GMPC MOTION NO. 11-2

A MOTION adopting a work plan to create a School Siting Task Force.

WHEREAS, in the 1990’s and into the 2000’s, with rising land costs in urban areas and rapid growth, many school districts in King County purchased rural land for future school sites; and

WHEREAS, since that time, demographic and policy changes have occurred and there are examples of best practices that reflect a more community-based approach to school siting; and

WHEREAS, it is necessary to address the changing environment and support school districts in their obligation to provide quality education for the children of King County; and

WHEREAS, VISION 2040 states that “The multicounty planning policies are designed to be broad. They provide overall guidance and direction for planning processes and decision-making at both regional and local levels” (page 31); and

WHEREAS, VISION 2040 further states: “Given the strong integration across the various policy sections in VISION 2040, the full body of multicounty policies is to be considered in decision-making for various programs, projects, and planning processes” (page 31); and

WHEREAS, VISION 2040 further states: “The multicounty policies also serve as planning guidelines and principles as required by state law to provide a common framework for regional and local planning, particularly in the area of transportation planning and its relationship to land use” (page 31); and

WHEREAS, VISION 2040, in the context of providing for sewage treatment capacity, also states that, “With very few exceptions – generally provided only for schools or for specific health, safety, or environmental concerns – sanitary sewer service is allowed only in urban areas” (page 91); and
WHEREAS, VISION 2040 also states that “Schools should be encouraged to become the cornerstones of their communities by locating in more urban settings and designing facilities to better integrate with their urban neighborhoods” (page 94); and

WHEREAS, PS-Action-6 in VISION 2040 directs counties and cities to collaborate with special service districts to review district location and design criteria for new schools to ensure that growth management goals and the regional vision are addressed (page 95); and

WHEREAS, the Growth Management Act (GMA) states that “In general, it is not appropriate that urban governmental services be extended to or expanded in rural areas except in those limited circumstances shown to be necessary to protect basic public health and safety and the environment and when such services are financially supportable at rural densities and do not permit urban development”; and

WHEREAS, the GMA definition of “urban governmental services” does not include schools but does include sewer systems; and

WHEREAS, certain School Districts believe that the June 15 2011 draft Countywide Planning Policies that relate to constructing new schools in the rural area make it difficult for them to fully utilize the fifteen properties in their inventories that are located within the Rural Area; and

WHEREAS, it is the intent of the King County Growth Management Planning Council (GMPC) that the financial stability and programmatic functions of the school districts be maintained while adhering to growth management rules and regulations at the state, regional, and local level; and

WHEREAS, the School Siting Task Force to be established in accordance with Attachment A to this motion will provide periodic reports to the GMPC and will submit its report to the King County Executive who will then transmit the report to the GMPC for their deliberation:

NOW THEREFORE BE IT RESOLVED that the Growth Management Planning Council of King County hereby adopts the School Siting Task Force work plan, included with this motion as Attachment A.
