# John Wilson Assessor

#### Dear Property Owners,

Our field appraisers work hard throughout the year to visit properties in neighborhoods across King County. As a result, new commercial and residential valuation notices are mailed as values are completed. We value your property at its "true and fair value" reflecting its highest and best use as prescribed by state law (RCW 84.40.030; WAC 458-07-030).

We continue to work hard to implement your feedback and ensure we provide accurate and timely information to you. We have made significant improvements to our website and online tools to make interacting with us easier. The following report summarizes the results of the assessments for your area along with a map. Additionally, I have provided a brief tutorial of our property assessment process. It is meant to provide you with the background information about the process we use and our basis for the assessments in your area.

Fairness, accuracy and transparency set the foundation for effective and accountable government. I am pleased to continue to incorporate your input as we make ongoing improvements to serve you. Our goal is to ensure every single taxpayer is treated fairly and equitably.

Our office is here to serve you. Please don't hesitate to contact us if you ever have any questions, comments or concerns about the property assessment process and how it relates to your property.

In Service,

John Wilson King County Assessor

# **How Property Is Valued**

King County along with Washington's 38 other counties use mass appraisal techniques to value all real property each year for property assessment purposes.

## What Are Mass Appraisal Techniques?

In King County the Mass Appraisal process incorporates statistical testing, generally accepted valuation methods, and a set of property characteristics for approximately 700,000 residential, commercial and industrial properties. More specifically for commercial property, the Assessor breaks up King County into geographic or specialty (i.e., office buildings, warehouses, retail centers, etc.) market areas and annually develops valuation models using one or more of the three standard appraisal indicators of value: Cost, Sales Comparison (market) and Income. For most commercial properties the income approach is the primary indicator of value. The results of the models are then applied to all properties within the same geographic or specialty area.

## **Are Properties Inspected?**

All property in King County is physically inspection at least once during each six year cycle. Each year Assessor's appraisers inspect a different geographic area. An inspection is frequently an external observation of the property to confirm whether the property has changed by adding new improvements or shows signs of deterioration more than normal for the property's age. For some larger or complex commercial properties an appraiser may need to also conduct an interior inspection of the buildings or property. From the property inspections we update our property assessment records for each property.

#### **How are Individual Commercial Properties Valued?**

The Assessor collects a large amount of data regarding commercial properties: cost of construction, Sales of property, and prevailing levels of rent, operating expenses, and capitalization rates. Statistical analysis is conducted to establish relationships between factors that might influence the value of commercial property. Lastly valuation models are built and applied to the individual properties. For income producing properties, the following are the basic steps employed for the income approach:

- 1. Estimate potential gross income
- 2. Deduct for vacancy and credit loss
- 3. Add miscellaneous income to get the effective gross income
- 4. Determine typical operating expenses
- 5. Deduct operating expenses from the effective gross income
- 6. Select the proper capitalization rate
- 7. Capitalize the net operating income into an estimated property value

#### **How is Assessment Uniformity Achieved?**

The Assessor achieves uniformity of assessments through standardization of rate tables for incomes, operating expenses, vacancy and credit loss collections and capitalization rates which are uniformly applied to similarly situated commercial properties. Rate tables are generated annually that identify specific rates based on location, age, property type, improvement class, and quality grade. Rate

tables are annually calibrated and updated based on surveys and collection of data from local real estate brokers, professional trade publications, and regional financial data sources. With up-to-date market rates we are able to uniformly apply the results to properties based on their unique set of attributes.

Where there is a sufficient number of sales, assessment staff may generate a ratio study to measure uniformity mathematically through the use of a coefficient of dispersion (aka COD). A COD is developed to measure for and show the uniformity of predicted property assessments. We have adopted the Property Assessment Standards prescribed by the International Association of Assessing Officers (aka IAAO) that may be reviewed at <a href="https://www.IAAO.org">www.IAAO.org</a>. The following are target CODs we employ based on standards set by IAAO:

| Type of Commercial Property      | Subtype                           | COD Range                    |
|----------------------------------|-----------------------------------|------------------------------|
| Income Producing                 | Larger areas represented by large | 5.0 to 15.0                  |
|                                  | samples                           |                              |
| Income Producing                 | Smaller areas represented by      | 5.0 to 20.0                  |
|                                  | smaller samples                   |                              |
| Vacant Land                      |                                   | 5.0 to 25.0                  |
| Other real and personal property |                                   | Varies with local conditions |

Source: IAAO, Standard on Ratio Studies, Table 2-3. www.IAAO.org

More results of the statistical testing process is found within the attached area report.

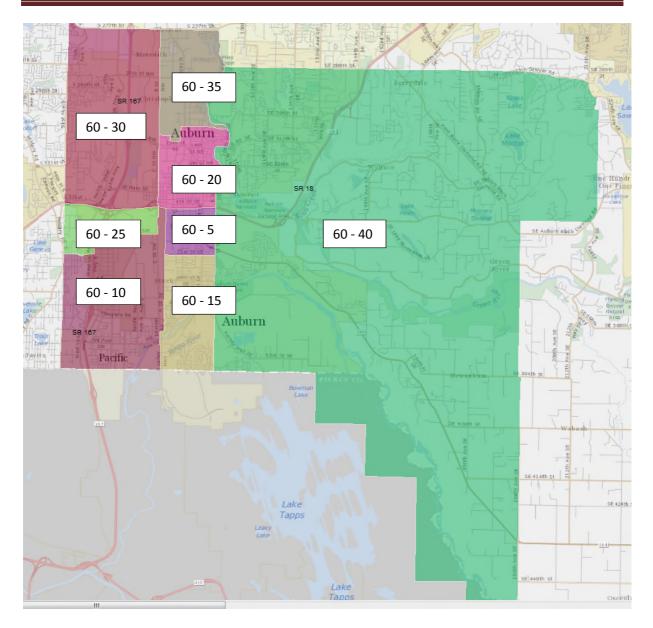

## **Requirements of State Law**

Within Washington, property is required to be revalued each year to market value based on its highest and best use. (RCW 8441.030; 84.40.030; and WAC 458-07-030). Washington Courts have interpreted fair market value as the amount of money a buyer, willing but not obligated to buy, would pay to a seller willing but not obligated to sell. Highest and Best Use is simply viewed as the most profitable use that a property can be legally used for. In cases where a property is underutilized by a property owner, it still must be valued at its highest and best use.

#### **Appraisal Area Reports**

The following area report summarizes the property assessment activities and results for a general market area. The area report is meant to comply with state law for appraisal documentation purposes as well as provide the public with insight into the mass appraisal process.

Appraisal Date: 1/1/2017

## Geographic Appraisal Area:

60: Auburn, Pacific, Algona and adjacent area

#### **Sales – Improved Summary:**

Number of Sales: 100; 99 in ratio

Range of Sales Dates: 01/01/2014– 12/31/2016

#### **Sales – Ratio Study Summary:**

|             |  | V I I O         |        |        |  |  |  |  |  |  |  |
|-------------|--|-----------------|--------|--------|--|--|--|--|--|--|--|
|             | SalesImproved Valuation Change Summary |                 |        |        |  |  |  |  |  |  |  |
|             | Mean Assessed Value                    | Mean Sale Price | Ratio  | COD*   |  |  |  |  |  |  |  |
| 2016Value   | \$1,716,900                            | \$2,048,200     | 83.8%  | 14.79% |  |  |  |  |  |  |  |
| 2017 Value  | \$1,920,900                            | \$2,048,200     | 93.8%  | 11.38% |  |  |  |  |  |  |  |
| Abs. Change | \$204,000                              |                 | 10.0%  | -3.41% |  |  |  |  |  |  |  |
| % Change    | 11.88%                                 |                 | 11.93% | -23.1% |  |  |  |  |  |  |  |

<sup>\*</sup>COD is a measure of uniformity, the lower the number the better the uniformity

Sales used in analysis: All improved sales, verified as good, that did not have characteristic changes between the date of sale and the date of appraisal were included in the ratio analysis. Examples of sales not included in the analysis are: those of property leased back to the seller; portions of a bulk portfolio sale; net lease sales; those prior to major property renovation.

#### **Population - Parcel Summary Data:**

| To                | Total Population - Parcel Summary Data |                 |                 |  |  |  |  |  |  |  |
|-------------------|--|-----------------|-----------------|--|--|--|--|--|--|--|
|                   | Land                                   | Improvements    | Total           |  |  |  |  |  |  |  |
| 2016 Value        | \$727,795,150                          | \$1,228,987,500 | \$1,956,782,650 |  |  |  |  |  |  |  |
| <b>2017</b> Value | \$757,588,700                          | \$1,292,263,100 | \$2,049,851,800 |  |  |  |  |  |  |  |
| % Change          | 4.09%                                  | 5.15%           | 4.76%           |  |  |  |  |  |  |  |

Number of Parcels in the Population: 1,972 including vacant parcels and government parcels, but excluding specialty parcels. When commercial condominium projects are counted as single parcels, the number is 1,479.

#### **Conclusion and Recommendation:**

Total assessed values for the 2017 revalue have increased 4.76%.

The values recommended in this report improve uniformity and assessment equity, we recommend posting these values for the 2017 assessment year.

## **Areas within King County and Responsible Appraisers**

The following appraiser did the valuation for this geographic area:

• Robert M. Rosenberger – Commercial Appraiser II

The process and results were reviewed for quality control and administrative purposes by Marie Ramirez, Senior Appraiser.

## Identification of the Area

Name or Designation: Area 60 – Auburn, Pacific, Algona

**Boundaries:** This area is located in the Southern portion of King County. The northern boundary is 277<sup>th</sup> Street South to the Green River. The boundary then follows the Green River south to S.E. 288<sup>th</sup> Street, then due east. The east boundary line starts at 216<sup>th</sup> Ave S.E., and then follows the half section line which corresponds to 220<sup>th</sup> Ave S.E. until it hits the S.E. Auburn Black Diamond Road. From there it heads west for a short distance, and then follows 196<sup>th</sup> Ave S.E. all the way to the Pierce County line. The southern boundary follows the King/Pierce County line to the western boundary which is 51<sup>st</sup> Avenue South.

The Cities of Algona, Auburn, & Pacific, the Muckleshoot Indian Reservation, and a portion of unincorporated King County are located within Area 60.

## Map:

A general map of the area is located in the report folder of the area report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

#### **Area Overview:**

Auburn development was dominated in 2016 by two themes, apartments and education. In south Auburn, construction started on the Estates at Hillside Gardens, a 127 unit senior complex on Howard Road. Just to the north of downtown, The Reserve broke ground on two adjoining complexes; 297 senior apartments, and 295 family units. Ground was also broken on the Merrill Gardens assisted living facility with 114 units in the heart of downtown. Auburn High School, formerly housed in a sprawling campus on East Main Street was completely rebuilt. It now houses 3,000 students under one roof in an attractive, energy efficient, cost effective, and technologically advanced building. Green River College went on a construction spree. It spent 32.2 million dollars on the new Mel Lindbloom Student Union Building on the main campus. Across the street from the main campus, the 34.6 million dollar Trades Complex was opened for the teaching of automotive repair, carpentry, etc. A satellite building which houses business classes - appropriately located just to the north of downtown – was also completed.

Qdoba opened a quick serve facility near the Outlet Collection, while a new line retail center welcomes visitors to the north end of town. In a sign of continuing strength, the industrial sector enjoys an actual overall vacancy rate under 3%.

## **Analysis Process**

**Effective Date of Appraisal**: January 1, 2017

**Date of Appraisal Report**: March 24, 2017

The following appraiser did the valuation for geographic area 60:

Robert M. Rosenberger

## **Highest and Best Use Analysis**

**As if vacant:** Market analysis of this area, together with current zoning and current anticipated use patterns, indicate the highest and best use of the majority of the appraised parcels as commercial. Any opinion not consistent with this is specifically noted in our records and considered in the valuation of the specific parcel

As if improved: Based on neighborhood trends, both demographic and current development patterns, the existing buildings represent the highest and best use of most sites. The existing use will continue until land value, in its highest and best use, exceeds the sum of value of the entire property in its existing use and the cost to remove the improvements. We find that the current improvements do add value to the property, in most cases, and are therefore the highest and best use of the property as improved. In those properties where the property is not at its highest and best use, a nominal value of \$1,000.00 is assigned to the improvements.

**Interim Use:** In many instances a property's highest and best use may change in the foreseeable future. A tract of land at the edge of a city might not be ready for immediate development, but current growth trends may suggest that the land should be developed in a few years. Similarly, there may not be enough demand for office space to justify the construction of a multistory office building at the present time, but increased demand may be expected within five years. In such situations, the immediate development of the site or conversion of the improved property to its future highest and best use is usually not financially feasible.

The use to which the site is put until it is ready for its future highest and best use is called an interim use. Thus, interim uses are current highest and best uses that are likely to change in a relatively short time.

**Standards and Measurement of Data Accuracy:** Each sale was verified with the buyer, seller, real estate agent or tenant when possible. Current data was verified and corrected when necessary via field inspection.

#### **Special Assumptions and Limiting Conditions**

All three approaches to value were considered in this appraisal.

Sales from 01/01/2014 to 12/31/2016 were considered in all analyses.

This report intends to meet the requirements of the Uniform Standards of Professional Appraisal Practice, Standard 6.

Time adjustments were not made to sales due to the lack of sales activity with which to consider for time trend analysis.

# **Area Description:**

Area 60 which contains Auburn, Algona, Pacific, and adjacent unincorporated areas is divided into eight neighborhoods which are described as follows:

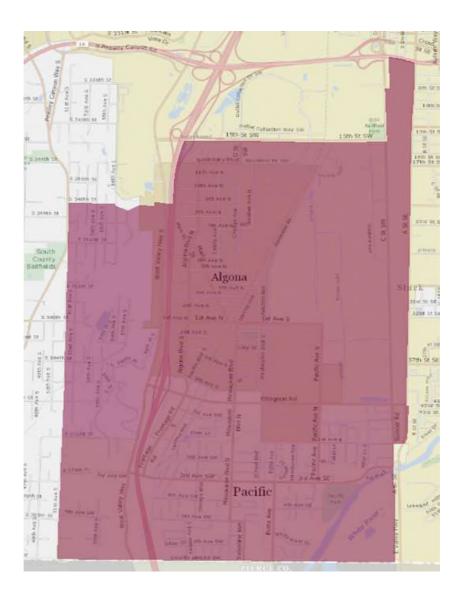

**Neighborhood 5; South Auburn Way** Neighborhood 5 is bounded by Highway 18 to the north, R Street S.E. to the east, 21<sup>st</sup> Street S.E. to the south, and A Street S.E. to the west.

This is mostly composed of the retail strip along South Auburn Way which serves as the gateway to the Muckleshoot Reservation, the White River Amphitheater, and the road to Enumclaw and Crystal Mountain. It also includes the Les Gove Park campus, which the City of Auburn expanded in 2014 by buying Big Daddy's Drive In and the adjacent retail parcels. In 2016, the city demolished those buildings.

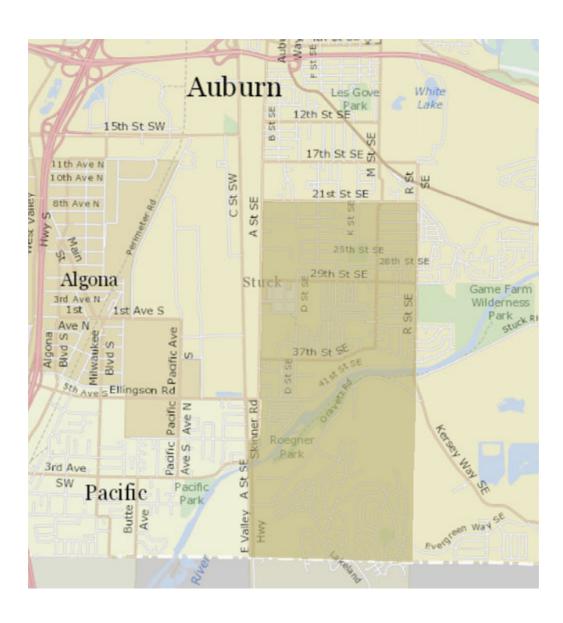

The significant new construction in this retail dominated neighborhood was a new apartment complex on Howard Road next to the Auburn Skate Connection roller rink.

**Neighborhood 10; Algona, Pacific, & the Auburn Boeing Plant** Neighborhood 10 is bounded by Outlet Collection Way to the north, by A Street S.E. to the east, by the King/Pierce County line to the south, and by 51<sup>st</sup> Avenue South to the west.

This area is dominated by industrial uses. These include the long standing Boeing plant known as the welded duct facility, the regional Safeway Distribution Center that relocated from Bellevue's Overlake area, warehouses in Algona, and the machine shops in Pacific. The General Services Administration has submitted a request for information to gauge interest from developers to swap its 129 acre complex for office space. Houses continue to be built in the Mixed Use Commercial zone in Algona – where this is allowed.

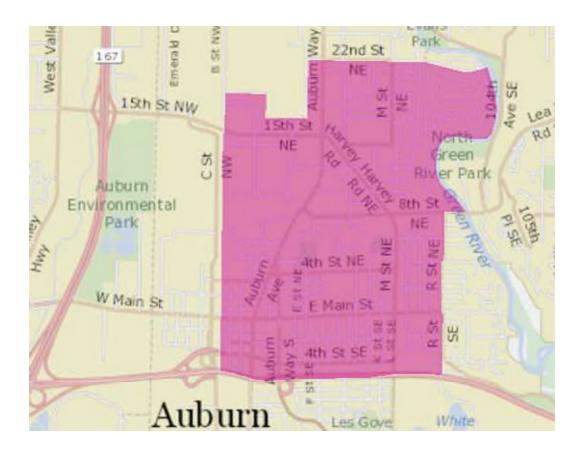

**Neighborhood 15; White River** Neighborhood 15 is bounded to the north by 21<sup>st</sup> Street S.E., by R Street S.E. on the east, by the Pierce County line on the south, and by A Street S.E. on the west.

This neighborhood is dominated by low rise apartment buildings interspersed with mobile home courts, with a little bit of retail at the southern end.

There are also some retail and industrial uses along A Street S.E. The line retail – excluding the Albertson's - at the White River Shopping Center sold in 2016 for \$197 per square foot.

**Neighborhood 20; Downtown Auburn** Neighborhood 20 is bounded on the south by Highway 18 and by the Auburn Airport to the north, by the Green River and R Street to the east, and by the railroad tracks adjoining C Street to the west.

As mentioned in the land analysis by neighborhood of this report, downtown Auburn is starting to emerge as a distinct retail and transit center. Buses and a parking garage funnel commuters to the Sound Transit train station. Merrill Gardens is completing an assisted living retirement community. In the past, many downtown single family residences were converted into office or

retail space, reflecting the growth of businesses surrounding them. The higher values are found along the principal arterial streets and in the CBD, Central Business District of Auburn.

The major change already taken place was the completion of the Trek Apartments on Main Street. This project opened with 126 units in 2015.

**Neighborhood 25; Outlet Mall & Vicinity** Neighborhood 25 is bounded by Highway 18 to the north, by C Street S.W. to the east, by 15<sup>th</sup> Street SW to the south until Highway 167 (the Valley

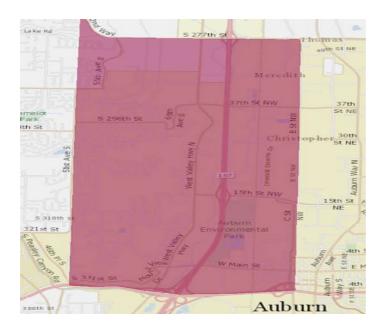

Freeway) where it drops down to S 348<sup>th</sup> Street and continues to the west boundary, 51<sup>st</sup> Avenue South.

This is the home of the Outlet Collection (formerly called the Supermall) which boasts a Nordstrom outlet, a Wal-Mart Supercenter, and an Act III 17 screen multiplex theater. An extensive remodeling project featuring new stores such as Nike Factory and H&M was completed in late 2014. The last two vacant pads were developed into a line strip with Panera Bread, and into a stand-alone, quick serve restaurant, Qdoba.

**Neighborhood 30; Emerald Downs** Neighborhood 30 is bounded to the north by South 277<sup>th</sup> Street, by B Street N.W. on the east, by Highway 18 on the south, and by 51<sup>st</sup> Avenue South on the west.

This neighborhood is overwhelmingly industrial, and fairly well built out.

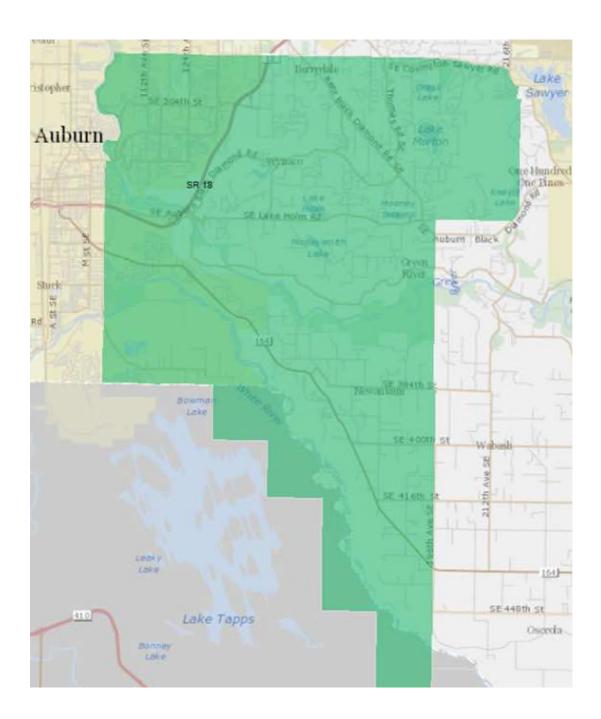

**Neighborhood 35; North Auburn Way** Neighborhood 35 is bounded to the north by South 277<sup>th</sup> Street, by the Green River on the east, by 22nd Street Northeast on the south, and by B Street N.W. on the west.

The bulk of this area supports light and heavy industrial uses. Commercial development snakes along Auburn Way North with numerous car dealers and retail spaces. Nearing completion is the EuroFoods grocery and deli. Grading and clearing have started on the commercially zoned site of the former Valley Six Drive-In Theater.

**Neighborhood 40; Lea Hill / Green River** Lying to the east of Auburn's urban core, Neighborhood 40 is bounded to the north by Southeast 288<sup>th</sup> Street, to the east by 196<sup>th</sup> Avenue Southeast, by the county line to the south, and by R Street and the Green River to the west.

While this area is mostly rural and recreational, it includes the Muckleshoot Reservation with its attendant Casino, Green River College, Pacific Raceways, Washington National Golf Course, and Druid's Glen Golf Course. Although the King County Council approved making the Pacific

Raceways Master Plan a demonstration project in order to process a complex, multi-phase master planned development, the ownership decided to continue as a racetrack for the foreseeable future. There seems to be a boom of residential construction in the area, including an assemblage for a large apartment on Lea Hill near Green River College.

Following is the parcel count for Area 60 broken down by number of parcels found in each neighborhood including government owned.

| AREA-NEIGHBORHOOD | PARCEL COUNT |
|-------------------|--------------|
| 60-05             | 142          |
| 60-10             | 254          |
| 60-15             | 102          |
| 60-20             | 434          |
| 60-25             | 75           |
| 60-30             | 369          |
| 60-35             | 411          |
| 60-40             | 480          |
| TOTAL PARCELS     | 2,267        |
|                   |              |

#### **Physical Inspection Area:**

WAC 458-07-015 requires each property to be physically inspected at least once during a 6 year revaluation cycle. At a minimum, an exterior observation of the properties is made to verify the accuracy and completeness of property characteristic data that affect value. Property records are updated in accordance with the findings of the physical inspection. Area 60-10 was physically inspected for the 2017 assessment year. This inspection area consisted of 254 parcels, or approximately 11.20% of the 2,267 total parcels located in Area 60 (including government-owned properties but not specialty parcels). A list of the physically inspected parcels and an identifying map are included in the addendum of this report.

# **Scope of Data**

#### Land Value Data:

Land sales that occurred in Area 60, between the dates of January 1, 2014 and December 31, 2016, were investigated to determine if they were market transactions, useful in estimating land value. Thirty-six (36) arm's length land sales closed during this period in Area 60. These sales were given primary consideration for valuing land as of 1/1/2017. Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sale Identification

Section. Sales information is analyzed and investigated by the appraiser to determine if they are market transactions.

Of the thirty-six (36) land sales used in this analysis, ninen (9) or 25% took place in 2014, sixteen (16) or 44% took place in 2015 and the balance, eleven (11) sales or about 31% of the sales occurred in 2016. All sales were equally weighted.

The search for comparable land sales was made within each geographic neighborhood and expanded to include the surrounding neighborhoods within the geographic area. Location and zoning were the major factors considered for adjustments.

#### **Improved Parcel Total Value Data:**

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. Property characteristics are verified for all sales if possible. An exterior observation of the properties was made to verify the accuracy and completeness of property characteristic data that affect value. Sales are listed in the "Sales Used" and "Sales Not Used" sections of this report. Additional information resides in the Assessor's website.

#### **Land Value**

## Land Sales, Analysis, Conclusions:

Land values were estimated based on the Sales Comparison approach. Sales were analyzed based on zoning, size, location and development potential. Changes were made based on recent land sales, and to achieve equalization in neighborhoods in accordance with zoning, size, and location. In the absence of sales in a neighborhood, sales in other similar neighborhoods were considered. Appraiser judgment prevails in all decisions regarding individual parcel valuation. The appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area. Adjustments were made in prior assessment years to land values of properties with wetland or sensitive areas that are subject to the Sensitive Area Ordinance (SAO).

In most categories, any changes made were primarily to improve equalization.

The total land assessed value (specialty land included) for Area 60 Assessment Year 2016 was \$1,287,963,950 and the total recommended land assessed value for Assessment Year 2017 is \$1,359,477,900. This increase is approximately five point eight one percent (5.81%) in total assessed land value.

| Neighborhood | 2016 Total      | 2017 Total      | % Change |
|--------------|-----------------|-----------------|----------|
| 60-05        | \$43,826,000    | \$46,336,300    | +5.73    |
| 60-10        | \$199,029,800   | \$216,804,600   | +8.93    |
| 60-15        | \$85,128,200    | \$90,042,900    | +5.77    |
| 60-20        | \$170,176,500   | \$170,986,400   | +0.48    |
| 60-25        | \$145,145,400   | \$159,513,400   | +9.90    |
| 60-30        | \$289,377,200   | \$288,515,800   | -0.30    |
| 60-35        | \$236,954,200   | \$254,038,100   | +7.21    |
| 60-40        | \$115,202,450   | \$133,240,400   | +15.66   |
| Land Value   | \$1,284,839,750 | \$1,359,477,900 | +5.81%   |

<sup>\*</sup>The above totals represent land values including the specialty land parcels.

| LAND SALES     | LAND SALES BY ZONING AND PRICE PER SQUARE FOOT |         |           |         |  |  |  |  |  |  |
|----------------|--|---------|-----------|---------|--|--|--|--|--|--|
| <b>GOVENIA</b> | G17 = G(10)                                    | ****    | - OTT (GT |         |  |  |  |  |  |  |

The high traffic count on Auburn Way South resulted in five (5) land sales from this neighborhood. These five, including a double sale, were analyzed for the 2017 assessment year.

E# 2748697: This was the sale of an obsolescent 46 year old fast food restaurant nearing the end of its economic life. This should be considered an interim use until redeveloped.

E# 2677714: This was a purchase on Auburn Way South by the City of Auburn. It adjoins Les Gove Park, and aligns with the city's long term plan of adding more amenities to this neighborhood. Even though there are several older buildings on this parcel, they are expected to be torn down.

E# 2756513: Two six-plexes are planned for this multifamily zoned property.

E#2781606: A new apartment of 125 units is being constructed on this site.

#### Area 60-10 Algona, Pacific, SW Auburn

Zero (0) land sales from this neighborhood were analyzed for the 2016 assessment year. All Commercial parcel values range from \$6.00 to \$15.00 per square foot. The industrial zoned properties assessed values range from \$5.00 to \$8.00 a square foot. These values are supported by previous sales.

#### Area 60-15 White River

| Area | Nbhd. | Major  | Minor | Land<br>Area | E#      | Sale Price  | Sale Date | SP /<br>Ld.<br>Area | Zone |

| 060  | 015   | 869520 | 0029  | 29,975       | 2807536 | \$510,000   | 06/14/16  | \$17.01             | C3   |

Five (5) land sales from this neighborhood were analyzed for the 2016 assessment year.

E# 2731846: This was bought by an adjacent owner to support his auto auction business. The allowable uses in C3 zoning include sales of autos, mobile homes, trucks, & RVs, as well as mini-storage, auto & contractor services.

E# 2704600: This involved a multifamily parcel that was on a side street.

E# 2836838: This was bought as an investment.

#### Area 60-20 Downtown Auburn

|      |       |        |       | Land    |         |             |           | SP /<br>Ld. |      |

| 060  | 020   | 733140 | 0400  | 30,664  | 2787561 | \$800,000   | 03/26/16  | \$26.09     | DUC  |
| 060  | 020   | 781570 | 0095  | 7,280   | 2734964 | \$275,000   | 06/05/15  | \$37.77     | DUC  |
| 060  | 020   | 781570 | 0135  | 29,864  | 2723442 | \$990,000   | 04/10/15  | \$33.15     | DUC  |

The Commercial Business District of Auburn, zoned DUC, is undergoing a makeover with the opening of the Trek Apartments, and a Merrill Gardens retirement complex.

E# 2742707: This property was bought by the State of Washington for Green River College which is building a 30,000 square foot classroom facility on the site.

E# 2723442: Purchased from the Bank of Washington, this site will eventually become a mixed use development. Per Levan Development LLC, the old retail building on this site is scheduled for demolition. The parking lot is leased to the City of Auburn on an interim basis.

E# 2734964: This is another parcel that forms part of the assemblage created by the purchaser of E# 2723442, above.

E# 2787561: This trio of parcels was bought as an investment.

E# 2814782: A future apartment is planned for this site.

A total of seven (7) land sales took place in this neighborhood during the past three years. They ranged from \$6.25 to \$37.77 per square foot. The highest was on W Main Street, the others were on side streets. These sales are in line with previous assessed values which were raised last year. The higher values are found along the principal arterial streets and in the CBD (Central Business District). Current assessed values for industrial zoned land in this neighborhood predominately range from \$5.00 to \$8.00 a square foot.

#### **Area 60-25 Outlet Collection**

| Area | Nbhd. | Major  | Minor | Land<br>Area | E#      | Sale Price  | Sale Date | SP /<br>Ld.<br>Area | Zone |
|------|-------|--------|-------|--------------|---------|-------------|-----------|---------------------|------|
| 060  | 025   | 030150 | 0350  | 70,905       | 2712707 | \$1,381,000 | 01/16/15  | \$19.48             | C3   |
| 060  | 025   | 132104 | 9020  | 35,744       | 2795908 | \$350,000   | 05/08/16  | \$ 9.79             | C3   |
| 060  | 025   | 132104 | 9050  | 42,640       | 2788294 | \$775,000   | 03/31/16  | \$18.18             | C3   |
| 060  | 025   | 232104 | 9007  | 39,758       | 2754482 | \$92,000    | 09/03/15  | \$2.31              | C3   |
| 060  | 025   | 232104 | 9022  | 400,752      | 2778013 | \$652,500   | 01/15/16  | \$1.63              | C3   |
| 060  | 025   | 242104 | 9012  | 434,493      | 2737806 | \$9,400,000 | 06/19/15  | \$21.63             | C3   |

There were six (6) land sales in this neighborhood during the designated time period for the 2016 appraisal date. Lower values are along West Valley Highway which is characterized by specialty businesses such as farm supply. All Commercial parcel values range from \$6.00 to \$18.00 per square foot.

E# 2754482: The low price of this parcel is due to it being on a slope, and having no left turn access from the West Valley Highway.

E# 2712707: This was the last available pad at the Outlet Collection mall. It is going to be a free standing Qdoba restaurant and a retail strip with containing Panera Bread.

E# 2778013: Steep slopes, wetlands and easements make this an atypical sale.

E# 2788294 & 2795908: These are a tear-down and assemblage for an as of yet unannounced project.

#### Area 60-30 Emerald Downs

|      |       |        |       | Land    |         |             |           | SP /<br>Ld. |      |

| 060  | 030   | 352204 | 9016  | 666,468 | 2671397 | \$4,750,000 | 05/29/14  | \$7.13      | M1   |
| 060  | 030   | 446340 | 0072  | 61,198  | 2675804 | \$837,500   | 06/23/14  | \$13.69     | C2   |

Five (5) land sales from this sub area were analyzed. Excepting the wetland properties, industrial land in this neighborhood is now appraised at \$5.00 to \$9.00 per square foot. These land values were increased last year

E# 2684918: This transaction was by the City of Auburn of a wetland parcel for \$.54 per square foot.

E# 2749238: This was a sale by Union Pacific Railroad of land adjoining the railroad tracks to the neighboring owner, Auburn Dairy Products, who have been expanding their operations.

#### Area 60-35 North Auburn

| Area | Nbhd. | Major  | Minor | Land<br>Area | E#      | Sale Price  | Sale Date | SP /<br>Ld.<br>Area | Zone |

| 060  | 035   | 936060 | 0325  | 182,650      | 2710261 | \$390,000   | 01/16/15  | \$2.14              | C4   |

There were six (6) land sales in this neighborhood during the designated time period for the 2016 appraisal date. Industrial zoned properties in this area are predominately assessed from \$5.00 to \$9.00 per square foot, excluding the wetland properties. The commercial zoned values range from \$8.00 to \$15.00 a square foot. Properties with good visibility and high traffic volume are in demand.

E# 2774544: The buyer is planning a retail development.

E# 2711409: This was purchased for a multi-family project.

E# 2710261: Formerly part of the Valley 6 Drive-In Movie Theater, this is part of an assemblage in the Northeast Auburn Special Plan Area.

E# 2742473: This is also part of the assemblage mentioned above.

E# 2787411: Advance Auto Parts is constructing a new store on the former site of the Auburn Elks.

E# 2796979: Tear-down sale from Children's Home Society to Sound Mental Health for a new building.

#### Area 60-40 Green River

**BN** Neighborhood Business

**IP** Industrial Property Specific Standards

RA-5 Rural 5 acre minimum lot size

#### **Preliminary Ratio Analysis**

| RECOMMENDED IAAO STANDARDS ON RATIO STUDIES |             |  |  |  |  |  |  |
|---|-------------|--|--|--|--|--|--|
| Appraisal Level                             | .90 to 1.10 |  |  |  |  |  |  |
| Coefficient of Dispersion (COD)             | 5.0 to 20.0 |  |  |  |  |  |  |
| Price Related Differential (PRD)            | .98 to 1.03 |  |  |  |  |  |  |

A Preliminary ratio study was done prior to revaluation. The study included sales of improved parcels and showed a Coefficient of Variation (COV) of 18.25% and a Coefficient of Dispersion (COD) of 14.79%. The assessment level as indicated by the weighted mean was 83.8%. This indicated that the assessment levels were low, and the uniformity was in need of adjustment.

#### **Improved Parcel Total Values:**

Greater Auburn has very little in the way of office space. Many professionals, including medical practitioners, operate out of converted houses. Overall, the office market has remained stable. Retail space, similarly, remains in the doldrums. The former Albertson's space at the Auburn North Center remains available for lease. The only bright spot is the area near the outlet mall.

Industrial space, on the other hand, has been going gangbusters. Industrial buildings are even constructed on commercially zoned land. Small buildings are particularly prized by owner users.

#### **Improved Value Data:**

Commercial improved sales dating from January 2014 through December 2016 were considered in the evaluation of Area 60's improved properties. Ninety-nine (99) arm's length improved sales took place during this period. One sale was not used in the ratio study since the improvements changed after the sale. The sales information was obtained from excise tax records, CoStar, brokers, and agents. The sales used in Area 60 were all fair market "arm's length" transactions reflecting market conditions. These sales were organized by market segments based on predominant use. Based on sales analysis, each segment reflected a market price per square foot of net rentable area. The sales price range served to establish a general upper and lower market boundary for the various property types within each subject area.

#### **Sales Comparison Approach Model Description**

The sales comparison approach reflects the principles of supply and demand, balance, externalities, and substitution. The sales comparison approach is preferred when there are adequate sales data. The model for sales comparison is based on four characteristics, 1) predominant use, i.e. zoning, 2) effective year built, 3) quality and 4) size. These characteristics are taken from the Assessor's records. A search was made for sales data that most closely fit the subject property within each geographic area. When necessary, sales of similar property types from other market areas were considered. From January 2014 through December 2016 there were 87 improved sales in Area 60; all were fair market "arm's length" transactions reflective of market conditions. These sales were organized by market segments based on predominant use.

For example, most service garages were valued from \$85 to \$95 per square foot. Mixed use buildings – most often apartments above retail – were appraised at \$90 per square foot. Custom built day care centers are valued at \$200 per square foot.

Mobile home parks were valued at a market rate of price per pad. The Assessor analyzed mobile home park sales and determined the following brackets per pad: double wide pads range from \$50,000 to \$70,000 per pad depending on the location and condition of the site, single wide pads were valued between \$35,000 to \$50,000 per pad depending on location and condition of the site, and RV pads were valued at \$25,000 a pad. A compilation of mobile home parks sales used in this analysis is on file in the Assessor's office.

#### **Sales Comparison Calibration**

Calibration of the coefficients utilized in the models applied via the sales comparison approach was established via an analysis of sales within each neighborhood. Neighborhoods were treated independent of one another as dictated by the market. Individual prices were applied based on

various characteristics deemed appropriate by each market. Specific variables and prices for each neighborhood are discussed in more detail above.

The table below, listing sales of common property types, was used to calibrate market approaches utilized in this revalue process.

The following table illustrates market transactions of typical property types in Area 60.

| PROPERTY TYPE                     | SALE PRICE RANGE LOW-HIGH               | MEAN SALE PRICE/UNIT          |
|-----------------------------------|---|-------------------------------|
| Office Buildings (7)              | Sale Price Range/Sq Ft -\$105 to \$197  | Mean Sales Price/Sq Ft-\$144  |
| Retail Stores (6)                 | Sale Price Range/Sq Ft -\$56 to \$375   | Mean Sales Price/Sq Ft-\$189  |
| Storage Warehouse (36)            | Sale Price Range/Sq Ft -\$62 to \$143   | Mean Sales Price/Sq Ft-\$102  |
| Industrial Condos(3)              | Sale Price Range/Sq Ft -\$109 to \$182  | Mean Sales Price/Sq Ft-\$128  |
| Restaurant (4)                    | Sale Price Range/Sq Ft - \$127 to \$211 | Mean Sales Price/Sq Ft-\$169  |
| Medical Office (9)                | Sale Price Range/Sq Ft -\$120 to \$322  | Mean Sales Price/Sq Ft-\$203  |
| Airport Leasehold<br>Hangars (12) | Sale Price Range/Sq Ft - \$47 to \$113  | Mean Sale Price/Sq Ft-\$68    |
| Auto Service                      | Sale Price Range/Sq Ft - \$85 to \$162  | Mean Sale Price/Sq Ft - \$129 |

Land-to-building ratios were utilized in the income and the market approaches when excess land was present in the parcels assessed.

#### Cost approach model description

Cost estimates are automatically calculated via the Marshall & Swift Valuation modeling system. Depreciation was based on studies done by Marshall & Swift Valuation Service. The cost was adjusted to the western region and the Seattle area. Cost estimates were relied upon for valuing special use properties where comparable sales data and/or income/expense information is not available. These properties are typically exempt properties such as schools, churches, and public utility buildings. Non-exempt buildings that are valued by the Cost method might be fraternal halls, auto dealers, and on-going new construction.

#### Cost calibration

The Marshall & Swift Valuation modeling system which is built in the Real Property Application is calibrated to the region and the Seattle area.

#### Income capitalization approach model description

Income tables were developed for all neighborhoods in Area 60 for income capitalization. The list of tables created for each neighborhood is contained in the appendix to this report. "No income" tables were created for properties where the income approach is not applicable; examples of these types of properties are churches, schools, hangars, and other special use properties where no income information exists.

The Income Approach was considered a reliable approach to valuation throughout Area 60 for improved property types where income and expense data are available to ascertain market rates. Income parameters were derived from the market place through market rental surveys, sales, and available real estate publications and websites.

<u>Income</u>: Income parameters were derived from the market place through the listed fair market sales as well as through published sources (i.e. Office Space Dot.Com, Commercial Brokers Association, Costar, Multiple Corporate Real Estate Websites), and opinions expressed by real estate professionals active in the market.

<u>Vacancy</u>: Vacancy rates used were derived mainly from published sources tempered by personal observation.

Expenses: Expense ratios were estimated based on industry standards, published sources, and personal knowledge of the area's rental practices. Within our income valuation models, the

assessor used triple net expenses for typical retail/mixed-use & industrial type uses. For typical office/medical buildings, the assessor used full service expenses within the valuation models.

<u>Capitalization Rates:</u> Capitalization rates were determined by local published market surveys, such as CBRE, Integra Realty Resources, Colliers, CoStar, Real Estate Research Corporation, The American Council of Life Insurance, and PwC (formerly Korpacz). The effective year and condition of each building contributes to the capitalization rate applied in the model. For example; a building in poorer condition with a lower effective year (let's say, 1960) will typically warrant a higher capitalization rate, and a building in better condition and a higher effective year (let's say, 2010) will warrant a lower capitalization rate.

The following tables are some of the published capitalization rates for the national and Seattle markets:

|   |                                |          | SEATTLE       | / REGIONAL CA | P RATES                        |  |
|---|--------------------------------|----------|---------------|---------------|--------------------------------|--|
| Source  | Date                           | Location | Office        | Industrial    | Retail                         | Remarks  |
| CBRE: Capital<br>Markets Cap. Rate<br>survey. | 2 <sup>nd</sup> Half<br>(2016) |          |               |               |                                | CBRE professional's opinion of where cap rates are likely to trend in the 2 <sup>nd</sup> ½ of 2016 based on recent trades as well as interactions with investors. Value Added represents an underperforming property that has an occupancy level below the local average under typical market conditions. |
|   |                                | Seattle  | 4.25% - 4.75% | -             | -                              | CBD – Class AA   |

| Inco                   | me approach calibration   |
|------------------------|---|
| age,<br>than<br>wher   | models were calibrated after setting base rents by using adjustments based on size, effective and construction quality. When the value of the property by the income approach was less the land value, a nominal \$1,000 value was allocated to the improvements. For properties we sales and income/expense data were not available, the Cost and or the Sales Comparison coach were utilized.   |
| colle<br>data<br>inclu | economic rents used in the income tables were derived from rents, expenses and rates cted in the market place, i.e. data collected in the field both actual and asking, market sales and fee appraisals, journals, publications and the Rental Survey. The tables used are ded in the Addenda of this report. The following table shows the rental rates, vacancy, uses and capitalization rates for the various property types found in Area 60. |
|                        | following table is the result of an analysis of this information. This table stratifies the major erty types for each neighborhood and the income parameters that were typically used.  |

|              | Medical/Dental       | \$12 to \$24   | 10%                   | 35%              | 6.25% to 9.25%               |

#### Reconciliation

All parcels were individually reviewed for correctness of the model application before final value selection. All of the factors used to establish value by the model were subject to adjustment. The market sales approach is considered the most reliable indicator of value when comparable sales were available, however the income approach was applied to most parcels in order to better equalize comparable properties. Whenever possible, market rents, expenses, and capitalization rates were ascertained from the market, sales, and along with data from surveys and publications these parameters were applied to the income model.

The income approach to value was considered to be a reliable indicator of value in most instances. The market rental rate applied to a few properties varied from the model but fell within an acceptable range of variation from established guidelines.

# **Model Validation**

#### **Total Value Conclusions, Recommendations and Validation:**

A ratio study was created for Area 60. The results of the ratio study showed compliance with IAAO assessments standards and indicated that Area 60 was at a proper assessment level. Equity between improved parcels has been improved as shown by the improvement in the C.O.V from 18.25% to 13.83%, the C.O.D. from 14.79% to 11.38%, and the Assessment Level was raised to 93.8% from 83.8%. The standard statistical measures of valuation performance are all within IAAO guidelines and are presented both in the Executive Summary and in the 2016 and 2017 Ratio Analysis charts and are shown in the chart below:

|                            | 2016 Ratio | 2017 Ratio | Change  |
|----------------------------|------------|------------|---------|
| Assessment Level           | 83.8%      | 93.8%      | +10.0   |
| Coefficient of Dispersion  | 14.79%     | 11.38%     | -3.41   |
| Coefficient of Variation   | 18.25%     | 13.83%     | -4.42   |
| Standard Deviation         | 0.1634     | 0.1321     | -0.0313 |
| Price Related Differential | 1.07       | 1.02       | -0.05   |

The market sales approach is considered the most reliable indicator of value when comparable sales are available.

The income approach to value is considered to be a reliable indicator of value when market sales are not available. Whenever possible, market rents, expenses, and capitalization rates were ascertained from sales. Data from surveys and publications were also considered in the application of the income model.

Cost estimates were relied upon for valuing special use properties where comparable sales data and/or income/expense information was not available.

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The Appraiser determines which available value estimate may be appropriate and may adjust by particular characteristics and conditions as they occur in the valuation area.

The total assessed value for assessment year 2016 was \$1,956,782,650. The total recommended assessed value for the 2017 assessment year is \$2,049,851,800. They are presented in the following chart. Application of these recommended values for the 2017 assessment year results in a total percentage change from the 2016 assessments of +4.76%. This increase is due partly to market changes over time and the previous assessment levels.

| PROPERTY    | 2016 Total      | 2017 Total      | \$ Increase and or Decrease | % Change |
|-------------|-----------------|-----------------|-----------------------------|----------|
| Land Value  | \$727,795,150   | \$757,588,700   | \$29,793,550                | +4.09%   |
| Total Value | \$1,956,782,650 | \$2,049,851,800 | \$93,069,150                | +4.76%   |

# **USPAP Compliance**

#### **Client and Intended Use of the Appraisal:**

This mass appraisal report is intended for use only by the King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

#### **Definition and date of value estimate:**

#### **Market Value**

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 WA. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65, 66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

#### **Highest and Best Use**

**RCW 84.40.030** All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.

An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.

WAC 458-07-030 (3) True and fair value -- Highest and best use. Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that

are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Samish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Samish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

#### **Date of Value Estimate**

#### RCW 84.36.005

All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.

## **RCW 36.21.080**

The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

## Property rights appraised:

# Fee Simple

Wash Constitution Article 7 § 1 Taxation: All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.

**Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914)** "the entire [fee] estate is to be assessed and taxed as a unit"

Folsom v. Spokane County, 111 WA. 2d 256 (1988) "the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee"

The definition of fee simple estate as taken from The Third Edition of The Dictionary of Real Estate Appraisal, published by the Appraisal Institute. "Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat."

# **Assumptions and Limiting Conditions:**

- 1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.
- 2. No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
- 3. No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
- 4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
- 5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
- 6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
- 7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge the taxpayer to retain an expert in the field and submit data affecting value to the assessor.
- 8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
- 9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
- 10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
- 11. An attempt to segregate personal property from the real estate in this appraisal has been made.
- 12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
- 13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
- 14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.

15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

### **Scope of Work Performed:**

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.

#### **CERTIFICATION:**

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- The area(s) physically inspected for purposes of this revaluation are outlined in the body of this report.
- Services that I provided within the prior three years include physical inspection, revaluation, appeal response preparation, attendance and participation in hearings, data collection, sales verification, and identifying new construction and recording the corresponding data.

# **Area 60 Ratio Study Report**

#### PRE-REVALUE RATIO ANALYSIS

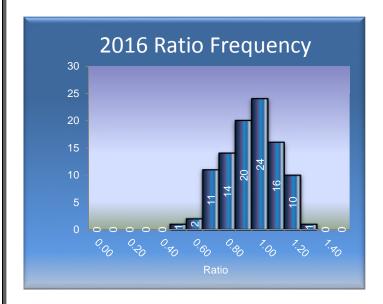

Pre-revalue ratio analysis compares sales from 2014 through 2016 in relation to the previous assessed value as of 1/1/2016.

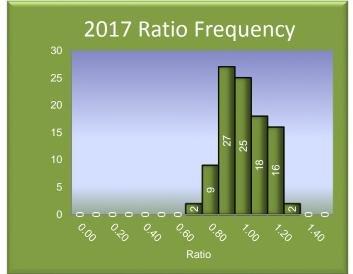

| PRE-REVALUE RATIO SAMPLE STATISTICS |             |
|-------------------------------------|-------------|
| Sample size (n)                     | 99          |
| Mean Assessed Value                 | \$1,716,900 |
| Mean Adj. Sales Price               | \$2,048,200 |
| Standard Deviation AV               | \$2,139,004 |
| Standard Deviation SP               | \$2,827,461 |
| ASSESSMENT LEVEL                    |             |
| Arithmetic Mean Ratio               | 0.896       |
| Median Ratio                        | 0.901       |
| Weighted Mean Ratio                 | 0.838       |
| UNIFORMITY                          |             |
| Lowest ratio                        | 0.4863      |
| Highest ratio:                      | 1.2530      |
| Coefficient of Dispersion           | 14.79%      |
| Standard Deviation                  | 0.1634      |
| Coefficient of Variation            | 18.25%      |
| Price Related Differential (PRD)    | 1.07        |

## **POST-REVALUE RATIO ANALYSIS**

Post revalue ratio analysis compares sales from 2014 through 2016 and reflects the assessment level after the property has been revalued to 1/1/2017

| POST REVALUE RATIO SAMPLE STATISTICS |             |
|--------------------------------------|-------------|
| Sample size (n)                      | 99          |
| Mean Assessed Value                  | \$1,920,900 |
| Mean Sales Price                     | \$2,048,200 |
