Example Residential Site Plan
RECOMMENDED CONSTRUCTION SEQUENCE

1. Hold pre-construction meeting, if required
2. Post sign with name and phone number of ESC Supervisor (may be consolidated with the required notice of construction sign).
3. Flag or fence clearing limits
4. Install catch basin protection, if required
5. Grade and install construction entrance(s)
6. Install perimeter protection (silt fence, brush barrier, etc.)
7. Construct sediment ponds and traps, if required
8. Grade and stabilize construction roads
9. Maintain erosion control measures in accordance with King County standards and manufacturer's recommendations
10. Relocate erosion control measures, or install new measure so that as site conditions change, the erosion and sediment control is always in accordance with the King County erosion and sedimentation control standards.
11. Secure all areas that will be unworked for more than seven days during the dry season or two days during the wet season with straw, wood fiber, mulch, compact, plastic sheeting, or equivalent
12. Stabilize all areas within seven days of reaching final grade
13. Seed, sod, stabilize, or cover any areas to remain unworked for more than 30 days
14. Upon completion of the project, stabilize all disturbed areas and remove BMP's if appropriate.
