**Lloyd Hara**  
**Assessor**

Dear Property Owners:

Property assessments for the 2013 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2013 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara  
Assessor

# Rainier Beach

## Housing

Grade 5/ Year Built 1937/ Total Living Area 570

Grade 6/ Year Built 1916/ Total Living Area 1150

Grade 7/ Year Built 1943/ Total Living Area 940

Grade 8/ Year Built 1911/ Total Living Area 2040

Grade 9/ Year Built 2006/ Total Living Area 2760

Grade 10/ Year Built 2007/ Total Living Area 5410

## ***Glossary for Improved Sales***

### ***Condition: Relative to Age and Grade***

1= Poor	Many repairs needed. Showing serious deterioration
2= Fair	Some repairs needed immediately. Much deferred maintenance.
3= Average	Depending upon age of improvement; normal amount of upkeep for the age of the home.
4= Good	Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain
5= Very Good	Excellent maintenance and updating on home. Not a total renovation.

### ***Residential Building Grades***

Grades 1 - 3	Falls short of minimum building standards. Normally cabin or inferior structure.
Grade 4	Generally older low quality construction. Does not meet code.
Grade 5	Lower construction costs and workmanship. Small, simple design.
Grade 6	Lowest grade currently meeting building codes. Low quality materials, simple designs.
Grade 7	Average grade of construction and design. Commonly seen in plats and older subdivisions.
Grade 8	Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
Grade 9	Better architectural design, with extra exterior and interior design and quality.
Grade 10	Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
Grade 11	Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
Grade 12	Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
Grade 13	Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.

## Summary

**Appraisal Date 1/1/2013 - 2013 Assessment Roll**

**Area Name / Number: Rainier Beach / 22**

**Previous Physical Inspection: 2009**

**Number of Improved Sales: 265**

**Range of Sale Dates: 1/1/2010 – 1/1/2013**

Sales – Average Improved Valuation Change Summary						
	Land	Imps	Total	Sale Price*	Ratio	COD
2012 Value	\$114,300	\$126,100	\$240,400			
2013 Value	\$75,200	\$134,800	\$210,000	\$229,000	91.0%	12.18%
Change	-\$39,100	+\$8,700	-\$30,400			
% Change	-34.2%	+6.9%	-12.6%			

\*Sales are time adjusted to 1/1/2013.

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. *The 2013 COD of 12.18% is an improvement from the previous COD of 15.33%.* Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more that 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

Population - Improved Parcel Summary:			
	Land	Imps	Total
2012 Value	\$110,800	\$109,800	\$220,600
2013 Value	\$73,300	\$112,200	\$185,500
Percent Change	-33.8%	+2.2%	-15.9%

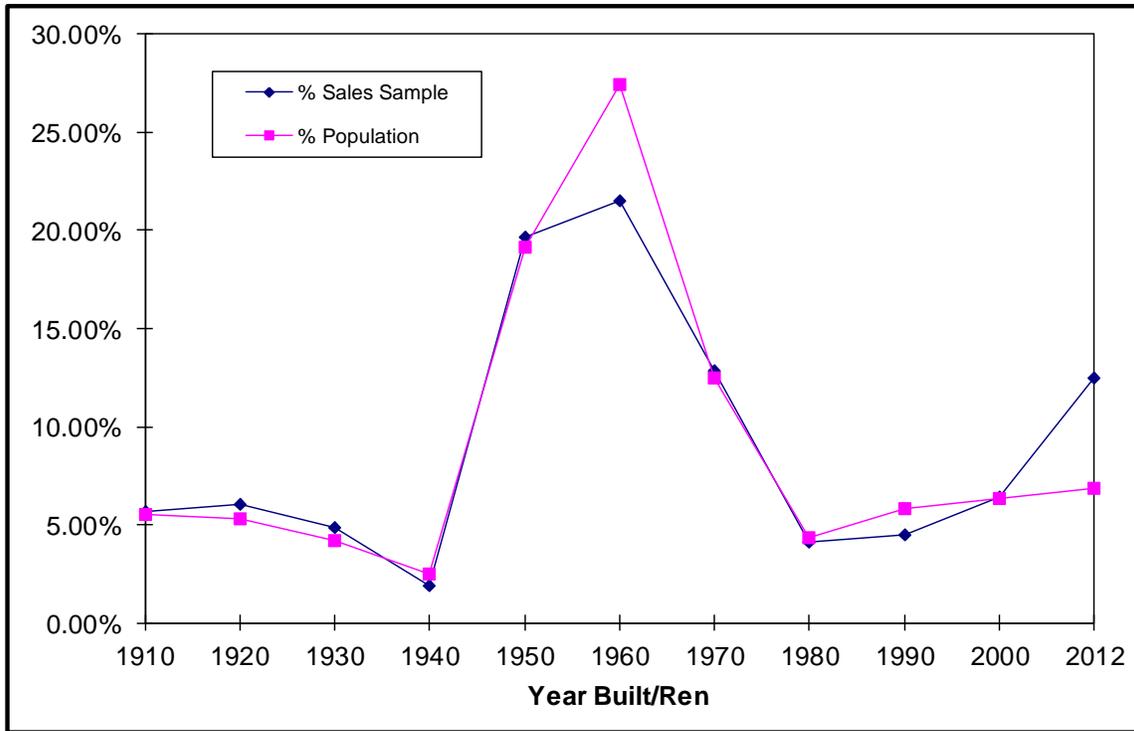

Number of one to three unit residences in the population: 3681

**Conclusions and Recommendation:** Since the values recommended in this report improve uniformity and equity, we recommend posting them for the 2013 Assessment Roll.

## Sales Sample Representation of Population - Year Built / Renovated

Sales Sample		
Year Built/Ren	Frequency	% Sales Sample
1910	15	5.66%
1920	16	6.04%
1930	13	4.91%
1940	5	1.89%
1950	52	19.62%
1960	57	21.51%
1970	34	12.83%
1980	11	4.15%
1990	12	4.53%
2000	17	6.42%
2012	33	12.45%
	265	

Population		
Year Built/Ren	Frequency	% Population
1910	205	5.57%
1920	195	5.30%
1930	154	4.18%
1940	91	2.47%
1950	705	19.15%
1960	1008	27.38%
1970	459	12.47%
1980	160	4.35%
1990	216	5.87%
2000	235	6.38%
2012	253	6.87%
	3681	

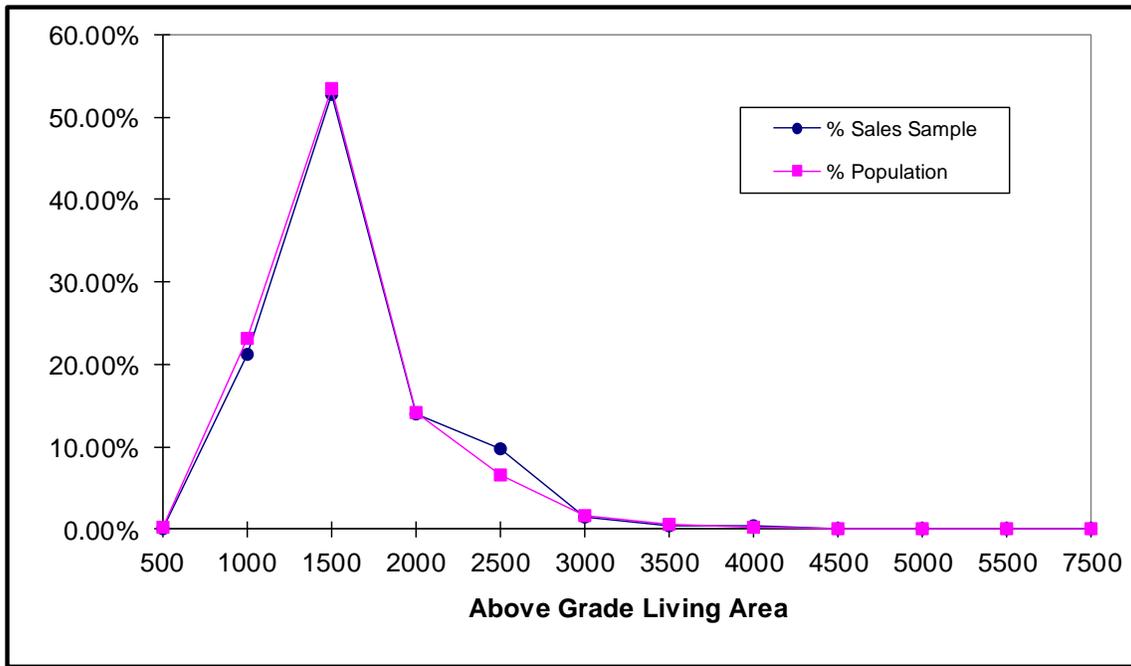

Sales of new homes built over the last few years are over represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

## Sales Sample Representation of Population - Above Grade Living Area

Sales Sample		
AGLA	Frequency	% Sales Sample
500	0	0.00%
1000	56	21.13%
1500	140	52.83%
2000	37	13.96%
2500	26	9.81%
3000	4	1.51%
3500	1	0.38%
4000	1	0.38%
4500	0	0.00%
5000	0	0.00%
5500	0	0.00%
7500	0	0.00%
	265	

Population		
AGLA	Frequency	% Population
500	5	0.14%
1000	852	23.15%
1500	1970	53.52%
2000	522	14.18%
2500	241	6.55%
3000	61	1.66%
3500	18	0.49%
4000	8	0.22%
4500	2	0.05%
5000	1	0.03%
5500	0	0.00%
7500	1	0.03%
	3681	

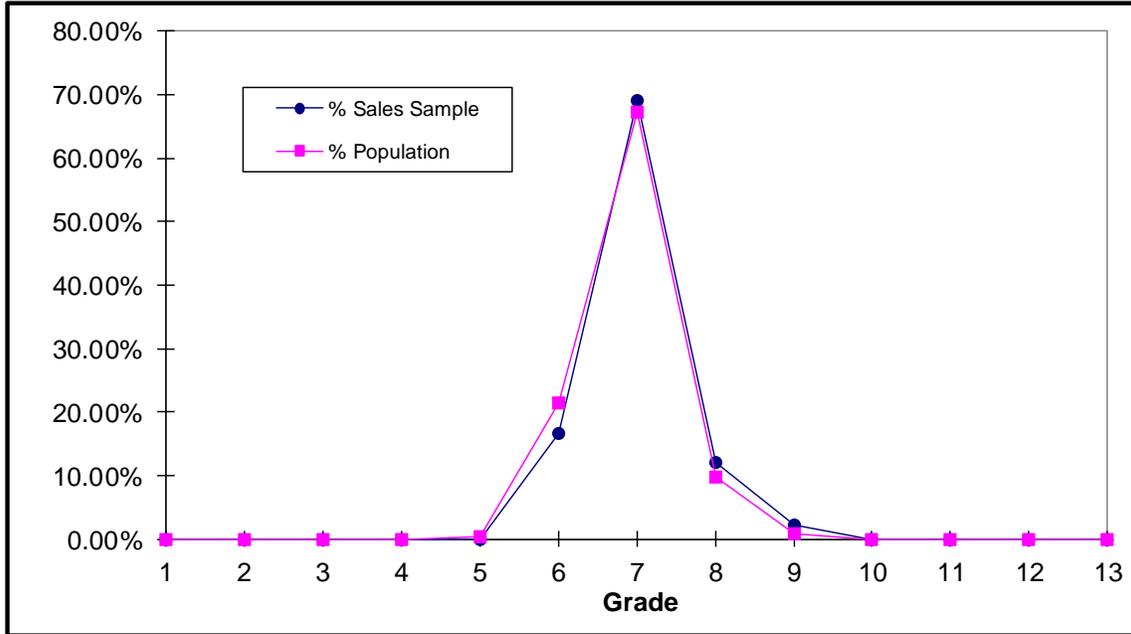

The sales sample frequency distribution follows the population distribution very closely with regard to Above Grade Living Area. This distribution is ideal for both accurate analysis and appraisals.

## Sales Sample Representation of Population - Grade

Sales Sample		
Grade	Frequency	% Sales Sample

10	2	0.05%
11	1	0.03%
12	0	0.00%
13	0	0.00%
	3681	

The sales sample frequency distribution follows the population distribution very closely with regard to Building Grade. This distribution is ideal for both accurate analysis and appraisals.

## ***Physical Inspection Process***

***Effective Date of Appraisal: January 1, 2013***

***Date of Appraisal Report: July 9, 2013***

### ***Sales Screening for Improved Parcel Analysis***

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2012
5. Existing residences where the data for 2012 is significantly different than the data for 2013 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$20,000 or less posted for the 2012 Assessment Roll .
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

*(See the attached Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis for more detailed information)*

#### **The following Departmental guidelines were considered and adhered to:**

Sales from 1/2010 to 1/2013 (at minimum) were considered in all analyses.

Sales were time adjusted to 1/1/2013.

This report is intended to meet the requirements of the Uniform Standards of Professional Appraisal Practice Standard 6.

## ***Identification of the Area***

### **Name or Designation:**

Area 22-Rainier Beach

### **Boundaries:**

This area is bounded on the north by S. Henderson St., on the east by Rainier Ave S, on the west by Martin Luther King Jr Way S. and the I-5 corridors, and on the south by the Seattle City limits.

### **Maps:**

A general map of the area is included in this report (page 14). More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

### **Area Description:**

Area 22 – Rainier Beach Area is located in SE Seattle and is divided into 4 sub areas. The majority of the area is located in the Seattle city limits. Area 22 includes the Rainier Beach and Rainier View neighborhoods with the southwest portion of sub-area 2 located in the Tukwila city limits.

Area 22 is located near I-5 which gives good access to nearby downtown Seattle to the north or the Southcenter shopping area to the south. Other major attributes include the Rainier Beach Light Rail Station, parks such as Beer Sheva Park along Lake Washington, Atlantic City Boat Ramp, Kubota Gardens, and Lakeridge Park and playground.

Approximately 67% of the homes in Area 22 are grade 7 in quality and roughly 79% of the houses were built before the 1970's. The typical lot sizes range from 6,000 to 8000 square feet.

Sub Area 2: The northern portion of sub area 2 includes the Dunlap neighborhood. The south portion of sub area 2 is located in the City of Tukwila. The Seattle City Light electrical transmission lines traverse portions of this sub area. Traffic noise also impacts a number of parcels along the I-5 corridor. Over 60% of the homes were built before 1970's and approximately 80% of the homes are of grade 7 quality.

Sub Area 3: This is the largest sub area in Area 22. It is in the Rainier Beach neighborhood and follows south to the east portion of the Rainier View neighborhood which includes Lakeridge Park. There are some commercial/retail properties at the northern end of this sub area and the 21 townhome parcels reported are all located in this sub area. Approximately 80% of the homes were built before the 1970's. Over 90% of the homes are of grade 6 & 7 quality.

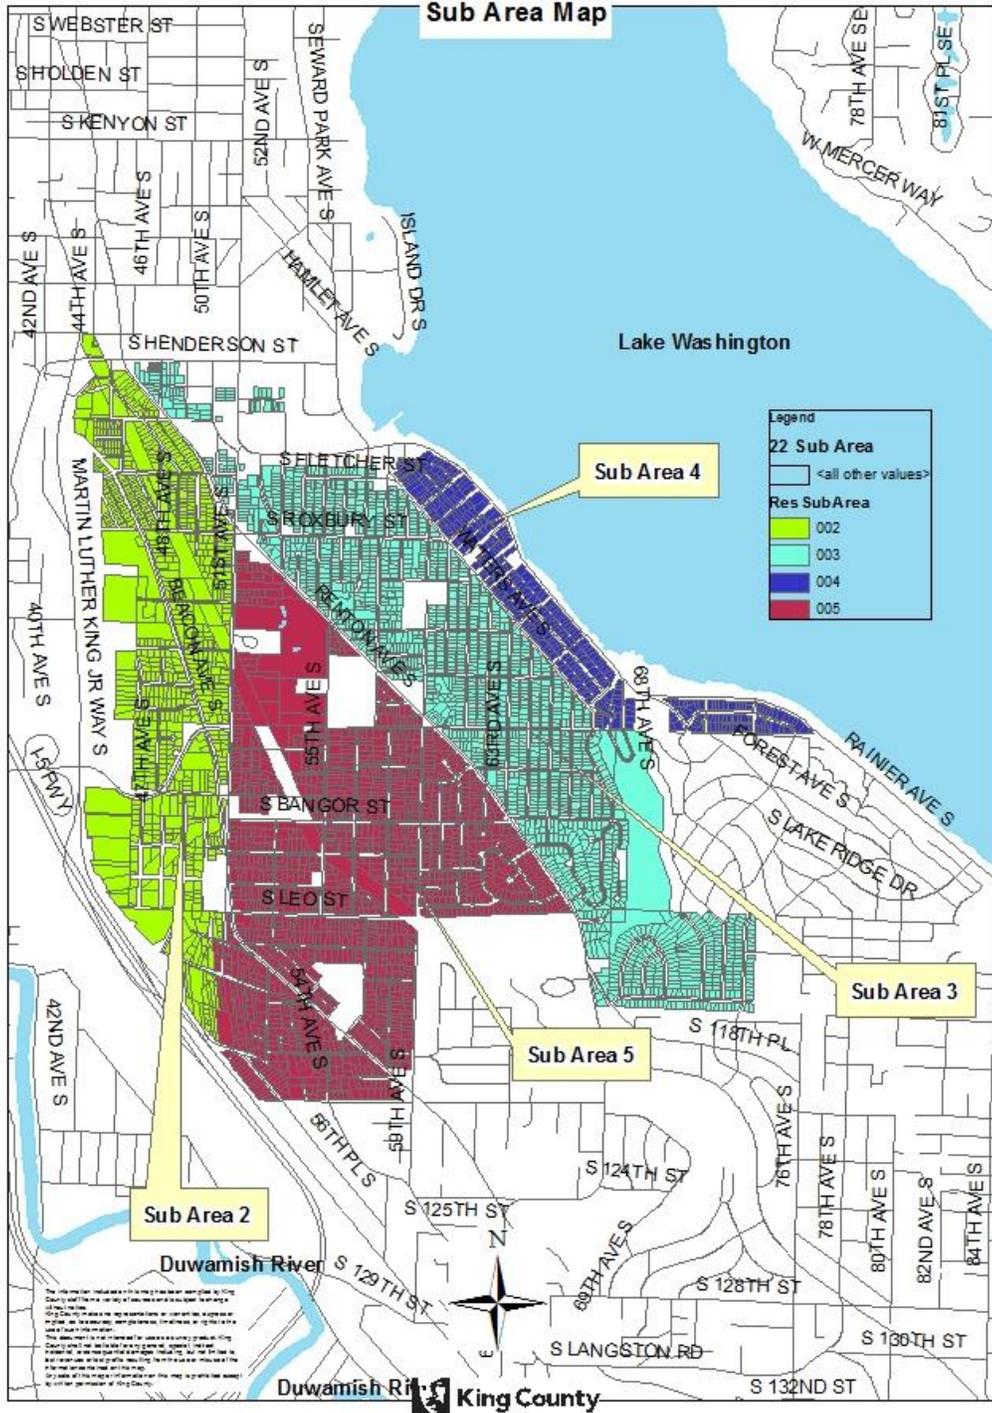

Sub Area 4: This sub area is bordered by Rainier Ave to the east and Waters Ave to the west. This sub area is the smallest sub area in Area 22 with only 314 improved parcels. Approximately 73% of the parcels do have some sort of view amenity which include views of Lake Washington, Cascade mountains and the City of Seattle. Most of the grade 9 and above homes are located in this sub area.

Sub Area 5: This sub area is also part of the Rainier beach neighborhood and includes the west portion of the Rainier View neighborhood. The Seattle City Light electrical transmission lines split the area with the parcels to the north of the transmission lines typically having curbs and

gutters while the southern portion does not. Approximately 75% of the homes were built before the 1970's and roughly 70% of the homes are of grade 6 & 7 quality.

# Area 22

Sub Area Map

## ***Land Valuation***

Vacant sales from 1/2010 to 1/2013 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2013.

Area 22 is a well-established urban neighborhood with 4331 parcels of which approximately 88% are improved and the remaining are vacant (525 parcels) or may include accessory improvements. Of the 525 vacant land parcels the City of Seattle owns 20% of them. The majority of Area 22 is located in the City of Seattle with a sprinkling of parcels outside the city limits. The southeast portion (about 241 parcels) is located in the City of Tukwila.

There were 8 land sales available within Area 22. In addition, 6 land sales from neighboring areas 24 and 25 were also utilized in the development of the land model. The sales comparison approach was utilized to determine land value, which was supplemented by the analysis of allocated land values from improved properties. Typical single family improved lot sizes range from 6,000 to 8,000 square feet and has no view or negative influences. The average lot values range between \$65,000 and \$71,000. Characteristics found to have the most influence on land include lot size, views, location, zoning, sewer availability, views, topography, and traffic.

## **Neighborhoods**

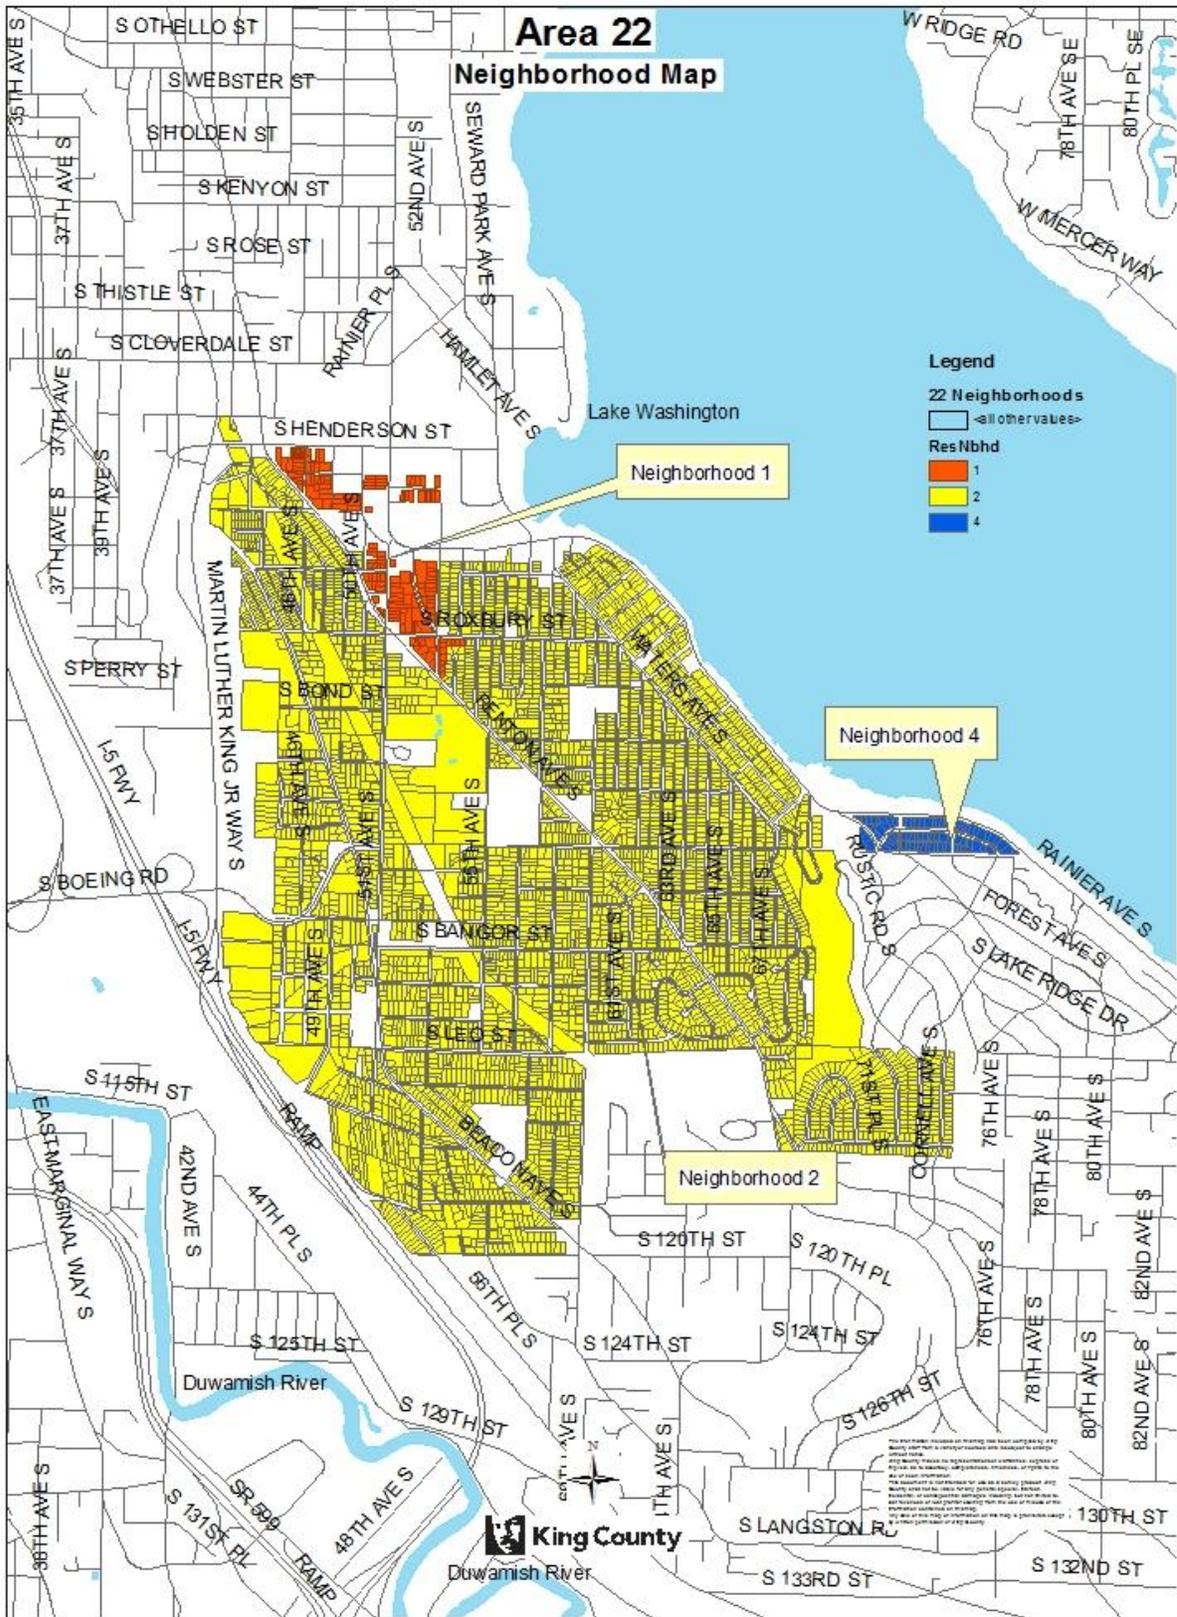

The area has 3 neighborhoods as defined by the appraisers working the area. The breakdown of neighborhoods was utilized as an efficient technique to identify and value different pockets within sub areas. A map of these neighborhoods is included at the end of this section. The following is a brief description of each neighborhood.

**Neighborhood 1** is found in the northern part of sub area 3. There are 181 parcels in this neighborhood and it is located near Rainier Beach high school and contains an area that is zoned for commercial as well as some commercial properties. Neighborhood 1 is somewhat less desirable than neighborhoods 2 and 4 for a number of reasons including a higher degree of commercial influences, and increased proximity to major arterials. There is a mixture of single family residences, townhomes, duplexes, and triplex type properties.

**Neighborhood 2** represents the majority of Area 22 and is found in sub areas 2, 3, 4, and 5. A majority of the parcels are located within the Seattle city limits with the southwest portion of this neighborhood located within the Tukwila city limits. The west side of this neighborhood is bordered by I-5 and Martin Luther King Jr Way S.

### **Neighborhood 4**

Neighborhood 4 has 79 parcels and all parcels are found in the very south portion of sub area 4. The parcels of this neighborhood lie to the west of Rainier Ave S. 93% of the properties in this neighborhood have views of Lake Washington.

## ***Land Model***

### **Model Development, Description and Conclusions:**

Area 22 is valued by a square foot lot size basis. Typical neighborhoods have overhead utilities, sidewalks, curbs and gutters. Parcels with view amenities are mostly located just along 62<sup>nd</sup> Ave S. heading southwest to Lakeridge Park.

### **Topography Adjustments**

All parcels were coded for topography based upon GIS analysis of the City of Seattle Steep Slope overlay. Parcels in which topography was coded were analyzed to determine if an adjustment was needed. Those parcels in which topography has a negative impact on value were adjusted from -10% to -90% (based on appraiser judgment).

Topography issues can cause a reduction in value by either reducing the lot utility of a parcel or by significantly increasing the cost to develop the parcel into a building site. For improved parcels falling into the latter situation the costs of development has been reflected in the improvement value. This adjustment considers that after an improvement has been placed on a parcel, the cost to cure for topography has been realized as additional building costs and is best reflected in the improvement value. The amount of this cost to cure is exposed as a percentage of base land value and is shown in the 'percent baseland value' impact field (%BLV) of Real Property. This amount of extra construction cost has been shifted from land to improvement.

A list of vacant sales used and those considered not reflective of market are included in the following sections.

## Land Value Model Calibration

SqFt/Lot	Base Land Value
500	\$45,000

Good	+75%
Excellent	+120%
<b>Other view</b>	
Average	+15%
Good	+20%
Excellent	+25%
<b>Seattle Skyline /Olympics</b>	
Average	+5%
Good	+10%
Excellent	+15%

It should be noted that only the highest view adjustment will be applied to a parcel. Example: If a parcel has an Good view of Lake Washington (+75%), excellent territorial view (+25%) and Average Seattle skyline view (+5%), the highest of all adjustments (+75%) will be applied.

Land values are not interpolated. The above land schedule and adjustments were typically used to value land. Negative and Positive Adjustments apply to all base land values. However in all cases appraiser judgment prevailed and has the latitude to make modifications as needed for unique circumstances.

## ***Land Calculation Examples***

Following are two examples of land calculations. Land values are truncated to the thousandth.

Example 1- A parcel in Neighborhood 4 that is 7,000 SF and has an Good Lake Washington view and a Good Territorial view would be calculated as follows:

\$81,000	Land Value for 7,000SF lot Neighborhood 4
<u>+\$60,000</u>	+75% for Good Lake Washington view
\$141,000	Truncated

Example 2- A parcel in Neighborhood 1 that is 5,500 SF with has an Good Territorial view and has moderate traffic would be calculated as follows:

\$70,000	Land Value for 9,000S SF lot Neighborhood 1
<u>+\$10,000</u>	Net adjustment=+15% (Good Territorial +20% plus moderate Traffic -5%)
\$80,000	Truncated

## ***Improved Parcel Valuation***

### **Improved Parcel Data:**

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited.

The analysis of this area consisted of a systematic review of applicable characteristics which influence property values. In addition to standard physical property characteristics, the analysis showed that properties in Subarea 2 and 5 needed a downward adjustment. Properties in neighborhood 1 and 4 needed an upward adjustment. Homes in Good and Very Good condition needed an upward adjustment and homes in Fair condition needed a downward adjustment.

265 sales were used to value the 3681 improved parcels in Area 22. A majority of the parcels were valued using the regression model or EMV (Estimated Market Value). However, there were cases where EMV did not work. This tended to be properties where the population was not adequately represented by the sales samples. There were a lack of sales for parcels with improvements in poor condition. The parcels with improvements in poor condition were valued at EMV less 35%. Other valuation tools such as cost, and cost less depreciation were available to aid in value selection of the poorly represented parcels. Ultimately, appraiser judgment was the most critical factor in selecting values for all parcels.

The valuation model applied to most properties and was calibrated using multiple regression analysis, a statistical technique for estimating market value from sales and property characteristics. The model developed for the area is explained in the Model Calibration section below. It includes a list of variables and their definitions. The complete model equation and exception parcel parameters are also included in the same section below.

Area 22 only had one manufactured home located in sub area 2. The manufactured home was valued using the MH RCNLD.

## **Area 22 Market Value Changes Over Time**

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2013**.

*For example, a sale of \$525,000 which occurred on August 1, 2012 would be adjusted by the time trend factor of 0.966, resulting in an adjusted value of \$507,000 ( $\$525,000 \times .966 = \$507,150$  – rounded to the nearest \$1,000).*

Market Adjustment to 1/1/2013		
Sale Date	Adjustment (Factor)	Equivalent Percent
1/1/2010	0.779	-22.1%
2/1/2010	0.785	-21.5%

## **Results**

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 91.0 %. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2013 assessment year (taxes payable in 2014) results in an average total change from the 2012 assessments of -15.9%. This decrease is due partly to market changes over time and the previous assessment levels.

**Note:** More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.

**Lloyd Hara**

As we start preparations for the 2013 property assessments, it is helpful to remember that the mission and work of the Assessor's Office sets the foundation for efficient and effective government and is vital to ensure adequate funding for services in our communities. Maintaining the public's confidence in our property tax system requires that we build on a track record of fairness, equity, and uniformity in property assessments. Though we face ongoing economic challenges, I challenge each of us to seek out strategies for continuous improvement in our business processes.

Please follow these standards as you perform your tasks.

- Use all appropriate mass appraisal techniques as stated in Washington State Laws, Washington State Administrative Codes, Uniform Standards of Professional Appraisal Practice (USPAP), and accepted International Association of Assessing Officers (IAAO) standards and practices.
- Work with your supervisor on the development of the annual valuation plan and develop the scope of work for your portion of appraisal work assigned, including physical inspections and statistical updates of properties;
- Where applicable, validate correctness of physical characteristics and sales of all vacant and improved properties.
- Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total in compliance with applicable laws, codes and DOR guidelines. The Jurisdictional Exception is applied in cases where Federal, State or local laws or regulations preclude compliance with USPAP;
- Develop and validate valuation models as delineated by IAAO standards: Standard on Mass Appraisal of Real Property and Standard on Ratio Studies. Apply models uniformly to sold and unsold properties, so that ratio statistics can be accurately inferred to the entire population.
- Time adjust sales to January 1, 2013 in conformance with generally accepted appraisal practices.
- Prepare written reports in compliance with USPAP Standard 6 for Mass Appraisals. The intended users of your appraisals and the written reports include the public, Assessor, the Boards of Equalization and Tax Appeals, and potentially other governmental jurisdictions. The intended use of the appraisals and the written reports is the administration of ad valorem property taxation.
