**Assessor**

Dear Property Owners:

Property assessments for the 2013 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2013 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

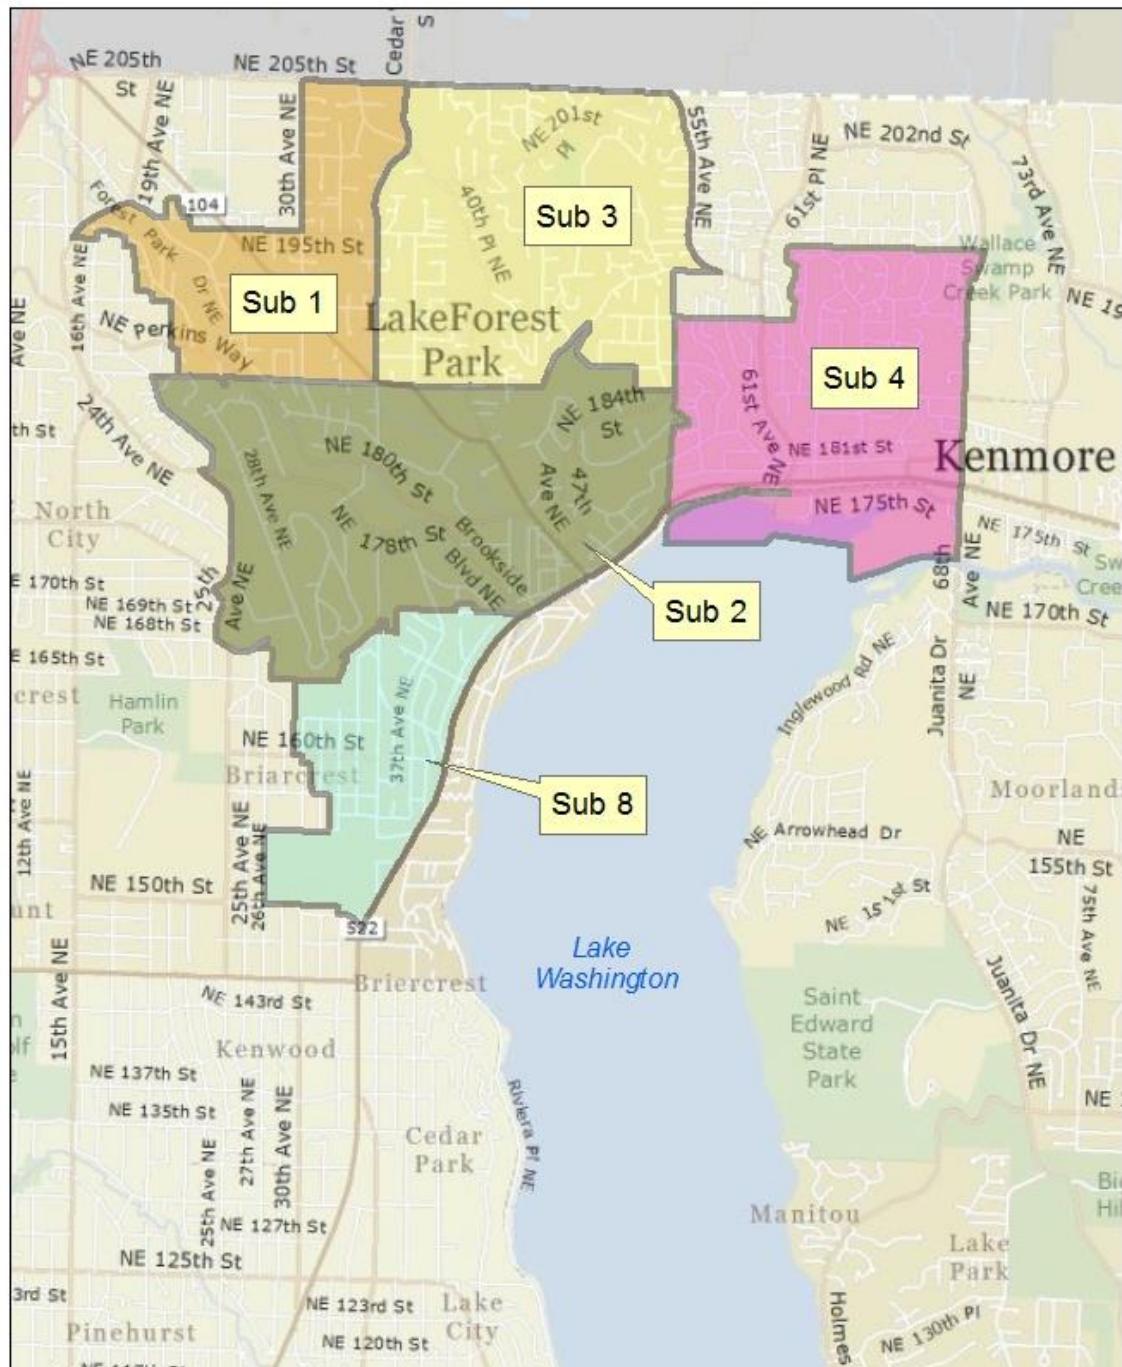

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara  
Assessor

\*Sales are time adjusted to 1/1/2013.

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. The 2013 COD of 10.9% is an improvement from the previous COD of 11.2%.

Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

**Summary of Findings:** The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that two characteristic-based and neighborhood-based variables needed to be included in the update formula in order to improve the uniformity of assessments throughout the area. For instance, Newer House parcels (built/renovated after 2005) were at a higher assessment level than others and their values were adjusted downward. Parcels located in Sub Area 8 (except Newer House parcels) were at a higher assessment level than others and their values were adjusted upward less than other parcels.

We recommend posting these values for the 2013 Assessment Roll.

## ***Sales Screening for Improved Parcel Analysis***

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2012
5. Existing residences where the data for 2012 is significantly different than the data for 2013 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$25,000 or less posted for the 2012 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

(See the attached *Improved Sales Used in this Annual Update Analysis* and *Improved Sales Removed from this Annual Update Analysis* for more detailed information)

## ***Land Update***

Analysis indicates land values are at or below current market levels as of 1/1/2013. No additional adjustment to land value is required.

## ***Improved Parcel Update***

The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that two characteristic-based and neighborhood-based variables needed to be included in the update formula in order to improve the uniformity of assessments throughout the area. For instance, Newer House parcels (built/renovated after 2005) were at a higher assessment level than others and their values were adjusted downward. Parcels located in Sub Area 8 (except Newer House parcels) were at a higher assessment level than others and their values were adjusted upward less than other parcels.

With the exception of real property mobile home parcels and parcels with "accessory only" improvements, the new recommended values on all improved parcels were based on the analysis of the 382 useable residential sales in the area.

Sales used in the valuation model were time adjusted to January 1, 2013. The chosen adjustment model was developed using multiple regression. An explanatory adjustment table is included in this report.

## ***Mobile Home Update***

There were only two sales of Mobile Homes within this area, therefore Mobile Homes received the 1.041% Change indicated by the sales sample as reflected on the Summary page.

## ***Results***

The resulting assessment level is 91.8%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2013 assessment year (taxes payable in 2014) results in an average total change from the 2012 assessments of +4.5%. This increase is due partly to market changes over time and the previous assessment levels.

Note: Additional information may reside in the Assessor's Real Property Database, Assessor's procedures, Assessor's "field" maps, Revalue Plan, separate studies, and statutes.

## Area 4 Adjustments

**2013 Total Value = 2012 Total Value + Overall +/- Characteristic Adjustments as Apply Below**

Due to rounding of the coefficient values used to develop the percentages and further rounding of the percentages in this table, the results you will obtain are an approximation of adjustment achieved in production.

### Standard Area Adjustment

5.42%

#### Newer House

(Built/Renovated  
after 2005) Yes

% Adjustment -2.36%

#### Sub Area 8 (except Newer Houses)

Yes

% Adjustment 1.18%

#### Comments :

The percentages listed are total adjustments not additive adjustments.

For instance, a Newer House parcel would approximately receive a -2.36% downward adjustment. 96 parcels in the improved population would receive this adjustment. There were 24 sales.

A parcel located in Sub Area 8 (except Newer House parcels) would approximately receive a 1.18% upward adjustment. 587 parcels in the improved population would receive this adjustment. There were 37 sales.

There were no properties that would receive a multiple variable adjustment.

Generally Newer House parcels and parcels located in Sub Area 8 were at a higher assessment level than the rest of the population. This model corrects for these strata differences.

86% of the population of 1 to 3 Unit Residences in the area are adjusted by the Standard Area Adjustment alone.

### ***Area 4 Market Value Changes Over Time***

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2013**.

*For example, a sale of \$525000 which occurred on August 1, 2010 would be adjusted by the time trend factor of 0.988, resulting in an adjusted value of \$519000(\$525000 X 0.988=\$518700) rounded to the nearest \$1000.*
