

May 20, 2016

Good afternoon,

To keep the project on schedule, King County's contractor will begin working regularly on Saturdays at the [Murray CSO Control Project](#) site, as needed, for the remainder of the project. Regular Saturday work will begin as early as Saturday, May 21. Normal work hours on Saturdays are 9 a.m. to 6 p.m.

Saturday work activities will vary as progress continues this summer and fall. Below is a list of current activities that you might see on Saturdays:

- Connection of the underground storage tank to above-ground facility operations.
- Installation of the 5-foot-wide sewer pipe along the southeast side of Beach Dr. S.W.
- Shoring work associated with the 5-foot sewer pipe installation. *Increased noise and vibration can be expected at times during shoring work.*
- Mechanical and electrical work inside the facility building.

Thank you for your continued patience during construction. Please contact the project hotline: 206-205-9186 with any questions or concerns.
