*Lloyd Hara*  
**Assessor**

Dear Property Owners:

Property assessments for the 2012 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2012 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

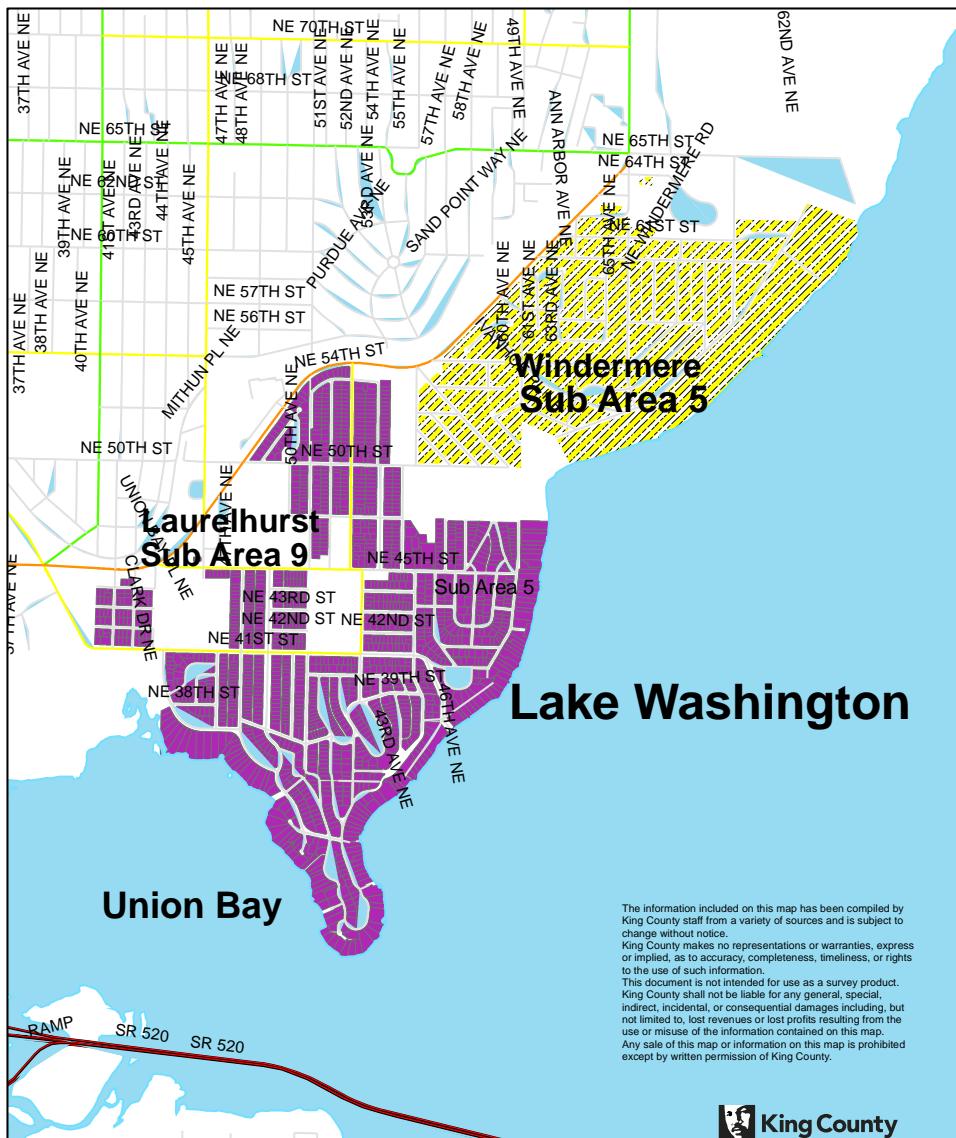

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

  
Lloyd Hara  
Assessor

## ***Glossary for Improved Sales***

### ***Condition: Relative to Age and Grade***

1= Poor	Many repairs needed. Showing serious deterioration
2= Fair	Some repairs needed immediately. Much deferred maintenance.
3= Average	Depending upon age of improvement; normal amount of upkeep for the age of the home.
4= Good	Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain
5= Very Good	Excellent maintenance and updating on home. Not a total renovation.

### ***Residential Building Grades***

Grades 1 - 3	Falls short of minimum building standards. Normally cabin or inferior structure.
Grade 4	Generally older low quality construction. Does not meet code.
Grade 5	Lower construction costs and workmanship. Small, simple design.
Grade 6	Lowest grade currently meeting building codes. Low quality materials, simple designs.
Grade 7	Average grade of construction and design. Commonly seen in plats and older subdivisions.
Grade 8	Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
Grade 9	Better architectural design, with extra exterior and interior design and quality.
Grade 10	Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
Grade 11	Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
Grade 12	Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
Grade 13	Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.

**Area Name / Number:** Laurelhurst – Windermere / 10

**Number of Improved Sales:** 208

**Range of Sale Dates:** 1/1/2009 – 1/1/2012

<b>Sales – Average Improved Valuation Change Summary</b>						
	Land	Imps	Total	Sale Price*	Ratio	COD
<b>2011 Value</b>	\$444,200	\$434,200	\$878,400			
<b>2012 Value</b>	\$453,400	\$484,900	\$938,300	\$1,039,400	90.3%	8.29%
<b>Change</b>	+\$9,200	+\$50,700	+\$59,900			
<b>% Change</b>	+2.1%	+11.7%	+6.8%			

\*Sales are time adjusted to 1/1/2012.

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

<b>Population - Improved Parcel Summary:</b>			
	Land	Imps	Total
<b>2011 Value</b>	\$496,900	\$442,900	\$939,800
<b>2012 Value</b>	\$510,300	\$485,600	\$995,900
<b>Percent Change</b>	+2.7%	+9.6%	+6.0%

Sales of new homes built over the last few years are over represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

## **Sales Sample Representation of Population - Above Grade Living Area**

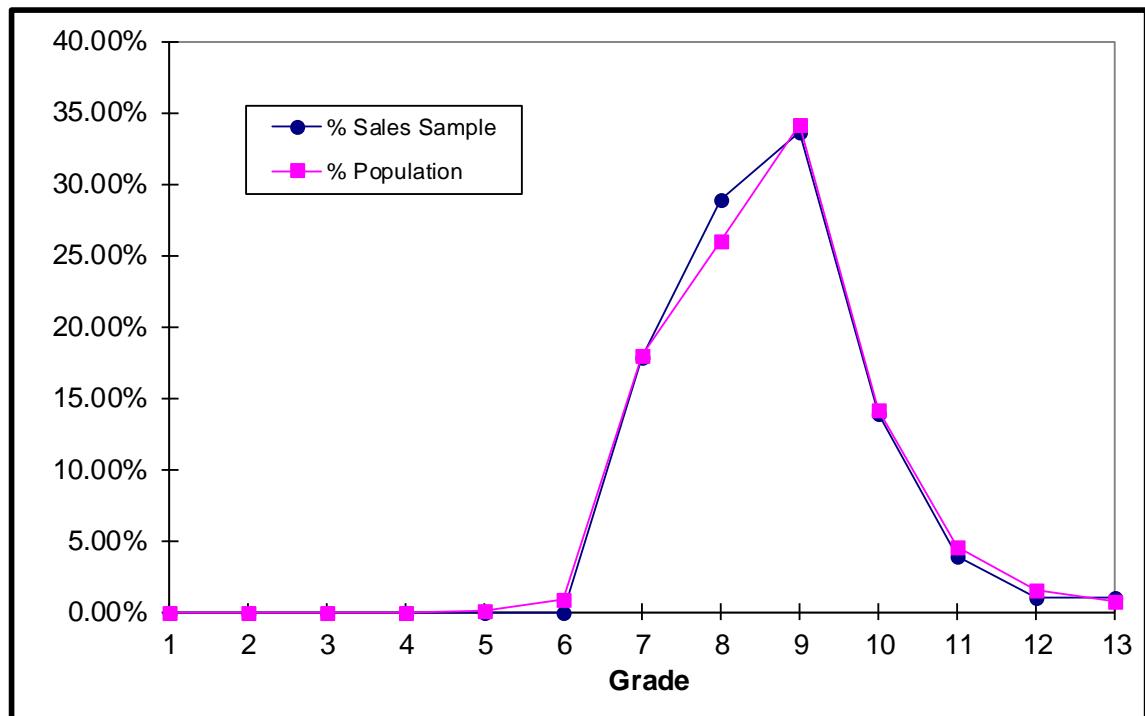

<b>Sales Sample</b>			<b>Population</b>

The sales sample frequency distribution follows the population distribution very closely with regard to Building Grade. This distribution is ideal for both accurate analysis and appraisals.

## **Sales Screening for Improved Parcel Analysis**

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2011
5. Existing residences where the data for 2011 is significantly different than the data for 2012 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$25,000 or less posted for the 2011 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

(See the attached *Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis* for more detailed information)

### **The following Departmental guidelines were considered and adhered to:**

Sales from 1/2009 to 1/2012 (at minimum) were considered in all analyses.

Sales were time adjusted to 1/1/2012.

This report is intended to meet the requirements of the Uniform Standards of Professional Appraisal Practice Standard 6.

## ***Identification of the Area***

### **Name or Designation:**

Area 10 – Laurelhurst/Windermere

### **Boundaries:**

Area 10 is bounded on the east and south by Lake Washington. To the southwest is Union Bay. It is bounded on the west by Sand Point Way NE and on the north by Magnuson Park.

### **Maps:**

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

### **Area Description:**

Area 10 is located in northeast Seattle between Lake Washington and Sand Point Way NE. There are two distinct sub areas within Area 10, Laurelhurst to the south and Windermere to the north.

Laurelhurst is defined as sub area 9 and includes neighborhoods 1& 3 and the southerly portion of neighborhood 4. Neighborhoods 1 & 3 are the primary and most valuable neighborhoods in sub area 9. The south portion of neighborhood 4 is a peripheral neighborhood with lower consequential land values. Parcels in neighborhoods 1 &3 enjoy the right to join the Laurelhurst Beach Club.

Windermere is defined as sub area 5 and includes neighborhood 2 and the west and northerly portion of neighborhood 4. Neighborhood 2 is the primary and most valuable neighborhood in sub area 5. As noted above neighborhood 4 is a peripheral neighborhood with lower consequential land values. Neighborhood 5 is an additional peripheral neighborhood within sub area 5. Parcels in neighborhood 2 enjoy access Windermere Park which is located on Lake Washington.

A map showing each neighborhood is included on page 15 of this report.

Area 10 is a very upscale area with the majority of the homes being grades 9-13. The improvements range from grade 5 to 13. Homes were built between 1900 and 2012 with the predominant year built between 1920 and 1960. The average sale price of a non-waterfront home is \$922,000. The average sale price of a waterfront home is \$3,914,000. A major quality of the area is the abundant views of Lake Washington, with 819 out of 2340 improved parcels (35%) enjoying a Lake Washington view. The area is influenced by its proximity to the University of Washington, Children's Hospital, University Village Shopping Center, Lake Washington and Magnuson Park. Area 10 includes 2422 parcels of which 98% are improved. New construction almost always occurs as a result of an existing home being torn down due to a lack of vacant parcels suitable for development. Area 10 includes 177 waterfront parcels ranging from low bank to high bank.

### ***Land Valuation***

Vacant sales from 1/2009 to 1/2012 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2012. Unfortunately there were no vacant land sales in area 10 during this time period. There were, however, a number of tear down sales where the purchaser acquired the property with the intention of removing the existing improvement and constructing a new one. These sales were used along with typical land to

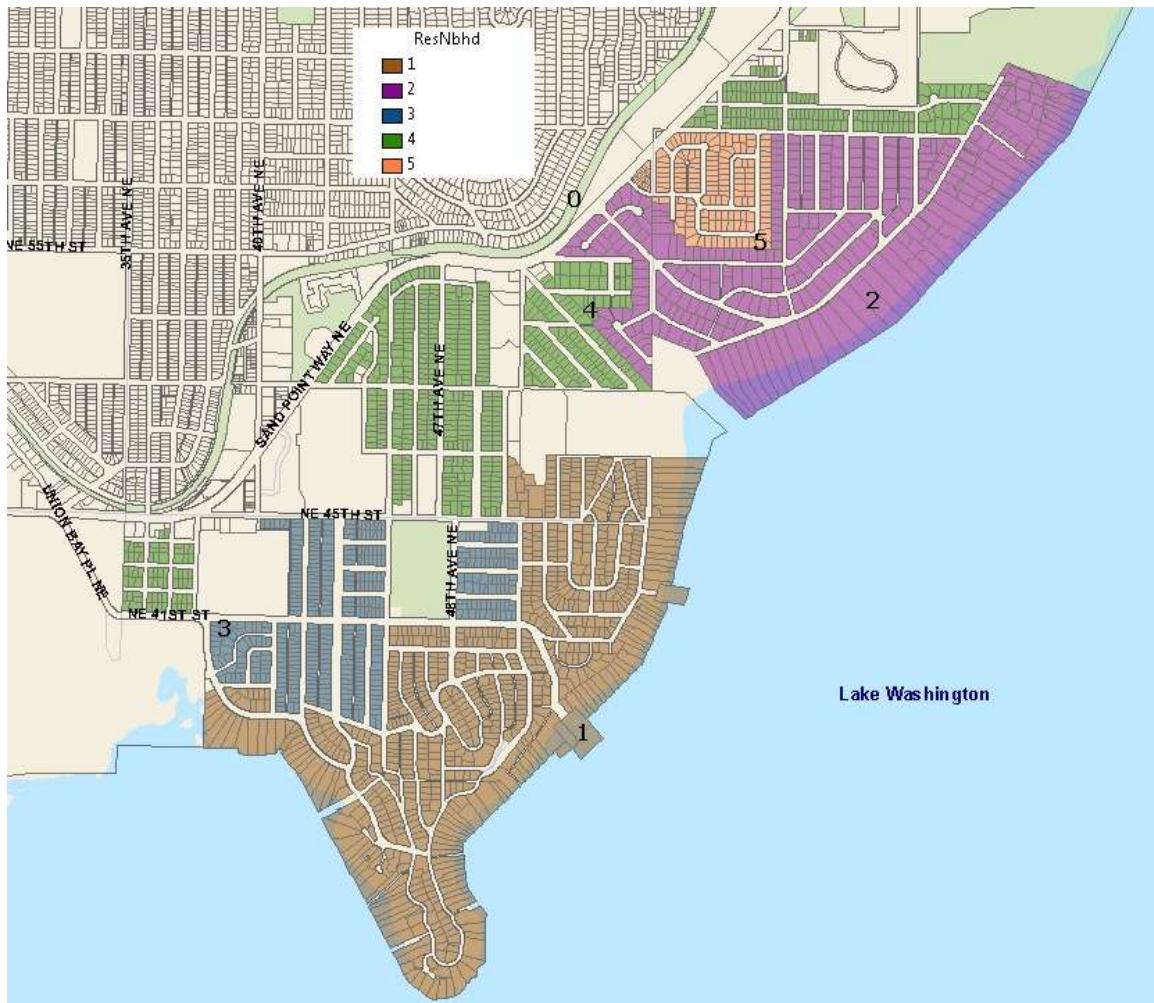

building ratios of 30% on sales of newer homes to determine land values in the area. Minimal vacant sales in adjacent areas were not considered as the nature and predominant values of area 10 are dissimilar to surrounding areas.

Typical lot size in neighborhoods 1, 3, 4 & 5 were 6300 square feet while typical non-waterfront lot size in neighborhood 2 is 14,400 square feet. Positive adjustments were made for additional square footage and views. Negative adjustments were made smaller lots, topographical issues, traffic impacts and proximity to commercial properties. Waterfront lots were valued by the front foot.

A typical 6400 square foot, non-waterfront lot in neighborhoods 1 & 3 has a value of \$344,000.

A typical 14,000 square foot, non-waterfront lot in neighborhood 2 has a value of \$536,000. A typical 6000 square foot, non-waterfront lot in neighborhoods 4 & 5 has a value of \$258,000.

## ***Improved Parcel Valuation***

### **Improved Parcel Data:**

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited.

The analysis of this area consisted of a systematic review of applicable characteristics which influence property values. In addition to standard physical property characteristics, the analysis showed that location, land value, age, grade and condition were influential in the market.

An analysis after valuation revealed that an additional time adjustment for the first 2 years of sales used needed to be made. This resulted in a minus 2.4% adjustment to total value to all EMV parcels except for waterfront, duplexes and triplexes.

## **Area 10 Market Value Changes Over Time**

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2012**.

*For example, a sale of \$525000 which occurred on August 1, 2009 would be adjusted by the time trend factor of 0.969, resulting in an adjusted value of \$509000 (\$525000 X .969=\$508725 – rounded to the nearest \$1000.*

## **Results**

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 90.3%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2012 assessment year (taxes payable in 2013) results in an average total change from the 2011 assessments of +6.0%. This increase is due partly to market changes over time and the previous assessment levels.

**Note:** More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.
