

## **Vashon pump stations Construction update**

Construction at the Vashon Bunker Trail (BT) Pump Stations continues. King County crews are working diligently to complete the work on time. Substantial completion is expected in May, 2018.

Work began in September of 2017 to replace aging equipment and structures at the pump stations. Since then, contractors have made significant progress and construction is expected to be completed on schedule.

The pump stations send sewage from homes and businesses to the Vashon Treatment Plant. Construction is scheduled for all four pump stations along 103rd Avenue SW and 105th Avenue SW. Work at each site is expected to take about three months to complete, approximately 12 months total.

### **What you can expect during construction**

- Flaggers will help move traffic through the work site
- One lane closed along 103rd Avenue SW between BT1 and BT3 work sites
- No lane closure at BT4 work site
- Interruption to sewer services not anticipated
- Coordination with Washington State Department of Transportation to minimize impact to the ferry schedule
- Access at all times for ferry traffic, emergency vehicles, school buses, and neighborhood residents
- Work crew, trucks, and drilling equipment in the street and public right-of-way on the curb and sidewalk
- Increased noise on site
- Work hours are weekdays between 7 a.m. and 5:30 p.m.; holidays and weekends as needed
