

Design Advisory Group Meeting #7 Agenda

Design Advisory Group Meeting #7

Wednesday, October 26, 2016 6:00 – 8:00 p.m.

South Seattle College Georgetown Campus, 6737 Corson Ave South, Seattle Building C, Room C110/111

Purpose of the meeting

- Share design developments between the 30% and 60% design milestones
- Discuss upcoming construction preparation
- Discuss general project questions and concerns
- Discuss next steps for the project

Agenda

Note: This is a meeting of the Georgetown Wet Weather Treatment Station Design Advisory Group. There will be two public comment periods for attendees to provide comments directly to the advisory group. Other comments for King County can be provided on a comment card.

| Cari Simson (alt. Jaen Gomez) | Sustainability/environmental |
| Emilie Shepherd | Local business association |
| James Rasmussen | Sustainability/environmental |
| Sherell Ehlers | Greater Duwamish River Corridor |
| Victoria Hardy | Education |

Glossary of terms

- **Sewage**: Used water that goes down drains and/or toilets in homes and businesses.
- **Stormwater**: Rain or snow that washes off roofs, streets and parking lots.
- **Combined sewer system**: Sewer pipes that carry both stormwater and sewage.
- **Combined sewer overflow (CSO)**: Release of excess stormwater and sewage into water bodies from a combined sewer system that is caused by heavy rain or snowmelt.
- **Wet weather treatment station**: A facility that cleans sewage and stormwater before it enters water bodies.
- Advanced primary treatment: Advanced primary treatment has more advanced solids settling technology as compared to standard primary treatment. Coagulants and flocculants are added to the treatment process to accelerate the solids settling process.
