### Annual Update

#### Characteristics Based Market Adjustment for 2015 Assessment Roll

**Previous Physical Inspection:** 2011  
**Number of Improved Sales:** 566  
**Range of Sale Dates:** 1/1/2012 – 12/31/2014 Sales were time adjusted to 1/1/2015

Sales - Improved Valuation Change Summary:						
	Land	Improvements	Total	Mean Sale Price	Ratio	COD
<b>2014 Value</b>	\$108,600	\$307,200	\$415,800			8.34%
<b>2015 Value</b>	\$106,500	\$303,600	\$410,100	\$437,400	93.8%	8.01%
<b>\$ Change</b>	-\$2,100	-\$3,600	-\$5,700			
<b>% Change</b>	-1.9%	-1.2%	-1.4%			

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The 2015 COD of 8.01% is an improvement from the previous COD of 8.34%. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%. The resulting COD meets or exceeds the industry assessment standards.

Population - Improved Valuation Change Summary:			
	Land	Improvements	Total
<b>2014 Value</b>	\$127,600	\$284,800	\$412,400
<b>2015 Value</b>	\$125,200	\$280,300	\$405,500
<b>\$ Change</b>	-\$2,400	-\$4,500	-\$6,900
<b>% Change</b>	-1.9%	-1.6%	-1.7%

**Number of one to three unit residences in the population:** 3,428

**Summary of Findings:** The analysis for this area consisted of a general review of applicable characteristics, such as: grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that several characteristic and plat-based variables needed to be included in the valuation formula in order to improve the uniformity of assessments throughout the area. For instance, the plats of Stonecroft (803535) and Taylor Heights Div 1&2 (856745-856746) were generally at lower assessment levels than the rest of the population. In addition, the plat of Willow Ridge (942940) and home located in sub-area 3 were generally at higher assessment levels than the rest of the population. This annual update valuation model corrects for these strata differences.

## Area 070 - Model Adjustments

### 1-3 Unit Residences

*2015 Total Value = 2014 Total Value + Overall (+/-) Characteristic Adjustments*

Standard Area Adjustment	# Parcels Adjusted	% of Population
-0.93%	2,200	64%

Due to truncating the coefficient values used to develop the percentages and further rounding of the percentages in this table, the results you will obtain are an approximation of adjustment achieved in production.

The percentages listed in the following table are total adjustments, not additive adjustments.

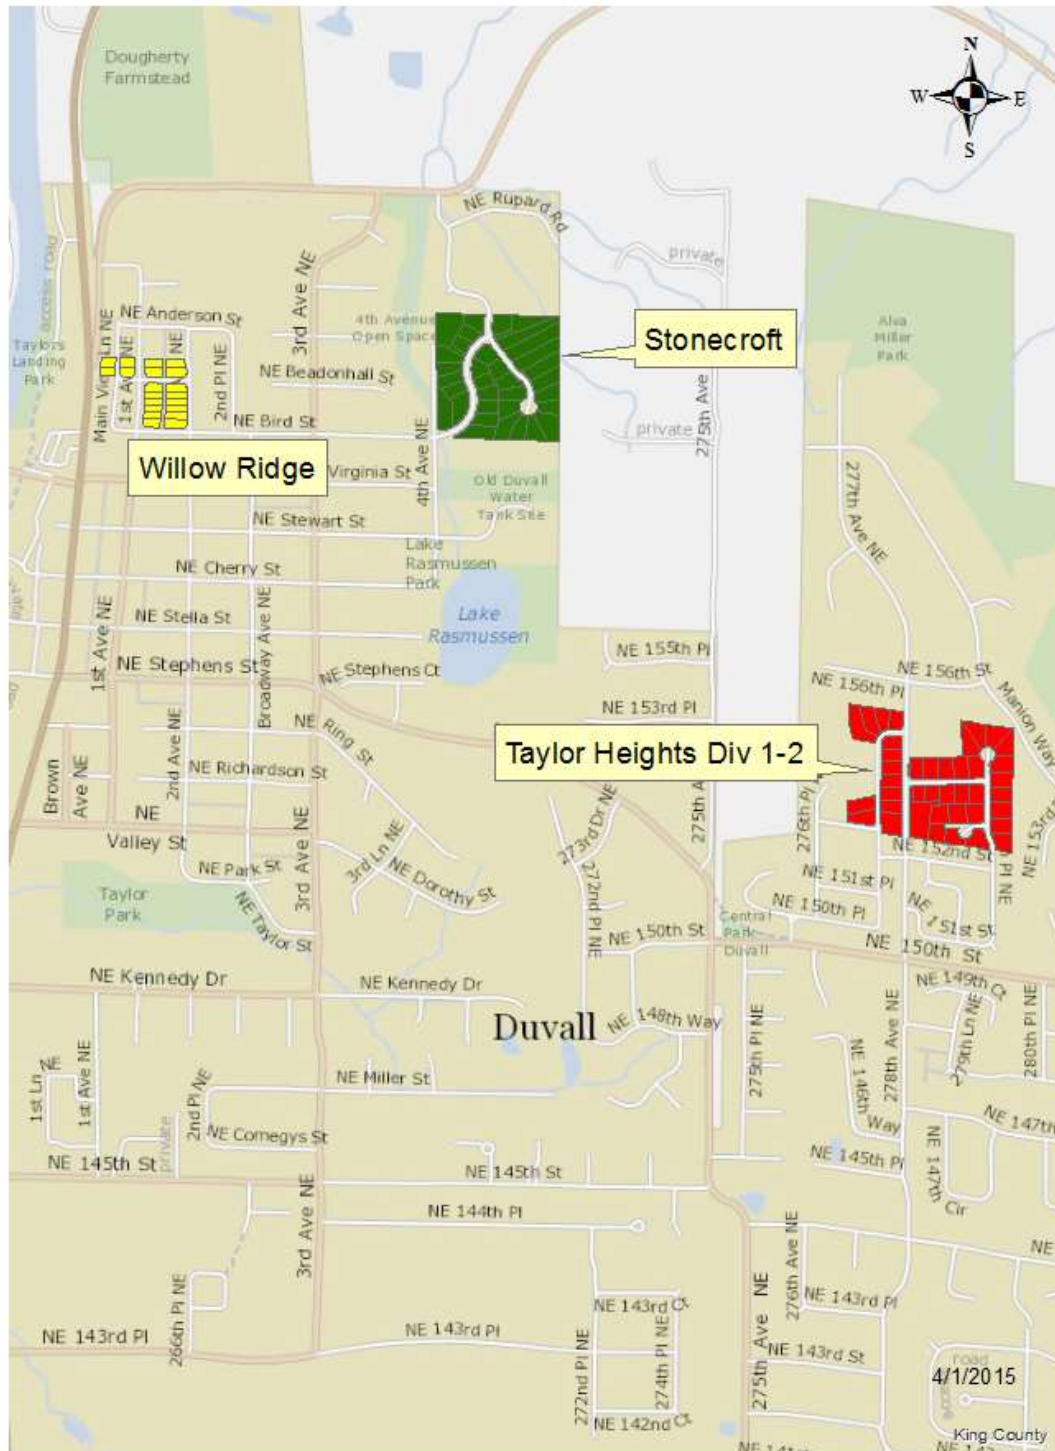

Model Variable	Adj %	# Sales	# in Pop	% Rep
Sub Area 3	-3.43%	99	1138	9%
Stonecroft Plat	+9.95%	7	32	22%
TAYLOR HEIGHTS DIV	+19.55%	7	38	18%
Willow Ridge Plat	-9.66%	16	20	80%

There were no properties that would receive a multiple variable adjustment.

Generally, the plats of Stonecroft (803535) and Taylor Heights Div. 1&2 (856745-856746), were at a lower assessment level than the rest of the population. Homes located in Willow Ridge (942940) and Sub-Area 3 were generally at a higher assessment level than the rest of the population. This model corrects for these strata differences.

Sales of new homes built over the last few years are over represented in this sample.

This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

## Area 070 Market Value Changes Over Time

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2015**.

For example, a sale of \$475,000 which occurred on October 1, 2013 would be adjusted by the time trend factor of 1.064, resulting in an adjusted value of \$0 ( $\$475,000 \times 1.064 = \$505,400$ ) – truncated to the nearest \$1000.

# Annual Update Process

**Effective Date of Appraisal: January 1, 2015**

**Date of Appraisal Report: March 31, 2015**

## Sales Screening for Improved Parcel Analysis

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2014
5. Existing residences where the data for 2014 is significantly different than the data for 2015 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$25,000 or less posted for the 2014 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

*(See the attached Improved Sales Used in this Annual Update Analysis and Improved Sales Removed from this Annual Update Analysis for more detailed information)*

## Land Update

Based on the 26 usable land sales available in the area, their 2014 Assessment Year assessed values, and supplemented by the value increase in sales of improved parcels, an overall market adjustment was derived. This resulted in an overall -1.9% decrease in land assessments in the area for the 2015 Assessment Year. The formula is:

2015 Land Value = 2014 Land Value \* 0.986, with the result truncated to the next \$1,000.

## Improved Parcel Update

The analysis for this area consisted of a general review of applicable characteristics, such as: grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that several characteristic and plat-based variables needed to be included in the valuation formula in order to improve the uniformity of assessments throughout the area. For instance, the plats of Stonecroft (803535) and Taylor Heights Div 1&2 (856745-856746) were generally at lower assessment levels than the rest of the population. In addition, the plat of Willow Ridge (942940) and home located in sub-area 3 were generally at higher assessment levels than the rest of the population. This annual update valuation model corrects for these strata differences.

With the exception of real property mobile home parcels and parcels with “accessory only” improvements, the new recommended values on all improved parcels were based on the analysis of the 566 useable residential sales in the area.

Sales used in the valuation model were time adjusted to January 1, 2015. The chosen adjustment model was developed using multiple regression. An explanatory adjustment table is included in this report.

The derived adjustment formula is:

$$\begin{aligned} 2015 \text{ Total Value} = & 2014 \text{ Total Value} * (1 - 0.05) / (.958904761461799 - 0.0948839667053433 * \\ & \text{STONE803535} + 0.0248806893647933 * \text{Sub3} - 0.164257463005145 * \text{TAYLOR856745\_746} + \\ & 0.0927245663237708 * \text{WILLOW942941}) \end{aligned}$$

The resulting total value is truncated to the next \$1,000, *then*:

$$2015 \text{ Improvements Value} = 2015 \text{ Total Value minus } 2015 \text{ Land Value}$$

## Mobile Home Update

There were not a sufficient number of Mobile Home sales, for separate analysis. Therefore, mobile homes were adjusted by the Total % Change indicated by the Area’s sales sample as reflected on the Executive Summary page of -1.4%. The adjustment formula is:

$$\begin{aligned} 2015 \text{ Total Value} &= 2014 \text{ Total Value} * 0.986 \\ 2015 \text{ Improvements Value} &= 2015 \text{ Total Value minus } 2015 \text{ Land Value} \end{aligned}$$

## Results

The resulting assessment level is 0.938. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2015 assessment year (taxes payable in 2016) results in an average total change from the 2014 assessments of -1.7%. This decrease is due partly to market changes over time and the previous assessment levels.

Note: Additional information may reside in the Assessor’s Real Property Database, Assessor’s procedures, Revalue Plan, separate studies, and statutes.

## Exceptions:

- If multiple houses exist on a parcel, the Total % Change indicated by the sales sample is used to arrive at the new total value (Previous Year Land Value + Previous Year Improvement Value) \* 0.986.
- If the site is improved with a house and mobile home, the formula derived from the house is used to arrive at new total value.
- If “accessory improvements only”, the Total % Change, as indicated by the sales sample, is used to arrive at a new total value. (Previous Year Land Value + Previous Year Improvement Value) \* 0.986.
- If land value ≤ \$1,000 no adjustment is applied.
- If improvements and accessories ≤ \$1,000 no further adjustment applied.

- If adjusted land value falls < \$1,000, then land value = \$1,000 or previous, whichever is less.
  - If adjusted improvement value falls < \$1,000, then improvement value = \$1,000 or previous, whichever is less.
  - If vacant parcel (no improvement value), the land adjustment applies.
  - If a parcel is coded “non-perc” (sewer system=3 or 4), the land adjustment is applied
  - If a parcel is coded “unbuildable” = 1, the land adjustment is applied.
  - If a parcel is coded water district private restricted, or public restricted, the land adjustment is applied.
  - If an improvement is coded “% net condition” or is in “poor” condition, then the model adjustment is applied.
- Any properties excluded from the annual up-date process are noted in RealProperty.

# Uniform Standards of Professional Appraisal Practice Compliance

## Client and Intended Use of the Appraisal:

This mass appraisal report is intended for use by the public, King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others for other purposes is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

## Definition and date of value estimate:

### Market Value

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 Wn. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65,66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

### Highest and Best Use

#### **RCW 84.40.030**

*All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.*

*An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.*

**WAC 458-07-030 (3) True and fair value -- Highest and best use.**

*Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.*

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

**Date of Value Estimate**

**RCW 84.36.005**

*All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.*

**RCW 36.21.080**

*The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.*

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

## Property Rights Appraised: Fee Simple

### **Wash Constitution Article 7 § 1 Taxation:**

*All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.*

### **Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914)**

*...the entire [fee] estate is to be assessed and taxed as a unit...*

### **Folsom v. Spokane County, 111 Wn. 2d 256 (1988)**

*...the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee...*

### **The Dictionary of Real Estate Appraisal, 3rd Addition, Appraisal Institute.**

*Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.*

## Assumptions and Limiting Conditions:

1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.
2. No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
3. No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge the taxpayer to retain an expert in the field and submit data affecting value to the assessor.

8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
11. An attempt to segregate personal property from the real estate in this appraisal has been made.
12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.
15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

### **Scope of Work Performed:**

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.
