

Know Your Bleach

Also known as: Sodium Hypochlorite

- * Bleach is available in different concentrations ranging from 2.75% to 8.3% and is Environmental Protection Agency (EPA) registered.
- * Bleach must have the percentage of sodium hypochlorite written on the label! – If there is no percentage listed, it can NOT be used.
- * Use only plain unscented bleach.

Active Ingredient:	
Sodium Hypochlorite:.....	8.25%
Other Ingredients:.....	91.75%
Total:.....	100.00%

- * Know what solution to make:

Sanitizer = Food surfaces, Kitchen, Classroom

Disinfecting = Body Fluid and Bathroom

Know how to protect yourself while mixing bleach:

It is required by Labor and Industries that workers have an emergency eye wash station and wear personal protective equipment. For bleach this includes safety goggles, rubber gloves, and an apron. Using correct measuring tools is required.
