

Sunset and Heathfield Pump Stations and Force Main Upgrade

Heathfield Pump Station Generator Color Preference

King County is planning to install a new generator enclosure at the Heathfield Pump Station as part of the Sunset and Heathfield Pump Station and Force Main Upgrade Project. We are gathering input from the community as we select the color the generator enclosure will be painted.

From the options below, please select the color you would prefer for the generator enclosure. King County staff will select the final color based on community preference, as well as seasonal changes and natural light that affect appearance. Regardless of the final color, the building will have a flat finish.

Heathfield generator enclosure location

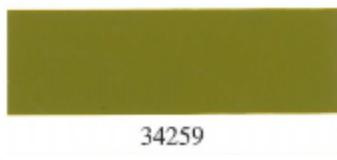

Generator enclosure at Heathfield Pump Station (shows existing color)

1. Please circle the color you would like the generator enclosure to be painted. (Note: Associated numbers are for King County reference only.)

A.

B.

C. Existing color

2. Is it important to you for the generator building to blend in with the surroundings?
