in the Rural Area in
462		a transportation concurrency travel shed that is non-concurrent, a development
463		proposal for a short subdivision creating up to four lots may purchase
464		Transferrable Development Rights from other Rural Area or Natural Resource
465		Land properties in the same travel shed; allowing this is intended to reduce
466		overall traffic impacts in rural travel sheds by permanently removing
467		development potential. The transfer shall not result in an increase in allowable
468		density on the receiving site. A short subdivision creating two lots where the
469		property has been owned by the applicant for five or more years and where the
470		property has not been subdivided in the last ten years shall satisfy the
471		transportation concurrency requirements without having to purchase
472		Transferrable Development Rights;
473		c. King County shall provide an added density bonus of up to a 100% increase
474		above the base density allowed in K.C. Code 21A.12.030, when Transferrable
475		Development Rights are used for projects within any designated commercial
476		center or activity center within the Urban Growth Area that provides enhanced
477		walkability design and incorporates transit oriented development, or when
478		Transfer of Development Rights are used for projects that provide affordable
479		housing in the R-4 through R-48 zones;
480		d. King County may allow accessory dwelling units in the Rural Area that are
481		greater than one thousand square feet, but less than 1,500 square feet, if the
482		property owner purchases one Transferrable Development Right from the Rural
483		Area, Agriculture or Forestry designations; and
484		e. King County may allow a detached accessory dwelling unit on a RA-5 zoned lot
485		that is two and one-half acres or greater and less than three and three-quarters
486		acres if the property owner purchases one Transferrable Development Right
487		from the Rural Area, Agriculture or Forestry designations.
488		
489	In Chante	er 3 Rural Areas and Natural Resource Lands, starting on page 3-35, amend
490	<mark>as follows</mark>	
401		

# 492 D. Non-Resource Industrial Uses and Development Standards in the Rural 493 Area

494 There are ((three)) existing industrially-zoned areas ((in the Rural Area containing multiple industrial 495 uses on several sites)) and throughout the Rural Area. The primary industrially-zoned areas include areas 496 located ((One is located)) within the southwest portion of the Town of Vashon.((. The second is a 497 designated industrial area)) in an area adjacent to the Rural Neighborhood Commercial Center of 498 Preston, and in an area along State Route 169. The Preston Industrial Area ((recognizes)) includes an 499 existing concentration of industrial uses that contributes to the economic diversity of the Rural Area, 500 ((but)) and expansion of this designated industrial area ((beyond the identified boundaries)) is not 501 permitted (see Policy CP-547). The ((third)) industrial area ((is located)) along State Route 169 is located 502 on ((lands)) sites that have been and continue to be used as for industrial purposes and have a designation 503 as a King County Historic Site. There are also existing industrial uses that are recognized on sites in the Rural Area that are not zoned Industrial. Further expansion of these industrial uses is not encouraged 504 505 and the sites are not appropriate for Industrial zoning. 506 507 R-512 ((The creation of new)) Industrial-zoned lands in the Rural Area shall be limited 508 to existing sites or those that have long been used for industrial or comparable 509 purposes with similar impacts, ((do not have potential for conversion to 510 residential use due to a historic designation and that may be accessed directly 511 from State Route 169)) in order to reduce pressure for growth, limit impacts on 512 nearby natural resources and functions, and avoid the need for infrastructure 513 extensions. Existing industrial uses in the Rural Area zone that do not qualify 514 to be zoned Industrial may continue if they are permitted uses or legal, 515 nonconforming uses. 516 517 R-513 Rural Public Infrastructure Maintenance Facilities((,)) and agriculture and 518 forestry product processing should be allowed in the Rural Area. ((Other new 519 industrial uses in the Rural Area shall be permitted only in Rural Towns and in 520 the designated industrial area adjacent to the Rural Neighborhood Commercial 521 Center of Preston.)) 522 523 In order to preserve rural character and protect sensitive natural features, ((new)) rural industrial 524 development in the Rural Area needs to be of a scale and nature that is distinct from urban industrial 525 development. The scale and intensity and many of the uses allowed in urban industrial development are

526 not appropriate for rural industrial ((areas)) <u>development</u>. The following policy applies to all new

527 industrial development in the Rural Area.

528 529	In Chapter 3 Rural Areas and Natural Resource Lands, on page 3-36, amend as
529 530	follows:
531	
532 533 534 535	The intent of ((this policy)) these policies is to ((preclude)) limit expansion of the industrial area ((beyond the identified boundaries)) and to ensure that new development and uses ((()) not previously ((constructed)) legally established or vested (()) in ((the)) rural industrial areas meet((s)) rural character standards. Site design, landscaping, design and construction of internal and access roads and building
536	scale should reinforce the ((set boundaries and)) rural nature of the industrial area to further discourage
537	future industrial expansion ((beyond the industrial boundary)).
538	
539	((There are also existing, isolated industrial sites in the Rural Area that are recognized, but are not
540	appropriate for new industrial uses. Further expansion of these isolated industrial uses is not encouraged,
541	and therefore they are not zoned Industrial.))
542	
543	((R-515 Existing industrial uses in the Rural Area outside of Rural Towns, the industrial area on
544	the King County-designated historic site along State Route 169 or the designated
545	industrial area adjacent to the Rural Neighborhood Commercial Center of Preston shall
546	be zoned rural residential but may continue if they qualify as legal, nonconforming
547	<del>uses.</del> ))
548	
549	In Chapter 3 Rural Areas and Natural Resource Lands, starting on page 3-38, amend
550	as follows:
551	
552	A. Ensuring Conservation and Sustainable Use of Resource Lands

King County's Natural Resource Lands contribute to the economic prosperity of the region. They are the
lands with long-term commercial significance for farming, forestry, and ((minerals)) mineral extraction.
Businesses that rely on resource lands provide jobs and products, such as food, wood, and gravel. They
also are an important part of the cultural heritage. Conservation and responsible stewardship of working
farm and forest lands also produces multiple environmental benefits, such as:

- Stream and salmon protection;
- Clean air and water;
- Wildlife habitat;

561	• Flood risk reduction;
562	• Groundwater recharge and protection; and
563	• Carbon sequestration and reduced greenhouse gas emissions.
564	
565	For ((mining)) mineral extraction, responsible stormwater management, erosion and sediment control,
566	and site remediation can help to mitigate many of the impacts ((of mining)) while providing local sources
567	of materials such as sand and gravel.
568	
569	King County has taken major steps to conserve and manage agricultural soils and activities, forestry and
570	((mining)) mineral extraction opportunities. Natural Resource Lands and the industries they support are
571	conserved by encouraging development to occur primarily in the Urban Growth Area as directed by the
572	Growth Management Act. Under this Comprehensive Plan, Resource Lands, including designated
573	Agricultural Production Districts, the Forest Production District and sites of long-term commercial
574	significance for resource uses, will have minimal new residential and commercial development. New
575	development that does occur will be designed to be compatible with active resource-based uses.
576	
577	This chapter contains King County's strategy for conservation of these valuable Resource Lands and for
578	encouraging their productive and sustainable management. The strategy consists of policies to guide
579	planning, incentives, education, regulation and purchase or transfer of development rights.
580	
581	Forest, (( <del>farm</del> )) <u>agriculture</u> , and mineral <u>resource</u> lands are not King County's only natural resources.
582	Many other resource-based industries, such as the fisheries industry, are influenced by King County's
583	land use and planning policies. Policies for the protection and enhancement of fisheries, as well as air,
584	water, vegetation, wildlife and other natural resources, can be found in Chapter 5, Environment.
585	
586	In Chapter 3 Rural Areas and Natural Resource Lands, on page 3-40, amend as
587	follows:
588	
589	The Growth Management Act also requires designation of mineral resource lands primarily devoted to
590	the extraction of minerals or that have known or potential long-term significance for the extraction of
591	minerals. Minerals include, but are not limited to, gravel, sand, and valuable metallic substances. Coal
592	is not considered a mineral resource in King County. Such lands are shown as Designated Mineral
593	Resource Sites on the Mineral Resources Map in this chapter. The role of the Forest Production District
594	in the conservation of mineral resources is also explained below.
595	

596	In Chapter	r 3 Rural Areas and Natural Resource Lands, on page 3-43, amend as
597	<mark>follows:</mark>	
598		
599	Resource ma	anagement strategies that protect the environment are necessary to maintain the long-term
600		of the resource. Chapter 5, Environment, describes the value of using an integrated,
601	ecosystem-b	ased approach to natural resource and environmental planning and management. This
602	approach, al	ong with sound operational practices by resource-based industries, may be able to prevent or
603	minimize en	vironmental impacts associated with common agricultural and forest practices and
604		<u>nineral extraction</u> while maximizing co-benefits.
605		
606	In Chapter	r 3 Rural Areas and Natural Resource Lands, on page 3-44, amend as
607	follows:	
608		
609	R-620	The Forest Production District shall remain in large blocks of contiguous forest
610		lands where the primary land use is commercial forestry. Other resource industry
611		uses, such as (( <del>mining</del> )) <u>mineral extraction</u> and agriculture, should be permitted
612		within the Forest Production District when managed to be compatible with
613		forestry.
614		
615	In Chapte	r 3 Rural Areas and Natural Resource Lands, on page 3-48, amend as
616	follows:	
617		
618	R-632	King County should continue to work with all affected parties and the Washington
619		State Department of Natural Resources to improve the enforcement of forest
620		practice regulations in the Rural Area, and to ensure that landowners comply with
621		county regulations when they are converting portions of a site to a non-forest use.
622		Harvesting of forest lands for the purpose of converting to non-forest uses shall
623		meet all applicable county standards for clearing and critical areas
624		management((-)), and the loss of carbon sequestration capacity resulting from
625		such forest conversions should be fully mitigated. Landowners opting to conduct
626		forest management activities under state approved forest practices permits should
627		be restricted from developing those areas for non-resource purposes for six years
628		from the date of forest practice approval. Recognizing that some landowners
629		combine the development of a residence or an agricultural activity on a portion of
630		the property with long-term forestry on the rest, the county should provide

flexibility in its regulations to address the residential development and agricultural activity differently from the forest management.

633

634 In Chapter 3 Rural Areas and Natural Resource Lands, on page 3-56, amend as

- 635 follows:
- 636

637 The 2012 Comprehensive Plan ((Update)) update added policy R-650 that directed the County to

638 convene a collaborative watershed planning process within each of the Agricultural Production Districts.

639 The County choose to start the process in the Snoqualmie Valley Agricultural Production District, where

640 the County has undertaken a number of habitat restoration projects, to develop an approach to

641 improving and balancing the interests of agricultural production, ecological function and habitat quality

642 for salmon, and flood risk reduction and floodplain restoration.

643

# In Chapter 3 Rural Areas and Natural Resource Lands, starting on page 3-58, amend as follows:

645 646

647 R-650a The Snoqualmie Valley Agricultural Production District is the first Agricultural 648 Production District to undergo a watershed planning effort called for in R-650. 649 King County shall implement the recommendations of the Snogualmie Fish, 650 Farm and Flood Advisory Committee. The recommendations of the task forces 651 and other actions identified in the final Advisory Committee Report and Recommendations will form the basis for a watershed planning approach to 652 653 balance fish, farm and flood interests across the Snogualmie Valley Agricultural 654 Production District and an agreement on protecting a defined number of acres 655 of agricultural land. The Advisory Committee, or a successor committee, will 656 monitor progress of the task forces and will reconvene to evaluate the 657 watershed planning approach to balancing interests prior to the next Comprehensive Plan ((Update)) update. The policy issues and 658 659 recommendations outlined in the Snoqualmie Fish, Farm, Flood Advisory 660 Committee Report and Recommendations are largely specific to the 661 Snoqualmie Valley and are not intended to be applied broadly in other 662 Agricultural Production Districts. Future Fish, Farm, Flood efforts focused in 663 other Agricultural Production Districts will need to go through their own 664 processes to identify barriers to success for all stakeholders in these 665 geographic areas. R-649 continues to apply to the Snoqualmie Valley 666 Agricultural Production District until the watershed planning effort outlined in

667		the Fish, Farm and Flood recommendations is complete. A policy reflecting the
668		outcome of this effort shall be included in the next eight-year (( <del>cycle</del> )) <u>update</u>
669		(( <del>Comprehensive Plan Update</del> )).
670		
671	In Chapter 3	3 Rural Areas and Natural Resource Lands, on page 3-59, amend as
672	<mark>follows:</mark>	
673		
674	R-652	King County commits to preserve Agricultural Production District parcels in or
675		near the Urban Growth Area because of their high production capabilities, their
676		proximity to markets, and their value as open space. King County should work
677		with cities adjacent to or near Agricultural Production Districts to minimize the
678		operational and environmental impacts of urban development and public facilities
679		<u>and infrastructure</u> on farming <u>and farmland,</u> and to promote activities (( <del>and</del>
680		infrastructure)), such as Farmers Markets and agriculture processing businesses,
681		that benefit both the cities and the farms by improving access to locally grown
682		agricultural products.
683		
684	In Chapter 3	3 Rural Areas and Natural Resource Lands, starting on page 3-60, amend
685	<mark>as follows:</mark>	
686		
687	R-655	Public services and utilities within and adjacent to Agricultural Production
688		Districts shall be designed to support agriculture and minimize significant
689		adverse impacts on agriculture and to maintain total farmland acreage and the
690		area's historic agricultural character:
691		a. Whenever feasible, water lines, sewer lines and other public facilities
692		should avoid crossing Agricultural Production Districts. Installation
693		should be timed to minimize negative impacts on seasonal agricultural
694		practices;
695		b. Road projects planned for the Agricultural Production Districts,
696		including additional roads or the widening of roads, should be limited to
697		those that are needed for safety or infrastructure preservation and that
698		benefit agricultural uses. Where possible, arterials should be routed
699		around the Agricultural Production Districts. Roads that cross
700		Agricultural Production Districts should be aligned, designed, signed
701		and maintained to minimize negative impacts on agriculture, and to
702		support farm traffic; and

703		c. In cases when <u>King County concludes that regional public ((or privately</u>
704		owned facilities meeting regional needs)) infrastructure cannot be
705		located outside of, and must intrude into, Agricultural Production
706		Districts, the County shall ensure that the infrastructure ((they should))
707		be built and located to minimize disruption of agricultural activity, and
708		shall establish agreements with the relevant jurisdictions or agencies.
709		d. If public services and utilities reduce total acreage in the Agricultural
710		Production District, mitigation shall follow the criteria established in
711		policy R-656a.
712		
713	R-656	(( <del>Lands can</del> )) <u>King County may allow lands to</u> be removed from the Agricultural
714		Production Districts only when it can be demonstrated that:
715		a. Removal of the land will not diminish the productivity of prime
716		agricultural soils or the effectiveness of farming within the local
717		Agricultural Production District boundaries; and
718		b. The land is determined to be no longer suitable for agricultural
719		purposes; (( <del>and</del> )) <u>or</u>
720		c. The land is needed for public services or utilities as described in policy
721		<u>R-655.</u>
722		
723	<u>R-656a</u>	<u>King County may only approve the</u> ((유)) <u>r</u> emoval of (( <del>the</del> )) land from the
724		Agricultural Production District (( <del>may occur only</del> )) if it is <u>, concurrently with</u>
725		<u>removal of the land from the Agricultural Production District,</u> mitigated through
726		the (( <del>addition</del> )) <u>replacement</u> of agricultural land abutting the same Agricultural
727		Production District that is, at a minimum, comparable in size, soil quality and
728		agricultural value. As alternative mitigation, the County may approve a
729		combination acquisition and restoration totaling three acres for every one acre
730		removed as follows:
731		a. A minimum of one acre must be added into another Agricultural
732		Production District for every acre removed; and
733		b. Up to two acres of unfarmed land in the same Agricultural Production
734		District from which land is removed shall be restored for every acre
735		removed.
736		
737	In Chapter 3	3 Rural Areas and Natural Resource Lands, on page 3-63, amend as
738	follows:	
739		

- 740R-664King County supports innovative technologies to process dairy and other741livestock waste to reduce nutrients and to create other products such as742energy and compost in ((the)) areas that have Agriculture and ((rural743classifications)) Rural Area land use designations.
- In Chapter 3 Rural Areas and Natural Resource Lands, starting on page 3-68, amend
   as follows:
- 747

## 748 E. Mineral Resources

King County contains many valuable mineral resources, including deposits of ((coal,)) sand, rock, gravel,
silica, clay, and metallic ores. ((and potentially recoverable gas and oil. Mining)) Mineral extraction and
processing these deposits is an important part of King County's economy, currently providing hundreds
of jobs and producing materials used locally, regionally, and nationally. ((Mining)) Mineral extraction
also has historic significance, in that it provided the impetus for past development in many parts of King
County, including Black Diamond and the Newcastle area.

755

King County is required by the Growth Management Act to designate and conserve mineral <u>resource</u>
lands and plan appropriately to protect them. In doing so the ((e))<u>C</u>ounty must assure that land uses
adjacent to mineral <u>resource</u> lands do not interfere with the continued use of mineral <u>resource</u> lands in
their accustomed manner and in accordance with best management practices. The policies in this section
explain the steps taken to designate and conserve mineral resource lands and provide direction on the

761 comprehensive review needed before additional sites are designated for mineral resource extraction.

762

Four main steps are necessary to <u>support and</u> maintain ((and enhance commercial)) local availability of mineral resources ((industries)). First, mineral resource sites should be conserved through designation and zoning. Second, land use conflicts between ((mining)) <u>mineral extraction</u>, processing and related operations and adjacent land uses should be prevented or minimized through policies and assessment and mitigation of environmental impacts. Third, operational practices should protect environmental quality, fisheries and wildlife, in balance with the needs of the industry. Finally, ((mining)) <u>mineral extraction</u> areas need to be reclaimed in a timely and appropriate manner.

- 770
- 771 The Mineral Resources Map identifies ((<del>four</del>)) <u>three</u> different types of Mineral Resource Sites <u>–</u>
- 772 Designated Mineral Resource Sites, Potential Surface Mineral Resources, and Nonconforming Mineral
- 773 <u>Resource Sites and Existing Mineral Resource Sites in the Forest Production District</u>. The sites were
- identified in the 1994 King County Comprehensive Plan or in subsequent annual updates. ((Following))

- 775 <u>Before</u> the Mineral Resources Map is a ((spreadsheet)) table that contains information on each Mineral
  776 Resource Site parcel.
- 777

778 The Designated Mineral Resources Sites on the Mineral Resources Map satisfy King County's

responsibility to designate and conserve mineral resources consistent with requirements of the Growth

780 Management Act. All Designated Mineral Resources Sites have Mineral zoning. Most of the

781 Designated Mineral Resources Sites shown on the map contain sand and/or gravel; however, a few

782 contain other mineral resources such as silica, rock, stone, shale, and clay. The criteria used in the 1994

783 King County Comprehensive Plan called for designation of properties that at the time were either zoned

outright for mining or those operating under an approved Unclassified Use Permit. In addition to the

785 designated Mineral Resources Sites, the Forest Production District and Forest (F) zone preserves the

786 opportunity for mineral extraction. ((Mining)) Mineral extraction is a permitted or conditional use in the

787 F zone. Because forestry does not preclude future mineral extraction, King County considers the Forest

788 Production District as part of its strategy to conserve mineral resources.

789

790 The Mineral Resources Map also shows Potential <u>Surface</u> Mineral Resource Sites. These are sites where 791 King County ((expects)) may allow some future surface mining to occur or where the owner or operator 792 indicates an interest in future ((mining)) mineral extraction. ((Most of the)) The Potential Surface 793 Mineral Resources Sites shown on the map ((contain sand and/or gravel; however, a few contain other 794 mineral resources such as quarry rock and coal)) do not indicate the material. Because of the geology of 795 King County, most valuable metallic mineral resources are located in the Forest Production District, and 796 are therefore already protected from urban development. Identification of Potential Surface Mineral 797 Resources Sites satisfies the Growth Management Act requirements to not knowingly preclude opportunities for future ((mining)) mineral extraction and to inform nearby property owners of the 798 799 potential for future ((mining)) mineral extraction use of these areas in order to prevent or minimize 800 conflicts.

801

The Mineral Resources Map also shows ((Non-Conforming)) Nonconforming Mineral Resources Sites. 802 803 These are sites on which some mining operations predated King County zoning regulations without 804 appropriate zoning or other land use approval. Mining for these sites has not been authorized through a 805 ((Land Use Map or zoning designation)) land use designation or zoning classification. These sites are 806 shown for informational purposes only. Mining can occur on an identified site only if mining has been 807 approved as a nonconforming use by the Department of Local Services - Permitting Division ((and 808 Environmental Review)), and mining activities have received all other necessary permit approvals. 809 Because the sites have not undergone formal review to be designated on the Land Use Map or zoned for

- 810 mining, the sites do not have long-term commercial significance. However, they can continue to serve811 mineral supply needs.
- 812

812		
813	(( <del>The Mineral</del>	Resources Map also shows Owner Identified Potential Coal Mining Sites that contain
814	subsurface coa	al resources. These sites could be mined by either underground or surface mining
815	techniques. B	Because of continued uncertainties involving the economics of energy and related market
816	conditions, it	is not always possible to determine the timing or likelihood of coal resources extraction in
817	potential coal	mining areas. Underground and surface coal mining is subject to permitting and
818	enforcement b	by the federal government. King County regulates land use decisions governing surface
819	facilities. Bec	ause of the difficulty in precisely locating these facilities prior to an actual proposal, King
820	County deterr	nined to not apply Potential M zoning to owner-identified coal resources sites.))
821		
822	R-679	King County shall identify existing and potential (( <del>mining</del> )) <u>mineral extraction</u>
823		sites on the Mineral Resources Map in order to conserve mineral resources,
824		promote compatibility with nearby land uses, protect environmental quality,
825		maintain and enhance mineral resource industries and serve to notify property
826		owners of the potential for (( <del>mining</del> )) <u>mineral extraction</u> activities. The
827		((ɛ)) <u>C</u> ounty shall identify:
828		a. Sites with existing Mineral zoning as Designated Mineral Resource
829		Sites;
830		b. Sites where the landowner or operator has indicated an interest in
831		(( <del>mining</del> )) <u>mineral extraction</u> , sites that as of the date of adoption of the
832		1994 Comprehensive Plan had potential Quarrying/Mining zoning, or
833		sites that the (( <del>c</del> )) <u>C</u> ounty determines might support future (( <del>mining</del> ))
834		<u>mineral extraction</u> as Potential <u>Surface</u> Mineral Resource Sites; <u>and</u>
835		c. Sites where mining operations predate zoning regulations but without
836		zoning or other land use approvals as (( <del>Non-Conforming</del> ))
837		<u>Nonconforming</u> Mineral Resource Sites(( <del>; and</del>
838		d. Owner-Identified Potential Sub-Surface Coal Sites)).
839		
840	R-680	King County shall designate as (( <del>mining</del> )) <u>Mining</u> on the Comprehensive Plan
841		Land Use Map those sites that had Potential Mineral (M) zoning prior to the date
842		of adoption of the 1994 Comprehensive Plan and those sites that had Mineral
843		zoning as of the date of the adoption of the <u>2000</u> King County Comprehensive
844		Plan (( <del>2000 Update</del> )) <u>update</u> .
845		

846		A (( <del>m</del> )) <u>M</u> ining designation on the Land Use Map shall not create a presumption
847		that Mineral zoning will be approved for sites with Potential Mineral zoning.
848		Potential Mineral zoning shall not be applied to additional sites.
849		
850	(( <del>Mining</del> )) <u>Mir</u>	neral extraction is an intense operation that may continue for many years. ((Mining))
851	Mineral extrac	tion operations can significantly change the land being mined and have impacts on the
852	environment a	nd on nearby properties. Beyond direct impacts to the mine site and nearby properties,
853	(( <del>the mining, t</del>	cansport, and end use of coal in production of electricity releases carbon that contributes))
854	mineral extract	tion and processing can contribute to greenhouse gas emissions. In 2014, the ((e))County
855	and cities upda	ted the Countywide Planning Policies to set a goal to reduce greenhouse gas emissions
856	80% by 2050 a	t the county scale. ((-
857	-	
858	))The (( <del>c</del> )) <u>C</u> our	nty's 2015 Strategic Climate Action Plan includes the same overarching goal.
859		
860	King County r	equires comprehensive review, including environmental analysis, prior to approving a
861	Land Use Map	and zoning change. Site-specific environmental review will also be required for a grading
862	permit or any o	other permit that is necessary for a ((mining)) mineral extraction operation. Therefore, a
863	comprehensive	site-specific study is required prior to any such approval.
864		
865	R-681	King County may designate additional sites on the Comprehensive Plan Land
866		Use Map as Mining only following a site-specific rezone to Mineral zoning.
867		Upon approval of a rezone to Mineral zoning, the Comprehensive Plan Land Use
868		Map shall be amended to designate the site as (( <del>mining</del> )) <u>Mining</u> during the next
869		Comprehensive Plan (( <del>amendment cycle</del> )) <u>update</u> . King County should approve
870		applications for site-specific rezones to Mineral zoning and applications for
871		permits that would authorize mineral extraction and processing only following
872		site-specific environmental study, early and continuous public notice and
873		comment opportunities, when:
874		a. The proposed site contains rock, sand, gravel, (( <del>coal, oil, gas</del> )) or other
875		mineral resources;
876		b. The proposed site is large enough to confine or mitigate all operational
877		impacts;
878 870		c. The proposal will allow operation with limited conflicts with adjacent
879		land uses when mitigating measures are applied;
880 881		d. The proposal has been evaluated under the State Environmental Policy
881 882		Act so that the (( <del>c</del> )) <u>C</u> ounty may approve, condition or deny applications
002		consistent with the (( <del>c</del> )) <u>C</u> ounty's substantive State Environmental Policy
		Comprohensive Plan Amondmente

883		Act authority, and in order to mitigate significant adverse environmental
884		impacts.
885		e. Roads or rail facilities serving or proposed to serve the site can safely and
886		adequately handle transport of products and are in close proximity to the
887		site.
888		
889	If King Cou	nty denies an application for a site-specific ((mining)) Mineral rezone it should remove the
890	Mining land	use designation from the Land Use map and the associated Potential Surface Resource
891	Mineral (( <del>zo</del>	ning for the)) site <u>designation</u> from the (( <del>county's Land Use maps</del> )) <u>Mineral Resources Map</u> .
892	If the (( <del>c</del> )) <u>C</u> o	ounty denies a permit that would authorize mineral extraction and/or processing on a
893	Designated I	Mineral Resources Site, the ((e)) <u>C</u> ounty should consider new information generated during
894	the permit re	view process to determine whether the site is not properly designated as mineral resource
895	land of long-	term commercial significance, the designation for the site on the Mineral Resources Map
896	should be ch	anged from Designated Mineral Resources Site to Potential ((surface)) Surface Mineral
897	Resource Sit	e. In addition, the Mining land use designation and the Mineral zoning classification for the
898	site should b	e amended to be compatible with the surrounding properties.
899		
900	R-682	King County should remove the Mining land use designation on the
901		Comprehensive Plan Land Use Map and associated Potential Mineral zone or
902		Mineral zoning for any sites that have been denied a rezone to Mineral.
903		
904		If a grading or other permit necessary for the extraction of mineral resources is
905		denied on a Designated Mineral Resource Site, the (( <del>ɕ))C</del> ounty shall evaluate
906		whether such mineral resource designation is appropriate. The re-evaluation
907		process may occur (( <del>during</del> )) <u>as part of</u> the annual (( <del>Comprehensive Plan</del>
908		amendment cycle)) update and information produced during the permit review
909		process shall be used to evaluate the appropriateness of changing the existing
910		designation. If the (( <del>c</del> )) <u>C</u> ounty determines that the site should not be designated
911		as mineral resource land of long-term commercial significance as defined in the
912		Growth Management Act, the <u>County shall evaluate whether the</u> site (( <del>shall be</del>
913		<del>redesignated to a Potential Surface</del> )) <u>should remain on the</u> Mineral Resource (( <del>Site</del>
914		<del>on the Mineral Resources</del> )) Map <u>.</u> and (( <del>to a</del> )) <u>whether the</u> land use designation and
915		zoning classification <u>should be changed, with consideration for</u> (( <del>compatible</del> ))
916		compatibility with the surrounding properties.
917		
918	R-683	King County may (( <del>update</del> )) <u>amend</u> the Mineral Resources Map to identify
919		additional Potential <u>Surface</u> Mineral Resource Sites (( <del>only during</del> )) <u>as part of</u> the

920		eight-year (( <del>Comprehensive Plan amendment cycle</del> )) or (( <del>as part of a</del> )) midpoint
921		update.
922		
923	R-684	The preferred adjacent land uses to sites designated as Mining on the Land Use
924		Map are (( <del>mining</del> )) <u>mineral extraction</u> , industrial, open space or forestry uses.
925		Sites for newly proposed Mineral zones shall not be adjacent to or within
926		Agricultural Production Districts. Agricultural lands and operations should be
927		protected from significant impacts associated with nearby (( <del>mine</del> )) <u>mineral</u>
928		extraction operations.
929		
930	R-685	(( <del>Mining</del> )) <u>Mineral extraction</u> activities are permitted within the Forest
931		Production District, consistent with policy R-620. However, a conditional use
932		permit shall be required for (( <del>mining</del> )) <u>mineral extraction</u> activities in the Forest
933		(( <del>Production District</del> )) <u>zone</u> located within one-quarter mile of established
934		residences or for proposals seeking to use local access streets where abutting
935		lots are developed for residential use.
936		
937	R-686	In order to comprehensively assess the environmental impacts associated with a
938		zoning change, conditional use or operating approval for a (( <del>mining</del> )) <u>mineral</u>
939		extraction proposal, the range of environmental impacts, including short-term and
940		long-term effects arising or existing over the lifetime of the proposal, shall be
941		assessed at the earliest possible stage. This should include the potential for
942		future proposals for structures and operations related to (( <del>mining</del> )) <u>mineral</u>
943		extraction, such as asphalt and concrete batch plants.
944		
945	R-687	King County should prevent or minimize conflicts with (( <del>mining</del> )) <u>mineral</u>
946		extraction when planning land uses adjacent to Designated Mineral Resource
947		Sites and Potential Surface Mineral Resource Sites. Subarea studies may
948		indicate areas where (( <del>mining</del> )) <u>Mining</u> is an inappropriate land use <u>designation</u> .
949		Designated Mineral Resource Sites and Potential Surface Mineral Resource
950		Sites and (( <del>nonconforming sites</del> )) <u>Nonconforming Mineral Resource Sites</u>
951		should be shown on <u>the</u> Mineral Resources Map and subarea study maps in
952		order to notify nearby property owners and residents of existing and
953		prospective ((mining)) mineral extraction activities.
954		
955	R-688	The periodic review process for mineral (( <del>extractive</del> )) <u>extraction</u> and processing
956		operations shall include sufficient public notice and comment opportunities.

957		The purpose of the periodic review process is to provide opportunities for
958		public review and comment on the mineral resource facility's fulfillment of state
959		and (( <del>c</del> )) <u>C</u> ounty regulations and implementation of industry-standard best
960		management practices, and for King County to modify, add or remove
961		conditions to address new circumstances and/or unanticipated
962		project-generated impacts. The periodic review process is not intended to
963		re-examine the appropriateness of the mineral resource use, or to consider
964		expansion of operations beyond the scope of existing permitted operations
965		since that review would be accomplished through the (( <del>c</del> )) <u>C</u> ounty's permitting
966		process. The periodic review is intended to be a part of King County's ongoing
967		enforcement and inspections of mineral resource sites, and not to be a part of
968		the (( <del>e</del> )) <u>C</u> ounty's permitting process.
969		
970	R-689	Conditions and mitigations for significant adverse environmental impacts
971		associated with mineral extraction or mining operations and their associated
972		structures or facilities should be required, especially in the following areas:
973		a. Air quality;
974		b. Environmentally sensitive and critical areas, such as surface and
975		groundwater quality and quantity, wetlands, fisheries and wildlife
976		habitats, and aquatic habitats;
977		c. Noise levels;
978		d. Vibration;
979		e. Light and glare;
980		f. Vehicular access and safety;
981		g. Land and shoreline uses;
982		h. Traffic impacts;
983		i. Visual impacts;
984		j. Cultural and historic features and resources;
985		k. Site security;
986		I. Climate change impacts from ((coal mined)) minerals extracted for
987		energy production; and
988		m. Others unique to specific sites and proposals.
989		
990	R-690	Where mineral extraction or mining are subject to state or federal regulations,
991		King County should work with the state and federal governments to ensure that
992		proposals (( <del>for underground mining, oil and gas extraction, and surface coal</del>
993		mining)) are reviewed with consideration of local land use and environmental

994		requirements, regional impacts from transport and assessment of climate
995		change impacts from end-use of (( <del>oil, gas and coal</del> )) <u>minerals and mined</u>
996		materials.
997		
998	R-691	King County should work with the Washington State Department of Natural
999		Resources to ensure that mining areas are reclaimed in a timely and
1000		appropriate manner. Reclamation of mineral extraction or mining sites in
1001		the Forest Production District should return the land to forestry. Where
1002		(( <del>mining</del> )) <u>mineral extraction</u> is completed in phases, reclamation also
1003		should be completed in phases as the resource is depleted. When
1004		reclamation of (( <del>mining</del> )) <u>mineral extraction</u> sites located outside of the
1005		Forest Production District is completed, the site should be considered for
1006		redesignation to a land use designation and zoning classification
1007		compatible with the surrounding properties.
1008		
1009	In Chapter 3	Rural Areas and Natural Resource Lands, starting on page 3-74, amend
1010	<mark>as follows:</mark>	
1011		
1012	<u>R-693</u>	King County shall prohibit the establishment of new coal mines and the
1013		expansion of existing coal mines.
1014

NOTE:

• Each map number corresponds to one or more parcel number(s), and in some cases different owners and operators. The acreage listed represents the sum acreage of all the parcels of the site. Please refer to the technical appendix for the parcel-specific version of this table.

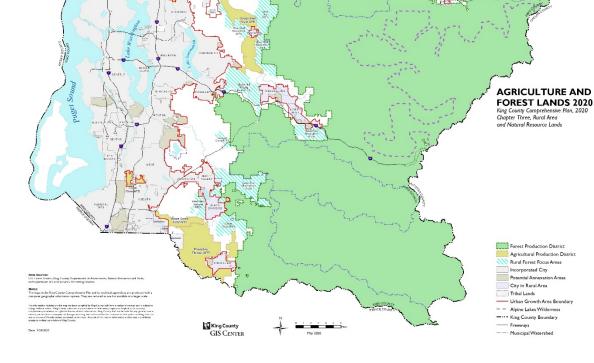

• Designated Mineral Resource Sites: Sites with Mineral Zoning.

• Potential Surface Resource Mineral Sites: Sites identified by the landowner or operator prior to

Nov.18, 1994 and sites as of Nov. 18, 1994 that had pending rezone applications for

Quarrying/Mining (now Mineral) zoning or had potential Quarrying/Mining (now Mineral) zoning.
 Such sites may or may not be able to operate, and are subject to all federal, state and local regulations.
 Nonconforming Mineral Resource Sites and Existing Mineral Resource Sites in the Forest
 Production District: Sites on which mineral extraction operations pre-date King County zoning regulations, but without zoning or other land use approvals.

## **Mineral Resources Map**

1034 1035

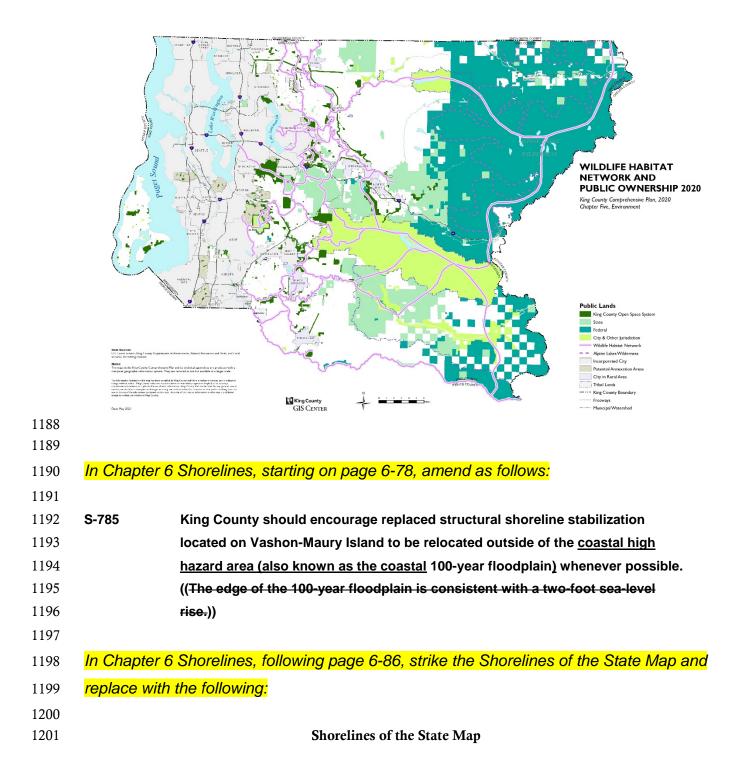

1036	King County has a role to play in promoting cooperation and public/private partnerships to address the
1037	full range of critical housing needs in King County and the Puget Sound region. King County convened
1038	the Regional Affordable Housing Task Force in July 2017. The task force met for 18 months to
1039	understand the affordable housing challenges and to meet people most affected by the lack of affordable
1040	units in the county. The task force work culminated in a Five-Year Action Plan and Final Report, which
1041	was adopted as the policy of the County in Motion 15372. The overarching goal of the Five-Year Action
1042	Plan is to "strive to eliminate cost burden for households earning 80 percent Area Median Income and
1043	below, with a priority for serving households at or below 50 percent Area Median Income." The Action
1044	Plan contains seven goals to accomplish the overall goal:
1045	
1046	1. Create and support an ongoing structure for regional collaboration;
1047	2. Increase construction and preservation of affordable homes for households earning less than 50

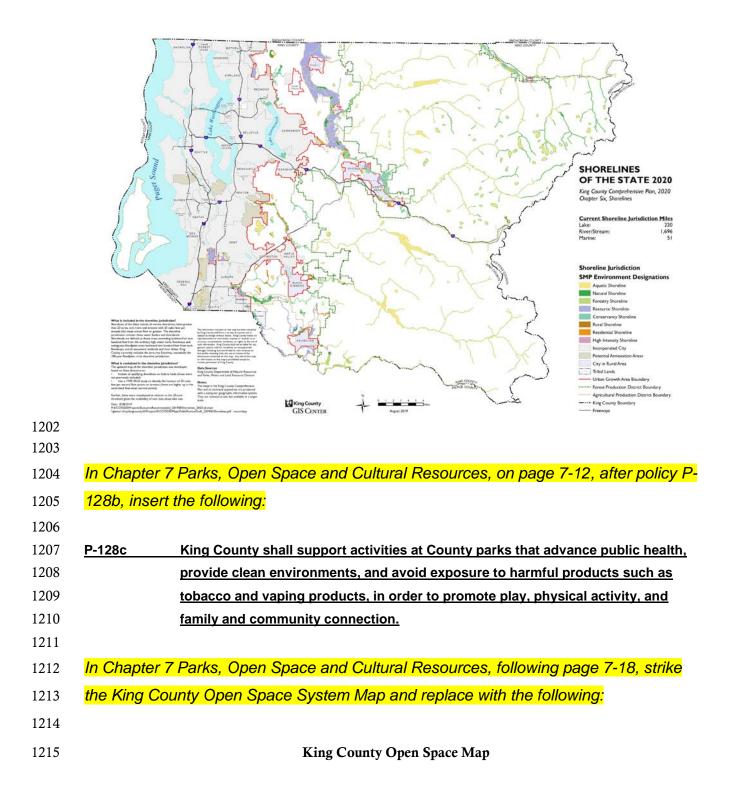

1048	percent area median income;		
1049	3. Prioritize affordability accessible within a half-mile walkshed of existing and planned frequent		
1050	transit service, with a particular priority for high-capacity transit stations;		
1051	4. Preserve access to affordable homes for renters by supporting tenant protections to increase		
1052	housing stability and reduce risk of homelessness;		
1053	5. Protect existing communities of color and low-income communities from displacement in		
1055	gentrifying communities:		
1055	6. Promote greater housing growth and diversity to achieve a variety of housing types at a range of		
1056	affordability and improve jobs/housing connections throughout King County; and		
1057	7. Better engage local communities and other partners in addressing the urgent need for and benefits		
1058	of affordable housing.		
1059			
1060	The King County Department of Community and Human Services is managing the County's role in		
1061	implementing the Five-Year Action Plan, in collaboration with other internal parties such as the Metro		
1062	Transit Department, the Facilities Management Division, the Department of Natural Resources and		
1063	Parks, and the Department of Local Services. The King County Growth Management Planning Council		
1064	created a new Affordable Housing Committee to serve as a regional advisory body with the goal of		
1065	recommending actions and assessing progress toward implementation of the Five-Year Action Plan. The		
1066	Committee is comprised of representatives of King County, the City of Seattle, Sound Cities Association,		
1067	housing authorities, and others with expertise in affordable housing, including preventing displacement.		
1068	The Committee is responsible for recommending amendments to the Countywide Planning Policies,		
1069	including regional goals, metrics, and land use policies. The Committee functions as a point of		
1070	coordination and accountability for affordable housing efforts across King County.		
1071			
1072	In Chapter 4 Housing and Human Services, on page 4-20, amend as follows:		
1073			
1074	H-201 In coordination with local jurisdictions, funding partners and community		
1075	partners, King County will seek to build and sustain coordinated regional health		
1076	and human services and behavioral health systems to provide services,		
1077 1078	supports, safety and opportunity to those most in need. In carrying out its role in such systems, King County government will:		
1078	a. Work with other jurisdictions and organizations to define a regional		
1075	health and human services and behavioral health systems and		
1081	strengthen financing, access and overall effectiveness of services;		
	с		

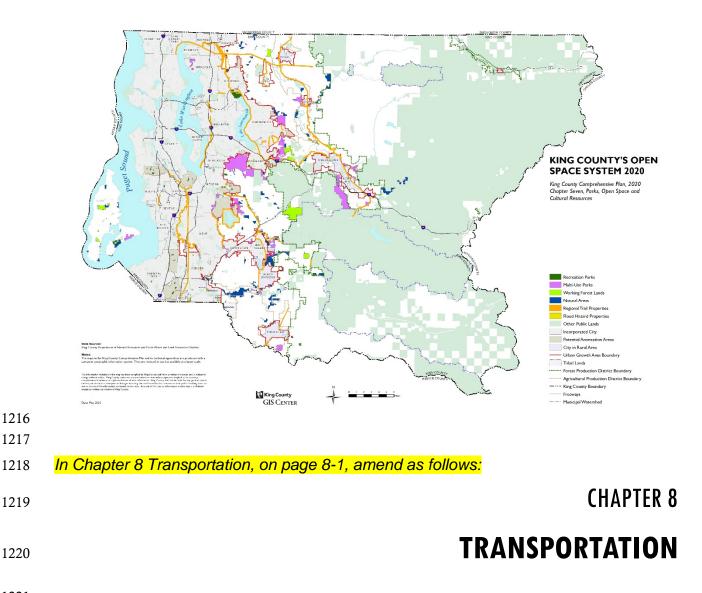

1082	b.	Collaborate with other funders to assure coordination in how funds are
1083		used, and continue to explore improvements to system design,
1084		contracting, data collection and analysis;
1085	с.	Retain responsibility for the development and implementation of
1086		mandated, through law or adopted (( <del>c</del> )) <u>C</u> ounty policy, countywide
1087		specialty systems for behavioral health (including mental health and
1088		substance use disorder treatment), physical, emotional and cognitive
1089		health, public health, drug and alcohol abuse and dependency,
1090		veterans, <u>older adults, children and youth, vulnerable adults,</u> and people
1091		with developmental disabilities;
1092	d.	Define its regional role in other human service and prevention-oriented
1093		systems, including systems that address homelessness, older adults'
1094		needs, domestic violence, sexual assault, crisis diversion and re-entry,
1095		early intervention and prevention and youth and family services;
1096	е.	Assess and measure the health and needs of King County's residents
1097		on an ongoing basis and modify strategies to respond to changing
1098		needs, outcomes, and new research; and
1099	f.	Review the effectiveness and appropriateness of this policy framework
1100		periodically and revise if needed.
1101 1102		
1103	In Chapter 5 Enviro	nment, on page 5-5, amend as follows:
1104		
1105	As part of the 2004 Cor	nprehensive Plan (( <del>Update in 2004</del> )) <u>update</u> , King County updated its critical
1106	areas, stormwater runo	ff management, and clearing and grading regulations consistent with Growth
1107	Management Act requi	rements to include best available science. These regulations are functionally
1108	interrelated, with the st	andards for protection of wetlands, aquatic areas, and wildlife areas also working
1109	in tandem with landsca	pe-level standards for stormwater management, water quality, and clearing and
1110	grading.	
1111		
1112	In Chapter 5 Enviro	nment, on page 5-12, amend as follows:
1113		
1114	The Puget Sound Partn	ership was created by the Washington State Legislature and Governor in July
1115	2007 to achieve the reco	overy of the Puget Sound ecosystem by the year 2020. Its goal is to consolidate
1116	and significantly streng	then the federal, state, local, and private efforts undertaken to date to protect and
1117	restore the health of Pu	get Sound and its watersheds. The Puget Sound Partnership also serves as an
1118	umbrella group for saln	non recovery efforts in Puget Sound, including implementation of salmon

1119	recovery plans prepared for Chinook salmon. King County, through its land use decisions, management		
1120	of stormwater and wastewater discharges, development of recycled water supplies, cooperative habitat		
1121	protection and restoration projects, work in flood risk reduction, salmon recovery, support for		
1122	agricultural and natural land protection, actions to address climate change and ongoing environmental		
1123	monitoring, is actively involved in the conservation and recovery of Puget Sound. King County has the		
1124	opportunity, and responsibility, to make significant contributions to protecting and restoring Puget		
1125	Sound. The Puget Sound Partnership's 2018-2020 Action Agenda for Puget Sound was revised in 2012,		
1126	2014, ((and)) 2016, and 2018, focusing on three Strategic Initiatives: protecting and restoring habitat,		
1127	preventing pollution from stormwater, and recovering shellfish beds. ((The Partnership anticipates		
1128	updating the Action Agenda again in 2018.))		
1129			
1130	In Chapter 5 Environment, starting on page 5-20, amend as follows:		
1131			
1132	Climate change impacts are here and now; in the last century, sea level in Seattle has risen by eight inches		
1133	and average annual temperatures in the Pacific Northwest have increased 1.5 degrees Fahrenheit. While		
1134	greenhouse gas emissions must be reduced to avoid the worst impacts of climate change, impacts are		
1135	projected even if global and local greenhouse gas emissions are drastically cut. The County is integrating		
1136	climate change preparedness into:		
1137	Operations and maintenance of infrastructure, programs and natural resources;		
1138	Provision of public services:		
1139	Policies and regulations; and		
1140	Partnerships with other local governments, community groups and businesses.		
1141			
1142	In Chapter 5 Environment, on page 5-20, after policy E-215b:		
1143			
1144	E-215bb King County should implement regulations that mitigate and build resiliency to		
1145	the anticipated impacts of climate change, based on best available information.		
1146	Such impacts include sea level rise, changes in rainfall patterns and flood		
1147	volumes and frequencies, changes in average and extreme temperatures and		
1148	weather, impacts to forests including increased wildfires, droughts and pest infiltrations. Methods could include mitigating grouphouse gas emissions		
1149 1150	infiltrations. Methods could include mitigating greenhouse gas emissions, establishing sea level rise regulations, and/or strengthening forests ability to		
1150	establishing sea level rise regulations, and/or strengthening forests ability to withstand impacts.		
1151			

1153	<u>E-215bbb</u>	King County shall assess the best available sea level rise projections two years
1154		prior to each eight-year update, and shall incorporate the projections into the
1155		Comprehensive Plan where appropriate.
1156		
1157	In Chapter	5 Environment, on page 5-33, amend as follows:
1158		
1159	E-420	King County should incorporate climate change projections into new
1160		species protection plans, and shall revise older species protection plans
1161		when feasible or when conducting (( <del>regular plan</del> )) <u>eight-year</u> updates to
1162		incorporate projected impacts from climate change.
1163		
1164	In Chapter	5 Environment, on page 5-42, amend as follows:
1165		
1166	E-440	King County should regularly review the Washington Department of Fish and
1167		Wildlife's list of Priority Species and other scientific information on species of
1168		local importance, and evaluate whether any species should be added to or
1169		deleted from the lists in <u>policies</u> E-435 and E-437. Any additions or deletions
1170		should be made through the annual (( <del>amendment process for the</del>
1171		comprehensive plan)) update.
1172		
1173	In Chapter	5 Environment, on page 5-42, after policy E-441, insert the following:
1174		
1175	In accordance	e with new statutory requirements, as described in Chapter 9, Services, Facilities and
1176	<u>Utilities, the I</u>	Department of Ecology has established a Watershed Restoration and Enhancement
1177	Committee in	all five Watershed Resource Inventory Areas located either entirely or partially within
1178	King County.	King County is participating in the Ecology process of developing a flow restoration
1179	<u>strategy for ea</u>	ach of the Watershed Resource Inventory Areas to mitigate the consumptive use of new
1180	permit-exemp	ot wells drilled in the next 20 years. The flow restoration strategies are anticipated to be
1181	recommended	<u>d by 2021.</u>
1182		
1183		
1184	In Chapter	5 Environment, following page 5-83, strike the Wildlife Habitat Network and
1185	Public Own	ership Map and replace with the following:
1186		
1187		Wildlife Habitat Network and Public Ownership Map

Transportation is critically important to King County and the surrounding region and has profound effects on quality of life and the vitality of the economy. Transportation provides access to jobs, education, services, recreation, and other destinations throughout King County. King County plays a central role in the regional transportation sector, supporting a variety of motorized, nonmotorized, air and marine King County Metro also operates <u>streetcar</u> <u>services within</u> the City of Seattle ((<del>South</del> <del>Lake Union streetcar</del>)). The King County International Airport/Boeing Field is owned, operated and maintained by the ((e))<u>C</u>ounty.

King County's Marine Division operates passenger-only ferry service from downtown Seattle to Vashon Island and West Seattle. transportation needs and providing services and facilities ranging from local to international.

The  $((\epsilon))\underline{C}$  ounty has direct responsibility for the unincorporated area road network. It provides transit services and facilities throughout the  $((\epsilon))\underline{C}$  ounty, including within cities, and also performs many of Sound Transit's services under contract.

The  $((e))\underline{C}$  ounty also provides requested roadrelated services to over two dozen cities or other agencies through contractual agreements where there is mutual benefit to the  $((e))\underline{C}$  ounty and its customer cities and agencies.

## 1224 In Chapter 8 Transportation, on page 8-3, amend as follows:

1225

1223

The current and projected economic climate, however, places severe constraints on the ((e))<u>C</u>ounty's
 ability to meet these important goals. The strategic plans for the <u>Road Services Division</u>, Metro Transit
 <u>Department</u>, and the Marine((<del>, and Road Services Divisions</del>)) <u>Division</u> identify priorities, analyze
 available funding and constraints, and set targets to help reach these goals.

1230

#### 1231 In Chapter 8 Transportation, on page 8-5, amend as follows:

1232

1233 Public transportation is vitally important to the Puget Sound region. It provides connections to jobs, 1234 schools, and other destinations, and enables those with limited mobility options to travel. Public 1235 transportation enhances regional economic vitality by freeing up roadway capacity and improving the 1236 mobility of people, goods, and services. It saves the region time and money. It helps accommodate 1237 regional growth by making better use of the region's existing infrastructure and benefiting the 1238 environment. Public transportation improves the quality of life and health for residents and visitors to the 1239 Puget Sound region. King County provides public transportation services through the Metro Transit 1240 ((<del>Division</del>)) Department, as well as passenger ferry service through the Marine Division. 1241

### 1242 Metro Transit ((Division)) Department

The King County ((Department of Transportation's)) Metro Transit ((Division)) Department (Metro) is
the designated public transit provider for King County. Metro's mission is to provide the best possible
public transportation services and improve regional mobility and quality of life in King County. Metro

- 1246 provides more than 120 million fixed-route transit rides per year. Its fixed route system includes a
- 1247 network of all-day, two-way bus routes between residential, business and other transit activity centers;
- 1248 peak-period commuter service to major destinations from many neighborhoods and from a network of

1249	park-and-ride lots; and local bus services that connect people to the larger transportation system. In
1250	addition to bus service, Metro provides alternative services, such as commuter vanpools, Access
1251	paratransit service, Commute Trip Reduction programs, and Rideshare Online, as well as community
1252	programs such as In Motion and car-sharing.
1253	
1254	In Chapter 8 Transportation, starting on page 8-6, amend as follows:
1255	
1256	Water Taxis: King County's Marine Division
1257	((On January 1, 2015, the King County Ferry District was assumed by King County. The Marine
1258	Division continues to operate passenger-only ferry service routes from downtown Seattle to West Seattle
1259	and Vashon Island. State legislation passed during the 2014 legislative session allowed King County to
1260	take this action. King County gained many administrative efficiencies as the Marine Division will no
1261	longer be maintaining two separate budgets, transferring funds between multiple agencies and accounts,
1262	and providing reports to two governments.))
1263	
1264	The Marine Division, which is a part of the Metro Transit Department, provides service from downtown
1265	Seattle to West Seattle and Vashon-Maury Island. The Marine Division is guided by the King County
1266	Ferry District 2014 Strategic Plan, which was developed while under the King County Ferry District's
1267	governance. The plan expresses the vision and goals for passenger-only ferry service in King County for
1268	the next three to five years. The strategies are the broad initiatives to pursue the vision and goals, with
1269	specific actions listed under each strategy. The plan's vision is to be a leader in regional mobility
1270	benefiting the community and economic development needs of King County through providing water
1271	taxi service that is safe, reliable, and a great customer experience while being responsive and accountable
1272	to the public. The goals are to: 1) provide reliable and safe service; 2) deliver financially sustainable water
1273	taxi service; and 3) to integrate water taxi service with the broader regional transportation system and
1274	economy. The strategies to achieve these goals include: 1) build on strengths and grow ridership; 2)
1275	achieve financial stability; 3) coordinate with regional planning and emergency management efforts; and
1276	4) explore growth and partnership opportunities.
1277	
1278	In Chapter 8 Transportation, starting on page 8-7, amend as follows:
1279	
1280	The Strategic Plan for Road Services defines the vision and mission for the King County Department of
1281	((Transportation's Road)) Local Services – Road Services Division. The Strategic Plan for Road Services
1282	provides detailed direction for the response to the many complex challenges, including two trends that
1283	have had significant impacts on the ((e))County's road services. One is that annexations, consistent with

1284	the goals of	the Growth Management Act, have reduced the urban unincorporated area and therefore the		
1285	tax base that supports the unincorporated road system has shrunk significantly. By ((2023)) 2024, when			
1286	the next (( <del>m</del>	the next ((major)) eight-year Comprehensive Plan update is completed, Road Services Division's		
1287	responsibilit	responsibilities will likely focus almost entirely on the Rural Area and Natural Resource Lands. A second		
1288	-	trend is the decline in County road funding, described in greater detail in Section IV. The Strategic Plan		
1289		rvices guides the Road Services Division as it is faced with the consequences of a smaller		
1290	service area	and reduced funding and seeks to manage the unincorporated King County road system		
1291	through foc	used investment of available resources to facilitate the movement of people, goods and		
1292	services, and	d respond to emergencies.		
1293				
1294	In Chapte	r 8 Transportation, on page 8-9, amend as follows:		
1295				
1296	T-104	The Strategic Plan for Public Transportation 2011-2021, King County Metro		
1297		Service Guidelines and the King County Metro Long Range Plan for Public		
1298		Transportation, or successor plans, shall guide the planning, development and		
1299		implementation of the public transportation system and services operated by		
1300		the King County Metro Transit (( <del>Division</del> )) <u>Department</u> .		
1301				
1302	In Chapte	r 8 Transportation, on page 8-10, amend as follows:		
1303				
1304	T-107	The King County International Airport Strategic Plan, or successor plans, shall		
1305		guide the planning, development and implementation of airport facilities and		
1306		services managed by the King County <u>International</u> Airport (( <del>Division</del> )).		
1307				
1308	In Chapte	r 8 Transportation. on page 8-15, amend as follows:		
1309				
1310	T-213	King County should use its authority including zoning, permitting and		
1311		development standards to protect the public use airports of (( <del>Banderra</del> ))		
1312		Bandera near the town of North Bend and Skykomish airport in King County		
1313		from encroachment of non-compatible land uses. Compatible airport land uses		
1314		are those that comply with generally accepted Federal Aviation Administration		
1315		guidance on location, height, and activity that provide for safe aircraft		
1316		movement, airport operations, including expansion, and community safety.		
1317		· · · · · · · · · · · · · · · · · · ·		
1318	In Chante	r 8 Transportation, on page 8-18, amend as follows:		
	in Chaple	ro nansponation, on page or 10, amenu as follows.		
1319				

1320				
1321	The State Environmental Policy Act establishes environmental review of project impacts on all elements			
1322	of the enviro	onment including transportation. ((In addition, the county has a mitigation payment system		
1323	whereby dev	whereby developments are charged proportionate shares for transportation projects and services needed		
1324	<del>as a result o</del>	f the related growth.))		
1325				
1326	In Chapter	r 8 Transportation, on page 8-19, amend as follows:		
1327 1328	(( <del>T-229</del>	King County shall implement a system that establishes fees needed to mitigate		
1329		the growth-related transportation impacts of new development. The fees will be		
1330		used to pay a development's proportionate share of transportation capital		
1331		projects needed to support growth including, but not limited to, road, transit,		
1332		and nonmotorized facilities. Such fees are in addition to any requirements		
1333		established for transportation services and facilities needed solely as a result of		
1334		the development.))		
1335				
1336	In Chapte	r 8 Transportation, on page 8-20, amend as follows:		
1337				
1338	In unincorpo	orated King County, the Road Services Division is responsible for nonmotorized facilities		
1339	such as bicy	cle lanes, sidewalks, or shoulders on $((\epsilon))$ County roads. The division also provides		
1340	crosswalks a	nd specialized signals or signage that help facilitate safer nonmotorized travel. The King		
1341	County Roa	d Design and Construction Standards include accommodation for nonmotorized uses and		
1342	specify bicyc	cle lane, sidewalk, or road shoulder criteria for unincorporated urban and rural roads.		
1343	Sidewalks an	re allowed in Rural Towns and, under certain circumstances, sidewalks are allowed in the		
1344	<u>Rural Area</u> a	as a spot improvement to address an existing safety or high-use issue when other walkway		
1345	alternatives	would not be as effective, or for safe routes to school. Road-related nonmotorized capital		
1346	needs in the	unincorporated area are included in the Transportation Needs Report and are programmed		
1347	in the six-ye	ar Roads Capital Improvement Program as funding allows. The HealthScape Transportation		
1348	Programmir	ng Tool, along with other criteria, is used in evaluating nonmotorized projects in the		
1349	Transportati	on Needs Report.		
1350				
1351	King County	y also plays a countywide role in nonmotorized transportation through its Regional Trails		
1352	System and	transit services. The regional trail network, discussed in Chapter 7, Parks, Open Space and		
1353	Cultural Res	sources, is an integral component of the $((\epsilon))$ county's transportation system. It includes		
1354	facilities loca	ated both in cities and the unincorporated area. The trail network functions as the spine of		
1355	the (( <del>e</del> )) <u>C</u> ou	nty's nonmotorized system in many areas. Transit and walking or biking are highly		

1356	synergistic; tr	ansit use tends to be highest in locations where walking and biking are prevalent, and vice
1357	versa. The M	etro Transit ((Division)) Department supports nonmotorized transportation programs such
1358	as bicycle rac	ks on transit buses and bicycle lockers at park-and-ride lots, employment sites and other
1359	locations.	
1360		
1361	In Chapter	8 Transportation, on page 8-27, amend as follows:
1362		
1363	Road Service	s Division's Capital Improvement Program and Financial Plan must be consistent with this
1364	Comprehensi	ive Plan and consider the current performance of the transportation system, concurrency
1365	needs of plan	ned developments, priority projects, phased implementation of improvements, and other
1366	related factor	s. Revenues from a range of sources, including grants ((and Mitigation Payment System
1367	<del>fees</del> )), are pro	pgrammed to appropriate projects.
1368		
1369	In Chapter	8 Transportation, on page 8-29, amend as follows:
1370		
1371	T-311	The (( <del>King County</del> )) Department of (( <del>Transportation</del> )) <u>Local Services</u> has
1372		responsibility for development and maintenance of transportation facilities in
1373		((c)) <u>C</u> ounty-owned road rights-of-way. Other right-of-way users must obtain
1374		approval from the department regarding projects, maintenance and other
1375 1376		activities impacting the right-of-way.
1370	In Chantor	8 Transportation, on page 8-32, amend as follows:
1377	III Chapter	o mansponation, on page 0-32, amend as follows.
1378	The coals an	d activities of (( <del>the</del> )) King County (( <del>Department of Transportation</del> )) <u>departments and</u>
1380	U U	provide transportation services in King County are integrally linked to the ((e))County's
1381		activities for addressing climate change. This linkage was refined in the County's 2012
1382	U U	nate Action Plan, with an entire chapter focused on the operational and service targets
1383	0	nsportation and land use. The Strategic Climate Action Plan identifies clear performance
1384		much change is the County attempting to achieve) and strategies and priority activities that
1385	0	house gas emissions. It allows for the reporting of strategies, program activities, and
1386	U	measures related to climate change in one location.
1387	renormanee	
1388	In Chanter	8 Transportation, on page 8-35, amend as follows:
	in onaptor	e hanependien, en page e ee, anona de fenerie.
1389		
1390	((King Coun	ty Marine Division

1391	The Marine Division provides passenger-only ferry service between downtown Seattle, Vashon Island,				
1392	and West Seattle.				
1393					
1394	In 2015, as part of the adopted 2015-2016 County Budget, the Council instructed the Marine Division to				
1395	develop a repe	ort on the potential for expansion of passenger ferry service in King County. This report			
1396	was completed	1 in 2015 and could be used to inform potential expansion of County passenger ferry			
1397	service and as	sociated future property tax levies.))			
1398					
1399	In Chapter 8	3 Transportation, on page 8-36, amend as follows:			
1400					
1401	T-401	Financial investments in transportation should support a sustainable,			
1402		transportation system, consistent with the priorities established in the King			
1403		County Strategic Plan and each <u>department and </u> division's strategic plan <u>s</u> or other			
1404		functional plans.			
1405					
1406	In Chapter 8	3 Transportation, on page 8-37, amend as follows:			
1407					
1408	T-404	When funding transportation projects in areas where annexations or			
1409		incorporations are expected, (( <del>the Department of Transportation</del> )) <u>King County</u>			
1410		should seek interlocal agreements with the affected cities and other service			
1411		providers to provide opportunities for joint grant applications and cooperative			
1412		funding of improvements.			
1413					
1414	In Chapter 9	9 Services, Facilities and Utilities, starting on page 9-18, amend as follows:			
1415					
1416	Under King County Code chapter 9.14, the Department of Natural Resources and Parks is to act as lead				
1417	agency in coordinating the activities of <u>the</u> Department of <u>Local Services</u> - Permitting <u>Division</u> (( <del>and</del>				
1418	Environmental Review)) and Public Health – Seattle & King County in order to ensure that groundwater				
1419	quality and quantity are protected, and facilitate implementation of the plans that have been developed to				
1420	protect groundwater in five groundwater management areas within King County. In accordance with				
1421	new water law requirements, King County has an established a hierarchy of water service that restricts				
1422	the creation of new permit-exempt wells in closed basins, except in very limited circumstances, and as				
1423	consistent with state law and the in-stream flow rules applicable to permit-exempt wells.				
1424					
1425	In Chapter 9	9 Services, Facilities and Utilities, on page 9-18, amend as follows:			
1426					

- 1427 Under King County Code chapter 9.14, the Department of Natural Resources and Parks is to act as lead
- 1428 agency in coordinating the activities of <u>the</u> Department of <u>Local Services -</u> Permitting <u>Division</u> ((and
- 1429 Environmental Review)) and Public Health Seattle & King County in order to ensure that groundwater
- 1430 quality and quantity are protected, and facilitate implementation of the plans that have been developed to
- 1431 protect groundwater in five groundwater management areas within King County. <u>In accordance with</u>
- 1432 <u>new water law requirements, King County has an established hierarchy of water service that restricts the</u>
- 1433 creation of new permit-exempt wells in closed basins, except in very limited circumstances, and is
- 1434 <u>consistent with state law and the instream flow rules applicable to permit-exempt wells.</u>
- 1435
  1436 In Chapter 9 Services, Facilities and Utilities, on page 9-36, amend as follows:
- 1437

Implementation of the 2006 King County Flood Hazard Management Plan has played a significant role
in protecting King County's economic base. The 2006 Flood Hazard Management Plan ((is now being))
was updated in 2013.

- 1441
- In Chapter 9 Services, Facilities and Utilities, on page 9-23, after Policy F-254, insert
   the following:
- 1444

## 1445 6. Water Availability and New State Laws

1446 In January 2018, the Washington State Legislature approved Engrossed Substitute Senate Bill (ESSB)

1447 6091, now codified in chapters 19.27, 58.17, 90.03, and 90.94 Revised Code of Washington. The

1448 adopted statutes clarify the steps building permit and subdivision applicants must take to establish that

1449 water is "legally available" when proposing to obtain water from a new permit-exempt well.

- 1450
- 1451 In King County, the new water law requirements most directly affect development in the Rural Area and
- 1452 on Natural Resource Lands where new development may not be served by public water systems and
- 1453 applicants are proposing to use permit-exempt wells for a source of water supply. King County has a

1454 prioritization for water use that intends to limit permit-exempt wells and require new development to be

- 1455 connected to Group A water systems. Consistent with the new water law requirements, King County
- 1456 permitting processes ensure that the hierarchy of water service is fully implemented with the
- 1457 <u>Comprehensive Plan policies and the King County Code</u>. Additionally, consistent with new water law,
- 1458 King County will participate in the Washington State Department of Ecology's Watershed Restoration
- 1459 and Enhancement Committee process, which may lead to the identification of new water planning
- 1460 provisions in future Comprehensive Plan updates.
- 1461

1462 In Chapter 9 Services, Facilities and Utilities, starting on page 9-37, amend as follows:

1463	
1464	King County's economy and quality of life depend on readily available, affordable and clean energy and
1465	telecommunications resources. Energy and electronic communications systems provide important public
1466	services and their implementation must be coordinated with land use planning. The sustainable
1467	development and efficient use of energy resources can ensure their continued availability while
1468	minimizing long-term costs, risks and impacts to ((the individual, society, and the shared environment))
1469	public health and safety, air and water quality, and essential public infrastructure and services.
1470	
1471	In order to help mitigate global climate impacts resulting from human energy use, King County is
1472	planning its energy uses in ways that will improve energy efficiency; increase production and use of
1473	renewable energy; reduce risk to public health, safety, critical services, and the environment; and reduce
1474	the release of greenhouse gases and emissions. This includes rigorous and transparent review and
1475	regulation of fossil fuel facilities.
1476	
1477	((Toward that goal, King County implemented the 2010 King County Energy Plan and the Strategic
1478	Climate Action Plan, which includes the following objectives for reducing energy use and greenhouse gas
1479	emissions in King County:
1480	1. Reduce energy use through continuous improvements in facility and equipment efficiency,
1481	procurement, construction practices, and resource conservation;
1482	2. Increase transit use and provide transportation choices that reduce overall energy use and
1483	emissions in the county, while improving the efficiency of King County's fleet;
1484	3. Be a leader in early adoption and promotion of innovative technology for buildings and vehicles
1485	with a focus on electric vehicles;
1486	4. Increase the production and procurement of renewable energy and the development of waste to
1487	energy applications; and
1488	5. Pursue sustainable funding strategies for energy efficiency, renewable energy projects,
1489	waste-to-energy projects and greenhouse-gas-reduction efforts.))
1490	
1491	The 2015 Strategic Climate Action Plan provides targets for reducing energy usage in operations and
1492	increasing the amount of renewable energy that the $((e))$ <u>C</u> ounty produces or uses. These targets are
1493	measured for the ((e)) <u>C</u> ounty government as a whole; divisions are directed to make policies and plans
1494	consistent with the King County Strategic Climate Action Plan and implement those as practical,
1495	considering the Plan and their other service priorities. Some divisions may exceed the targets, while
1496	others may not meet them in given years – but all divisions will use the Strategic Climate Action Plan as
1497	the basis for strategic energy planning and direction.

1498			
1499	King County divisions are taking steps to translate countywide energy targets into agency specific plans		
1500	and action. Agency specific plans are important steps that support progress towards countywide targets.		
1501	The Strategic Climate Action Plan sets the ((e))County's long term goal of reducing its greenhouse gas		
1502	emissions from government operations, compared to a 2007 baseline, by at least at least 80% by 2050. In		
1503	order to accomplish this goal, the $((\epsilon))$ ounty is dedicated to reducing its energy use, which $((most$		
1504	heavily contributes to its)) is the most cost-effective approach to reducing greenhouse gas emissions.		
1505	Energy reduction goals are included in the Strategic Climate Action Plan. In its government operations,		
1506	the ((e)) <u>C</u> ounty set buildings and facilities normalized energy use reduction goals of five percent		
1507	reduction by 2020 and 10% by 2025, as measured against a 2014 baseline. In its vehicle operations, the		
1508	((e))County set a reduction goal of at least 10% of its normalized net energy use by 2020, again measured		
1509	against a 2014 baseline.		
1510			
1511	In Chapter 9 Services, Facilities and Utilities, on page 9-40, amend as follows:		
1512			
1513	F-307 King County should foster the development and increased use of clean, renewable		
1514	and alternative fuel and energy technologies <u>.</u>		
1515			
1516	In Chapter 9 Services, Facilities and Utilities, on page 9-49, amend as follows:		
1517			
1518	5. Hazardous Liquid and Gas Transmission Pipelines		
1519	Part of the fossil fuel system is the movement of hazardous liquid and gas by transmission pipelines.		
1520	Hazardous liquid and gas transmission pipelines, as defined by Revised Code of Washington		
1521	81.88.((040))010 and Washington Administrative Code 480-93-005, ((consecutively)) respectively,		
1522	provide a vital service of transporting hazardous materials from one location to another. Long-distance		
1523	transmission pipelines move a variety of hazardous materials, including crude oil, petroleum products,		
1524	natural gas and hazardous liquids, such as anhydrous ammonia. Pipeline rupture or failure can result in		
1525	release of these materials, which are highly flammable, explosive or toxic. The policies in this chapter		
1526	identify public values and goals to assure that the transmission of hazardous materials by pipeline address		
1527	public health and safety.		
1528			
1529	In Chapter 9 Services, Facilities and Utilities, on page 9-49, amend as follows:		
1530			
1531	F-331 King County recognizes that federal and state regulatory programs govern the		
1532	design, construction, and operation of hazardous liquid and gas transmission		

1533		pipelines. (( <del>To preserve the safety and reliability of the hazardous liquid and gas</del>	
1534		<del>transmission pipeline system,</del> )) <u>King County's</u> land use <u>designations</u> , zoning	
1535		<u>classifications</u> and <u>development</u> regulations (( <del>shall</del> )) <u>should</u> be (( <del>consistent with</del>	
1536		state and federal requirements)) focused on increasing safety and reducing	
1537			
1538	state government. King County shall actively engage in federal and state review		
1539	processes to identify local impacts and risks and advocate for safety and		
1540		environmental protections.	
1541			
1542	F-332	Any new <u>, modified, or expanded</u> hazardous liquid and gas transmission pipelines	
1543		proposed for construction in King County shall meet the (( <del>c</del> )) <u>C</u> ounty's	
1544		development regulations, including but not limited to, King County's zoning code,	
1545		building code, grading code, and shoreline management code. <u>Proposals for</u>	
1546		modifications, such as regular maintenance or changes required to address	
1547		hazards or comply with federal or state safety requirements, shall be clearly	
1548		distinguished from proposals to modify or expand facility capacity or uses.	
1549			
1550	In Chapter	9 Services, Facilities and Utilities, on page 9-52, amend as follows:	
1551			
1552	7. Crude O	il Transport by Rail <u>, Truck and Vessel</u>	
1553	Part of the fo	ssil fuel system is the transport of crude oil by rail, truck and vessel. King County and local	
1554	governments	across the United States are facing rapid and significant increases in train traffic carrying	
1555	crude oil. A	ccording to the Washington State Department of Ecology's 2014 Marine and Rail Oil	
1556	Transportati	on Study, the volume of crude oil transported by rail across the US increased 42-fold from	
1557	2008 to 2013		
1558			
1559	In Chapter	9 Services, Facilities and Utilities, on page 9-53, amend as follows:	
1560			
1561	F-344a	King County Office of Emergency Management shall convene local emergency	
1562		managers, first responders, railroads and others to prepare for and mitigate the	
1563		increasing risk of oil spills, fire and explosions posed by oil (( <del>-by-rail</del> )) transport <u>by</u>	
1564		rail, truck and vessel. This work should consider potential risks from related fossil	
1565		fuel facilities.	
1566			
1567	F-344b	King County should advocate for environmental reviews of proposed oil	
1568		terminals <u>and other related fossil fuel facilities</u> in Washington State to	

1570

assess and mitigate for area-wide, cumulative risks and impacts to public safety, infrastructure, traffic, health, water supplies and aquatic resources from increased oil ((train traffic)) transport by rail, truck, and vessel.

1571 1572

# In Chapter 9 Services, Facilities and Utilities, on page 9-53, after Policy F-344c, insert the following:

1575

## 1576 **8. Fossil Fuels and Fossil Fuel Facilities**

Fossil fuels are petroleum and petroleum products, coal, and natural gas, such as methane, propane and
 butane, derived from prehistoric organic matter and used to generate energy. Fossil fuels do not include
 non-fuel petrochemicals, fuel additives, or renewable fuels. Fossil fuel facilities are commercial facilities
 used primarily to receive, store, refine, process, transfer, wholesale trade, or transport fossil fuels. They do
 not include individual storage facilities for the purposes of retail or direct to consumer sales, facilities or
 activities for local consumption, non-commercial facilities, and uses preempted by federal or state rule or
 law.

1584

1585 New or expanded fossil fuel facilities may create significant public health risks, including air pollution

- 1586 <u>causing impaired respiratory functions from fine particulates, noise pollution affecting hearing loss and</u>
- 1587 psychological health, exposure to heavy metals, and contamination of drinking water sources. These
- 1588 risks may result in cancer, premature death, and lung and heart diseases. Fossil fuel facilities also pose a
- 1589 threat to King County's ecology through extensive land disturbing activities that cause adverse impacts to
- 1590 <u>natural ecosystems, contamination of surface water and groundwater, risks from impacts in areas with</u>
- 1591 seismic and geological instability, and destruction of critical habitat for wildlife. New and expanded
- 1592 fossil fuel facilities may create congestion at vehicle/train crossings, increase noise levels through
- 1593 additional vehicle trips, and generate dust, debris, and odor. Additionally, there have been multiple

1594 incidents across the United States and Canada in which spills of crude oil from train derailments and

1595 tanker ships and natural gas pipeline explosions have caused numerous fatalities and illnesses, substantial

- 1596 <u>loss of property, and significant environmental damage.</u><sup>1</sup>
- 1597
- 1598 Fossil fuel extraction, processing, infrastructure, transport, and end use as a fuel contribute significantly
- 1599 to climate change and environmental pollution. According to the International Panel on Climate
- 1600 Change, the combustion of fossil fuels is the largest human source of global greenhouse gas emissions.<sup>2</sup>

<sup>&</sup>lt;sup>1</sup> Ordinance 18866

<sup>&</sup>lt;sup>2</sup> IPCC, 2014: Climate Change 2014: Synthesis Report. Contribution of Working Groups I, II and III to

1601	Washington state and King County are also threatened by impacts resulting from climate change,				
1602	including warming temperatures, sea level rise on coastal communities, diminishing snowpack and water				
1603	availability, ocean acidification, and forest decline. <sup>-3</sup>				
1604					
1605	Local regulations c	an address these impacts by ensuring comprehensive environmental review and			
1606	permitting requiren	nents, particularly for fossil fuel facilities such as terminals, storage facilities, and			
1607	refining and handli	ng facilities. Federal and State statutes also regulate components of the fossil fuel			
1608	system, such as the	location, construction, and operational conditions for pipelines and railroad lines.			
1609	-				
1610	<u>F-344d</u>	King County land use policies, development regulations, and permitting and			
1611		environmental review processes related to fossil fuel facilities shall be			
1612		designed to:			
1613		a. protect public health, safety, and welfare;			
1614		b. mitigate and prepare for disasters;			
1615		c. protect and preserve natural systems;			
1616		d. manage impacts on public services and infrastructure; and			
1617		e. reduce impacts of climate change.			
1618 1619	F-344e	King County shall thoroughly review the full scope of potential impacts of			
1620	1-3446	proposals for new, modified, or expanded fossil fuel facilities. Fossil fuel			
1621		facilities include commercial facilities used primarily to receive, store, refine,			
1622		process, transfer, wholesale trade, or transport fossil fuels, such as but not			
1623		limited to bulk terminals, bulk storage facilities, bulk refining, and bulk			
1624		handling facilities.			
1625					
1626	F-344f	When reviewing proposals for new, modified or expanded fossil fuel			
1627		facilities, King County shall require comprehensive environmental			
1628		assessment, and early and continuous public notice and comment			
1629		opportunities. King County shall only approve new, modified, or expanded			
1630		facilities when:			
1631		a. The proposed facility can confine or mitigate all operational impacts;			
1632	b. The facility can adequately mitigate conflicts with adjacent land				
1633	uses;				

the Fifth Assessment Report of the Intergovernmental Panel on Climate Change [Core Writing Team,

R.K. Pachauri and L.A. Meyer (eds.)]. IPCC, Geneva, Switzerland.

<sup>3</sup> Ordinance 18866

1634		c. The full scope of environmental impacts, including life cycle
1635		greenhouse gas emissions and public health, have been evaluated
1636		and appropriately conditioned or mitigated as necessary, consistent
1637		with the County's substantive State Environmental Policy Act
1638		authority;
1639		d. The applicant must comply with applicable federal and state
1640		regulations, including the Clean Water Act, Clean Air Act, and
1641		Endangered Species Act;
1642		e. The applicant has demonstrated early, meaningful, and robust
1643		consultation with the public, surrounding property owners, and with
1644		Indian tribes to assess impacts to treaty-protected cultural and
1645		fisheries resources; and
1646		f. Risks to public health and public safety can be mitigated.
1647		
1648		Results from the King County Equity Impact Review Tool shall be used as
1649		an important consideration to identify and mitigate impacts in the siting of
1650		new, modified, or expanded fossil fuel facilities.
1651 1652	F-344h	King County shall establish a periodic review process for fossil fuel
1653		facilities. The periodic review shall be a part of King County's ongoing
1654		enforcement and inspections of fossil fuel facilities, and to assure
1655		compliance with applicable conditions, mitigations, and the most up-to-date
1656		safety and public health standards. The periodic review process should,
1657		subject to applicable law:
1658		a. Provide opportunities for public review and comment;
1659		b. Evaluate whether the facility is in compliance with current federal,
1660		state, and County regulations and implementation of
1661		industry-standard best management practices; and
1662		c. Allow King County to modify, add or remove permit conditions to
1663		address new circumstances and/or unanticipated fossil fuel
1664		facility-generated impacts.
1665		
1666	In Chapter 10 Ed	conomic Development, starting on page 10-3, amend as follows:
1667		
1668	Covering only 45 sq	uare miles, urban unincorporated King County contains a number of residential
1669	communities and bu	siness centers with about half of the unincorporated population, 127,000 people.
1670	Major communities	within this urban jurisdiction include North Highline, (( <del>West Hill/Skyway</del> ))
1671	<u>Skyway-West Hill</u> , I	Fairwood, East Renton, and Lakeland/East Federal Way. The urban unincorporated
		Comprehensive Plan Amendments Page 61

1672 communities together had about 17,600 jobs in 2014. The largest job sector is services, with about 6,000
 1673 jobs throughout urban unincorporated King County. Education and government is the second largest
 1674 sector with 5,000 jobs.<sup>4</sup>

1675

## 1676 In Chapter 10 Economic Development, starting on page 10-6, amend as follows:

1677

## 1678 Working Collaboratively in the Region

1679 Central Puget Sound Economic Development District (serving King, Kitsap, Pierce, and Snohomish 1680 Counties) adopted a "Regional Economic Strategy for the Central Puget Sound Region" in 2005, ((and)) 1681 updated it in 2012, and then adopted an updated version entitled "Amazing Place: Growing Jobs and 1682 Opportunity in the Central Puget Sound Region" in 2017. ((The Regional Economic Strategy)) Amazing 1683 <u>Place</u> was developed by the Puget Sound Regional Council (('s Prosperity Partnership - a coalition of 1684 more than 200 government, business, labor, nonprofit and community leaders from the four counties—)) 1685 to ((ensure long-term regional prosperity)) sustain economic vitality and global competitiveness. 1686 1687 In order to accomplish this, ((the Regional Economic Strategy)) Amazing Place identifies ((ten)) 14 1688 industrial clusters that, based on regional economic analysis, offer the best opportunities for business 1689 growth and job creation in the Central Puget Sound region for the next several years. 1690 1691 Clusters are concentrations of industries that export goods and services that drive job creation and import 1692 wealth into the region. An industry cluster differs from the classic definition of an industry sector because 1693 it represents the entire horizontal and vertical value-added linkages from suppliers to end producers, 1694 including support services, specialized infrastructure, regional universities' research and development, 1695 and other resources. Clusters are supported by the economic foundations such as workforce training, 1696 infrastructure, quality education, a stable and progressive business climate, and more. The clusters are 1697 Aerospace, Architecture and Engineering, Business Services, Clean Technology, Food and Beverage, 1698 Information and Communication Technology, Life Sciences and Global Health, Maritime, Materials 1699 Manufacturing, Military and Defense, ((Philanthropies))Recreational Gear, Tourism ((and Visitors, 1700 and)), Transportation and Logistics, and Wood Products. ((The Regional Economic Strategy)) Amazing 1701 <u>Place</u> identifies specific strategies and actions to help support the growth of each cluster. 1702

1703 In Chapter 10 Economic Development, on page 10-15, amend as follows:

<sup>&</sup>lt;sup>4</sup> This 2014 data does not reflect that Klahanie was annexed to Sammamish in 2016. Updated figures are not currently available.

1705 The ((e))<u>C</u>ounty also recognizes that the land areas, economies, and natural beauty of the Rural Area and Natural

1706 Resource Land((s classifications)) designations benefit all county residents. The agriculture sector provides a safe

1707 and reliable local food source—keeping costs low and quality high—to restaurants and households, the majority of

which are in urban areas, and regionally to farmers markets and specialty stores. Rural King County provides many
 diverse recreation and tourism opportunities, including scenic vistas; trails for hiking, bicycling, off-road, and

diverse recreation and tourism opportunities, including scenic vistas; trails for hiking, bicycling, off-road, and
equestrian use; harvest festivals; open space and wildlife habitat; and working farms and forest lands. all within a

- equestrian use; harvest festivals; open space and wildlife habitat; and working farms and forest lands, all within ashort distance from the urban centers.
- 1713 In Chapter 11 Community Service Area Subarea Planning, on page 11-1, amend as

CHAPTER 11	1715
COMMUNITY SERVICE AREA	1716
SUBAREA PLANNING	1717

## 1718 1719

1712

1714

follows:

King County had a robust community planning program that occurred in two distinct periods—1973 through 1984 to implement the 1964 Comprehensive Plan, and 1985 through 1994 to implement the 1984 Comprehensive Plan. Since then, there have only been minor updates to community plans that were processed through updates to the Comprehensive Plan. After nearly two decades of aging plans and significant growth, King County leadership renewed its interest in more detailed long-range planning for unincorporated rural and urban communities in 2014 by providing funding ((for the Department of Permitting and Environmental Review)) to re-initiate a subarea planning program. The policies in this chapter are based on these historical adopted Community Plans and will be updated as part of the community planning process in coming years.

In Chapter 11 Community Service Area Subarea Planning, on page 11-2, amend as
 follows:

## 1722 A. Planning Framework and Geography

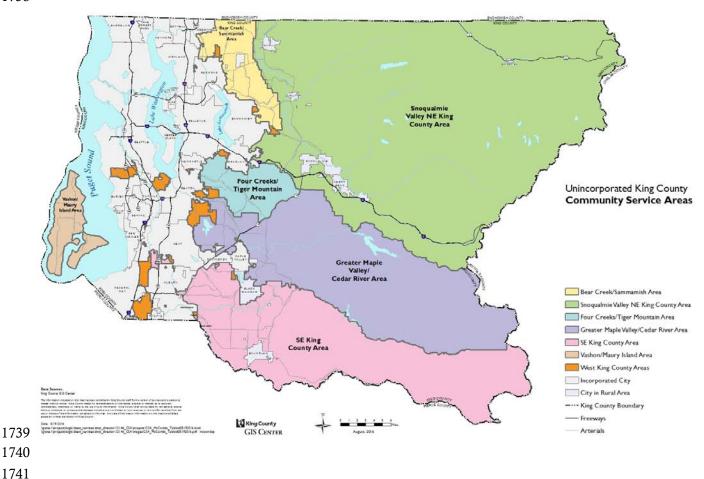

Beginning with the 2016 Comprehensive Plan the geographical boundaries of the County's seven Community
Service Areas will be used as the framework for subarea plans created and amended from that point forward.
Subarea plans will be developed for the six rural Community Service Areas, and for the five remaining large urban
unincorporated potential annexation areas. The focus of subarea plans will be on ((land use)) locally specific issues
in these subarea geographies.

1728

There are a number of key benefits to defining subarea planning boundaries to be coterminous with the Community Service Area boundaries. This structure organizes the County's unincorporated planning area into fewer and more manageable territories so that updates of the plans can occur within a shorter time horizon. Using the Community Service Area boundaries also aligns land use planning with other county services and programs thereby increasing consistency between planning and public service delivery. Finally, since the last round of subarea planning in 1994 there have been numerous major annexations and incorporations which mean some subareas are now largely within the jurisdiction of cities and thus the County now has just a regional, rather than local, planning role in those areas.

1737 Figure: Community Service Areas Map

1738

Comprehensive Plan Amendments Page 64

- 1742 The following table illustrates how the Community Service Area geography aligns with the former Community
- 1743 Planning Area geography; this is provided to identify how the existing policies are re-assigned into the new
- 1744 geographic structure.
- 1745

Community Service Area	Includes parts of the following former Community Planning Areas	
Bear Creek / Sammamish Area	Bear Creek, Northshore, East Sammamish	
Four Creeks / Tiger Mountain Area	Tahoma Raven Heights, Snoqualmie	
Greater Maple Valley / Cedar River Area	Tahoma Raven Heights, Soos Creek, East King County, Snoqualmie	
SE King County Area	Enumclaw, Tahoma Raven Heights, East King County, Soos Creek	
Snoqualmie Valley / NE King County Area	Snoqualmie, East King County, East Sammamish	
Vashon / Maury Island	Vashon	
West King County Areas (unincorp. urban)	Portions of 10 Community Planning Areas	

1747 While there are differences among the Community Service Areas in terms of their boundaries, range of land uses, 1748 annexation issues, and more, using this accepted geography will ensure the entire unincorporated portion of the 1749 ((e))County receives some level of planning on a regular cycle. This includes ((a regular assessment)) development 1750 of ((the)) each Community Service Area's subarea plan. Each plan will establish goals, policies, and community 1751 needs using information such as population changes, ((new development,)) employment targets and similar 1752 demographic and socioeconomic indicators. ((These assessments are called Community Service Area Subarea 1753 Plans.)) To address the unique issues in each geography, Community Service Area subarea plans may also have 1754 more refined((, land uses)) focuses on rural town centers, urban neighborhoods, business districts, or corridor 1755 approaches. 1756 1757 The high level review along with more detailed land use planning will be guided by a series of ((criteria)) 1758 considerations such as community interest, social equity, funding, and new development. Equity and social justice 1759 principles will play a particularly key role during subarea plan public engagement activities. The County will use the 1760 tools and resources developed by the Office of Equity and Social Justice to develop the scope of work and the plans 1761 so that  $((\mathbf{P}))$  people of color, low-income residents, and populations with limited English proficiency will be informed 1762 and offered equitable and culturally-appropriate opportunities to participate in its planning process. 1763 1764 CP-100 King County shall implement a Community Service Area subarea planning program. 1765 This program includes the following components for the development and 1766 implementation of each subarea plan: 1767 A subarea plan shall be adopted for each of the six rural Community Service а. 1768 Areas and five large urban Potential Annexation Areas consistent with the 1769 scheduled established in the Comprehensive Plan and King County Code

1770		Title 20. Each subarea plan shall be streamlined to be focused on locally-
1771		specific policies that address long-range community needs.
1772		b. The County shall adopt and update on an ongoing basis, a list of services,
1773		programs, facilities, and capital improvements that are identified by the
1774		community for each geography, known as a community needs list, to
1775		implement the vision and policies in the subarea plan and other County
1776		plans and to build on the strengths and assets of the community.
1777		c. Implementation of each subarea plan and community needs list shall be
1778		monitored on an ongoing basis via established performance metrics.
1779		d. Community engagement for development, review, amendment, adoption,
1780		and implementation of each subarea plan shall use the Office of Equity and
1781		Social Justice's equity toolkit.
1782		e. The King County Council shall have an established role in the Community
1783		Service Area subarea planning process, including in the development,
1784		review, amendment, adoption, and monitoring the implementation of each
1785		subarea plan and community needs list.
1786		
1787		plies going forward with the subarea plans, starting with the Snoqualmie Valley/NE
1788	King County (	CSA geography. Two CSA subarea plans, for the Skyway-West Hill PAA and North
1789	<u>Highline PAA</u>	, were under development prior to adoption of this policy. To the extent possible, the
1790	County will fo	llow this policy for these two plans. Some known deviations include:
1791		
1792	• <u>Skywa</u>	ny-West Hill: The County adopted a Phase 1 Land Use Strategy that includes a focus on
1793	land u	se, planning, and the built environment, in June 2020. The Phase 1 Land Use Strategy
1794	includ	es seven Action items. This includes five Action items initially proposed by the
1795	Execu	tive, and two added by the Council. The two added by Council:
1796	0	Action 1 sets the scope of work for the CSA Subarea Plan.
1797	0	Action 2 requires performance monitoring and evaluation, including metrics related
1798		to community engagement and Service Partnership Agreements.
1799	• <u>North</u>	Highline: A Public Review Draft of the Land Use Strategy is issued, and Executive
1800	<u>contin</u>	ues to work with the community on the CSA Subarea Plan. Executive completes
1801	<u>scopin</u>	g with community to identify topics of the plan. "Action Items" identified in the Public
1802	Review	w Draft of the Land Use Strategy are complete and results of those Action Items
1803	includ	ed in transmittal of the Plan.
1804		
1805	B. Plan	ning Schedule

•

- 1806 Below is the schedule for subarea planning using the Community Service Area geography. Reviewing all
- 1807 six rural Community Service Area subareas and five large urban Potential Annexation Areas over the
- 1808 ((course of an approximately thirteen year period (while pausing the subarea planning process during the
- 1809 Eight-Year update of the Comprehensive Plan)) next decade at both the broad, policy level and at the
- 1810 local, community level with detailed planning will facilitate a more equitable planning process. The plan
- 1811 sequencing was determined by subarea plans already underway, the ability to partner with other
- 1812 jurisdictions, anticipated ((land use changes)) community needs within a Community Service Area, and
- 1813 striving for a countywide geographic balance in alternating years. The anticipated duration of each
- 1814 subarea planning process will be two years, which includes time for community engagement, plan
- 1815 development, and Council review and adoption.
- 1816

1825 ((*Note: The planning year is a 12-month, July to June process. The adoption year is a 12-month, July to June process.*))

1826

1827 Note: Planning for each geography is anticipated to take eighteen months, beginning in July and ending

1828 the following December. After transmittal of the plan to the Council on the first business day of January,

1829 review is anticipated to last six months with adoption anticipated to occur in June.

1830 <u>1. The Skyway-West Hill Land Use Strategy, Phase 1 of the Skyway-West Hill Subarea Plan, adopted in</u>

- 1831 <u>2020 is only a portion of the subarea plan anticipated by this schedule, accounting for the longer plan</u>
- 1832 <u>development timeline.</u>

1833 <u>2. The plan development timeline for the North Highline Community Service Area Subarea Plan reflects</u>

- 1834 <u>changes made in the 2020 Comprehensive Plan update.</u>
- 1835

1836 For each of the Community Service Area subarea planning processes, the subarea plans included in

1837 Motion 14351, which adopted the scope of work for the 2016 King County Comprehensive Plan, shall be

- 1838 included. This includes the following adopted scopes of work:
- 1839

Study in Motion 14351	Community Service Area
Snoqualmie Pass Subarea Plan: Initiate a subarea plan for Snoqualmie Pass rural town and ski area. The subarea plan should be developed in collaboration with Kittitas County, evaluate and address the current and future housing and economic development needs of this growing community, and include outreach with the local community in its development.	Snoqualmie Valley/Northeast King County CSA

Highline Subarea Plan: Initiate an update to the Highline Community Plan, and incorporate the updated subarea plan into the Comprehensive Plan. The updated subarea plan should include zoning and regulations that: address the historic wide gaps in equity of infrastructure investments and services; facilitate the revitalization of its neighborhoods, local economy, and quality of life of its residents; and have included outreach with the local community in their development.	West King County CSA – North Highline
Cedar Hills/Maple Valley Subarea Plan: Initiate a subarea plan for the "Cedar Hills/Maple Valley" area. Review land use designations and implementing zoning on parcels 2823069009, 2923069019, 2923069080, 2923069082, 2923069083, 2923069084, 3223069001, 3223069003, 3223069068, 3323069027, 3323069030, and 3323069042 and the surrounding area, which has long-standing industrial and resource material processing uses. Study and make recommendations on the potential long-term land uses for this area, including coordination with the County's planning on future closure of the adjacent Cedar Hills landfill. Include evaluation of options for land uses other than mining, including residential uses, non-residential uses; whether a four-to-one proposal is appropriate for this area; and outreach with the local community in its development.	Four Creeks/Tiger Mountain CSA

The schedule above ensures that subarea plan goals and objectives are up-to-date and relevant based on current and future needs. Within this larger structure, if a property owner has an interest in a land use change outside of this planning cycle, they are able to use the existing land use processes. Property owners can submit for a Site Specific Land Use Amendment or Zone Reclassification, per King County Code 20.18.050 and 20.20 respectively. If a significant land use issue arises in a Community Service Area outside of the planning cycle, the cycle may be adjusted.

- 1848 In consideration of the restructure of the subarea planning program adopted in 2018 and 2020, the
- 1849 County will evaluate initiating a performance audit of the program once the restructure has been
- 1850 implemented, by adding a requirement to the King County Auditor's work plan during the ((2021-2022))
- 1851 <u>2023-2024</u> biennium. Additionally, following the completion of the first ((thirteen-year)) subarea
- 1852 planning cycle, the subarea planning schedule for developing and adopting updates to the subarea plans
- 1853 moving forward will be reviewed as part of the ((<del>2031 major</del>)) <u>2032 eight-year</u> Comprehensive Plan
- 1854 update. This review will include evaluation of whether the subarea plan update schedule and process can
- 1855 be condensed from its current ((thirteen-year)) planning cycle.
- 1856

# In Chapter 11 Community Service Area Subarea Planning, on page 11-6, amend as follows:

1859

Although the majority of the community plans are no longer in effect as separately adopted plans,1 in many cases the published plan documents contain valuable historical information about King County's communities and other information that provides background for the policies listed below and for the portions of the local pre-Growth Management Act area zoning that remain in effect. The following sections of this chapter will be updated, as appropriate, to reflect the new Community Service Area subarea plans as they are adopted.

1866

## 1867 I. Bear Creek / Sammamish Area

1868 The Bear Creek/Sammamish Community Service Area consists of portions of the following former 1869 Community Planning Areas: Bear Creek, Northshore and East Sammamish. Large sections of this area 1870 have been annexed into the cities of Bothell and Redmond and have incorporated into the cities of 1871 Kenmore, Sammamish and Woodinville. The Urban Planned Developments east of the City of 1872 Redmond ((are)) were controlled through ((detailed)) development agreements ((and built-out for all 1873 practical purposes)); however, those agreements were expiring and, in 2020, King County established 1874 land use and zoning for these areas. King County will not permit additional similar urban-scale 1875 development outside the Urban Growth Area. The policies listed below pertain to areas within the 1876 Community Service Area that are still within unincorporated King County. 1877 1878

1 The plans currently in effect are the West Hill Community Plan, <u>Skyway-West Hill Land Use Strategy (Phase 1 of the Skyway-West Hill Subarea Plan)</u>, White Center Community Action Plan, Fall City Subarea Plan, and the Vashon-Maury Island Community Service Area Subarea Plan.

## 1884 In Chapter 11 Community Service Area Subarea Planning, starting on page 11-40,

1885 amend as follows:

## 1886 D. ((West Hill – ))Skyway<u>-West Hill</u> Potential Annexation Area

- 1887 The West Hill Community Plan was adopted by King County in 1993, and as such was prepared in
- 1888 conformance with the Growth Management Act and incorporated as part of the 1994 King County
- 1889 Comprehensive Plan.
- 1890

1879 1880

1881

- 1891 In 2014 and 2015, the County adopted Motion 14221 and 14351, which called for a comprehensive
- 1892 update to the West Hill Community Plan. Around this same time, the County was also providing

1893	technical assistance to a community-led effort to update some elements of the Community Plan. This
1894	community-led effort resulted in the development of a local Action Plan, which was proposed to be an
1895	addendum to the existing Community Plan as part of the 2016 Comprehensive Plan update. The County
1896	ultimately did not adopt the Action Plan in 2016, as ((Since then,)) the County also reinitiated its Subarea
1897	Planning Program. ((
1898	review the Community Plan, consistent with Motion 14221.)) The County has committed to ((will))
1899	work with the community to complete a Community Service Area Subarea Plan that includes a review of
1900	the (( <del>proposed</del> )) Action Plan and ((to)) <u>an</u> update the Community Plan (( <del>within the context of the new</del>
1901	Subarea Planning Program)). A process to ((update to the Community Plan will be)) develop the
1902	Community Service Area Subarea Plan was initiated in ((approximately July)) 2018((, with adoption
1903	anticipated in June 2020)). As part of the 2020 Plan update, the County adopted a Land Use Strategy,
1904	Phase 1 of the Skyway-West Hill Subarea Plan, that outlined the potential policy and implementation
1905	steps for land use development in Skyway-West Hill. A Skyway-West Hill Community Service Area
1906	Subarea Plan that replaces the West Hill Community Plan is expected to be adopted in 2022. The
1907	Subarea Plan will be developed based on a scope of work developed with the community.
1908	
1909	In Chapter 12 Implementation, Amendments and Evaluation, on page 12-1, amend as
1910	follows:
1911	CHAPTER 12
1912	IMPLEMENTATION, AMENDMENTS AND
1913	EVALUATION
1914	

The Comprehensive Plan policies, development regulations and countywide policy framework have been adopted to achieve the (())<u>C</u>ounty and region's growth management objectives. This chapter describes the tools, processes and procedures The chapter explains the relationship between planning and zoning, lists the incentives programs, identifies actions that will be undertaken between ((major)) <u>eight-</u> <u>year</u> updates to implement or refine provisions within the Comprehensive Plan, and outlines and distinguishes between used to implement, <u>review and</u> amend ((<del>and</del> <del>review</del>)) the Comprehensive Plan.

annual update<u>s</u> ((<del>cycles</del>)), midpoint updates, and eight-year ((<del>cycle amendments</del>)) <u>updates</u>.

- 1916
- 1917

## 1918 In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-4,

1919 amend as follows:

## 1920 II. Comprehensive Plan Amendments

In the process of implementing the Comprehensive Plan, there may be a need for amendments to address emerging land use and regulatory issues. The ((e))<u>C</u>ounty has established the Comprehensive Plan ((amendment)) <u>update</u> process to enable individual residents, businesses, community groups, cities, county departments and others to propose changes to existing Comprehensive Plan policies and development regulations. This process provides for continuous and systematic review of Comprehensive Plan policies and development regulations in response to changing conditions and circumstances that could affect growth and development throughout King County.

1928

1929 The Comprehensive Plan (( $\frac{amendment}{amendment}$ )) update process includes (( $\frac{amendment}{amendment}$ )) update, (( $\frac{amendment}{amendment}$ )) update (( $\frac{amendment}{amendment}$ ))) update (( $\frac{amendment}{amendment}$ )) update (( $\frac{$ 1930 the midpoint ((eycle)) update, and ((an)) the eight-year ((eycle)) update. The annual ((eycle)) update 1931 generally is limited to those amendments that propose technical changes and adoption of CSA subarea 1932 plans. The eight-year ((eycle)) update is designed to address amendments that propose substantive 1933 changes. The midpoint update is an optional process that allows for consideration of a smaller range of 1934 substantive changes, but only if initiated by motion. This ((amendment process, based on a defined 1935 eycle,)) update schedule provides the measure of certainty and predictability necessary to allow for new 1936 land use initiatives to work. By allowing annual ((update)) and midpoint updates ((amendments)), the 1937 process provides sufficient flexibility to account for technical adjustments or changed circumstances. The 1938 process requires early and continuous public involvement and necessitates meaningful public dialogue. 1939

King County has established a docket process to facilitate public involvement and participation in the
Comprehensive Plan ((amendment)) update process in accordance with RCW 36.70A.470. Parties
interested in proposing changes to existing Comprehensive Plan policies, development regulations, land
use designations, zoning, or other components of the Comprehensive Plan can obtain and complete a
docket form outlining the proposed amendment. Docket forms are available via the King County
website.

1947	I-201	The (( <del>am</del>	endment)) update process shall provide continuing review and
1948		evaluatio	on of Comprehensive Plan policies and development regulations.
1949			
1950	I-202	Through	the (( <del>amendment</del> )) update process, King County Comprehensive Plan
1951		policies a	and supporting development regulations shall be subject to review,
1952		evaluatio	n, and amendment according to (( <del>an</del> )) <u>the</u> annual (( <del>cycle</del> )), midpoint
1953		(( <del>cycle</del> )),	and (( <del>an</del> )) eight-year (( <del>cycle</del> )) <u>update schedule</u> in accordance with
1954		RCW 36.7	70A.130 (1) and (2).
1955			
1956	I-203	Except as	s otherwise provided in this policy, the annual (( <del>cycle</del> )) <u>update</u> shall not
1957		consider	proposed amendments to the King County Comprehensive Plan that
1958		require s	ubstantive changes to Comprehensive Plan policies and development
1959		regulatio	ns or that alter the Urban Growth Area Boundary. Substantive
1960		amendmo	ents may be considered in the annual (( <del>amendment cycle</del> )) <u>update</u> only
1961		(( <del>if</del> )) to co	onsider the following:
1962		а.	A (( <del>proposal for a</del> )) Four-to-One (( <del>project</del> )) <u>proposal</u> that changes the
1963			Urban Growth Area Boundary;
1964		b.	An amendment regarding the provision of wastewater services to a
1965			Rural Town. Such amendments shall be limited to policy
1966			amendments and adjustments to the boundaries of the Rural Town
1967			as needed to implement a preferred option identified in a Rural Town
1968			wastewater treatment study;
1969		с.	Amendments necessary for the protection and recovery of
1970			threatened and endangered species;
1971		d.	Adoption of Community Service Area subarea plans;
1972		e.	Amendments to the workplan(( <del>, only as part of the 2018 subarea</del>
1973			<del>planning restructure</del> )) <u>to change deadlines;</u> or
1974		f.	Amendments to update the Comprehensive Plan schedule to
1975			respond to adopted ordinances to improve alignment with the
1976			Growth Management Act, multicounty and countywide planning
1977			activities.
1978			
1979	I-204	-	t-year (( <del>cycle</del> )) <u>update</u> shall consider proposed amendments that could
1980			dered in the annual (( <del>cycle</del> )) <u>update</u> and also those outside the scope
1981			nual (( <del>cycle</del> )) <u>update</u> , proposed amendments relating to substantive
1982		•	to Comprehensive Plan policies and development regulations, and
1983		proposal	s to alter the Urban Growth Area Boundary in accordance with
1984		applicabl	e provisions of Countywide Planning Policies.

1985		
1986	<u>l-204a</u>	The midpoint update is an optional process that allows for consideration of a
1987		smaller range of substantive changes at the four-year point of the eight-year
1988		update schedule. Midpoint updates are only authorized by a motion that
1989		establishes the scope of work. A smaller-range of substantive changes to
1990		policies and amendments to the Urban Growth Area boundary may (( <del>also</del> )) be
1991		considered (( <del>at</del> )) <u>as part of</u> the midpoint (( <del>of the eight-year</del> )) update (( <del>cycle but</del>
1992		only if authorized by motion)). Workplan action items may be added or amended
1993		if related to a topic identified in the scope of work.
1994		
1995	I-205	In accordance with RCW 36.70A.140 and the State Environmental Policy Act, as
1996		applicable, King County shall ensure public participation in the (( <del>amendment</del> ))
1997		update process for Comprehensive Plan policies and development regulations.
1998		King County shall disseminate information regarding public involvement in the
1999		Comprehensive Plan (( <del>amendment</del> )) <u>update</u> process, including, but not limited to,
2000		the following: description of procedures and schedules for proposing
2001		amendments to Comprehensive Plan policies and development regulations;
2002		guidelines for participating in the docket process; public meetings to obtain
2003		comments from the public or other agencies; provision of public review
2004		documents; and dissemination of information relating to the Comprehensive Plan
2005		(( <del>amendment</del> )) <u>update</u> process on the Internet or through other methods.
2006		

- 2007 In Chapter 12 Implementation, Amendments and Evaluation, on page 12-9, amend as
- 2008 follows:
- 2009

Comprehensive Plan Land (( <del>Uses</del> )) <u>Use</u> <u>Designations</u>	Zoning <u>Classifications</u> *
Unincorporated Activity Center : White Center	R-12, R-18, R-24, R-48, NB, CB, O, I

- 2010
- 2011

#### 2012 In Chapter 12 Implementation, Amendments and Evaluation, on page 12-11, amend as

- 2013 follows:
- 2014

2015 A new feature of the 2016 Comprehensive Plan is this Workplan section. While Workplan tasks have 2016 accompanied the Comprehensive Plan as part of the adoption process by the County Council, these tasks 2017 were historically included with the Ordinance rather than inside of the Comprehensive Plan. In the 2016 2018 Comprehensive Plan, these tasks will be included in the body of the document. Workplan tasks work in 2019 conjunction with the other tools discussed in this chapter, such as regulations, incentive programs, and 2020 other core regional planning and implementation activities. Each Workplan item includes a summary 2021 description, general timeline and anticipated outcomes. In the 2018 update to the 2016 King County 2022 Comprehensive Plan, as part of the restructure adopted in Ordinance 18810 ((Proposed Ordinance 2018-2023 0153)) and Motion 15142, the County modified the structure of the King County Comprehensive Plan 2024 update process ((review cycle,)) to include a comprehensive update every eight years, as well as potential 2025 annual and midpoint updates. As part of this review, Workplan items were amended to reflect this 2026 restructure, and to add direction for future updates to the Comprehensive Plan, including a 2020 update.

2027 Consistent with policies I-203 and I-204a, modifications and additions to the Workplan were included in 2028 the 2020 Comprehensive Plan update. 2029 In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-11, 2030 amend as follows: 2031 2032 2033 Action 1: Implementation of the Community Service Area Subarea Planning Program. Under the 2034 direction of the Department of Local Services - Permitting Division ((Permitting and Environmental 2035 Review)), King County has launched a new regular subarea planning program. While this is described in 2036 greater detail in Chapter 11: Community Service Area Subarea Planning, launching and implementing 2037 this effort will be a major activity following the adoption of the Comprehensive Plan. For each plan, the 2038 County shall comply with Policy CP-100 and K.C.C. 2.16.055. 2039 *Timeline:* Ongoing; the Executive will propose a subarea plan for each area ((approximately once • 2040 every thirteen years)) based on planning schedule in Chapter 11. 2041 • Outcomes: A proposed subarea plan for each Community Service Area for Council consideration 2042 and possible adoption. Each subarea plan shall be transmitted by the Executive to the Council in 2043 the form of an ordinance that adopts the subarea plan, at a time consistent with King County 2044 Code Chapter 20.18. A Public Review Draft of each subarea plan shall be made available to the 2045 public and the Council for comment prior to finalizing the plan for transmittal. 2046 • Lead: Department of Local Services - Permitting Division ((Permitting and Environmental 2047 Review)), in coordination and collaboration with the Office of Performance Strategy and Budget. 2048 Executive staff, including the Department of Local Services - Permitting Division ((Permitting 2049 and Environmental Review)), the Office of Performance, Strategy and Budget, or other 2050 appropriate agencies, shall update and coordinate with the Councilmember office(s) representing 2051 the applicable study area throughout the community planning process. 2052 2053 Action 2: Develop a Performance Measures Program for the Comprehensive Plan. The purpose of the 2054 program is to develop longer-term indicators to provide insight into whether the goals of the 2055 Comprehensive Plan are being achieved or if revisions are needed. Given the longer-term nature of the 2056 issues addressed in the Comprehensive Plan, this program will be implemented on an eight-year ((eycle)) 2057 update schedule. Reports are to be released in the year prior to the initiation of the eight-year update in 2058 order to guide the scoping process for the update. Additionally, to the extent practicable for each dataset, 2059 indicators will be reported at the level most consistent with the major geographies in the Growth 2060 Management Act and Comprehensive Plan - incorporated cities, unincorporated urban areas, Rural 2061 Areas, and Natural Resource Lands.

2062	• <i>Timeline:</i> The motion adopting the program framework shall be transmitted by June 1,
2063	2017. A ((2021)) 2022 Comprehensive Plan Performance Measures Report released by
2064	March 1, (( <del>2021</del> )) <u>2022</u> , will inform the (( <del>2021</del> )) <u>2022</u> Scope of Work for the (( <del>2023</del> ))
2065	2024 Comprehensive Plan update.
2066	• <i>Outcomes:</i> The 2017 framework for the program shall be transmitted by the Executive to
2067	the Council by June 1, 2017, in the form of a motion that adopts the framework. The
2068	(( <del>2021</del> )) 2022 Comprehensive Plan Performance Measures Report shall be completed as
2069	directed by the 2017 framework motion adopted by the Council. The Executive shall file
2070	with the Council the ((2021)) 2022 Comprehensive Plan Performance Measures Report.
2071	The (( <del>2021</del> )) <u>2022</u> Scope of Work for the (( <del>2023</del> )) <u>2024</u> Comprehensive Plan (( <del>Update</del> ))
2072	update shall be informed by the ((2021)) 2022 Performance Measures Report. The
2073	Executive's transmitted ((2023)) 2024 Comprehensive Plan shall include updated
2074	references to the new Performance Measures Program.
2075	• Lead: Office of Performance Strategy and Budget. Executive staff shall work with the
2076	Council's Comprehensive Plan lead staff in development of the 2017 framework for the
2077	program.
2078	In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-14,
2079	amend as follows:
2080	
2080 2081	Action 5: Review 2016 King County Comprehensive Plan Implementation Needs. The 2016

2095 2096 ((Permitting and Environmental Review)), and Prosecuting Attorney's Office.

Action 6: Alternative Housing Demonstration Project. There is considerable interest to explore temporary and permanent alternative housing models to address the issues of homelessness and affordable housing in the Puget Sound region. King County is currently exploring microhousing pilot projects across the region that can inform a larger demonstration project under King County Code on alternative housing models in unincorporated King County. Based on what the County learns from the experience of pilots across the region, the County should pursue a larger demonstration project that looks at a broader range of temporary and permanent alternative housing models under its land use authority.

2105 This work plan item will utilize an interbranch team to analyze the potential for a demonstration project 2106 under K.C.C. chapter 21A.55 for one or more temporary or permanent alternative housing projects, such 2107 as single and/or multi-family microhousing (i.e., very small units clustered around a shared kitchen and 2108 other similar models) or tiny houses, modular construction, live/work units, and co-housing projects. A 2109 demonstration project will allow the County to test development regulations and other regulatory barriers 2110 related to alternative housing models before adopting or amending permanent regulations. Such 2111 regulations could include amendments to or establishment of regulations related to permitted uses or 2112 temporary uses, building and fire codes, water and sewer supply requirements, setbacks, landscaping 2113 screening, location requirements, light and glare requirements, public notice, and mitigation of impacts to 2114 the surrounding area. This work plan item should also analyze potential funding sources and funding 2115 barriers for projects that may or may not require public funding, including funds managed by the King 2116 County Housing and Community Development Division of the Department of Community and Human 2117 Services.

2118 *Timeline:* Two phases. Phase One – Issuance of a request for proposals to identify a project or 2119 projects in unincorporated King County that will participate in an Alternative Housing 2120 Demonstration Project. While a project or projects are being chosen, a Demonstration Project 2121 ordinance package that pilots necessary regulatory flexibilities will be developed for approval by the 2122 Council. Such a Demonstration Project shall be transmitted to Council by ((June 28)) December 2123 31, 2019. Phase II – An Alternative Housing Demonstration Project Report, including proposed 2124 regulations and/or amendments to implement the recommendations of the report shall be 2125 transmitted to the Council for consideration ((by December 31, 2021)) within two years from the 2126 final certificate of occupancy for buildings developed under the Demonstration Project Ordinance.

Outcomes: The interbranch team shall prepare, and the Executive shall file with the Council, the
 Alternative Housing Demonstration Project Report, which shall include analysis of the issues
 learned in the Demonstration Project(s), and identification of recommended amendments to the

- Comprehensive Plan and King County Code. The Executive shall also file with the Council an
  ordinance adopting updates to the Comprehensive Plan and/or King County Code as
  recommended in the Report.
- *Leads*: The King County Council will convene an interbranch team comprised of staff from at least:
   King County Council, Department of Community and Human Services, Department of Local
   <u>Services Permitting Division</u> ((Permitting and Environmental Review)), Public Health, and Office
   of Performance Strategy and Budget.
- 2137

# In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-16, amend as follows:

2140

2141 Action 8: Cottage Housing Regulations Review. Cottage housing is a method of development that 2142 allows for multiple detached single-family dwelling units to be located on a commonly owned parcel. In 2143 unincorporated King County, cottage housing is currently only permitted in the R-4 through R-8 urban 2144 residential zones, subject to certain conditions in the King County Code, such as in K.C.C. 21A.08.030 2145 and 21A.12.030, which includes being only allowed on lots one acre in size or smaller. This work plan 2146 item will review Comprehensive Plan policies and development code regulations for the potential for 2147 expanded allowances for cottage housing in unincorporated King County, including in Rural Areas, and 2148 recommend policy and code changes as appropriate. The review will include evaluation of encouraging: 2149 close proximity of garages to the associated housing unit; and development of units with a wide variety of 2150 square footages, so as to address various needs and a diversity of residents.

- *Timeline:* A Cottage Housing Regulations Report shall be transmitted to the Council by December
   31, 2018. Any proposed policy or code changes to implement the recommendations in the report
   shall be transmitted to the Council for consideration by September 30, 2019 as part of the 2020
   Comprehensive Plan update.
- Outcomes: The Executive shall file with the Council the Cottage Housing Regulations Report,
   which shall include identification of any recommended amendments to the King County Code
   and/or Comprehensive Plan. The Executive shall also file with the Council an ordinance adopting
   updates to the King County Code and/or the Comprehensive Plan, if recommended in the Report.
- *Leads*: The Department of <u>Local Services Permitting Division</u> ((<del>Permitting and Environmental</del>
   Review)) and the Office of Performance Strategy and Budget.
- 2161

# In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-19, amend as follows:

2164

2165 Action 12: Update Plat Ingress/Egress Requirements. State law gives King County the responsibility 2166 to adopt regulations and procedures for approval of subdivisions and plats. The Department of Local 2167 Services - Permitting Division ((Permitting and Environmental Review)) reviews ingress and egress to 2168 subdivisions and plats during the preliminary subdivision approval process using the Department of 2169 ((Transportation)) Local Services - Road Services Division's "King County Road Design and 2170 Construction Standards – 2007" (Roads Standards). In recent years, subdivision layouts have included 2171 one entry/exit (or ingress/egress) point and a looped road network within the subdivision. 2172 2173 Utilizing one entry/exit point can cause access issues if the roadway were to be physically impeded (such 2174 as due to: a fire, debris, flooding, ice, snow, etc.). This configuration may also cause traffic backups while 2175 waiting for the ability to turn in to or out of the development. Sometimes, this one access point may also 2176 be located too close to other intersecting roadways to the roadway that the development intersects; this 2177 can contribute to traffic back-ups. 2178 2179 This Workplan item directs the Executive to transmit legislation to update the code, (such as K.C.C. Title 2180 21A), and the King County Department of ((Transportation)) Local Services - Road Services Division's 2181 Road Standards to address these access issues. This code update will include requiring two entry/exit 2182 points for plats and subdivisions over a certain size; requiring sufficient distance between the two 2183 entry/exit points so as to not impact traffic flows; addressing access for emergency vehicles, including 2184 requiring adequate roadway width to accommodate emergency vehicles; and increasing the distance 2185 between adjacent intersecting streets. The transmittal letter for the ordinance(s) shall indicate the rational 2186 for the chosen size threshold for when the County will require two entry/exit points. 2187 *Timeline:* The proposed amendments to the King County Code and the King County Roads 2188 Standards shall be transmitted to the Council for consideration by ((June 28, 2019)) June 30, 2020. 2189 • *Outcomes:* The Executive shall file with the Council an ordinance(s) adopting updates to the King 2190 County Code and the King County Roads Standards. 2191 Lead: Department of Local Services ((Transportation and Department of Permitting and 2192 Environmental Review)). 2193 2194 Action 13: Water Availability and Permitting Study. The recent Washington State Supreme Court 2195 decision in Whatcom County v. Western Washington Growth Management Hearings Board (aka, Hirst) held that

2196	counties have a responsibility under the Growth Management Act to make determinations of water	
2197	availability through the Comprehensive Plan and facilitate establishing water adequacy by permit	
2198	applicants before issuance of development permits. <i>Hirst</i> also ruled that counties cannot defer to the State	
2199	to make these determinations. This case overruled a court of appeals decision which supported deference	
2200	to the State. The Supreme Court ruling will require the County to develop a system for review of water	
2201	availability in King County, with a particular focus on future development that would use permit exempt	
2202	wells as their source of potable water. This system will be implemented through amendments to the King	
2203	County Comprehensive Plan and development regulations. The County will engage in a Water	
2204	Availability and Permitting Study to address these and related issues. This study will analyze methods to	
2205	accommodate current zoning given possible water availability issues and will look at innovative ways to	
2206	accommodate future development in any areas with insufficient water by using mitigation measures (e.g.	
2207	water banks). This study will not include analysis of current water availability.	
2208	• <i>Timeline:</i> Eighteen month process. Initial report will be transmitted to the Council by December	
2209	1, 2017; final report, with necessary amendments, will be transmitted to the Council by	
2210	December 31, 2018. This report may inform the scope of work for the 2020 Comprehensive Plan	
2211	update.	
2212	• Outcomes: Modifications, as needed, to the Comprehensive Plan, King County Code and County	
2213	practices related to ensuring availability of water within the Comprehensive Plan and	
2214	determining the adequacy of water during the development permit process.	
2215	• <i>Leads:</i> Performance, Strategy and Budget. Work with the Department of Local Services -	
2216	Permitting Division ((Permitting and Environmental Review)), Department of Natural Resources	
2217	and Parks, Department of Public Health, Prosecuting Attorney's Office, and King County	
2218	Council. Involvement of state agencies, public, local watershed improvement districts, and non-	
2219	governmental organizations.	
2220		
2221	Action 14: 2020 Comprehensive Plan Update. In 2018, the County restructured its comprehensive	
2222	planning program and associated Comprehensive Plan update ((cycles)) process. This restructure	
2223	includes moving to an eight-year update ((eycle)) update schedule. As part of the transition to this new	
2224	(( <del>planning cycle</del> )) <u>update schedule</u> and given that the next (( <del>major</del> )) <u>eight-year</u> plan update will not be	
2225	completed until ((2023)) 2024, there is a need to make substantive changes in the interim. The scope of	
2226	the update proposed by the $((e))$ <u>E</u> xecutive in the motion shall include any changes as called for by	
2227	applicable Workplan Action items, any policy changes or land use proposals that should be considered	
2228	prior to the ((2023)) 2024 update, review and inclusion of changes related to docket proposals that were	

2229 recommended to be reviewed as part of the next ((<u>"major"</u>)) <u>eight-year</u> update, aligning the language in

the Comprehensive Plan and Title 20 regarding what is allowed during annual, midpoint and eight-yearupdates, and reviewing and updating the terminology to consistently describe the various updates.

- 2232 *Timeline:* A motion authorizing the 2020 Comprehensive Plan update shall be transmitted to the Council for consideration by January 2, 2019. The Council shall have until February 28, 2019 to adopt the motion. The 2020 Comprehensive Plan update shall be transmitted to the Council for consideration by September 30, 2019. The Council shall have until June 30, 2020 to adopt the 2020 Comprehensive Plan update.
- 2237 • *Outcomes:* The Executive shall file with the Council a motion authorizing the 2020 2238 Comprehensive Plan update. The Council shall have until February 28, 2019 to adopt the 2239 motion, either as transmitted or amended. In the absence of Council approval by February 28, 2240 2019, the Executive shall proceed to implement the scope as proposed. If the motion is approved 2241 by February 28, 2019, the scope shall proceed as established by the approved motion. The 2242 Executive shall then file with the Council the proposed 2020 Comprehensive Plan update by 2243 September 30, 2019. The Council shall have until June 30, 2020 to adopt the 2020 2244 Comprehensive Plan update.
- *Leads:* Office of Performance, Strategy and Budget, in coordination and collaboration with the
   Department of <u>Local Services Permitting Division</u> ((<del>Permitting and Environmental Review</del>)).
- 2247

2248 Action 15. Annual DLS Briefing at ((PRE)) Local Services Committee. In order to better serve the 2249 residents of unincorporated King County, the ((Executive transmitted legislation in 2018 (Proposed Ordinance 2018-0312) to)) Council adopted Ordinance 18791 to establish a new Department of Local 2250 2251 Services effective January 1, 2019, following guidance for the creation of the Department adopted in 2252 Motion 15125. ((If approved by the Council, t))The Department will be evaluating processes, procedures, 2253 and policies to identify areas of improvement in the delivery of unincorporated services. In addition to 2254 this evaluation, the Department will report at least annually to the ((Planning, Rural Services and 2255 Environment (PRE))) Local Services Committee or its successor on key issues related to unincorporated 2256 areas.

2257

2258

*Timeline:* The Department will report to the ((PRE)) <u>Local Services</u> Committee or its successor at least annually.

- Outcomes: The Department of Local Services shall coordinate with the Regional Planning Unit
   and other departments to inform the 2020 Comprehensive Plan ((Update)) update, and will brief
   the ((PRE)) Local Services Committee at least annually.
- *Leads:* Department of Local Services, in coordination with the Regional Planning Unit of Office of
   Performance, Strategy and Budget.

2264

2265 Action 16: Streamlining the Comprehensive Plan. Public participation, as expressed in Policy RP-103, is to be actively sought out throughout the development, amendment, and implementation of the 2266 2267 Comprehensive Plan. The Plan, and various iterations before final adoption, are posted online in order to 2268 be accessible to the public, and active outreach efforts during plan updates seek to reach a wide range of 2269 County residents. However, such a lengthy document with many complex regulatory requirements can 2270 be difficult to navigate and understand. To make the Comprehensive Plan and relevant sections in King 2271 County Code Title 20 more reader-friendly and accessible to a wider audience, redundancies and excess 2272 detail should be minimized. This workplan item will initiate the process of streamlining the 2016 2273 Comprehensive Plan and portions of King County Code Title 20 over the next several years, with the 2274 goal of becoming shorter, easier to understand, and more accessible to the general public. This review 2275 will consider: removal of text or policies that are redundant and/or repetitive within the plan; removal of 2276 text or policies that are redundant to other existing plans and policy documents; removal of outdated text 2277 or policies; removal of text or policies that are at a level of detail that is more appropriate for functional 2278 plans, implementation plans, development regulations, etc.; increasing readability and conciseness; 2279 clarifying the process for amending the plan; and making the document and sections of the Code more 2280 streamlined, user friendly, and accessible for the public. 2281 *Timeline:* A streamlined version of the Comprehensive Plan and relevant sections of King • 2282 County Code Title 20, including but not limited to KCC 20.08, 20.12, and 20.18 shall be 2283 transmitted to the Council for consideration by June 30, ((2022)) 2023. 2284 • *Outcomes:* The Executive shall file with the Council an ordinance adopting a streamlined version 2285 of the Comprehensive Plan and associated code changes as part of the Executive's proposed 2286 ((2023 Eight-Year)) 2024 eight-year Comprehensive Plan update. 2287 • Leads: Office of Performance, Strategy and Budget, in coordination and collaboration with the 2288 Council's Comprehensive Planning lead staff and the Department of Local Services - Permitting 2289 Division ((Permitting and Environmental Review)). 2290

- 2291 Action 17: Update the Residential Density Incentive Code. As part of the 2020 Comprehensive Plan
- 2292 update, the King County Executive included a code study regarding the County's Residential Density
- 2293 Incentive (RDI) regulations in K.C.C. Chapter 21A.34. This code study included recommendations for
- 2294 updating the RDI regulations, but ultimately the 2020 Comprehensive Plan update did not include any
- 2295 updates with the 2020 Comprehensive Plan update. The code study states that the "key factors identified
- 2296 and recommendations should be considered as the Affordable Housing Committee seeks to develop
- 2297 model ordinances or provide technical assistance to other jurisdictions interested in implementing
- 2298 inclusionary housing policies." As part of this Work plan Action, the King County Executive will update

2299	the County's RDI regulations. This work can be coordinated with the Affordable Housing Committee of		
2300	the Growth Management Planning Council, which has been established to implement the Regional		
2301	Affordable Housing Task Force Five Year Action Plan and will recommend action and assess progress		
2302	toward implementing the Plan.		
2303 2304	• <i>Timeline:</i> A proposed ordinance modifying the Residential Density Incentive Code shall be transmitted to the Council by June 30, 2023.		
2305	• <u>Outcomes: The Executive shall file with the Council a proposed ordinance as part of the</u>		
2306	Executive's proposed 2024 eight-year Comprehensive Plan update.		
2307	• <i>Lead</i> : Department of Local Services – Permitting Division, in coordination with the Department of		
2308	Community and Human Services and the Affordable Housing Committee of the Growth		
2309	Management Planning Council.		
2310			
2311	Action 18: Greenhouse Gas Mitigation. As part of the 2020 update to the 2016 Comprehensive Plan,		
2312	policies and regulations related to some aspects of climate change and greenhouse gas emissions were		
2313	adopted. More work is needed to address resiliency for the natural and built environment, and to		
2314	mitigate impacts from climate change, including avoiding or sequestrating greenhouse gas emissions.		
2315	The loss of carbon sequestration capacity resulting from the conversion of forestland to non-forest uses is		
2316	one area where the County can make a difference in addressing these impacts. In order to implement the		
2317	policy direction in the 2020 update related to sea level rise, climate change, greenhouse gas emissions,		
2318	and fossil fuel facility impacts, this Workplan item directs:		
2319	A. Preparation of a Forest Conversion Review Study that includes and evaluates the following		
2320	information:		
2321	1. The current process and standards for reviewing and approving Class-IV General Forest		
2322	Practices relating to forest conversion, and for reviewing and approving Conservation		
2323	Option Harvest Plans.		
2324	2. The number of forest conversions permitted in King County since January 1, 2010,		
2325	regardless of whether a separate Class-IV Forest Practice permit was issued, and the		
2326	average and total acreage of forest removed.		
2327	3. The number of Conversion Option Harvest Plans approved since January 1, 2010, and		
2328	the number of participating properties that were not subsequently replanted.		
2329	4. Potential pathways to achieving zero net loss carbon sequestration capacity from forest		
2330	conversions, including, but not limited to, off-site replanting, payment into a mitigation		
2331	bank, and purchase of carbon credits. This should include both standard forest		

2332	conversions and properties with Conversion Option Harvest Plans that are subsequently
2333	converted to non-forest uses.
2334	B. Drafting and transmittal of a proposed ordinance that establishes or modifies regulations, and if
2335	necessary, Comprehensive Plan policies, that will result in zero net loss of carbon sequestration
2336	capacity from forest conversions, based on the recommended strategies in the Forest Conversion
2337	<u>Review Study.</u>
2338	• <u>Timeline: The Forest Conversion Review Study report and a proposed ordinance making</u>
2339	<u>Comprehensive Plan and/or King County Code changes shall be transmitted to the Council for</u>
2340	consideration by June 30, 2022.
2341	Outcomes: The Executive shall file with the Council the Forest Conversion Review Study report
2341	• <u>Outcomes: The Executive shall file with the Council the Forest Conversion Review Study report</u> and a proposed ordinance with recommended code and/or policy updates.
2342	
2343 2344	<ul> <li><u>Leads</u>: Department of Local Services – Permitting Division and Department of Natural Resources and Parks.</li> </ul>
2345	
2346	Action 19: Skyway-West Hill and North Highline Anti-Displacement Strategies. King County will
2347	complete an Anti-Displacement Strategy for Skyway-West Hill and North Highline. In the context of
2348	Motion 15539, the work done by the County's Regional Affordable Housing Task Force and the ongoing
2349	work by the Affordable Housing Committee of the Growth Management Planning Council, this strategy
2350	will evaluate tools, programs, and regulations to retain and create affordable housing and prevent
2351	residential displacement. The strategy, at minimum, shall consider the following: mandatory
2352	inclusionary zoning; preservation for manufactured housing and manufactured housing communities;
2353	residential community benefit agreements; relocation assistance; redevelopment assistance; right to return
2354	programs; community preference programs; and other tools, programs, and regulations identified in
2355	Motion 15539. The report will be informed by best practices, research, other ongoing efforts in King
2356	County, and a robust community engagement process.
2357	• <u>Timeline: A Skyway-West Hill and North Highline Anti-Displacement Strategies Report and</u>
2358	proposed legislation to implement the recommendations in the report shall be transmitted to the
2359	Council for consideration by September 30, 2021. This deadline supersedes the deadlines adopted
2360	<u>in Motion 15539.</u>
2361	Outcomes: The Executive shall file with the Council the Skyway-West Hill Equitable Housing
2362	Development Strategies Report, which shall include recommended strategies and tools and
2363	identification of recommended legislation, if appropriate. The Executive shall also file with the
2364	Council legislation as recommended in the Report. These outcomes supersede the deliverables
2365	adopted in Motion 15539.

- 2366 • Leads: Department of Community and Human Services, Department of Local Services, the Office 2367 of Equity and Social Justice, and the Office of Performance Strategy and Budget. Executive staff 2368 shall update and coordinate with the Councilmember offices representing the area throughout the 2369 planning process. 2370 2371 Actions Related to the Growth Management Planning Council 2372 The Growth Management Planning Council (GMPC) is a separate formal body consisting of elected 2373 officials from King County, Seattle, Bellevue, other cities and towns in King County, special purpose 2374 districts, and the Port of Seattle. The GMPC developed the Countywide Planning Policies, providing a 2375 countywide vision and serving as a framework for each jurisdiction to develop its own comprehensive
- 2376 plan, which must be consistent with the overall vision for the future of King County. The GMPC is
- 2377 chaired by the King County Executive; five King County Councilmembers serve as members.
- 2378 Recommendations from the GMPC are transmitted to the full King County Council for review and
- consideration.
- 2380
- 2381 The GMPC develops its own independent work program every year; this section of the 2016
- 2382 Comprehensive Plan Workplan identifies issues the County will bring forward to the GMPC for review,
- 2383 consideration and recommendations. King County will submit these Workplan items to the GMPC for
- consideration at its first meeting of 2017, with a goal of completing the GMPC review and
- recommendations by December 31, 2018. The Executive will work with the Council to determine
- 2386 whether the amendments are appropriate for inclusion in ((an Annual)) the annual or ((Midpoint))
- 2387 <u>midpoint</u> Comprehensive Plan ((Amendment)) <u>update</u> prior to the next ((Eight-Year)) <u>eight-year</u> update.
- 2388
- In Chapter 12 Implementation, Amendments and Evaluation, starting on page 12-22,
  amend as follows:
- 2391

#### 2392 Action ((17))<u>GMPC-1 (Was Action 17)</u>: Develop a Countywide Plan to Move Remaining

2393 Unincorporated Urban Potential Annexation Areas Toward Annexation. The GMPC has authority to 2394 propose amendments to the Countywide Planning Policies, and a unique defined role related to 2395 recommending approval or denial of Urban Growth Area expansions. In order to move remaining 2396 unincorporated areas, which vary in size and complexity, towards annexation, the GMPC would 2397 reconsider the Potential Annexation Areas map and the "Joint Planning and Annexation" section of the 2398 Countywide Planning Policies. This effort would include an evaluation of how to address Potential 2399 Annexation Areas that have been previously unsuccessful in annexation and/or where annexation does 2400 not appear feasible in the near future. The report shall include review of tax revenue impacts to the

County resulting from annexations, evaluation of requirements regarding annexation of roadways within
Potential Annexation Areas, and identification of current orphaned roads and potential methods to
transfer ownership to cities. Deadline: December 31, 2019.

2404

2405 Action ((18)) GMPC-2 (Was Action 18): Review the Four-to-One Program. The County's Four-to-2406 One Program has been very effective in implementing Growth Management Act goals to reduce sprawl 2407 and encourage retention of open space. This is done through discretionary actions by the County 2408 Council, following a proposal being submitted by a landowner(s) to the County. Over time, there have 2409 been proposals that vary from the existing parameters of the program; these have included possible 2410 conversion of urban zoning for lands not contiguous to the original 1994 Urban Growth Area, allowing 2411 the open space to be non-contiguous to the urban extension, use of transfer of development rights, 2412 providing increased open space credit for preserved lands with high ecological value (such as lands that 2413 could provide for high value floodplain restoration, riparian habitat, or working resource lands), and 2414 consideration of smaller parcels or parcels with multiple ownerships. Allowing these changes have the 2415 potential for increasing the use of the tool, with attendant risks and benefits. The Growth Management 2416 Planning Council would review the Four-to-One program and determine whether changes to the existing 2417 program should be implemented that will strengthen the program and improve implementation of the 2418 Comprehensive Plan, including evaluation of the proposals listed above. 2419

2420 Action ((19)) GMPC-3 (Was Action 19): Buildable Lands Program Methodology Review. As 2421 required by the Growth Management Act, King County and the 39 cities participate in the Buildable 2422 Lands Program to evaluate their capacity to accommodate forecasted growth of housing units and jobs. 2423 The program, administered by the Washington State Department of Commerce, requires certain counties 2424 to determine whether the county and its cities are achieving urban densities within urban growth areas by 2425 comparing assumptions and targets regarding growth and development with actual growth and 2426 development in the county and cities. Since issuance of the first Buildable Lands Report in 2002, 2427 jurisdictions and stakeholders have expressed the potential for possible refinements of the methodology 2428 used by King County and the cities. The Growth Management Planning Council would work with 2429 stakeholders to review the methodology, including testing the accuracy of the Buildable Lands Report 2430 model and results, for potential refinements.

2431

#### 2432 In Glossary, on page G-14, amend as follows:

- 2433
- 2434 Land Use Map

2435 The land use map ((for)) adopted as part of the Comprehensive Plan designates the general location and

- extent of the uses of land for agriculture, timber production, housing, commerce, industry, recreation,
- open spaces, public utilities, public facilities, and other land uses as required by the Growth Management

2438 Act. ((The)) <u>A representation of the</u> Land Use Map is ((not included in the Plan because it is very large;

2439 however a smaller representation of it is reproduced)) included at the end of Chapter 1: Regional Growth

- 2440 Management Planning. ((The full size map is available for review at the Department of Permitting and
- 2441 Environmental Review and at the Clerk of the King County Council.))
- 2442

## 2443 In Glossary, on page G-15, amend as follows:

2444

### 2445 Mineral Resource Sites

The Growth Management Act requires cities and counties to designate, where appropriate, mineral
resource lands that are not already characterized by urban growth and that have long-term significance
for the extraction of minerals. The comprehensive plan designates as Mineral Resource Sites existing,
approved ((mining)) mineral extraction sites, and also designates as Potential Surface Mineral Resource
Sites properties on which King County expects some future mines may be located. (See Chapter 3: Rural
Areas and Natural Resource Lands)

2452

# 2453 In Glossary, on page G-20, amend as follows:

2454

#### 2455 **Public Review Draft**

- 2456 A Public Review Draft is a draft of ((e))<u>E</u>xecutive proposed Comprehensive Plan ((amendments))
- 2457 <u>updates</u>, including proposed Community Service Area subarea plans, made available to the public for
- 2458 review and comment. A Public Review Drafts is published prior to transmittal of proposed
- 2459 Comprehensive Plan ((amendments)) updates to the ((e))Council so as to provide the public an
- opportunity to record comments before the ((e))<u>E</u>xecutive finalizes the recommended ((amendments))
   <u>updates</u>.
- 2462

# In the Vashon-Maury Island Community Service Area Subarea Plan, starting on page 96. amend as follows:

2465

### 2466 VMI CSA Workplan Action 2: Sewer Local Service Area

2467 Portions of Vashon-Maury Island have an established "local service area" (LSA) that allows for

the provision of sewer service within certain areas of the island. Adoption of the LSA dates back

to at least 1986, with the adoption of the Vashon Community Plan in Ordinance 7837.

2470 Subsequent to the adoption of that plan, the Growth Management Act (GMA) was passed. 2471 which defined provision of sewer as an urban service. Provision of sewer service outside the urban growth boundary is tightly restricted. Because there was already sewer service on 2472 2473 portions of Vashon-Maury Island, this existing LSA was continued in the County's planning 2474 documents and code provisions (such as in K.C.C. Title 13). With the adoption of the Vashon-2475 Maury Island subarea plan, as well as the adoption of the affordable housing incentive SDO, 2476 future development is anticipated, some of which would desire or rely on sewer service. 2477 However, the legislative history of the LSA is unclear, and for the Rural Town area, the LSA 2478 boundary does not match the boundaries of the Rural Town. This Workplan item directs an 2479 Interbranch Team to review the legislative history of the LSA on Vashon-Maury Island, and 2480 determine what the current LSA boundary is. This work shall include: 1) review of the past 2481 ordinances adopting, and/or repealing, various land use planning and sewer planning 2482 documents (including Vashon Sewer District plans), 2) evaluation of GMA and other applicable 2483 legal limitations on modifying the boundaries of the LSA and the Rural Town, 3) proposing an ordinance to officially adopt the correct LSA boundary, and 4) evaluation of the effects of this 2484 2485 correct LSA boundary on the existing land use designations, zoning and affordable housing 2486 SDO. If review by the Utilities Technical Review Committee is required, this shall be completed 2487 by the Executive prior to transmittal of the report and accompanying proposed ordinance.

2488

*Timeline:* A Vashon-Maury Island Sewer Local Service Area Report and proposed
 ordinance to implement the recommendations in report shall be transmitted to the
 Council for consideration by ((June 30)) December 31, 2019.

- Outcomes: The Interbranch Team shall develop and the Executive shall file with the
   Council the Vashon-Maury Island Sewer Local Service Area Report, which shall include
   identification of recommended amendments to the King County Code. The Executive
   shall also file with the Council an ordinance adopting updates to the Code as
   recommended in the Report.
- Lead: Department of Permitting and Environmental Review shall lead an interbranch
   team including the Prosecuting Attorney's office, Council staff, and the Department of
   Natural Resources and Parks, including coordination with the Utilities Technical Review
   Committee. Work with the Vashon Sewer District will be required. Executive staff shall
   update and coordinate with the Councilmember office(s) representing Vashon-Maury
   Island throughout the community planning process.
