UPDATE: Repaving on 93rd Avenue Northeast Delayed to **October 27**

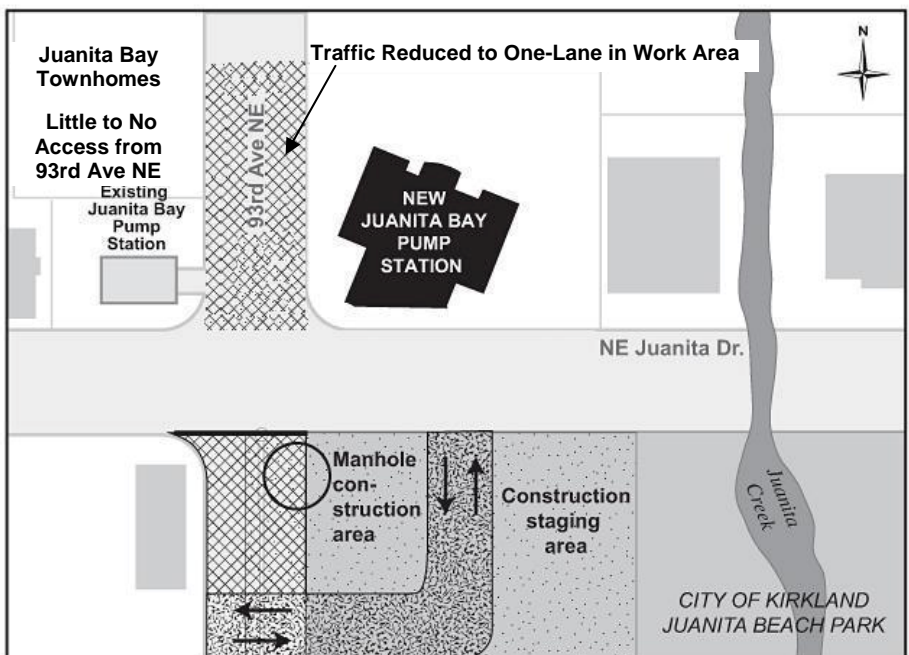

Weather permitting, King County's contractor for the Juanita Bay Pump Station project will repave roughly 150 feet of 93rd Avenue Northeast between Northeast Juanita Drive and the new pump station's northern property line on **Monday, October 27**. Repaving has been delayed from the original date of October 23, and will continue to depend on weather and other factors.

Vehicle traffic on 93rd Avenue Northeast immediately north of Northeast Juanita Drive will be reduced to one lane for the duration of the work. Drivers and pedestrians seeking access to 93rd Avenue Northeast should detour around the work site or be prepared for delays.

Access to the Juanita Bay Townhome from 93rd Avenue Northeast will be severely limited during the work. **Residents needing to drive during the work should plan to be out of the townhome parking lot or make alternative parking arrangements by 7:00 a.m. on Monday, October 27.**

It is possible that paving could be further delayed. To receive future updates, please call the project hotline: 206-205-3898

King County is building the new wastewater pump station to help ensure your community receives safe, reliable wastewater service for the next 50 years. Thank you for your patience during construction.
