# Sunset and Heathfield Pump Stations and Force Main Upgrade

December 12, 2019

**Construction Update: *Work now focused on pump stations.  
Restoration along SE 35th PI and 164th PI SE coming in 2020.***

Now that the pipe installation is complete, most of the construction will be concentrated inside the Sunset and Heathfield pump stations. You will still see trucks and workers coming and going and there will be some intermittent lane closures for deliveries, but traffic impacts should be minimal until we begin final landscaping and restoration of SE 35th PI and 164th PI SE in 2020. We will send information about planned closures related to restoration through the email list once they are scheduled.
