Study Guide for the For-Hire Driver Examination

For-Hire Driver Examination Study Material

OVERVIEW:

In 1979, King County, the City of Seattle, and the Port of Seattle embarked on a program to regionalize taxicab regulations and licensing by developing consistent regulations and services across jurisdictions. This promoted public safety and customer service by standardizing fees, regulations, enforcement, and rate review procedures through King County.

The ordinance portion will test your knowledge of King County Code chapter 6.64 and Seattle Municipal Code chapter 6.310. The geography portion of the examination will test your knowledge of King County/City of Seattle and surrounding areas. The test may include matching, multiple choice, true/false and audio questions. In order to pass the test, you must obtain a score of 80% or greater.

GEOGRAPHY

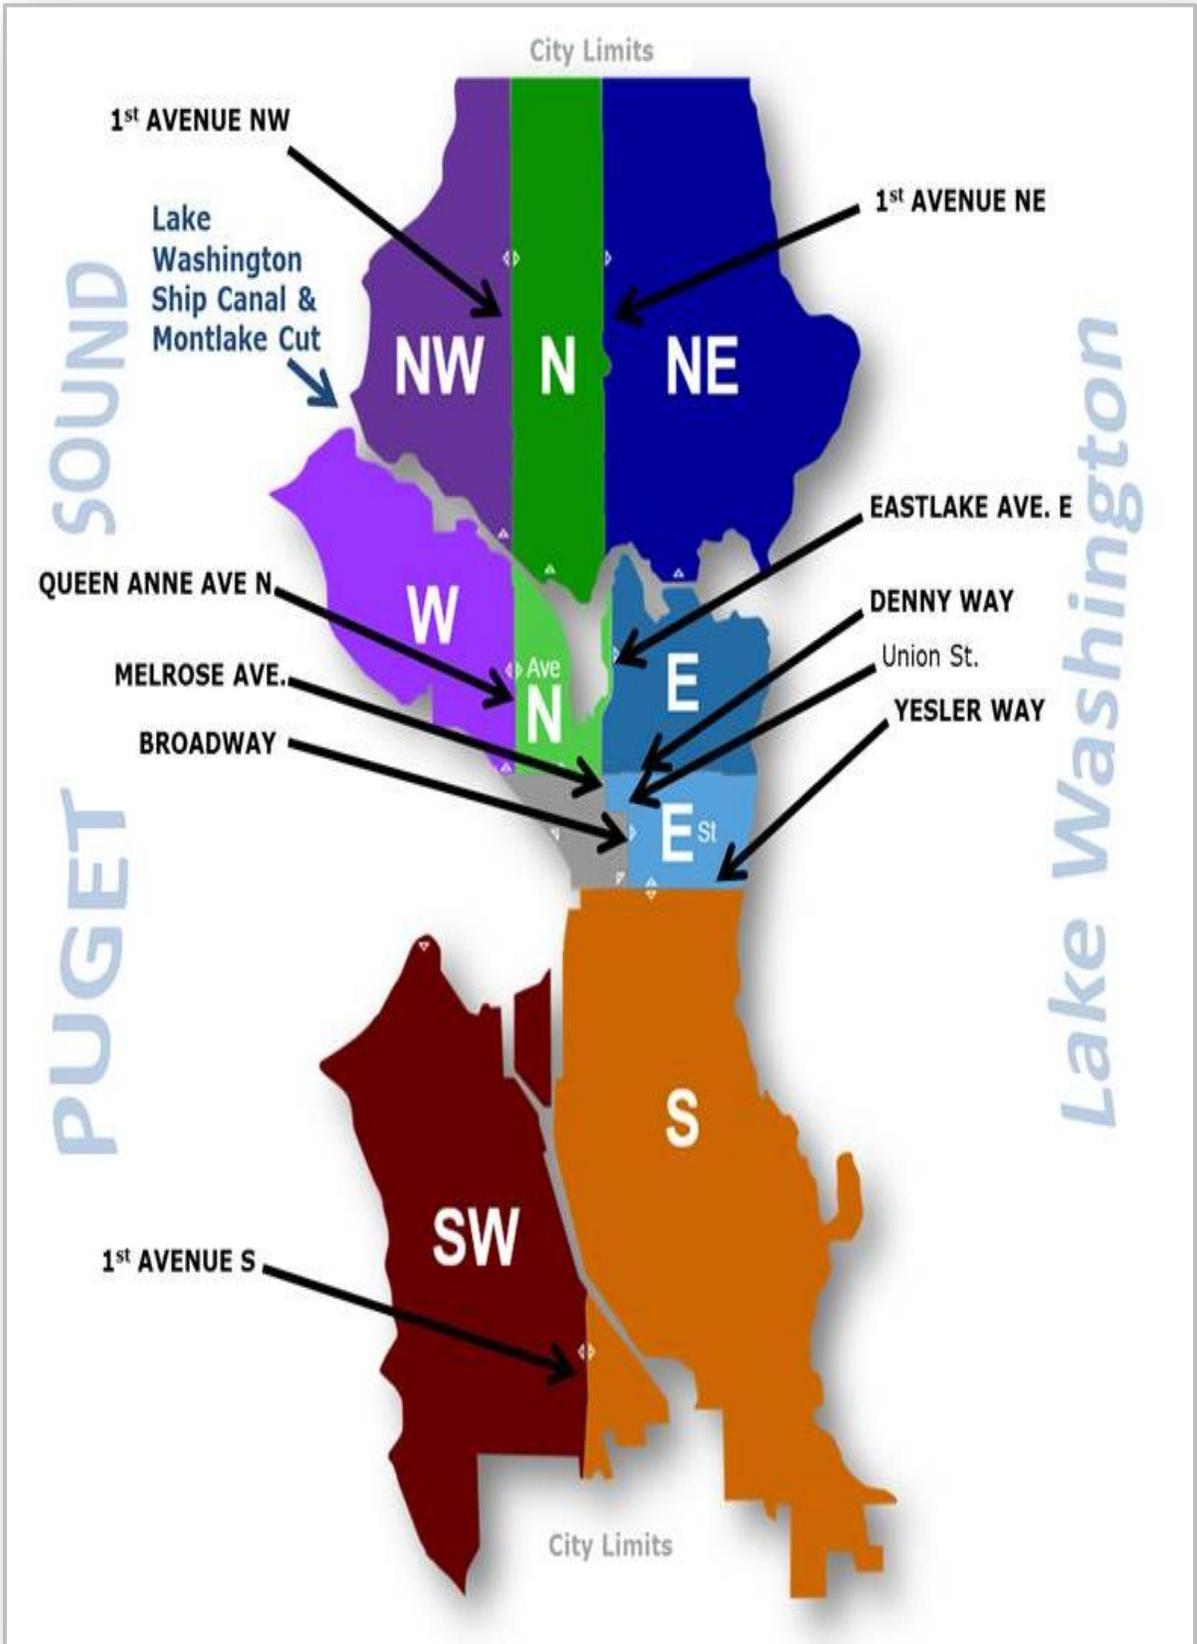

Eight Dividing Lines in the City of Seattle

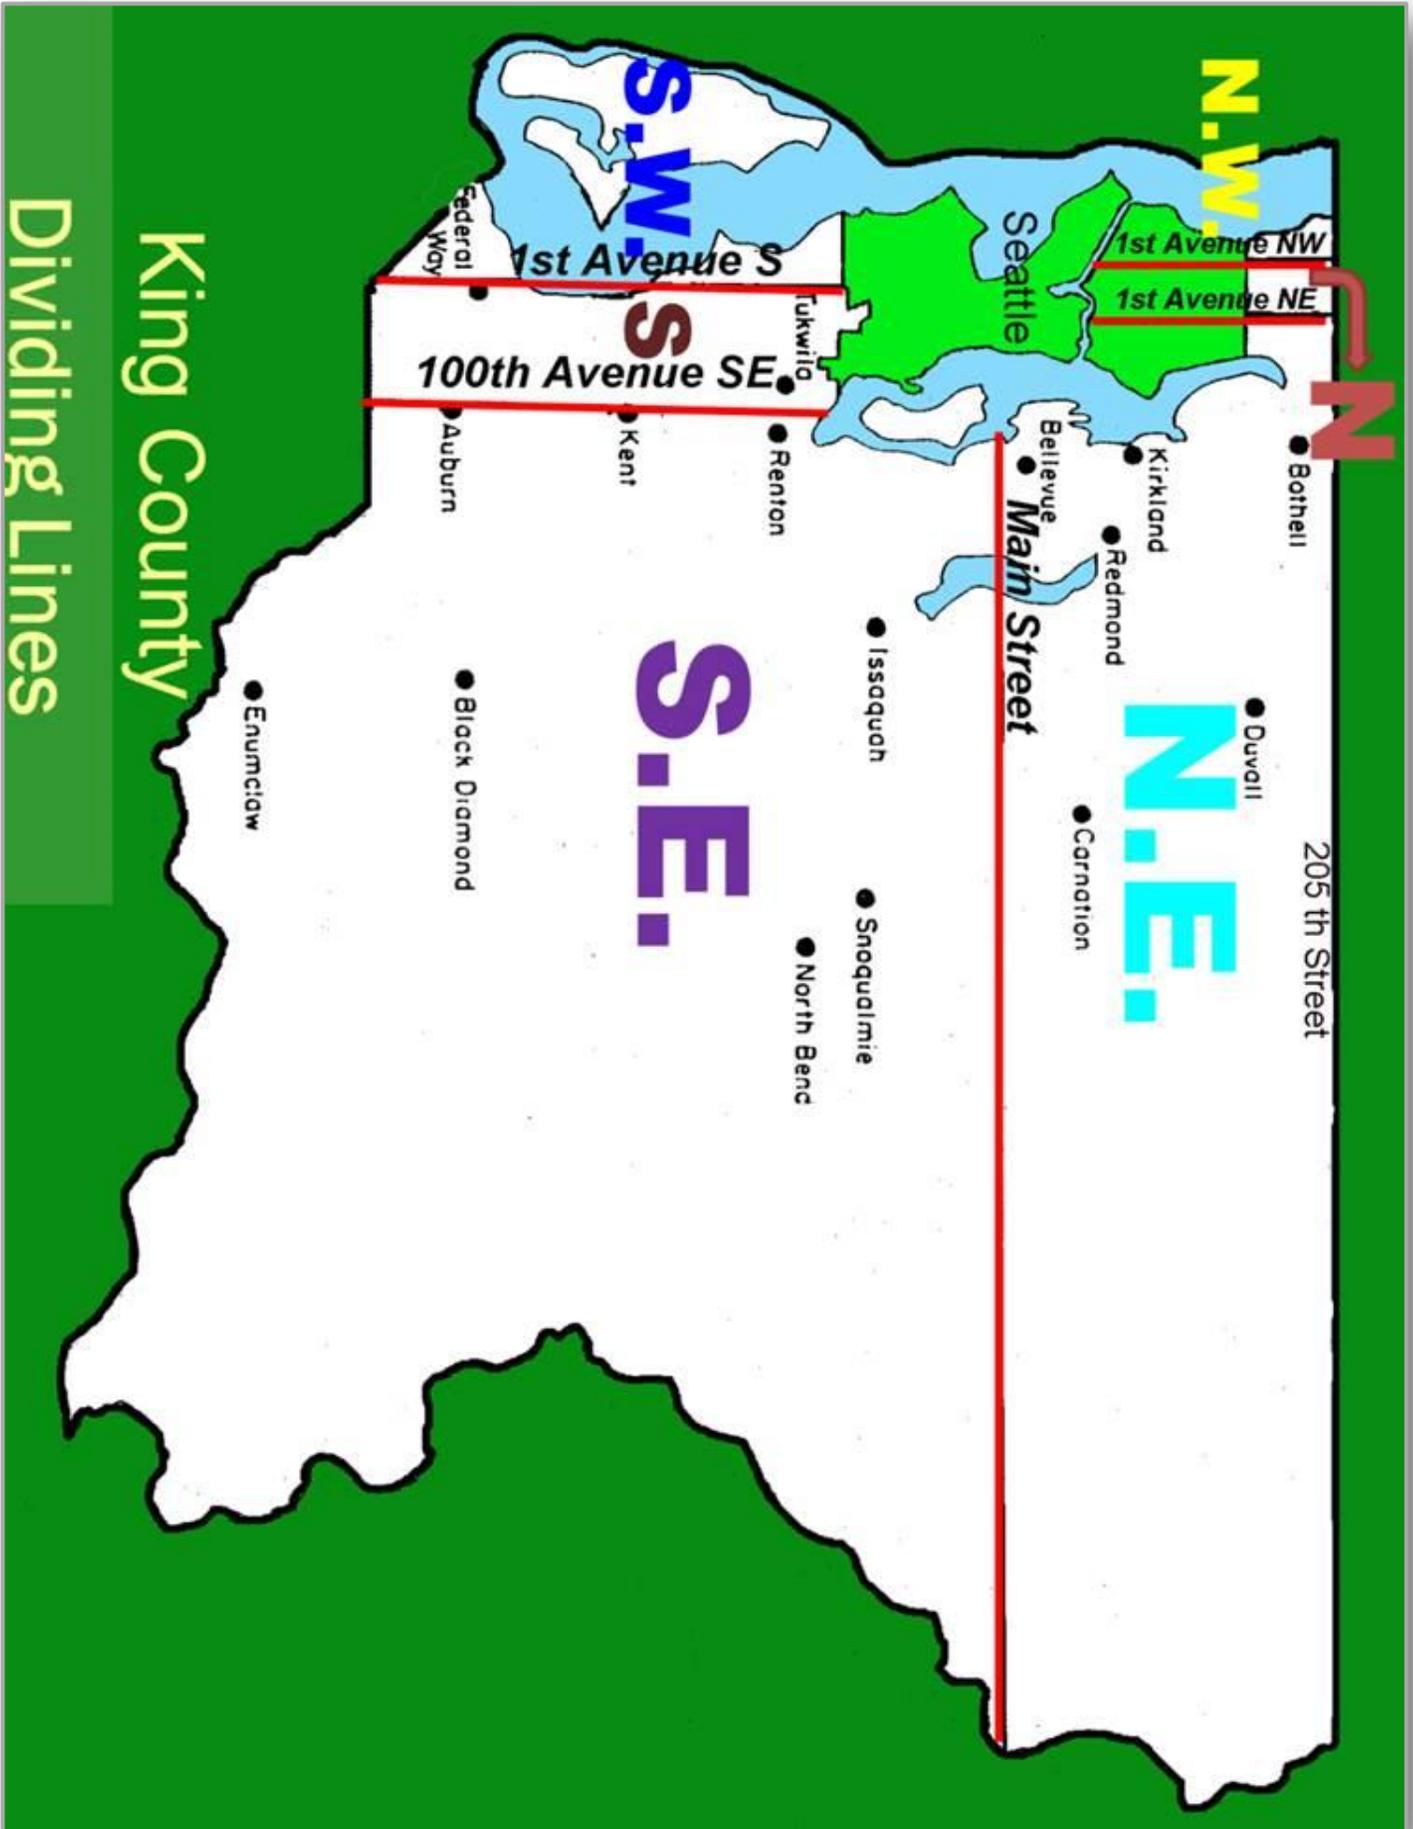

- **First Avenue South** - *First Avenue South* divides Avenues South from Avenues Southwest **and also** divides South Streets from Southwest Streets. It travels from Yesler Way southward to the Pierce County Line in Federal Way.
- **Yesler Way** - *Yesler Way* divides Avenues South from (non-directional) Avenues **and also** divides South Streets from (non-directional) Streets and East Streets.
- **Denny Way**- *Denny Way* divides Avenues from Avenues East, Avenues North and Avenues West.
- **Eastlake, Melrose, & Broadway** - *Eastlake, Melrose and Broadway* divides (non-directional) Streets from East Streets **and also** divides Avenues North from Avenues East.
- **Queen Anne Avenue** - *Queen Anne Avenue* divides West Streets from (non-directional) Streets **and also** Avenues West from Avenues North.
- **Lake Washington Ship Canal & Montlake Cut** - *The Ship Canal and the Montlake Cut* divides Northwest, North and Northeast Streets from West, (non-directional) Streets and East Streets **and also** divides Avenues Northwest and Northeast from Avenues West and East.
- **First Avenue Northwest** - *First Avenue Northwest* divides Northwest Streets from North Streets **and also** divides Avenues Northwest from Avenues North.
- **First Avenue Northeast** - *First Avenue Northeast* divides North Streets from Northeast Streets **and also** Avenues North from Avenues Northeast.

Two Additional Dividing Lines in King County

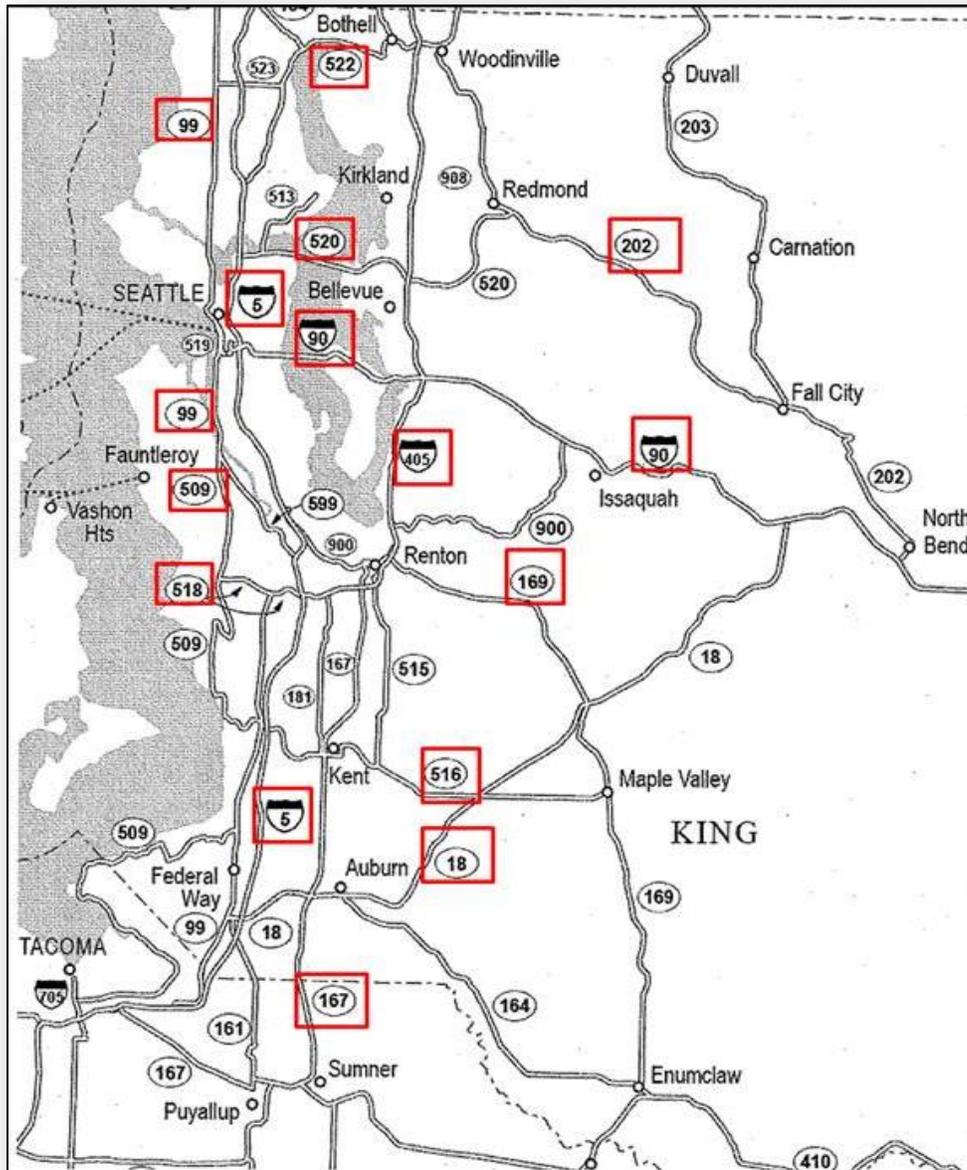

The numbering and street designation system that begins in the City of Seattle continues outside the City limits into King County. Many cities in King County outside of the city limits of Seattle do have their own numbering systems, for example: Kent, Renton, Algona, Pacific, Kirkland, Bothell, Issaquah, Auburn, Mercer Island, and Black Diamond. This is especially true in the older downtown sections of these cities.

- **Main Street in Bellevue** - *Main Street in Bellevue* divides Avenues Northeast from Avenues Southeast and divides Northeast Streets from Southeast Streets.
- **100th Avenue Southeast (South King County)** - This north/south line divides Avenues South from Avenues Southeast and divides South Streets from Southeast Streets.

STREET LAYOUT (AVENUES AND STREETS) & NUMBERING SYSTEM

To determine where an address is located, you need to know if the house number is Even or Odd and if the roadway runs North/South or East/West.

House Number

The last two digits of the **house number** will help determine which side of the street an address is located. The house number is located before the roadway name.

Example:	401 Fifth Avenue is Odd .
Example:	700 South Dearborn Street is Even .

Avenues

Avenues run North and South. The directional designator is behind the roadway name. For example: 5th Avenue South, Westlake Avenue North, Aurora Avenue North, etc.

Example:	401 Terry Avenue is located on the <u>West</u> side of the roadway
Example:	3100 23rd Avenue South is located on the <u>East</u> side of the roadway.

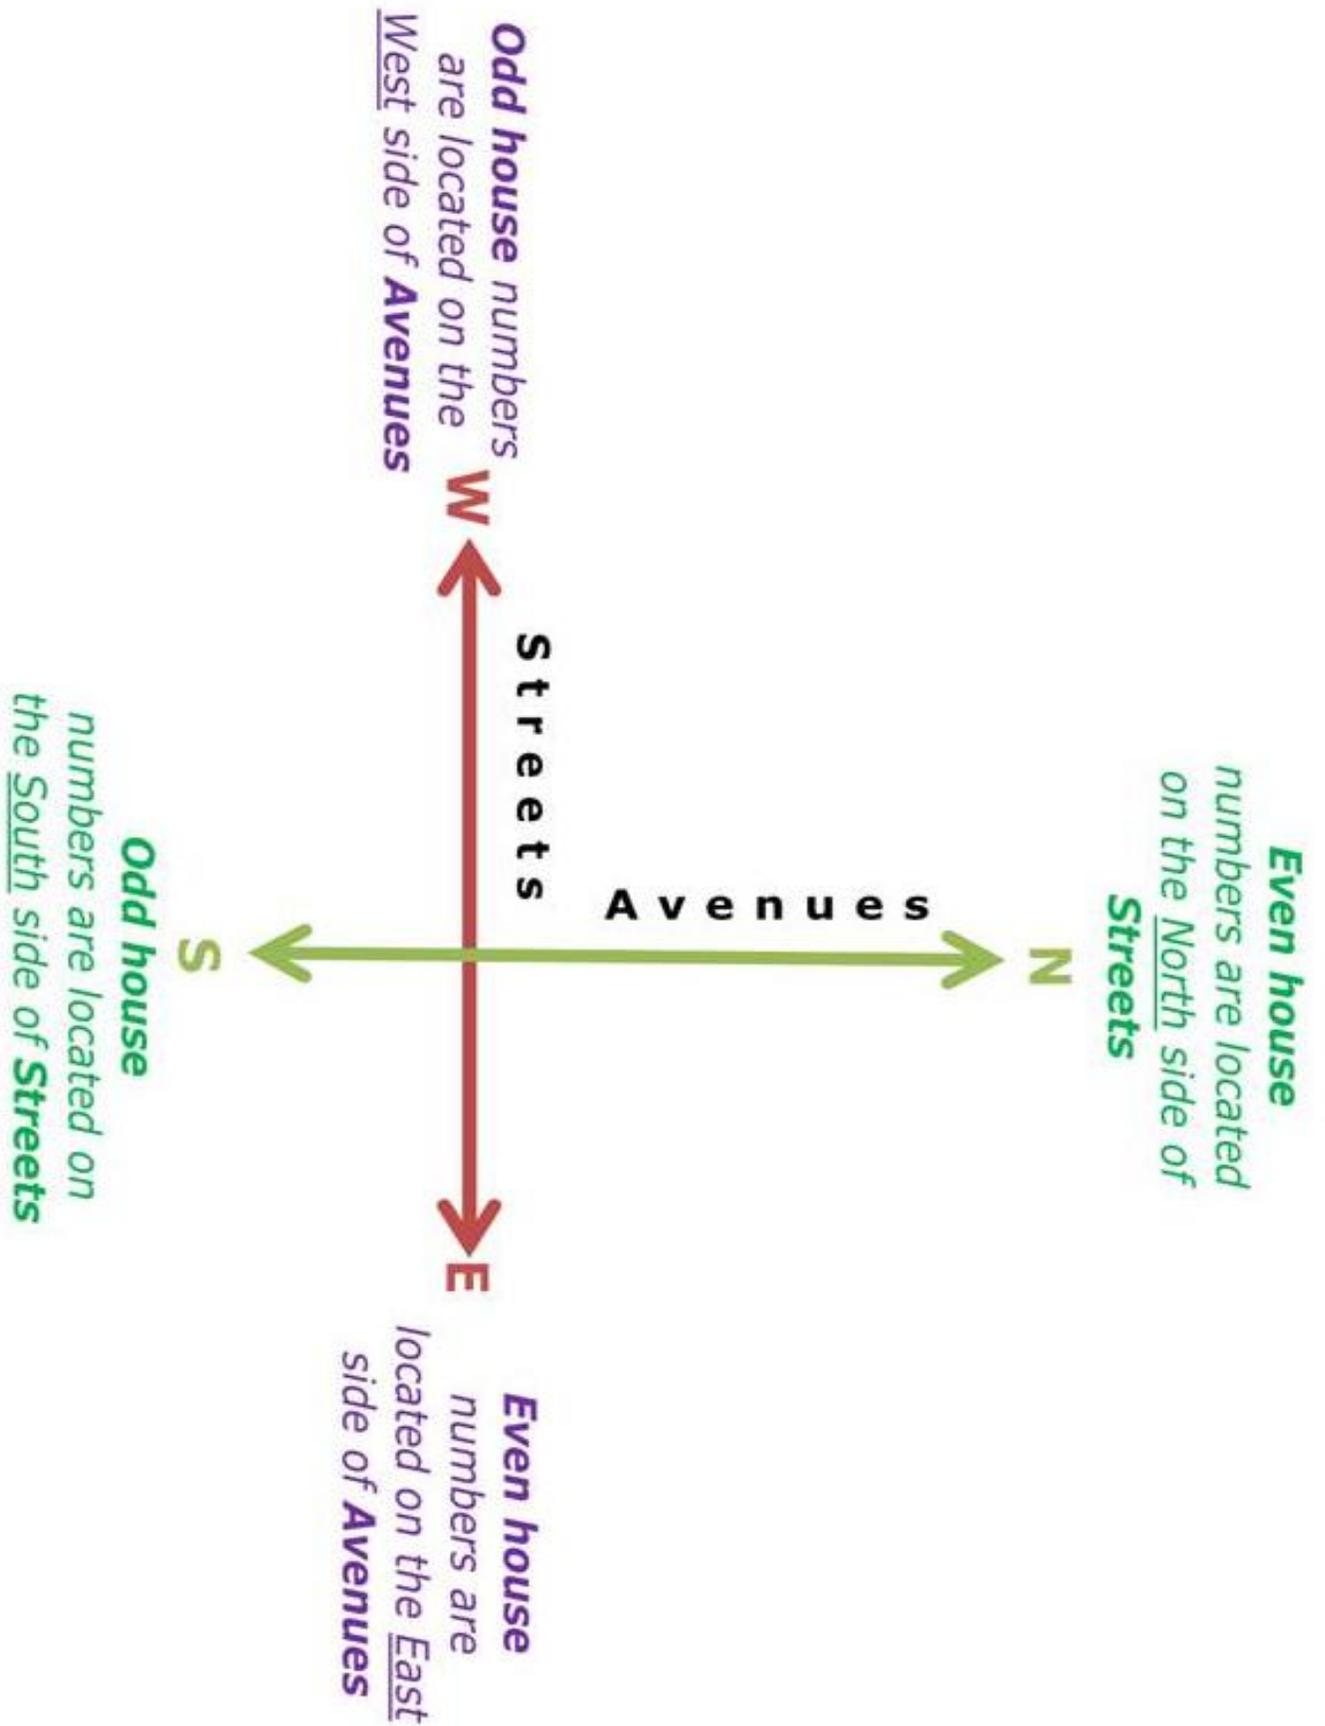

Streets

Streets run East and West. The directional designator is in front of the roadway name. For example: East Mercer Street, South Jackson Street, Northeast 8th Street, etc.

Example:	700 South Dearborn Street is located on the <u>North</u> side of the roadway.
Example:	1531 Northeast 100th Street is located on the <u>South</u> side of the roadway.

If a roadway is not a Street or Avenue, but rather a Boulevard, Place, Lane, Road, Drive, or Way, the location of the directional designator will help identify if the roadway is similar to an avenue or street.

Example:	Holman Road Northwest is like an Avenue- It runs north/south because the directional designator "Northwest" is behind the roadway name, like it is with an Avenue.
Example:	Northeast Northgate Way is like a Street – It runs east/west because the direction designator is in front of the roadway name, like it is with a Street.
