King County

Since January 21, 2020, Public Health - Seattle & King County has been responding to an outbreak of novel coronavirus (COVID-19) in coordination with our partners at the Washington State Department of Health and the Centers for Disease Control and Prevention. These data reflect reports for King County residents received through midnight the day before. For desktop and mobile users, hover over graphs for more details.

Summary of counts:		Since yesterday
All results:	**14,140**	+ 1,830
Negative:	**12,312** 87.1% of all results	+ 1,579
Positive:	**1,828** 12.9% of all results	+ 251
Deaths due to COVID-19 illness:	**125** 6.8% of positive results	+ 16

Test results are reported to the Washington State Department of Health. Pending or inconclusive results are not included in this dashboard. Multiple tests per person are counted once.

Rate of positive results per 100,000 residents by ZIP code or city of residence (choose to the right)

○ ZIP code

○ Show positive results only

Count by test result date

First positive result reported among King County resident (Feb 28, 2020)

Bars are the number of test results per day

Line is running total of positive results since the start of the outbreak

Data are incomplete for the most recent dates

Test results may be reported several days after the result. Data from previous days are routinely updated.

Sex at birth and age group of King County residents with COVID-19 test results

		Negative results	Positive results	Rate of positive results per 100,000 King County residents
Sex at birth	Female	7,428	929	83.5
	Male	4,794	849	76.2
Age group in years	0-9	787	5	1.9
	10-19	509	18	7.1
	20-29	1,593	189	91.1
	30-39	2,596	267	67.7
	40-49	2,191	259	87.3
	50-59	1,897	285	105.4
	60-69	1,535	287	130.8
	70-79	723	243	199.0
	80+	474	274	442.0

Negative results: 10K 8K 6K 4K 2K 0K   Positive results: 0K 2K 4K 6K 8K 10K

Counts may not add up to total case count as demographic data may be missing.

**Rates may reflect targeted testing in certain populations (e.g. 60+)**
