

Construction Update

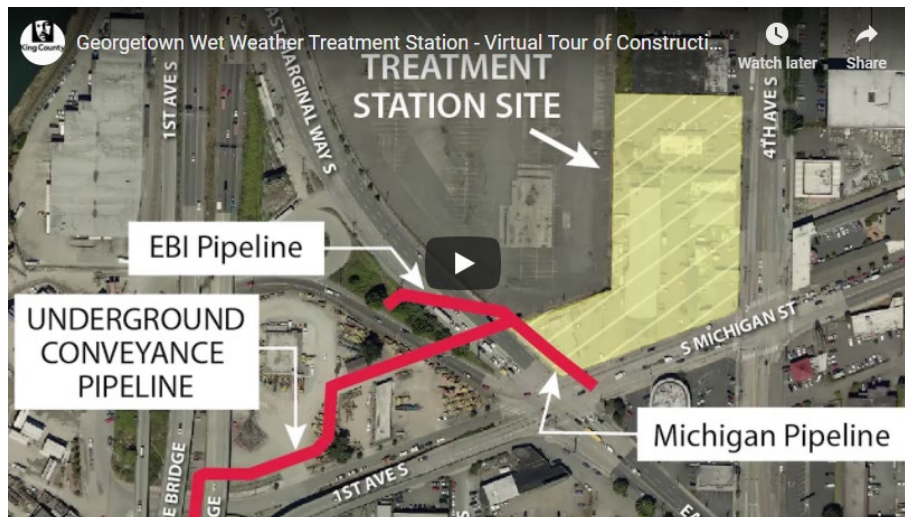

December 2020

Georgetown Wet Weather Station Project Update

King County Wastewater Treatment Division (WTD) is building a new wet weather treatment station in Georgetown, at the corner of Fourth Avenue South and South Michigan Street in Seattle, Washington. The project includes an outfall structure, which crews completed in March this year. Currently WTD is constructing the treatment station and connecting pipes to the outfall structure.

Take a look at our virtual construction progress on the Georgetown Wet Weather Treatment Station by clicking on the link below!

Construction for the treatment station began in 2018. We are excited to share the progress we have made since construction started. [Watch our virtual tour](#) to learn more about what we have accomplished at the outfall, conveyance pipeline, and treatment station sites. Construction for the project is expected to wrap up in 2022 and we will provide updates leading up to completion in the coming year!

What to expect during construction:

- Project team available by phone to brief and update community groups, business owners, and residents about construction activities and next steps for construction
- Noise and vibrations typical of construction
- Security fencing and erosion and sediment control around the project sites
- Active 24/7 construction hotline: 206-205-9286
