

Cumulative % Grantee Patient Origin by Zip Code Tabulation Area (ZCTA)

- Cumulative to 75%
- Cumulative 75%-100%
- Delivery Sites

Source: Uniform Data System, Bureau of Primary Health Care, 2015

ZCTA Label Key

Example Values:

- 12345 - ZCTA Number
- 1,234 - Patients in ZCTA
- 12% - % of Patients from ZCTA

330h Approved Service Area Map

The Service Area Map is submitted with each grant application. Key information includes:

- Approved Service Sites
- Projection of what ZIP Codes the majority of patients come from (Patient Origin)
- Overlap with other health centers or safety-net providers
- Population indicators (e.g. uninsured rates)

We are required to review our service area annually for accuracy and accessibility. UDS data (patients and visits) is the primary data source.

For 2018, our service area map remains accurate. The majority of patients are concentrated in the dark blue areas along the I-5 corridor.

We will discuss our methods for assessing service site accessibility during strategic planning.
