

## Recycling Options for cracked or broken indoor plastic recycling and trash bins

Indoor plastic bins used to collect trash or recyclable materials – the ones typically used in classrooms, lunchrooms, and offices – are quite durable and generally last for more than ten years. However, after much use, the bins may break, crack, or warp and become unusable.

Plastic recycling and trash bins are made of several types of plastics which can be recycled. The companies listed below offer collection services for these products.

### **Recology-Cleanscapes**

206-859-6700

For city phones, visit [this website](#)

Web: <https://www.recology.com/>

For a school or district with regular collection service through Recology-CleanScapes, the indoor bins are accepted in the outdoor commingled recycling container. Or, if you need to place the indoor bins next to the outdoor recycling container, call Recology first to let them know.

### **Commercial Waste Reduction and Recycling (CWRR)**

Telephone: 206-772-4745 or 360-886-9372

Web: <https://www.cwrrecycling.com/>

- Minimum quantity for collection: N/A
- Centralized collection point by district preferable
- Cost? Call or email company for information
