

# FREMONT SIPHON

replacement project

King County  
Department of  
Natural Resources and Parks  
Wastewater Treatment Division

## Project Update – April 6, 2015

King County's contractor for the Fremont Siphon Replacement Project continues work to prepare the project sites. Crews finished demolition of the Praxair building on the Fremont project site and removed trees from both project sites.

### What's ahead?

#### **Queen Anne site: Site preparation**

Crews will continue preparing the site for construction. The site will be fenced off. Erosion control and construction entrances will be installed.

#### **Fremont site: Utility investigations**

Crews will dig small holes and remove dirt to determine the location of utility lines around the work area. This work will not disrupt service to neighbors. You may hear the equipment or see crews working around the site.

*Crews demolished and removed the Praxair building from the Fremont work site in late March.*

### Stay safe!

Help keep work areas safe by avoiding the area during construction. Please do not engage individuals working at the site. Contact the 24-hour project information line (206-205-5428) with questions or concerns.

### What to expect during construction

- Work from 7 a.m. to 6 p.m. on weekdays, 9 a.m. to 6 p.m. on Saturdays (if needed)
- Increased noise and activity at and around work sites
- More trucks on roads near sites
