Overnight power outage at Elliott Bay Marina

Monday, August 25

On Monday, August 25, an overnight power outage beginning at 11:00 p.m. will occur at the Elliott Bay Marina in the Smith Cove area on West Marina Place. The temporary outage will last about eight hours. This power outage is needed to complete an electrical service connection to the King County combined sewer overflow (CSO) control facility site on 23rd Avenue West. Seattle City Light notified affected property owners by mail.

Traffic control will assist motorists and pedestrians as needed in the area.

King County's contractor is constructing a new combined sewer CSO control facility in Magnolia. A 1.5-million gallon underground tank will store excess flows of stormwater and sewage when heavy rains fill pipes, reducing untreated overflows to Puget Sound. A new 3,000-foot gravity sewer pipeline below 32nd Avenue West will direct flows to the new CSO control facility in the Smith Cove area.

Questions or Concerns? Contact our 24-hour construction hotline at

206-205-0968 and leave a message. We will return your call.

For more information, visit www.kingcounty.gov and search "South Magnolia CSO".
