Lloyd Hara
Assessor

Dear Property Owners:

Property assessments for the 2013 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2013 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara
Assessor

*Sales are time adjusted to 1/1/2013.

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. *The 2013 COD of 7.63% is an improvement from the previous COD of 10.13%.* Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more that 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

Population - Improved Parcel Summary:

Sales of new homes built over the last few years are over represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

Sales Screening for Improved Parcel Analysis

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Multi-Parcel or Multi Building parcels
3. New construction where less than a 100% complete house was assessed for 2012
4. Existing residences where the data for 2012 is significantly different than the data for 2013 due to remodeling or on parcels that were vacant for 2012 and have had new houses constructed for 2013
5. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
6. Others as identified in the sales removed list

(See the attached Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis for more detailed information)

Identification of the Area

Name or Designation:

Area 42---Phinney Ridge/Fremont

Boundaries:

This area is generally bounded by North 85th Street on the north, Aurora Avenue North and East Green Lake Way North on the east, the ship canal to the south, and 3rd Avenue Northwest and Greenwood Avenue North on the west.

Maps:

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description:

Area 42 is located in the northwestern area of Seattle. It contains the neighborhoods of Phinney Ridge, Fremont, west Green Lake, and a portion of Greenwood. Geographically it is located on a hill sloping easterly, westerly, and southerly. Phinney Avenue North is generally located at the crest of the hill in the northern section. Major attributes of this area include close proximity to Green Lake, Woodland Park Zoo, Woodland Park, University of Washington, and is relatively close to the downtown business core. Another major drawing point to this area is the view amenity. Approximately 24% of the properties enjoy a view of the Olympic mountains, Cascade mountains, Mt. Rainier, Puget Sound, Green Lake, Seattle Skyline, the ship canal, or has a territorial view. Approximately 99% of the parcels are improved in this area.

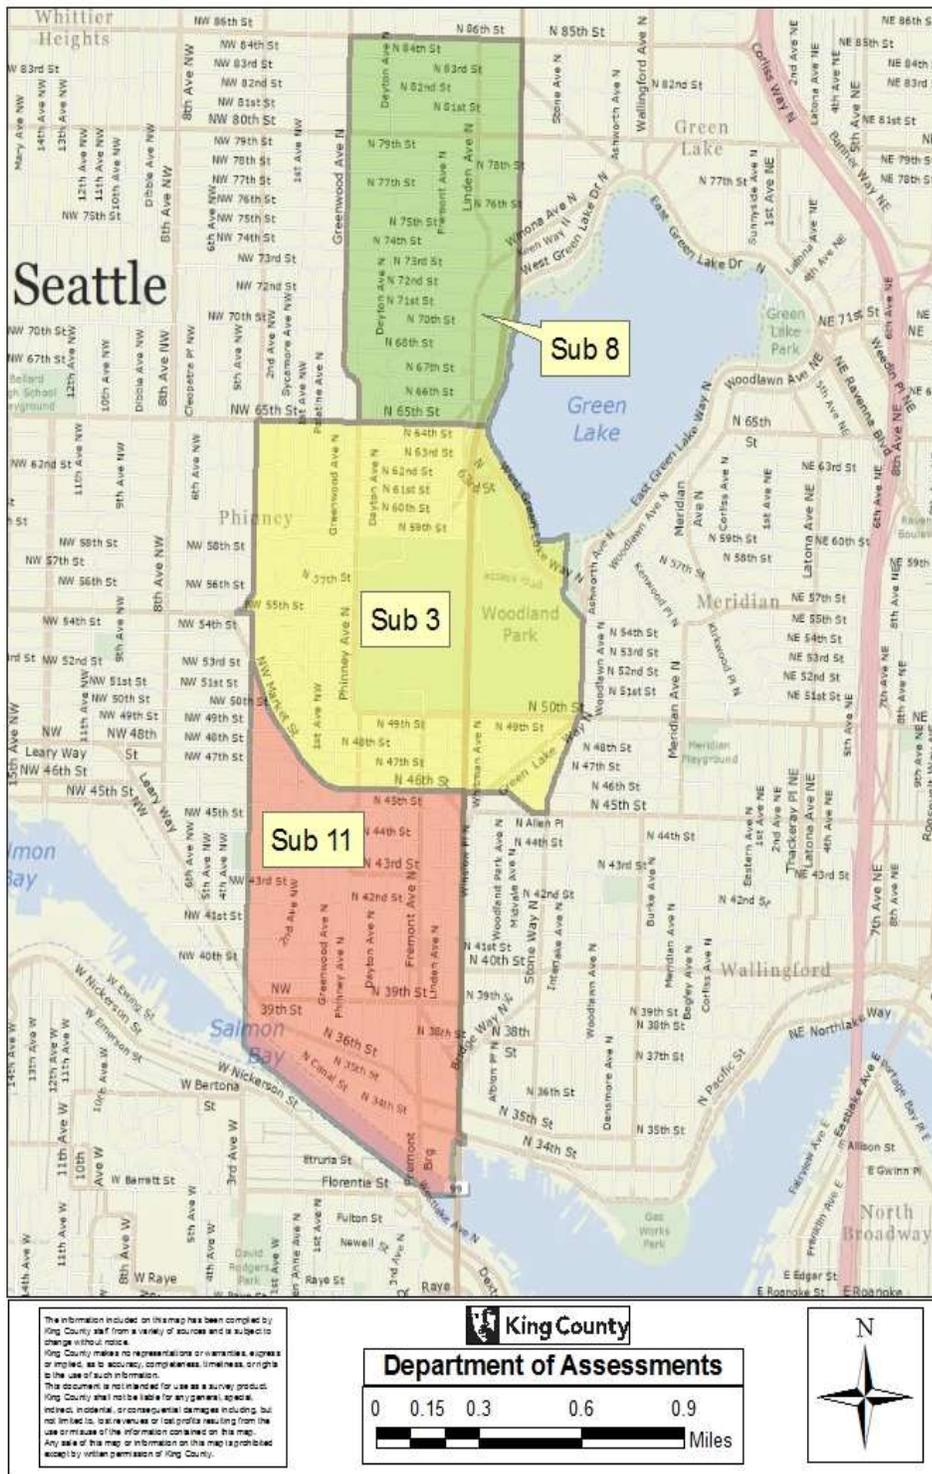

This area was one the first areas developed in Seattle. Approximately 70% of the houses were built before 1930. The typical house is grade 7 in quality, has 1,340 square feet of above grade living area, has 1,550 square feet of total living area, and is in good condition. The typical lot size is 4,000 square feet. Since the late 1980's the remodel activity of existing homes in this area has been brisk. There was a down turn in the remodel activity from 2008 to 2012.

Construction of townhome style residences has greatly increased in the past 8 years. There were 564 parcels with townhomes constructed on them. Approximately 23% of the area is zoned to allow these higher density developments. Approximately 77% of the area is zoned for detached single family residences [SF 5000].

Area 42 is divided into three sub areas. Sub area 3 is the Phinney Ridge neighborhood. The eastern portion, north of the Woodland Park zoo, has views of the Cascades and Green Lake. The western portion has views of Puget Sound, the Olympics, the ship canal, Ballard, Bainbridge Island, and Magnolia. The average assessed value in sub area 3 is \$508,000. Sub area 8 contains the west Green Lake area as well as a portion of Greenwood. The average assessed value here is \$443,000. Sub area 11 contains the Fremont neighborhood and the southern part of Phinney Ridge. The average assessed value here is \$463,000.

The total assessed value of all parcels for the 2013 assessment year was \$2,444,724,000. For the 2012 assessment year the total was \$2,244,324,000. As a result of our physical inspection we added \$26,209,000 in assessed value attributable to new construction to the tax roll. The physical inspection began in 10/2012 and was completed in 6/2013.

Area 42 Sub Areas

Land Valuation

Vacant sales from 1/2010 to 1/2013 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2013. In addition to the market data approach the allocation technique was also utilized. Vacant land and teardown sales from the neighborhoods of East Green Lake, Wallingford, Ballard, Crown Hill, Sunset Hill, Maple Leaf, north Seattle, Licton Springs, Broadview, Blue Ridge, North Beach, Ravenna, Bryant, Hawthorne Hills, Wedgwood, University District, University Village, and Mathews Beach were also analyzed in the valuation of land. A typical non view lot with 4,500 square feet had a value of \$216,000. A typical townhome style residence parcel had a land value of \$100,000.

Land Model

Model Development, Description and Conclusions:

Approximately 99% of the parcels have houses on them in area 42. Vacant land sales in area 42 and the surrounding areas were rare. Vacant sales from 1/2010 to 1/2013 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2013. There were only 5 vacant land sales occurring from 1/2010 to 1/2013 in area 42. We also analyzed 21 teardown sales occurring in the same time frame. These sales were analyzed to supplement the vacant lot sales analysis. We also analyzed sales in similar neighborhoods that included East Green Lake, Wallingford, Ballard, Crown Hill, Sunset Hill, Maple Leaf, north Seattle, Licton Springs, Broadview, Blue Ridge, North Beach, Ravenna, Bryant, Hawthorne Hills, Wedgwood, University District, University Village, and Mathews Beach. We utilized the market data as well as the allocation approach to value in order to determine the land values. The last time the land was inspected and sales analyzed by a field appraiser was in 2007. Since the 2008 assessment year the land values have been annually adjusted similar to improvement values.

The predominant factors influencing land value in this area were location, lot size, view amenity, and traffic noise. These characteristics as well as others such as zoning, topography, highest and best use as if vacant classification, available on street parking, external nuisance, and known easements were checked for accuracy and considered in the land valuation. Adjustments for views and traffic noise were developed using paired sale analysis, years of appraisal experience, and knowledge of the area.

Large sites, where short platting is typical, were valued based on zoning and number of sites allowed for development with consideration made for development costs. The typical development cost used in this area was \$25,000.

Area 42 was divided into 14 neighborhoods. The breakdown of these neighborhoods was utilized as an efficient technique to identify and value different pockets within sub areas. A map of these neighborhoods is included at the end of this section.

Neighborhoods 4 and 5 comprise the Greenwood neighborhood located in sub area 8.

Neighborhood 5 is predominately zoned for single family development. Homes in this area are smaller compared to south of North 80th Street in sub area 8 and all of sub areas 3 and 11.

There are 370 parcels in **neighborhood 5**. **Neighborhood 4** is located east of **neighborhood 5**. It contains an area that is zoned for commercial uses on Aurora Avenue North. Overall, compared

to all other neighborhoods within Area 42, **neighborhood 4** had the lowest average sale price. There are 132 parcels in **neighborhood 4**.

Neighborhood 1 is located on the eastern slope of Phinney Ridge in sub area 8. The topography of this area is rather steep but each parcel has a level building pad for residential development. Approximately 39% of the parcels in **neighborhood 1** have a view of the Cascade mountains, Green Lake, or of the territory. Many others have view utilization of their upper floor living areas. This area has close proximity to shops and restaurants on Greenwood Avenue North located at the top of Phinney Ridge. There are 504 parcels in **neighborhood 1**.

Neighborhood 2 contains the bulk of the east Green Lake neighborhood. Topography is level to moderately sloped. This area is highly desirable due to its close proximity to Green Lake. Only 8% of the properties have a view. There are 792 parcels in **neighborhood 2**.

Neighborhood 3 is located east of **neighborhood 2**. This is a transition area from a desirable residential neighborhood to one that contains commercial development on Aurora Avenue North. There are 145 parcels in **neighborhood 3**.

Neighborhood 6 is located on the eastern slope of Phinney Ridge in sub area 3. It is adjacent to the Woodland Park Zoo. It also has close proximity to Green Lake. **Neighborhood 6** had the highest average sale price in all of area 42. On average the largest homes are also located here. Approximately 40% of the parcels have a view of the Cascade mountains, Green Lake, or of the territory. There are 334 parcels in **neighborhood 6**.

Neighborhood 7 is located on the western facing slope of Phinney Ridge in sub area 3. This is a high demand area due to its views of the Olympics, Puget Sound, the ship canal, and territorial views of Bainbridge Island, Ballard, and Magnolia. Approximately 41% of the parcels have a view. It is also adjacent to the Woodland Park Zoo and several park areas outside the zoo itself. **Neighborhood 7** had the second highest average sale price of any primarily single family zoned neighborhood within area 42. There are 950 parcels in **neighborhood 7**.

Neighborhood 8 is located south of the Woodland Park Zoo in sub area 3. Approximately 58% of the parcels are zoned for higher density development compared to single family homes. Teardown activity in this area has not been as strong as other areas due to the fact that many of the single family residences are good quality, large homes, and have been well maintained or remodeled over the past 80 to 100 years. There are 416 parcels in **neighborhood 8**.

Neighborhood 9 is located on a southwest facing slope in sub area 11. This is a transition area between Phinney Ridge, east Ballard, and Fremont neighborhoods. Approximately 98% of this area is zoned for single family development. Over 57% of the parcels have a view of the Olympic mountains, Puget Sound, the ship canal, or of the territory. There are 334 parcels in **neighborhood 9**.

Neighborhood 10 contains the northern portion of Fremont. Approximately 87% of the zoning allow for higher density development [townhome style residences]. Many older homes remain here due to the same reasons mentioned in **neighborhood 9**. However, there are more commercial influences [retail shops and restaurants] in **neighborhood 10** compared to **neighborhood 9**. 41% of the improvements are townhome style residences. Approximately 19% of the parcels have a view of the Olympic mountains, Cascade mountains, downtown skyscrapers, the ship canal, Puget Sound, or of the territory. There are 319 parcels in **neighborhood 10**.

Neighborhood 11 contains the eastern portion of sub area 11. This area is exclusively zoned for high density development. Approximately 41% of the improvements are townhome style residences. This area contains numerous commercial use buildings located on Aurora Avenue North. Over 20% of the parcels are impacted by traffic noise in **neighborhood 11**. There are 184 parcels in **neighborhood 11**.

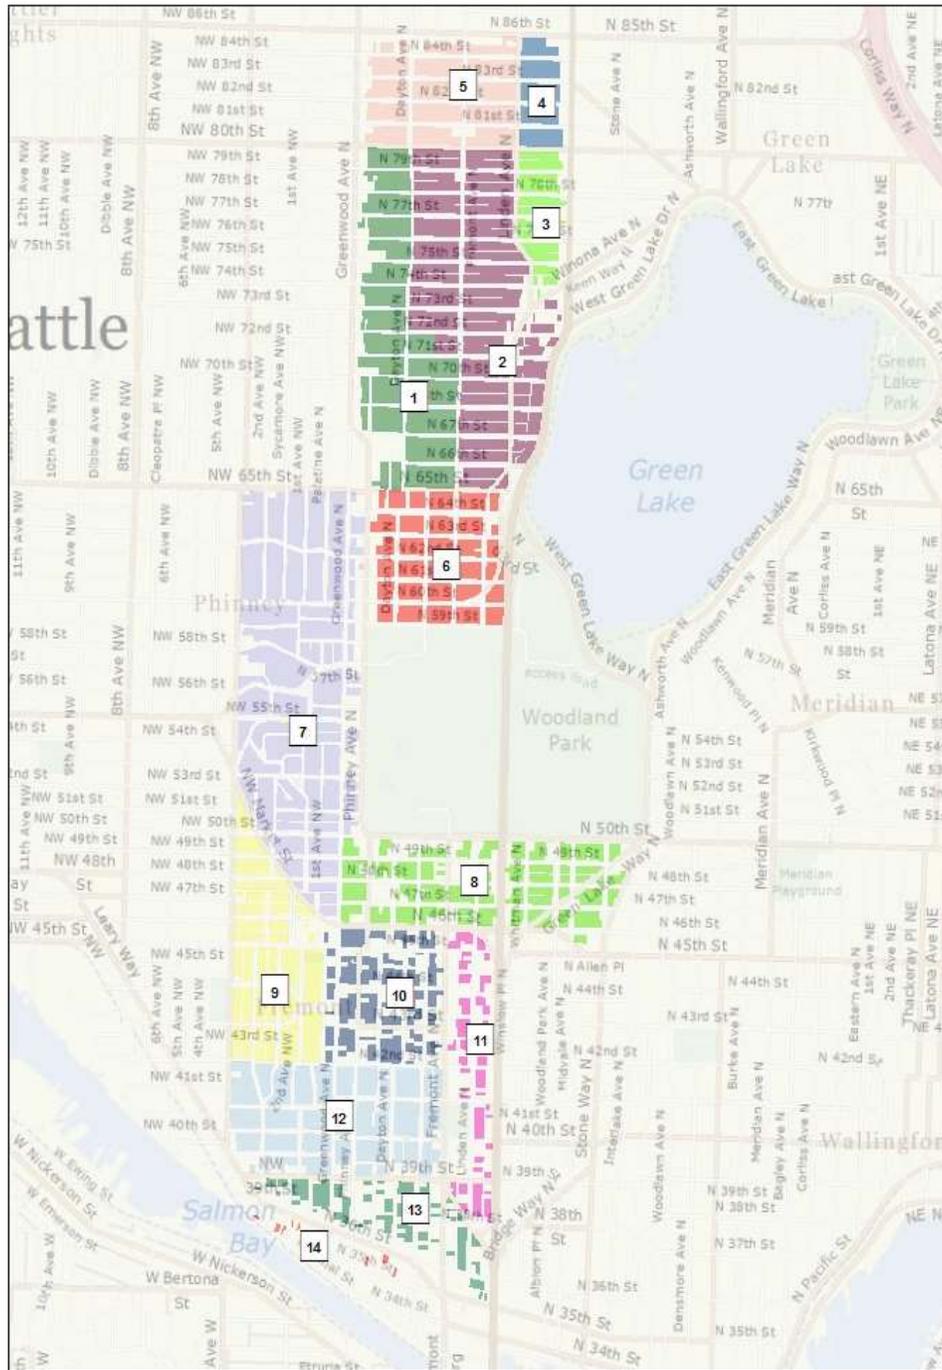

Neighborhood 12 contains the heart of the single family residences in Fremont. Approximately 32% of the parcels have a view of the Olympic mountains, Mt. Rainier, the ship canal, Puget Sound, downtown skyscrapers, or of the territory. There are 501 parcels in **neighborhood 12**.

Neighborhood 13 is located in the southern portion of sub area 11. It is zoned exclusively for townhome style residences. The highest number [162] of townhome style improvements are located **neighborhood 13**. Due to the high density of dwellings the availability of on street parking is limited in this area. There are 249 parcels in **neighborhood 13**.

Neighborhood 14 is a small area at the most southern portion of sub area 11. All of the parcels are zoned for retail, apartment, or manufacturing uses. The improvements are non-conforming structures on very small lots. They are scattered between commercial businesses. There are 13 parcels in **neighborhood 14**.

A list of vacant sales used and those considered not reflective of market are included in the following sections.

For example, a SF 5000 zoned lot, with 4,500 square feet, located in neighborhood 6, and an average Cascade mountain view would be valued at :

Land Value = (Lot Size Value (\$236,000) - Traffic Adjustment (0)- Adjacent to Commercial Adjustment (0)- Limited on Street Parking (0)) + View Adjustment (6%), rounded to the closest thousand equals \$250,000.

Improved Parcel Valuation

Improved Parcel Data:

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited.

Characteristic based multiplicative regression models were developed for valuing the majority of parcels in area 42. The main model was applied to detached single family residences. The second multiplicative regression model was developed for townhome style residences. Our team extensively verified every sale and confirmed the characteristic data at the time of sale. The model was tested for accuracy on all possible types of property in the population. Supplemental models were developed and applied to properties where the main model was not deemed accurate. The valuation models were applied to the population after each parcel had been inspected in the field. Based on the sales an overall assessment level of 91.7% was achieved. The prior assessment level was 81.9%. The uniformity of assessment improved as the COD was reduced from 10.13% to 7.63%.

The regression model for detached single family homes included the following variables: sale date, sale date squared, land value, grade, condition, year built or year renovation, first floor area, upper floor area, basement area, covered parking area, number of bathrooms, heavy traffic, sub area 3, sub area 11, neighborhood 1, neighborhoods 3 or 4, and year built/renovated 1936 to 1949. It was applicable to houses with grades 6-10, all ages, and all conditions with the exception of "poor". It was not applicable to homes with grades less than 6 or greater than 10, multiple buildable sites, parcels with more than one house, or parcels with obsolescence.

The regression model for townhome style residences included the following variables: sale date, sale date squared, land value, total replacement cost new [RCN], year built or renovated, sub area 8, neighborhood 13, view utility, good garage access, good view, no covered parking, limited on street parking, heavy traffic, and detached unit. It was applicable to grades 7-9 homes in average condition.

A list of improved sales used and those considered not reflective of market are included in the following sections.

Of the improved parcels in the population, 4,033 parcels increased in value. They were comprised of 42 single family residences on commercially zoned land and 3,991 single family residences or other parcels.

Of the vacant land parcels greater than \$1000, 9 parcels increased in value. (Tax exempt parcels were excluded from the number of parcels increased)

Area 42 Market Value Changes Over Time Detached Single Family Residences

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2013**.

For example, a sale of \$475,000 which occurred on August 1, 2011 would be adjusted by the time trend factor of 1.131, resulting in an adjusted value of \$537,000 ($\$475,000 \times 1.131 = \$537,225$ – rounded to the nearest \$1,000).

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 91.7%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2013 assessment year (taxes payable in 2014) results in an average total change from the 2012 assessments of +7.9%. This increase is due partly to market changes over time and the previous assessment levels.

Note: More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.

Lloyd Hara

Assessor

As we start preparations for the 2013 property assessments, it is helpful to remember that the mission and work of the Assessor's Office sets the foundation for efficient and effective government and is vital to ensure adequate funding for services in our communities. Maintaining the public's confidence in our property tax system requires that we build on a track record of fairness, equity, and uniformity in property assessments. Though we face ongoing economic challenges, I challenge each of us to seek out strategies for continuous improvement in our business processes.

Please follow these standards as you perform your tasks.

- Use all appropriate mass appraisal techniques as stated in Washington State Laws, Washington State Administrative Codes, Uniform Standards of Professional Appraisal Practice (USPAP), and accepted International Association of Assessing Officers (IAAO) standards and practices.
- Work with your supervisor on the development of the annual valuation plan and develop the scope of work for your portion of appraisal work assigned, including physical inspections and statistical updates of properties;
- Where applicable, validate correctness of physical characteristics and sales of all vacant and improved properties.
- Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total in compliance with applicable laws, codes and DOR guidelines. The Jurisdictional Exception is applied in cases where Federal, State or local laws or regulations preclude compliance with USPAP;
- Develop and validate valuation models as delineated by IAAO standards: Standard on Mass Appraisal of Real Property and Standard on Ratio Studies. Apply models uniformly to sold and unsold properties, so that ratio statistics can be accurately inferred to the entire population.
- Time adjust sales to January 1, 2013 in conformance with generally accepted appraisal practices.
- Prepare written reports in compliance with USPAP Standard 6 for Mass Appraisals. The intended users of your appraisals and the written reports include the public, Assessor, the Boards of Equalization and Tax Appeals, and potentially other governmental jurisdictions. The intended use of the appraisals and the written reports is the administration of ad valorem property taxation.
