

FREMONT SIPHON

replacement project

Fremont Siphon Replacement Project Community Design Workshop January 12, 2013

Flexible Design Elements Input

Visit each of the stations in small groups. Learn about each flexible element and jot down your notes on this form, write on a post-it note to comment on displays, or give verbal feedback to team members. Bring your notes back for a group discussion on input.

Stations

- *Lighting*
- *Fencing and northwest corner*
- *Vegetation and views*
- *Building and odor control stacks*

Lighting

1. How would you characterize the current lighting?
 - Industrial, low, spilling into surrounding area
2. How could lighting enhance or detract from the neighborhood?
3. How might you change the lighting, if you wanted to?
 - Would lighting changes vary around the property?

Fencing and northwest corner

1. What is your preference on the purpose of fencing for the area?
 - Security fencing for the entire site
 - Security fencing for the “core area” and “soft” fencing to delineate the property line
2. The northwest corner of the site may not be used for the facility features. If it is not behind a security fence, what are your opportunities or concerns for this area?
 - Examples: Pathway, connection to the park, transition area, rain garden
3. What is your preference for fence types? Why?
 - Security: vertical rod, chain link, screen
 - Soft: split rail, wood framed wire, picket

Vegetation and views

1. What is your preference on the purpose of vegetation and landscaping and how it interacts with neighboring views?
 - Provide color and open views (“garden” feel)
 - Blend into the park, preserve existing views (“tree’d” feel)
 - Screen the new facility
2. What are your preferences and dislikes about the example plant palette and landscapes shown? Why?
3. What other places are good examples of vegetation and landscaping that you like?

Building and odor control stacks

1. Think about the new building. Would you like it to be:
 - Iconic – a statement building?
 - Blend in with the surrounding neighborhood/landscape?
 - Disappear to the extent possible?
2. Think about the new odor control stacks. Would you like them to be:
 - Iconic – a statement or artistic structure?
 - Blend in with or match the building?
 - Disappear or disguised to the extent possible?
3. What are your preferences and dislikes of the sample materials shown? Why?

Additional comments and notes

Space for drawings or other ideas

HOW TO SUBMIT THIS FORM – Please submit by: January 31

Please use one of the following methods to submit your comments:

Place the form in the **comment box** today or give to **project staff**

Download this form on the project website and submit via email or mail (*see below*)

Email a copy of the form to adair.muth@kingcounty.gov

Mail the form to:
