Lloyd Hara
Assessor

Dear Property Owners:

Property assessments for the 2014 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2014 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you.

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara
Assessor

Executive Summary Report

Appraisal Date 1/1/2014 – 2014 Assessment Year

Geographic Area Name: Area 70

South Renton & CBD, Tukwila - Southcenter, Kent Valley, & Unincorporated King County

Previous Physical Inspection: 2013

Sales – Improved Summary:

Number of Sales: 77

Number of Sales used in the Ratio: 72

Range of Sales Dates: 01/01/2011 – 02/10/2014

Sales – Ratio Study Summary:

	Improved Value	Sale Price	Ratio	COD
2013 Weighted Average Value	\$3,036,900	\$3,362,800	90.3%	12.60%
2014 Weighted Average Value	\$3,237,500	\$3,362,800	96.3%	7.32%
Change	\$200,600	0%	6.0%	-5.28%
% Change	6.61%	0%	6.64%	-41.90%

COD is a measure of uniformity, the lower the number the better the uniformity. Based on the numbers here, we have greater uniformity in the current year's assessment.

*Sales used in Analysis: All improved sales which were verified as good that did not have characteristic changes between the date of sale and the date of appraisal were included in the analysis.

Population - Parcel Summary Data:

	Land	Improvements	Total
2013 Value	\$1,518,734,550	\$1,681,897,165	\$3,200,631,715
2014 Value	\$1,630,095,600	\$1,753,761,300	\$3,383,856,900
Percent Change	7.33%	4.27%	5.72%

Number of Parcels in the Population: 1,750 including vacant parcels but excluding government owned and specialty parcels.

Conclusion and Recommendation:

All of the statistical ratios are within the IAAO standards. Since the values recommended in this report improve uniformity and assessment equity, we recommend posting these values for the 2014 assessment year.

Areas within South King County and Responsible Appraisers

Executive Summary- Marie Ramirez, Senior Appraiser

The following appraiser did the valuation for this geographic area:

Valerie A. Dreas – Commercial Appraiser

The process and results were reviewed for quality control and administrative purposes by Marie Ramirez, Senior Appraiser.

Analysis Process

Effective Date of Appraisal: January 1, 2014

Date of Appraisal Report: May 14, 2014

The following appraisers did the valuation for geographic area 70:

Valerie A. Dreas – Commercial Appraiser I

Highest and Best Use Analysis

As if vacant: Market analysis of this area, together with current zoning and current anticipated use patterns, indicate the highest and best use of the majority of the appraised parcels as commercial. Any opinion not consistent with this is specifically noted in our records and considered in the valuation of the specific parcel

As if improved: Based on neighborhood trends, both demographic and current development patterns, the existing buildings represent the highest and best use of most sites. The existing use will continue until land value, in its highest and best use, exceeds the sum of value of the entire property in its existing use and the cost to remove the improvements. We find that the current improvements do add value to the property, in most cases, and are therefore the highest and best use of the property as improved. In those properties where the property is not at its highest and best use, a nominal value of \$1,000.00 is assigned to the improvements.

Interim Use: In many instances a property's highest and best use may change in the foreseeable future. A tract of land at the edge of a city might not be ready for immediate development, but current growth trends may suggest that the land should be developed in a few years. Similarly, there may not be enough demand for office space to justify the construction of a multistory office building at the present time, but increased demand may be expected within five years. In such situations, the immediate development of the site or conversion of the improved property to its future highest and best use is usually not financially feasible.

The use to which the site is put until it is ready for its future highest and best use is called an interim use. Thus, interim uses are current highest and best uses that are likely to change in a relatively short time.

Standards and Measurement of Data Accuracy: Each sale was verified with one or more of the following market participants: the buyer, seller, real estate agent or tenant when possible. Current data was verified and corrected when necessary via field inspection.

Special Assumptions and Limiting Conditions

All three approaches to value were considered in this appraisal.

The following Departmental guidelines were considered and adhered to:

- Sales from 1/1/2011 to 2/10/2014 were considered in all analyses.
- No market trends (market condition adjustments, time adjustments) were applied to sales prices. Models were developed without market trends. The utilization of three years of market information without time adjustments averaged any net changes over that time period.
- This report intends to meet the requirements of the Uniform Standards of Professional Appraisal Practice, Standard 6.

Identification of the Area

Name or Designation: **South Renton & CBD, Tukwila Southcenter, Kent Valley, and Unincorporated King County**

Area 70

BOUNDARIES:

Area 70 consists of the cities of Renton, Tukwila, Kent Valley, and unincorporated King County. It is bounded on the South beginning at the intersection of Kent/Des Moines Road and Frager Road. The boundary goes east towards SR 167 and then essentially follows SR 167 North to I-405. The area continues to go north along I-405 to the Green River, and then heads west toward Airport Way S (Renton Airport). The border continues west to Rainier Avenue South, it heads north along Rainier Avenue around the Renton Airport. The boundary ends at the edge of Lake Washington and then heads back south again along Rainier Avenue South towards Airport Way, then continues south towards SR 900 until it turns into Martin Luther King Jr. Way. The boundary stays on the south side of MLK (SR 900) until South 129th Street and then continues south towards the Southcenter Mall area. The boundary then continues south, on the east side of I-5 through the mall and stays on the east side of the Green River until it terminates at the point of beginning, Frager Road and Kent/Des Moines Road.

Maps:

A general map of the area is included in the Map section. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description:

Area 70 encompasses Renton Valley, including the Central Business District, the Tukwila Southcenter Mall and industrial area, and the Kent Valley Industrial area (excludes Kent Central Business District).

Area 70-10: West of Renton Airport, west of Renton CBD, north of I-405

Boundaries:

This area begins in the most northern portion of Renton west of the Renton Airport and continues along South Lake Washington. The western boundary lies along Rainier Avenue to include the very northern part of downtown Renton. Then it continues south through Grady way but excluding the downtown neighborhood of Renton. The eastern and southern boundaries stretch out along I-405 to I-5, and west along Sunset/MLK to the South Seattle border.

Neighborhood Description:

The north part of this neighborhood runs around the Renton Airport. This is mostly an older neighborhood consisting of single family residences that have been converted to office use, and small family owned retail businesses. The southern portion of the neighborhood runs along Rainier Avenue South, where Fred Meyers, Safeway and Walmart are the major retail stores. This area also includes several large office complexes, and the automobile dealerships on Grady Way. The stretch along Sunset (SR 900) consists of single and multi-family housing, the Black River Forest area and industrial properties.

New WSADA Office

New development in the area consists of a new auto sales office on Grady Way, the remodeling of the old Saturn Dealership by Walker Subaru, the extension of Walmart on 7th Avenue, and the remodeling of the Lincoln Dealership at 7th & Rainier.

Facing Rainier & Grady Way

The former Draper Valley industrial building on 7th was purchased by NW Gourmet Foods and heavily remodeled for food processing. The old Billy McHales on 7th was demolished. No other major development has occurred in this area over the last year.

The widening of Rainier Avenue is completed.

NW Gourmet Foods

Rivertech - \$12 million

There were 12 improved sales in Neighborhood 10 between 1/1/2011 and 2/10/2014. Two sales in 2011, two sales in 2012, 7 in 2013, and 1 in 2014. Sales prices ranged from \$305,000 to \$12 million.

Area 70-20: Renton Central Business District

Boundaries:

This neighborhood is located along the eastern side of Rainier Avenue and continues along the western side of Cedar River. The southern boundary is S Grady Way, while Airport Way South serves as the northern boundary.

Neighborhood Description:

This area is the Commercial Business District of Renton or Downtown Renton. It is comprised of mixed use properties with retail on the first floor and residential on the upper floors. Most of the buildings in this neighborhood were built prior to the 1960's and some were remodeled and updated to keep up with the changing economy. The demands in this area, evident of the new construction trend, are mostly mixed use and multi-family buildings. This is a neighborhood in transition. However, transition has been slow.

Vacant Service Garage on Logan -

Valley Counseling purchased a new building on Wells and rehabbed the property significantly for their new offices.

Several properties along Main Street have been offered for sale for redevelopment, with two -- a gas station at Main and 2nd and an old repair shop -- were purchased.

The Dinner Train Depot was also purchased by the Renton Chamber of Commerce for their new office.

There were a total of 11 sales in this neighborhood between 1/1/2011 and 2/10/2014. Two sales occurred in 2011, seven sales occurred in 2012, and two sales occurred in 2013. Sales prices ranged from \$120,000 to \$2,095,000.

Area 70-30: Tukwila – Southcenter Commercial/Industrial District

Boundaries:

The neighborhood includes the Southcenter area south of I-405 down to South 212th Street in Kent. The western border is I-5, and the eastern border is West Valley Highway.

Neighborhood Description:

The neighborhood consists of the Southcenter Mall area and goes south into the Tukwila industrial area, and into the northern most part of the Kent Valley. This area also includes the Segale development and the new extension of Southcenter Parkway from 180th to 200th Street which replaces Frager Road as the arterial access to 200th from Southcenter. Most of the properties are shopping centers and big box retail near the mall area, while ancillary uses are commercial warehouse, office, small strip center retail, and industrial uses.

A new hotel is being constructed off of Andover Park West.

The new Sound Transit/Amtrak station at Longacres is being constructed.

Segale Properties continues to develop the land south of 180th Street. A new road has been built that connects to Orilla and Military Road South and the new Southcenter Parkway extension to S. 200th has been completed.

The newest construction project is the Stryker Business Park at S. 212 and 59th Place South. The development is planned for four new industrial distribution warehouses; two of which have already been completed and are available for lease.

There were 12 sales of properties between 1/1/2011 and 2/10/2014. Three sales occurred in 2011, three sales in 2012, and six sales occurred in 2013. Sales prices ranged from \$1.1 million to \$12 million.

Area 70-40: Southeast Renton, North Kent Valley

Boundaries:

The boundary for this neighborhood is I-405 to the north and South 192nd Avenue to the south, West Valley Highway to the west, and SR 167 to the east.

Neighborhood Description:

This area includes the southeast portion of Renton which is predominantly industrial and office zoned properties. Part of this neighborhood was named the IKEA District in honor of IKEA Home Store, a major City of Renton community supporter. The neighborhood continues through the north Kent industrial area which is predominantly small industrial properties and small commercial retail properties.

Old Motorsports is being converted to new auto dealership.

There were 13 sales that occurred between 1/1/2011 and 2/10/2014. Five sales occurred in 2011; one sale in 2012; 6 sales occurred in 2013, and 1 sale in 2014. Sales prices ranged from \$990,000 to \$10.5 million.

Area 70-50: West Kent Valley Industrial

Boundaries:

This neighborhood borders the south side of 192nd, running west to West Valley Highway/68th Avenue and then south to 212th, west again to the Green River and then south to Kent-Des Moines Road, then runs east to 84th Avenue South, and heads north to S. 228th Street and then east again to 76th Avenue S until S 212th Street, and then runs east along 212th Street to SR 167.

Neighborhood Description:

Neighborhood 50 is the north and west portion of the Kent Valley industrial area. This neighborhood has one of the largest concentrations of distribution, warehousing, and manufacturing facilities in North America. The entire Kent Valley Industrial area is home to more than 45 million square feet of building space.

There has been little redevelopment in this area. This area includes the excess land that Boeing redeveloped and sold between 208th Street and 212th Street. However, much of that land remains vacant and available.

AlSCO, Inc. has completed their new building at S 204th and 68th Avenue South.

There were 16 sales in this neighborhood between 1/1/2011 and 2/10/2014. Two sales occurred in 2011; six sales occurred in 2012; and eight sales occurred in 2013. Sales prices ranged from \$215,000 to \$26 million.

Retail strip sold for \$5.1 million.

Area 70: Neighborhood 60

Boundaries

The boundary runs from SR 167 east along 212th Street to S 76th Street, and then south along 76th to S 228th Street, then west to 64th Avenue South and then south to James Street and then west to the Green River and then south to Kent Des-Moines road and east back to SR 167.

Neighborhood Description.

The neighborhood consists of new industrial development and old retail neighborhoods along SR 167. This area **excludes** the Kent CBD area and Kent Station. The Showare Center is within this neighborhood.

There is no significant development happening in this area.

There were 13 sales that occurred in this neighborhood between 1/1/2011 and 2/10/2014. One sale occurred in 2011; six sales in 2012; and six sales in 2013. Sales ranged from \$240,000 to \$7.9 million.

Area 70 Population counts

The following is the parcel count for Area 70 broken down by number of parcels found in each neighborhood.

Area Neighborhood	Parcel Counts	Percent
70-10	346	20.2%
70-20	255	14.9%
70-30	277	16.0%
70-40	251	14.7%
70-50	243	14.2%
70-60	342	20.0%
Total	1,714	100.00%

**This total does not include specialty or government parcels*

Physical Inspection Area:

Properties in Neighborhoods 10 were physically inspected for 2014 assessment year as required by WAC 458-07-015 4 (a). An exterior observation of the properties was made to verify the accuracy and completeness of property characteristic data that affect value. A total of 346 parcels (vacant and improved but excluding specialty and government owned parcels) were inspected for this year. The general boundaries of the neighborhood may be delineated as follows:

Northern: Renton Ave N, west of Lake Washington
Southern: 16th Avenue
Eastern: Renton Avenue North, east along Grady Way to Benson
Western: Interurban Avenue

A list of inspected parcels is included in the Addenda of this report.

Preliminary Ratio Analysis

A Preliminary Ratio Study was done for January of 2014. The study included sales of improved parcels showing a weighted mean ratio of 90.3%. The study was also repeated after application of the 2014 recommended values. The results are included in the validation section of this report. The weighted mean remained stable at 96.3%; while the COD is 7.32%. The PRD is 1.02. All are within IAAO parameters. Summary table of statistical ratios are located at the end of this report.

Scope of Data

Improved Parcel Total Value Data:

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified initially by a sales verification letter sent to the Buyer. Further verification, if possible, is done by calling either the purchaser or seller, inquiring in the field or calling the Brokers involved in the transaction. Characteristic data is verified for all sales if possible. An exterior observation of the properties was made to verify the accuracy and completeness of property characteristic data that affect value. Sales are listed in the "Sales Used" and "Sales Not Used" sections of this report. Additional information resides in the Assessor's procedure manual located in the Public Information area of the King County Administration Building.

Land Value Data:

Vacant sales from 1/1/2011 to 2/10/2014 were given primary consideration for valuing land.

Land Value

Land Sales, Analysis, Conclusions

There were seventeen sales between 1/1/2011 and 2/10/2014 considered in the revaluation of land in Area 70. Nineteen sales were excluded after sales verification because they were non-market transactions and were not relied on to set market value estimates for 1/1/2014. Sales were analyzed based on zoning, location and lot size. When possible, each neighborhood was valued based on sales within that neighborhood. In the absence of sales in a subject neighborhood, sales from other competing neighborhoods were given consideration. Vacant sales were given primary consideration for valuing land. We also gave consideration to improved properties that were purchased for land value only; the intention is to demolish the existing improvements and redevelop.

Location and zoning were the major factors considered for adjustments. The following table shows the majority of land sales used in this report.

Land Sales by Neighborhood Zoning and Price Per Square Foot					
Neighborhood	Zoning	Sale Count	High Sale	Low Sale	Median Sale
10	CA	3	\$39.50	\$28.70	\$33.57
	IM	1	\$12.76	\$12.76	\$12.76
20	CD	3	\$22.65	\$47.92	\$24.24
30	TUC	2	\$15.95	\$18.19	\$17.07
	M1	1	\$7.15	\$7.15	\$7.15
40		0			
50	M1	1	\$9.89	\$9.89	\$9.89
60	CM-1	1	\$8.88	\$8.88	\$8.88

Land Sales by Neighborhood Zoning and Price Per Square Foot					
Neighborhood	Zoning	Sale Count	High Sale	Low Sale	Average Sale
60	GWC	1	\$7.45	\$7.45	\$7.45
	GC	1	\$20.58	\$20.58	\$20.58
	DCE	1	\$36.25	\$36.25	\$36.25
	SR-1	1	\$1.24	\$1.24	\$1.24
	MRT-16	1	\$1.12	\$1.12	\$1.12

The recommended land values for all land parcels in area 70 for the 2014 assessment year generate a total change from the 2013 assessments of +7.33%. The total assessed land value for the 2013 assessment year for Area 70 is \$1,518,734,550. The total recommended assessed land value for the 2014 assessment year is \$1,630,095,600.

Discussion of Land Sales

The following is a discussion of the sales and value analysis for each neighborhood in Area 70:

Area 70-10: Renton, West of CBD

Four land sales occurred in the months from 1/1/2011 to 2/10/2014 in this neighborhood. Comparable land sales from competing neighborhoods were also used in the analysis of land values in this neighborhood. The following are the detailed analysis of these sales:

Sale one is a parcel zoned IM. We were unable to confirm the details with the parties, but all indications are that this is a market sale.

Sale two had an old building that was subsequently torn down by the City of Renton for the street widening project. The Seller stated that the buyer intended to build a restaurant on the property. Currently the property is being used for staging for the street widening project.

Sale three is a parcel improved with a small used car building used by Hyundai of Renton. The buyer stated that he purchased the property for the land and did not give any consideration for the building.

Sale four is a parcel with a small building that was a used car lot – McGee Auto Sales. The property was purchased for land value only and is planned for redevelopment in the future. (As of the date of this report, a building permit application is being processed to build a mixed use retail office building on the site.)

	Area	Nbhd	Major	Minor	Land Area	Excise #	Sale Price	Sale Date	SP / Ld Area	Zone
1	070	010	334040	4805	14,500	2492996	\$ 185,000	05/24/11	\$12.75	IM
2	070	010	922890	0005	8,784	2524859	\$ 347,000	12/08/11	\$39.50	CA
3	070	010	192305	9096	92,347	2570837	\$2,650,000	10/24/12	\$28.70	CA
4	070	010	182305	9100	12,659	2582446	\$ 425,000	12/26/12	\$33.57	CA

Industrial zoned property in Neighborhood 10 ranges from \$1 to \$20/sf. Commercial zoned properties in this area are assessed from \$13 to \$29 per square foot depending on the size and arterial location. Multi-family zoned parcels are generally located in the older sections of this neighborhood. These parcels are smaller lots and usually require two or more to develop. Multi-family zoned land is assessed from \$2.50 to \$20 per square foot while single family residential land is \$6.50 to \$12/sf.

Please note that lands that are impacted by wetlands, right-of-ways, or topography are given nominal values of \$1 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Area 70-20: Renton Central Business District

Three land sales occurred in this neighborhood.

Sale five is a parcel zoned CD. Buyer stated it was purchased as an investment. The property is used for paved parking and is leased to a neighboring property.

Sale six consists of two parcels of land that has a building on it. Buyer stated that the property was slated for redevelopment; though no details were known.

Sale seven consists of 4 parcels that had an old gas station on the property. This was purchased for redevelopment.

	Area	Nbhd	Major	Minor	Land Area	Excise #	Sale Price	Sale Date	SP / Ld Area	Zone
5	070	020	723150	1320	6,622	2620533	\$150,000	07/24/13	\$22.65	CD
6	070	020	784130	0165	9,600	2647788	\$460,000	12/20/13	\$47.92	CD
7	070	020	723150	1230	29,500	2649032	\$714,000	01/07/14	\$24.24	CD

There is no industrial zoned land in the Renton CBD. Commercially zoned properties in this area are assessed from \$1 to \$40 per square foot depending on the size and arterial location.

Multi-family zoned parcels are assessed from \$22 to \$27 per square. There is no single family residential zoning in downtown Renton.

Please note the land that is impacted by wetlands, right-of-ways, or topography are given nominal values of \$1 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Area 70-30: Tukwila Southcenter

Three land sales occurred in the period from 1/1/2011 to 2/10/2014 in this area.

Sale eight is a vacant parcel located on Upland Drive in the industrial/retail area of Southcenter. The property will be developed into a hotel.

Sale nine is a bulk sale of 17 parcels purchased from Boeing to build the Stryker Business Park. The property had some parcels that are used for drainage and retention ponds. There were 3 buildings on the property that were to be demolished at an unconfirmed amount.

Sale ten is a vacant parcel located at the corner of Andover Park East and Treck Drive. The property was a cash sale and the proposed development is office/retail.

Based on sales that occurred during this time, the TUC zoning was the only properties that had value increases along Andover Park E and West. Properties in this specific area went from \$16/sf to \$17.50/sf.

	Area	Nbhd	Major	Minor	Land Area	Excise #	Sale Price	Sale Date	SP / Ld Area	Zone

Commercial zoned properties in this area are assessed from \$1 to \$30 per square foot. Industrial properties in this area are \$1 to \$9.50/sf. Multi-family zoning in this area is \$1 to \$3. Single family residential land is \$1/sf.

Please note the land that is impacted by wetlands, right-of-ways, or topography are given nominal values of \$1.00 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Area 70-40: Southeast Renton, North Kent Industrial Valley, East of the Green River

No sales occurred in this area. We relied on sales from area 30 and 50 to value the land.

Industrial zoned property in Neighborhood 40 ranges from \$1.00 to \$26/sf. Commercial zoned properties in this area are assessed from \$1 to \$30 per square foot depending on the size and arterial location. There is no single or multi-family residential zoning in this area.

Please note the land that is impacted by wetlands, right-of-ways, or topography are given nominal values of \$1.00 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Area 70-50: West Kent Valley Industrial

This area has the greatest concentration of industrial properties in Area 70. One land sale occurred in the months from 1/1/2011 to 2/10/2014 in this area.

Sale eleven is a vacant parcel located at the corner of S 204th and 68th Avenue S. The property sold with SEPA approval in place, but no plans or permits.

	Area	Nbhd	Major	Minor	Land Area	Excise #	Sale Price	Sale Date	SP / Ld Area	Zone
11	070	050	012204	9123	256,030	2504984	\$2,531,618	08/09/11	\$9.89	M1

Industrial zoned property in Neighborhood 50 ranges from \$1.00 to \$18.25/sf. Commercial zoned properties in this area are assessed from \$8.75 to \$18.00 per square foot depending on the size and arterial location. Multi-family zoned parcels are assessed from \$6.00 to \$8.50 per square foot while single family residential land is \$1/sf.

Please note the land that is impacted by wetlands, right-of-ways, or topography are given nominal values of \$1 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Area 70-60: East Kent Valley, along SR 167

This neighborhood is a mix of newer industrial development and older commercial properties just north of the Kent CBD. Six land sales occurred for the period between 1/1/2011 to 2/10/2014 in this neighborhood. Comparable land sales from competing neighborhoods and geographic area 65 were used in the analysis of all land values in this neighborhood.

Sale 12 is a purchase to build a Tai Kwon Do studio. Property had several offers. This was an REO sale, but price was based on appraisal and broker's price opinion.

Sale 13 was a purchase by the tenant of leased land.

Sale 14 was a three parcel purchase by Heritage Bank to construct a new bank.

Sale 15 was a purchase of land that has a creek and wetlands. No indication as to how much is useable. There were no unusual sale conditions.

Sale 16 was a purchase of single family residential land that was purchased as open space.

Sale 17 was a purchase of multi-family land for development.

Industrial zoned property in this neighborhood indicates a range of values from \$1.00 to \$14.25 per square foot. Commercially zoned land is assessed from \$1.00 to \$20.00 per square foot. Multifamily land is assessed from \$1.00 to \$11.50 per square foot. Single family land is \$2.25 per square foot.

Please note the land that is impacted by wetlands, right-of-ways, or topography are given nominal values of \$1.00 per sf or flat valued if 100% impacted. Land value can vary on a price per square foot due to location and size.

Land Value Conclusions, Recommendations and Validation:

Area 70 encompasses four jurisdictions with many varying zoning codes. Zoning was considered in determining the market value of the land for assessment purpose. Renton, Kent, Tukwila, and unincorporated King County are the major contributors of this zoning in their respective jurisdictions. In 2013 land values still show some strength in market demand in neighborhoods 10, 30 and 60.

However, it should be noted that Area 70 is the smallest geographic valuation area among the South County jurisdictions; that's because it is also one of the densest areas with more than 2,600 commercial properties (including government and specialties). Viable vacant land for development is scarce. Most of the remaining vacant land typically has issues with wetlands and sloping or is being used for right of way and water retention. Recent vacant land sales are properties that were turned over from Boeing and purchased by others for development. Other parcels, particularly in the downtown Renton area, were previously developed property purchased for land value, with the improvements being slated for demolition or held for future redevelopment.

Given this, another valuation technique was employed by the Assessor for this area to determine if land values should be modified. This is called the “land extraction method.” This method takes viable improved sales and extracts land values by deducting the depreciated cost of the improvements, site improvements and entrepreneurial incentive. The method is most reliable when dealing with improved properties nearing the end of their economic life, or brand new properties where little depreciation has occurred.

Thirty-six improved sales occurred in Area 70 between 1/1/2011 to 2/10/2014, all with various zonings. The land extraction method was employed with these properties to test whether changes in land values is warranted given the lack of data samples for vacant sales. The Assessor found that there were a number of good sales where the extraction method could be employed. Multiple property sales were not always viable and properties that were not near the end or at the beginning of their economic life needed to be used with caution.

The Assessor found that there was sufficient evidence based on this methodology to support the current land value conclusions – but not enough viable evidence to recommend major modifications to land values. Most of the viable extraction sales basically supported current values. There is one exception in Neighborhood 30 – Southcenter Mall area. Several new land sales have occurred for the TUC zoning along Andover Park East and West. These sales indicated that an increase in land value was warranted and the price per square foot was increased from \$16/sf to \$17.50/sf.

The Assessor evaluated properties impacted by wetlands and topography and they were valued similarly. Using appraisal judgment as well as aerial and topographic maps, the Assessor determined the percent impact and applied a percentage decrease in land value based on the extent of sloping for sloped property. Wetlands were determined by using current wetlands map for each of the jurisdictions and the Assessor’s mapping program to calculate the amount of wetlands impact. The reason is that these parcels may not be 100% buildable, but the impacted portions do have some value for density calculations, open space buffers or water retention needs. Appraisal judgment was not used in cases where a delineation study was provided to the Assessor. Whole parcels that are 100% used for water retention were valued at \$1,000.

The Assessor also revalued right of way parcels. All right of way parcels were adjusted to reflect the same value as neighboring parcels.

Area 70	2013 Total Land	2014 Total Land	\$ Increase	% Change
Land Values	\$1,518,734,550	\$1,630,095,600	\$111,361,100	+7.33%

Valuation of Improved Parcels

Improved Value Data

Commercial improved sales dating from 1/1/2011 to 2/10/2014 were considered in the evaluation of Area 70's improved properties. Seventy-seven arm's length improved sales have occurred during this period. Five sales are not included in the ratio study as the improvements changed their use after the sale and the current assessed value is not reflective of the sales price at the time of sale. The sales were obtained from Excise Tax Records, Costar, Brokers and Agents. These sales were organized by market segments based on predominant use. Based on sales analysis, each segment reflected a market price per square foot of net rentable area. The sales price range served to establish a general upper and lower market boundary for the various property types within each subject area.

Sales Comparison Approach Model Description

All sales were verified with a knowledgeable party when possible. Each sale was inspected and the recorded property characteristics adjusted when necessary. The resulting data was stratified according to use, location, effective year, size, and quality of construction in order to establish appropriate ranges of price per square foot to use as guidelines. In addition to setting parameters for the market approach to value, the sales validate the income approach model. Data gathered during the verification process along with other resources assist in calibrating the components of the income model: rental rates, vacancy and collection losses, operating expenses, and capitalization rates. The results are tested against the sales population, adjusted when appropriate, and reconciled to produce a credible income valuation model.

The sales comparison approach was deemed the most reliable method of valuation for convenience stores, car washes, day care facilities, and mobile home parks.

The sales comparison model is based on four data sources from the Assessor's records; occupancy or section use codes, effective year, quality of construction, and size. Most weight was given to comparable sales within each geographic neighborhood and expanded to include the surrounding competing neighborhoods within the geographic area.

Sales were organized into market segments based on predominate use. Based on a sales analysis, each segment reflected a market price per square foot of net rentable area. These sales price ranges served to establish a general upper and lower market boundary for the various property types within each subject area.

Property Type	No. of Sales	High/Low Range/SF	*Median Sales Price/SF
Auto Dealership	1	\$258.98	\$258.98
Automotive Center	1	\$162.28	\$162.28
Church	1	\$100.34	\$100.34

Retail Store	2	\$161.46 to \$204.32	\$182.89
Storage Warehouse	18	\$62.97 to \$216.01	\$93.42
Shopping Center	1	\$112.28	\$112.28
Transit Warehouse	2	\$59.25 to \$206.06	\$132.66
Warehouse, Distribution	14	\$60.79 to \$170.01	\$82.69

*Median is used instead of average in order to compensate for extreme highs and lows in prices per square foot.

Sales Comparison Calibration

Calibration of the coefficients utilized in the models applied via the sales comparison approach and established an analysis of sales within each neighborhood. Market areas may change for certain property type; i.e., large regional malls are scarce, and the market area for these types of properties may extend countywide or extend into other counties. Conversely, small retail stores or small family business operations will have a market area that is more localized, providing there are sales. Individual prices were applied based on various characteristics deemed appropriate by the market for each property type.

Cost Approach Model Description

Cost estimates are automatically calculated via the Marshall & Swift Valuation modeling system. Depreciation was based on studies done by Marshall & Swift Valuation Service. The cost was adjusted to the western region and the Seattle area. Cost estimates were relied upon for valuing special use properties where comparable sales data and/or income/expense information is not

available or not appropriate. These properties are typically exempt properties such as churches, schools, public utility buildings, and park improvements. Non-exempt buildings that are valued by the Cost method include fraternal halls, auto dealerships, and on-going new construction.

Cost Calibration

The Marshall & Swift Valuation modeling system, which is built in the Real Property Application, is calibrated to the region and the Seattle area.

Income Capitalization Approach Model Description

The Income Approach was considered a reliable approach to valuation throughout Area 70 for improved property types where income and expense data is available to ascertain market rates. Income parameters were derived from the market place through market rental surveys, sales, and available real estate publications and websites.

Market Analysis

The main property types dealt with are office, retail, industrial warehouse/distribution and industrial flex properties (Industrial flex is defined as industrial buildings with a greater than 30% office ratio). Some publications will lump all of the southend sales in their data; some will break them down between cities. Renton and Tukwila will typically be lumped together, or will stand on their own individually. Kent and Auburn will be lumped together or stand on their own individually. Thus, determining appropriate lease rates, capitalization rates and vacancy rates can be difficult. More weight is given to those publications that break down the specific market areas, property types and property characteristics than those that are lumped together.

The Assessor performed a market survey of lease rates for newly leased properties in 2013. Issues discussed were asking versus what was realized and along with any concessions that were given for the differing property types. Not all leases were confirmed with a property owner or Broker, but a sufficient sampling was found for each of the property types to give a good indication of the reliability of the published data. Effective rent is the actual rental rate being received by the property owner after allowance for rent concessions, i.e., free rent or higher than usual tenant improvement allowances. The common concession is free rent for all the property types. The concession will typically be one month free for every year leased. Retail properties were most likely to have the tenant improvement concessions. Rent concessions were noted in our lease survey, but not considered due to the assumption that all properties are leased at market rates, with market vacancy, and market capitalization rate.

The Assessor has access to various publications for the three main property types – office, retail and industrial. The Assessor gives greater weight to publications that focus on the Seattle or Puget Sound market area. Little weight is given to national publications.

The Puget Sound area is considered one of the top three investment markets in the U.S.¹ Essentially the Kent Valley is split into four main areas: Renton, Tukwila, Kent and Auburn. Both Kent and Tukwila have similar vacancy rates for their industrial property types, while Renton has lower vacancy rates. The Assessor's survey results show a median rate per month of \$0.44/sf for warehouse space in Renton; \$0.50/sf for Tukwila; and \$0.42/sf for Kent which is slightly lower. However, the lease rates fluctuate depending on size of the tenancy and amenities. Capitalization rates for Class B and C industrial properties are between 5.75% and 7.0% for the entire Seattle area.

Office vacancy rates in the Renton, Tukwila and Kent areas appear to have worsened during 2013. Most survey data focuses on Class A property. Kent is still struggling with vacancies at 13%, while Tukwila and Renton has gone up to 13% for Class B and 8% for Class C properties. The survey results for Kent show that triple net rates range between \$12 to \$12.50 per year with some properties as high as \$18/sf. However, there were very few leases contracted during 2013; so the sample size is small. Renton's office rates are \$10.50 to \$18/sf on a triple net basis. Tukwila is showing a range of \$9 to \$17/sf on a triple net basis.

Again, location, age of building, and tenancy size will cause the lease rate to fluctuate. Capitalization rates for office properties in the Seattle area range from 6.50% to 8.50% for Class B and C properties. (There are very few, if any, Class A properties in the South County area.)

As for retail properties in the Southend, the vacancy rates rose slightly over 2013; Kent Valley is 4.5% while Renton/Tukwila is 5.9%. The Assessor's market survey shows \$9 to \$38/sf lease rates for the Tukwila area, \$14 to \$28/sf for the Renton area, and \$9 to \$25/sf for the Kent area. Capitalization rates range from 6.25% to 7.75%.

Overall, the office market appears to be still struggling. The retail market has remained fairly stable through the economic downturn and continues to remain somewhat flat. The industrial market in the Kent Valley is showing the greatest amount of improvement. There are more sales of industrial property this year than any other property type.

A change in the valuation of office properties is the switch to using a triple net rate versus gross. Most office properties are leased on a gross or modified gross. However, the range in the expenses for these buildings, even those of similar age, was pretty wide. It became difficult to stratify effectively. So, the Assessor took the gross lease rate and deducted the stated triple net expense rate from each property². After doing this, the range for office properties became pretty tight and could be more effectively stratified for age and size.

¹ "Industrial market is buzzing – even for spec"; Seattle Times - Real Estate; pg 3; June 27, 2013.

² Stated NNN rates are based on CBA reported data or taken from income and expense information provided by the property owner.

Income Approach Calibration

The models were calibrated after setting base rents by using adjustments on size, quality of construction, and the effective year. When the value of the property by the income approach was less than the land value, a nominal \$1,000 value was allocated to the improvements. For property types where sales and income/expense data was not available, the Cost Approach was utilized.

Income: Income parameters were derived from the market place through the listed fair market sales as well as through published sources (i.e. Office Space Dot.Com, Commercial Brokers Association, Costar, Multiple Corporate Real Estate Websites), and opinions expressed by real estate professionals active in the market.

Vacancy: Vacancy rates used were derived mainly from published sources tempered by personal observation and discussions with property owners and Brokers.

Expenses: Expense ratios were estimated based on industry standards, published sources, and personal knowledge of the area's rental practices. Within our income valuation models, the assessor used triple net expenses.

Capitalization Rates: Capitalization rates were determined by local published market surveys, such as CoStar, Real Estate Analytics, The American Council of Insurance Adjustors, Colliers International, Integra Realty Resources, and Korpaz. Other national reports include; Grubb & Ellis Capital Mkt. Update, Emerging Trends in Real Estate, Urban Land Institute, and Cushman & Wakefield. The effective year and condition of each building contributes to the capitalization rate applied in the model. For example; a building in poorer condition with a lower effective year built (let's say, 1960) will typically warrant a higher capitalization rate, and a building in better condition and a higher effective year built (let's say 2010) will warrant a lower capitalization rate.

The Income Approach was considered a reliable approach to valuation throughout Area 70 for improved property types where income and expense data is available to ascertain market rates. Income parameters were derived from the market place through market rental surveys, sales, and available real estates' publications and websites.

The information requested includes current and anticipated future rents, operating expense breakdown and assigned responsibility for the expenses, and estimated capitalization rates associated with a sale. In addition, owners, tenants, and agents of non-sale properties are surveyed to collect similar data. Disclosure of this information is not required by law and therefore is often difficult to obtain. The return rate of mail surveys varies and the data can be incomplete. Telephone interviews are dependent upon obtaining a valid number for a knowledgeable party and the opportunity to contact them. Interviews with tenants in the field usually yield rental and expense information only. As a supplement, lease information is

The following table recaps the rates as reported by these publications:

All parcels were individually reviewed for correctness of the model application before final value selection. All of the factors used to establish value by the model were subject to adjustment. The market sales approach is considered the most reliable indicator of value when comparable sales were available, however the income approach was applied to most parcels in order to better equalize comparable properties. Whenever possible, market rents, expenses, and capitalization rates were ascertained from sales, and along with data from surveys and publications, these parameters were applied to the income model.

The income approach to value was considered to be a reliable indicator of value in most instances. The market rental rate applied to a few properties varied from the model but fell within an acceptable range of variation from established guidelines.

Ratio studies were done for the entire geographic Area 70. The results show compliance with IAAO assessment standards and indicate that Area 70 has a proper assessment level.

Reconciliation

The area appraiser made a review of the appropriateness of the application of the valuation models before final value was selected for each parcel. Each appraiser can adjust any or all of the factors used to establish value by the model. The market rents, as established by the income model, were used as a guide in establishing the market rental rates used. The market rental rates applied varied somewhat but fall within an acceptable range of variation from the established guideline. Market price per square foot as calculated from the market table and was considered in addition to the economic income derived from the income tables. The appraiser made the determination of value based on the appraiser's judgment of the appropriateness of the method for each property. For quality control purposes an administrative review of the selected values was made by Marie Ramirez, Senior Appraiser.

	2013 Ratio	2014 Ratio
Assessment Level	90.3%	96.3%
Coefficient of Dispersion	12.60%	7.32%
Coefficient of Variation	15.57%	9.77%
Standard Deviation	14.21%	9.55%
Price Related Differential	1.01	1.02

Model Validation

Total Value Conclusions, Recommendations and Validation:

The market sales approach is considered the most reliable indicator of value when comparable sales are available.

The income approach to value is considered to be a reliable indicator of value when market sales are not available. Whenever possible, market rents, expenses, and capitalization rates were ascertained from sales. Data from surveys and publications were also considered in the application of the income model.

Cost estimates were relied upon for valuing special use properties where comparable sales data and/or income/expense information was not available. And this approach was also used on some parcels that have excess land.

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the

parcel, the neighborhood, and the market. The Appraiser determines which available value estimate may be appropriate and may adjust by particular characteristics and conditions as they occur in the valuation area.

The new assessment level is 96.3%. The standard statistical measures of valuation performance are all within IAAO guidelines. Seventy-two arms-length sales generate an assessment level (weighted mean) of 96.3% and is within IAAO guidelines. These are presented both in the Executive Summary and in the 2013 and 2014 Ratio Analysis charts included in this report.

The total assessed value for the 2013 assessment year for Area 70 was \$3,200,631,715. The total recommended assessed value for the 2014 assessment year is \$3,383,856,900. Application of these recommended values for the 2014 assessment year results in an average total change from the 2013 assessments of 5.72%.

Total Assessed Value Chart

	Land	Improvements	Total
2013 Value	\$1,518,734,550	\$1,681,897,165	\$3,200,631,715
2014 Value	\$1,630,095,600	\$1,753,761,300	\$3,383,856,900
Percent Change	7.33%	4.27%	5.72%

USPAP Compliance

Client and Intended Use of the Appraisal:

This mass appraisal report is intended for use by the public, King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others for other purposes is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

Definition and date of value estimate:

Market Value

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 Wn. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65,66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

Highest and Best Use

RCW 84.40.030

All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.

An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.

WAC 458-07-030 (3) True and fair value -- Highest and best use.

Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

Date of Value Estimate

RCW 84.36.005

All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.

RCW 36.21.080

The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

Property Rights Appraised: Fee Simple

Wash Constitution Article 7 § 1 Taxation:

All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.

Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914)

...the entire [fee] estate is to be assessed and taxed as a unit...

Folsom v. Spokane County, 111 Wn. 2d 256 (1988)

...the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee...

The Dictionary of Real Estate Appraisal, 3rd Edition, Appraisal Institute.

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Assumptions and Limiting Conditions:

1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.
2. No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
3. No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge

the taxpayer to retain an expert in the field and submit data affecting value to the assessor.

8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
11. An attempt to segregate personal property from the real estate in this appraisal has been made.
12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.
15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

Scope of Work Performed:

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.

CERTIFICATION:

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- The area(s) physically inspected for purposes of this revaluation are outlined in the body of this report.
- The individuals listed below were part of the “appraisal team” and provided significant real property appraisal assistance to the person signing this certification. Any services regarding the subject area performed by the appraiser within the prior three years, as an appraiser or in any other capacity is listed adjacent their name.
- Any services regarding the subject area performed by me within the prior three years, as an appraiser or in any other capacity is listed below:
