## Identification of the Area 17

## Name or Designation:

University, Wallingford, Roosevelt, Sandpoint

## Boundaries:

Area 17 is bound on the north by NE 95th. Street, on the east by Lake Washington, and on the south by Lake Union. The western boundary is Interstate 5 from NE 50th Street to NE 95th Street. The western boundary runs west along 50th Street to Woodland Park Avenue N and from there south to the lake.

## Maps:

A general map of the area is included in this report. More detailed Assessor’s maps are located on the seventh floor of the King County Administration Building.

## Area Description:

The area included in the Assessor's Commercial Area 17 includes northeast Seattle approximately from Interstate 5 to Lake Washington and from Lake Union and Portage Bay north to NE 95th Street. It is divided for the purpose of assessment into economic neighborhoods each of which includes one or more business districts, as shown on the accompanying neighborhood map:

| 10 | Stone Way - Northlake - Pacific Street |
| :--- | :--- |
| 20 | Wallingford |
| 40 | Roosevelt - Lake City Way |
| 50 | Roosevelt District |
| 60 | University District |
| 70 | University Village |
| 80 | Wedgewood |
| 90 | East Maple Leaf |
| 100 | View Ridge - Sand Point |
| 110 | University of Washington |

Neighborhood 10 is Stone Way - Northlake - Pacific Street. Along Stone Way between $\mathrm{N} 40^{\text {th }}$ Street and Lake Union is an area of older retail and service businesses with a number of industrial properties. The three east-west streets lying north of Lake Union are Northlake Avenue, N $34^{\text {th }}$ Street, and Pacific Avenue. These have a combination of newer residential and mixed-use projects, small office buildings, and older industrial properties.

Neighborhood 20 includes Wallingford, a major business district located along N 45th Street between Stone Way N and I-5 and along Stone Way from N $40^{\text {th }}$ Street to N $45^{\text {th }}$ Street.

Neighborhood 40 includes the commercial areas along Roosevelt Way and Lake City Way between NE $75^{\text {th }}$ Street and NE $95^{\text {th }}$ Street.

Neighborhood 50 is the Roosevelt business district. It includes the commercial businesses along Roosevelt Way from Ravenna Boulevard to NE $75^{\text {th }}$ Street and along NE $65^{\text {th }}$ Street from I-5 to $20^{\text {th }}$ Avenue NE.

Neighborhood 60 is the University District. It is bordered by I-5 on the west, NE Ravenna Boulevard on the north, Ravenna Avenue on the east, and the University of Washington on the south. The eastern part of the district, along University Way and Brooklyn Avenue is the retail center. The western part has had considerable new development, including new office buildings, a new hotel, and several new apartment and congregate living projects. Directly north of the University campus is the residential area which includes fraternities, sororities, and rooming houses, which provide student housing.

Neighborhood 70 is the University Village neighborhood. It includes the University Village shopping center and the retail and service businesses located along $25^{\text {th }}$ Avenue NE, NE Blakely, NE $50^{\text {th }}$ Street, and Union Bay Place NE.

Neighborhood 80 includes the shopping districts along NE $65^{\text {th }}$ Street east of $20^{\text {th }}$ Avenue NE and along $35^{\text {th }}$ Avenue NE. NE $65^{\text {th }}$ Street has seen recent development activity, with the remodeling of the former PCC grocery store into a bookstore and coffee shop and two new mixed-use developments on the north side of NE $65^{\text {th }}$ Street.

Neighborhood 90, from $30^{\text {th }}$ Avenue NE to $40^{\text {th }}$ Avenue NE between NE $75^{\text {th }}$ Street and NE $95^{\text {th }}$ Street has little commercial development.

Neighborhood 100, lying to the east of $40^{\text {th }}$ Avenue NE, is a primarily residential neighborhood, including View Ridge, Windermere, Laurelhurst, and Sand Point. The former Sand Point Naval Air Station has been converted to other public uses including Warren G. Magnuson Park, public housing, and office space for community organizations. There is a small shopping district along Sand Point Way at about $50^{\text {th }}$ Avenue NE. The Children's' Orthopedic Hospital is located at Sand Point Way and NE $50^{\text {th }}$ Street.

Neighborhood 110 is the University of Washington.
Economic activity within Area 17 can be divided between region building activity, which exports to the larger regional economy, and region serving activity. The region building activities are the basis of the local economy, and the region serving businesses depend on the level of region building activity. The principal region building activity is the

University of Washington, which attracts large numbers of students and provides employment for faculty and staff. Other region builders include the Children's Orthopedic Hospital, located on Sand Point Way at NE 50th Street, and the shipyard activity along Lake Union and Portage Bay. The University Village shopping center has also become a region builder, having developed into a regional specialty center or lifestyle mall. Region serving activities include the smaller retail and service businesses located in the seven business centers.

Important changes have been taking place in these centers over the past several years. The University District was formerly a region building activity in itself, with a number of retail stores, which attracted shoppers from around the Seattle area. These stores, including the J.C. Penney's Department Store, Nordstrom Department Store, and smaller specialty shops, have moved out of the district or are moving out at this time as leases expire. Many small restaurants and other businesses catering to the student population have taken their place, but commercial vacancies along University Way have been higher than the city average for several years. The exception is the University Bookstore, which carries textbooks and supplies for University classes. It also contains a large selection of popular books, music, camera supplies, and clothing, and continues to attract shoppers from outside the University neighborhood.

Another important development, common to all the business centers in Area 17, has been the construction of large numbers of new apartments and residential condominiums. Until recently, apartment vacancies in the area were very low and rental rates were increasing rapidly, with the result that apartment properties were appreciating. This brought on a surge of multi-family development, especially in the eastern and northeastern parts of the University District.

Land in the area has seen significant increases in value, as evidenced by recent sales, so that now many properties have land values higher than their value in their existing use. In other words, the existing uses are not the use that the land would be put to if it were vacant, and increasingly are not the highest and best use of the properties as presently developed. The implication is that major redevelopment activity will be taking place in Area 17 in the next few years, following the regional and national economies' recovery from the recent recession. This is taking place now in the University District, with the recent completion of new office properties. The Roosevelt District, along Roosevelt Way and along NE 65 Street between Roosevelt Way and 15th Avenue NE is another area of rising land values.

The University Village Shopping Center, lying east of 25th Avenue NE and north of NE 45th Street, has become a regional specialty center, with the Barnes and Noble Bookstore, the Eddie Bauer store, and several "high-end" shops, including Pottery Barn, Restoration Hardware, Crate and Barrel, and Miller-Pollard furnishings. The shopping center has recently been renovated and expanded with new retail shops, a five storyparking garage, and additional office space.

## Physical Inspection:

The physical inspection area for the 2008 assessment year was Neighborhoods $80 \& 90$.

## Preliminary Ratio Analysis:

A Ratio Study was completed prior to the application of the recommended 2007 assessed values. This study included sales of improved parcels and showed a Coefficient of Variation (COV) of $15.24 \%$. The study was repeated after application of the 2008 recommended assessed values. The results are included in the validation section of this report, and show an improvement in the COV to 10.92\%.

## Scope of Data

## Land Value Data:

Vacant sales between January 1, 2005 and December 31, 2007 were considered in valuing land. Vacant sales are defined as transactions representing value in land to the purchaser. The category includes properties undeveloped at the time of sale and properties, which were purchased for redevelopment rather than to continue the existing use.

## Improved Parcel Total Value Data:

Sales of improved properties between January 1, 2005 and December 31, 2007 were considered in estimating market values of improved properties. Sales information is obtained from excise tax affidavits and reviewed by neighborhood appraisers to confirm that sales are "arms length" market transactions representing market value. Appraisers confirm sales through public record, through inspection of sale properties, and through interviews with buyers, sellers, and agents. A list improved sales used and those considered not reflective of market are included in the following sections.

## Land Value

## Land Sales, Analysis, Conclusion:

Commercial, industrial, and multi-family properties in Area 17 were examined to determine if changes in the assessed value of land were warranted for assessment year 2008. Changes were considered based on recent land sales and on the need to achieve equalization among similar parcels.

There were thirty-two land sales in Area 17 between January 1, 2005 and December 31, 2007. These are shown in the following table.

| Land Sales by Type and Sub-area |  |  |  |  |
| :--- | :---: | :---: | :---: | ---: |
|  | Commercial | Industrial | Residential | Total |
| Neighborhood 10 | 2 | 0 | 2 | 4 |
| Neighborhood 20 | 2 | 0 | 1 | 3 |
| Neighborhood 40 | 3 | 0 | 3 | 6 |
| Neighborhood 50 | 1 | 0 | 1 | 2 |
| Neighborhood 60 | 0 | 0 | 10 | 10 |
| Neighborhood 70 | 0 | 0 | 1 | 1 |
| Neighborhood 80 | 0 | 0 | 1 | 1 |
| Neighborhood 90 | 0 | 0 | 0 | 0 |
| Neighborhood 100 | 0 | 0 | 5 | 5 |
| Total | 8 | 0 | 24 | 32 |
|  |  |  |  |  |

Land value ranges in Area 17 are $\$ 70.00$ to $\$ 115.00$ per square foot for commercial land, $\$ 70.00$ to $\$ 120.00$ per square foot for multi-family land and $\$ 75.00$ per square foot for industrial land. Values tend to be lowest in the northern part of the area and highest within the principal business districts.

Ranges of value within the individual neighborhoods are shown by zoning type in the following table.

| Land Value per Square Foot by Zoning and Neighborhood |  |  |  |
| :--- | :--- | :---: | :--- |
| Neighborhood | Zoning | Multi-family |  |
|  | Commercial | Industrial | $\$ 70.00-\$ 115.00$ |
| 10 | $\$ 85.00-\$ 90.00$ | $\$ 75.00$ | $\$ 85.00-\$ 120.00$ |
| 20 | $\$ 90.00-\$ 120.00$ | - | $\$ 85.00-\$ 100.00$ |
| 40 | $\$ 80.00-\$ 90.00$ | - | $\$ 95.00-\$ 100.00$ |
| 50 | $\$ 100.00-\$ 115.00$ | - | $\$ 85.00-\$ 115.00$ |
| 60 | $\$ 100.00-\$ 115.00$ | - | $\$ 85.00-\$ 105.00$ |
| 70 | $\$ 90.00-\$ 100.00$ | - | $\$ 75.00-\$ 90.00$ |
| 80 | $\$ 80.00-\$ 85.00$ | - | $\$ 75.00-\$ 85.00$ |
| 90 | $\$ 75.00-\$ 80.00$ | - | $\$ 70.00-\$ 85.00$ |
| 100 | $\$ 70.00-\$ 75.00$ | - | $\$ 85.00$ |
| 110 | - | $\$ 75.00$ |  |

Some selected values lie outside these ranges due to special considerations such as view, corner location, or adverse environmental conditions.

Recommended values for assessment year 2008 result in an increase in total land valuation between January 1, 2007 and January 1, 2008 of 10.04\%. Total assessed value of land was $\$ 3,416,955,314$ for assessment year 2007 and is recommended to be $\$ 3,760,030,400$ for assessment year 2008, an overall increase of $\$ 343,075,086$.

## Vacant Land Model:

The direct sales comparison approach was used to estimate land values. The most important considerations were development potential, based on zoning, and location relative to major activity centers.

## Improved Parcel Total Values:

## Sales comparison approach model description:

In the sales comparison approach, sales of improved properties are used to establish value ranges for various types of use. Sales for Area 17 were verified and analyzed to determine the sale price per square foot of net rentable area. This information was stratified according to use and location in order to set value ranges for classes of properties. A set of value ranges was created for the entire geographic area and is then adjusted for local conditions within each neighborhood.

## Cost approach model description:

Value estimates by the cost approach were made using a software program supplied by the Marshall Valuation Service, a widely accepted guide to construction costs in the real estate industry. The model requires that the floor area of the building be classified among a series of coded uses and that the building structure, quality, shape, and heating system be specified. The appraiser estimates the building's effective age based on its actual age, observed condition, and obsolescence present, and the model calculates replacement cost and depreciation. Depreciated replacement cost is added to site value to obtain the value estimate by the cost approach.

The cost approach is used to estimate the value of public facilities and other buildings such as churches which have highly specialized configuration and which are not frequently sold. Estimates of depreciated replacement cost are calculated for other properties as well but are given less weight than the sales comparison and income approaches, which are considered to more accurately reflect the real estate market.

## Cost calibration

Each appraiser valuing new construction can individually calibrate valuations to specific buildings in our area by accessing the computerized valuation model supplied by Marshall Valuation Service.

## Income capitalization approach model description

The income capitalization model consists of a series of tables in which ranges of rent, vacancy, operating expenses, and overall capitalization rates are arrayed according to building quality and effective age. Tables are prepared for different types of income producing properties, (e.g. office buildings, retail stores, or restaurants). A separate set of tables is prepared for each neighborhood, and the income model applies the appropriate table to each of the income producing properties in each sub-area to produce a value estimate by direct capitalization.

The valuation process includes the following steps:
(1) The program multiplies the property's net rentable area by the market rent to derive potential gross income (PGI)
(2) The program subtracts allowances for vacancy and operating expenses to derive net operating income (NOI).
(3) The program capitalizes NOI (divides it by the overall rate) to produce the value estimate.

The income approach is considered the most reliable approach to valuation in area 17 where relevant income and expense data is available to ascertain market rates. During the sales verification process, an attempt is made to obtain income and expense data from the parties involved in the transactions through interviews or via mail. The information requested includes current and anticipated future rents, operating expense breakdown and assigned responsibility for the expenses, and estimated capitalization rates associated with a sale. In addition, owners, tenants, and agents of non-sale properties are surveyed to collect similar data. Disclosure of this information is not required by law and therefore is often difficult to obtain. The return rate of mail surveys varies and the data can be incomplete. Telephone interviews are dependent upon obtaining a valid number for a knowledgeable party and the opportunity to contact them. Interviews with tenants in the field usually yield rental and expense information only. As a supplement, lease information is gathered from Costar and other websites. In order to calibrate a credible income model, it is necessary to consider data from recognized published sources to assist in developing capitalization rates. These publications tend to report data that is considered relevant to institutional-grade CBD and suburban real estate. The following table recaps the rates as reported by these publications.

| Source | Date | Location | Office | Industrial | Retail | Multifamily | Remarks |

In area 17, many of the properties are considered to be non-institutional grade. They may present a higher risk to investors and therefore should be valued at a higher capitalization rate. The following table shows ranges of capitalization rates for institutional and noninstitutional grade properties per a survey conducted in January 2008 by PricewaterhouseCoopers LLP.

| Institutional |  | Non-institutional |
| :--- | :---: | :---: |
| Market | OAR Range | OAR Range |
| National <br> Regional <br> Mall | $5.00 \%-9.50 \%$ | $5.00 \%-12.00 \%$ |
| National Strip <br> Shopping Ctr | $5.80 \%-9.00 \%$ | $7.00 \%-11.00 \%$ |
| National <br> CBD Office | $4.50 \%-9.00 \%$ | $5.50 \%-10.00 \%$ |
| National <br> Suburban <br> Office | $5.00 \%-$ <br> $10.50 \%$ | $5.50 \%-11.75 \%$ |

| Institutional |  | Non-institutional |
| :--- | :--- | :---: |
| Market | OAR Range | OAR Range |
| National Flex <br> and R\&D | $5.50 \%-9.00 \%$ | $8.00 \%-10.00 \%$ |
| National <br> Warehouse | $5.00 \%-8.00 \%$ | $6.00 \%-9.50 \%$ |
| National <br> Apartment | $3.50 \%-8.00 \%$ | $4.50 \%-11.00 \%$ |

The preceding tables demonstrate ranges of capitalization rates and trends that are compiled with information that is collected on a national or broad regional scale. This information is reconciled with data specific to the real estate market in area 17 to develop the income model. The range of capitalization rates in the income model for area 17 reflects the variety of properties in this area.

Rental rates, vacancy levels and operating expenses are derived by reconciling all of the information collected through the sales verification process, completed surveys, interviews with tenants, owners, and brokers and the appraiser's independent market research. Quality, effective year, condition, and location are variables considered in the application of the income model to the parcels in the population best suited to be valued via the income approach. Property types in area 17 that are valued by the income approach include, but are not limited to, offices, retail stores, and mixed-use buildings.

## Income approach calibration

The models were calibrated after setting base rents by using adjustments based on location, size, effective age, and quality of construction. The following table summarizes the income valuation model developed for area 17.

| Property Type | Typical Rent Range | Overall Rent Range | Expenses | OAR Range |
| :--- | :--- | :--- | :--- | :--- |
| Apartments | $\$ 12.00$ to $\$ 18.00$ | $\$ 9.00$ to $\$ 21.00$ | $30 \%-40 \%$ | $.055-.065$ |
| Restaurants | $\$ 15.00$ to $\$ 24.00$ | $\$ 9.00$ to $\$ 27.00$ | $10 \%$ | $.0725-.0775$ |
| Retail | $\$ 12.00$ to $\$ 25.00$ | $\$ 9.00$ to $\$ 30.00$ | $10 \%$ | $.0725-.0775$ |
| Offices | $\$ 12.00$ to $\$ 18.00$ | $\$ 9.00$ to $\$ 24.00$ | $10 \%-30 \%$ | $.0725-.0775$ |
| Med $/$ Dent Offices | $\$ 18.00$ to $\$ 24.00$ | $\$ 12.00$ to $\$ 30.00$ | $10 \%-30 \%$ | $.0725-.0775$ |
| Supermarket | $\$ 12.00$ to $\$ 15.00$ | $\$ 9.00$ to $\$ 18.00$ | $10 \%$ | $.0725-.0775$ |

| Property Type | Typical Rent Range | Overall Rent Range | Expenses | OAR Range |
| :--- | :--- | :--- | :--- | :--- |
| Department store <br> Discount store | $\$ 12.00$ to $\$ 18.00$ | $\$ 9.00$ to $\$ 21.00$ | $10 \%$ | $.0725-.0775$ |
| Convenience Stores | $\$ 15.00$ to $\$ 21.00$ | $\$ 12.00$ to $\$ 24.00$ | $10 \%$ | $.0725-.0775$ |
| Day Care Centers | $\$ 12.00$ to $\$ 14.00$ | $\$ 9.00$ to $\$ 16.00$ | $10 \%$ | $.0725-.0775$ |
| Industrial $/$ Whse | $\$ 8.00$ to $\$ 10.00$ | $\$ 7.00$ to $\$ 15.00$ | $10 \%$ | $.0725-.0775$ |
| Service $G a r a g e s ~ a n d ~$ <br> Mini-Lubes | $\$ 9.00$ to $\$ 10.00$ | $\$ 9.00$ to $\$ 15.00$ | $10 \%$ | $.0725-.0775$ |

| Basement, <br> Mezzanine | $\$ 4.50$ to $\$ 7.50$ | $\$ 3.00$ to $\$ 9.00$ | $10 \%$ | $.0725-.0775$ |
| Vacancy Rate for all property types in Area 17 is $5 \%$ |  |  |  |  |

## Reconciliation and/or validation study of calibrated value models including ratio study of hold out samples.

All parcels were individually reviewed for correctness of the model application before final value selection. All of the factors used to establish value by the model were subject to adjustment. The market sales approach is considered the most reliable indicator of value when comparable sales were available, however the income approach was applied to most parcels in order to better equalize comparable properties. Whenever possible, market rents, expenses, and cap rates were ascertained from sales, and along with data from surveys and publications these parameters were applied to the income model. An administrative review of the selected values was made by Bonnie Christensen, Senior Appraiser for quality purposes.

## Model Validation

## Total Value Conclusions, Recommendations and Validation:

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is office reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The Appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area.

Application of the total value model described above results in improved equity between individual properties as shown by the improvement in the C.O.V. from $15.24 \%$ to
$10.92 \%$ and the C.O.D. from $11.06 \%$ to $8.48 \%$. This reflects an improvement from previous values. In addition, the resulting assessment level is $95.4 \%$. These figures are presented in the 2007 and 2008 Ratio Analysis charts included in this report.

The total assessed value of Area 17 for assessment year 2007 was $\$ 4,267,272,471$.The total recommended assessed value for the 2008 assessment year is $\$ 4,620,169,200$. This amounts to a total change of approximately $+8.27 \%$.
