— Clearance of Solid Waste for Dispo-
sal at KC Waste Disp. Fac. -Original

SUPERSEDED BY: PUT 7-2-1 (PR)

King County Public Rules and Regulations

Public Rules

Title

Clearance of Solid Waste for Disposal at
King County Waste Disposal Facilities

RECEIVED
90 OCT 18 PM 3:32

Document Code No.
PUT 7-2 (PR)

Department/Issuing Agency

Department of Public Works/Solid Waste Division

CLERK
KING COUNTY COUNCIL

Effective Date

Approved

Don Hill 10/17/90

- 1.0 **SUBJECT TITLE:** Clearance of Solid Waste for Disposal at King County Solid Waste Disposal Facilities.
 - 1.1 **EFFECTIVE DATE:**
 - 1.1.1 File Date:
 - 1.2 **TYPE OF ACTION:** New
 - 1.3 **KEY WORDS:** (1) Clearance of Solid Waste; (2) Solid Waste Disposal; (3) Waste Clearance Policy; (4) Solid Waste Facility Operation; (5) Health Department Solid Waste Clearance.
- 2.0 **PURPOSE:** To specify procedures for clearance of solid waste for disposal at King County Solid Waste Division Facilities. Waste affected by this Public Rule includes industrial waste, oil-contaminated soil, asbestos-containing waste, dusty material, infectious waste, animal waste, containerized liquids and drum containers.
- 3.0 **ORGANIZATIONS AFFECTED:** Applicable to the Department of Public Works, Solid Waste Division. The Seattle-King County Department of Public Health, Environmental Health Division, and users of King County solid waste disposal facilities will also be affected.
- 4.0 **REFERENCES:**
 - 4.1 Puget Sound Air Pollution Control Authority, Regulations 1.
 - 4.2 Proposed King County Comprehensive Solid Waste Management Plan, 1989.
 - 4.3 King County Code, Title 10, Solid Waste.
 - 4.4 King County Department Policies and Procedures, PUT 7-3-2 (D-W).
 - 4.5 King County Board of Health Code, Title 10.
 - 4.6 Washington Administrative Code 173-303.
 - 4.7 Washington Administrative Code 173-304.

- 4.8 Washington Administrative Code 173-400.
- 4.9 Revised Code of Washington Chapter 70-105.
- 4.10 Federal Solid Waste Disposal Act (SWDA), more commonly known as Resource Conservation and Recovery Act (RCRA), 42 USC, Section 6901-6991i.
- 4.11 King County Solid Waste Division Cedar Hills Regional Landfill Site Development Plan.
- 4.12 King County Solid Waste Division Cedar Hills Regional Landfill Site Development Plan Environmental Impact Statement.
- 4.13 The State Environmental Policy Act (SEPA), Chapter 43.21C RCW, and SEPA Rules, Chapter 197-11 WAC.

5.0 DEFINITIONS:

- 5.1 "Animal Waste" means carcasses or parts of carcasses, manures, waste by products from rendering plants, fish processors, or animal operations such as feedlots, poultry houses or dairies. The term also includes dewatered sludge from pretreatment of wastewater emanating from rendering plants, fish processors, or animal operations such as feedlots, poultry houses, or dairies.
- 5.2 "Asbestos-containing waste" means any waste that contains more than one percent asbestos by weight and that can be crumbled, pulverized, or reduced to powder when dry, by hand pressure.
- 5.3 "Bulky waste" means materials such as asphalt, concrete, masonry, stumps and rocks.
- 5.4 "Contaminated soils" means soils containing contaminants at concentrations greater than cleanup levels established by the Washington State Department of Ecology (WDOE) and is not a dangerous waste.
- 5.5 "Dangerous Waste" means solid waste designated in WAC 173-304-070 through 173-304-103 as dangerous or extremely hazardous waste.
- 5.6 "Drum containers" means rigid containers made of fiber, plastic, steel, or other nonferrous metal materials with capacity of greater than 5 gallons.
- 5.7 "Dusty materials" means material which may cause ambient air quality standards for suspended particulates to be exceeded at the transfer station during unloading or at the active area of the landfill during placement, as specified in PSAPCA Regulations I, Section 11.03. Dusty materials include materials such as sheetrock dust, silicone dust, saw dust, or any other loads which become airborne when unloaded.

- 5.8 "Hazardous Waste" means solid waste designated by 40 CFR Part 261 and regulated as hazardous waste by the United States Environmental Protection Agency.
- 5.9 "Health Department" means the Seattle-King County Department of Public Health.
- 5.10 "Improperly handled waste" means waste handled other than in accordance with PSAPCA Regulations I, King County Board of Health Code Title 10, WAC 173-303, WAC 173-304, this public rule, or any other applicable provision of local, state, or federal law.
- 5.11 "Industrial Waste" means any waste from a commercial or industrial activity meeting any of the following descriptions:
 - A. Sludge waste, including sludge from septic tanks and food service grease traps.
 - B. Waste from an industrial process.
 - C. Waste from a pollution control process.
 - D. Residue from a spill of a chemical substance or commercial product, or a waste listed in this definition.
 - E. Commercial products or chemicals which are off-specification, outdated, unused or banned, excepting out-dated or off-specification uncontaminated food or beverage products in original consumer containers. This category includes containers which once held commercial products or chemicals unless the container is empty. A container is empty when:
 - 1. All waste has been removed that can be removed using the practices commonly employed to remove materials from the type container, e.g., pouring, pumping, or aspirating, and
 - 2. An end has been removed (for containers in excess of 25 gallons), and
 - 3. No more than 1 inch of residue remains on the bottom of the container or inner liner, or
 - 4. No more than 3.0 percent by weight of the total capacity of the container remains in the container (for containers up to 110 gallons), or
 - 5. No more than 0.3 percent by weight of the total capacity of the container remains in the container (for containers larger than 110 gallons).

6. Containers which once held hazardous waste must be triple rinsed with an appropriate solvent or cleaned by an equivalent method to be considered empty. Containers which once held substances regulated under the Federal Insecticide, Fungicide, and Rodenticide Act must be emptied according to label instructions or triple rinsed with an appropriate solvent.
 7. Cylinders of compressed gas are empty when the pressure in the container is equivalent to atmospheric pressure.
- F. Waste produced from the demolition or dismantling of industrial process equipment or facilities contaminated with chemicals from the industrial process.
- 5.12 "Infectious Waste" means all infectious waste as defined by Title 10 of the King County Board of Health except the definitions of sharps and of human blood and blood products which are modified to read as follows:
- "'Sharps' which means medical and laboratory equipment generated by an infectious waste generator that may cause punctures or cuts. Such waste includes, but is not limited to, needles, syringes, lancets, scalpel blades and laboratory glassware including slides, coverslips, and pasteur pipettes."
- "'Human blood and blood products' means (1) Liquid waste human blood; (2) products of blood; (3) items saturated and/or dripping with human blood; or (4) items that were saturated and/or dripping with human blood that are now caked with dried human blood; including serum, plasma, and other blood components, and their containers, which were used or intended for use in either patient care, treating and laboratory analysis or the development of pharmaceuticals. Intravenous bags are also included in this category."
- 5.13 "KCSWD" means the King County Solid Waste Division.
- 5.14 "Liquid Waste" means any waste material that is determined to contain "free liquids" by Method 9095 (Paint Filter Liquids Test), as described in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods" (U.S. EPA Publication No. SW-846.)
- 5.15 "Official of the King County Solid Waste Division" means the Solid Waste Division Manager or his/her designee.
- 5.16 "PSAPCA" means the Puget Sound Air Pollution Control Agency.
- 5.17 "Regulated Hazardous/Dangerous Waste" means all waste defined as dangerous or hazardous as per WAC 173-303 or Chapter 70.105 RCW or RCRA.

- 5.18 "SEPA" means the State Environmental Policy Act, Chapter 43.21C RCW. "SEPA Rules" refers to Chapter 197-11 WAC which establishes uniform rules for compliance with SEPA.
 - 5.19 "Sludge" means a solid or semi-solid material consisting of settled solids combined with varying amounts of water and dissolved material which contains less than 40 percent solids by weight and is not a liquid waste.
 - 5.20 "Total Petroleum Hydrocarbons" means the sum of petroleum hydrocarbons expressed in percent, determined by the test method described in EPA Publication SW-846.
 - 5.21 "Waste Clearance Form" means documentation provided by the Health Department or KCSWD which, when completed by the generator and approved by the Health Department of the KCSWD, provides information on the characteristics of the solid waste load and specifications regarding an acceptable method of disposal.
- 6.0 POLICIES - GENERAL: General waste clearance policies are addressed in this section. Policies related to specific types of waste are contained in Section 7, below.
- 6.1 The following loads shall be handled as specified in the King County Board of Health Code Title 10 except as modified by this public rule and shall be accompanied by an approved Waste Clearance Form, and shall be delivered to the Cedar Hills Landfill or other designated facility for disposal:
 - A. Animal waste (See Section 7.1)
 - B. Asbestos-containing waste (See Section 7.2)
 - C. Contaminated soil (Section 7.4)
 - D. Industrial waste (See Section 7.7)
 - E. Treated infectious waste (See Section 7.8)
 - 6.2 The following loads must be handled as specified by this Public Rule and may be required to be accompanied by an approved Waste Clearance Form. These materials will be accepted only at the Cedar Hills Landfill or other facility designated by the KCSWD:
 - A. Containerized liquids (See Section 7.30)
 - B. Drum containers (See Section 7.5)
 - C. Dusty material (See Section 7.6)

- 6.3 The following loads will not be accepted at any KCSWD solid waste handling facility under any circumstances:
- A. Hazardous/dangerous waste.
 - B. Burning or smoldering material.
 - C. Non-containerized liquids.
 - D. Sludge which may be classified liquid waste per Section 5.15 of this Public Rule.
 - E. Untreated infectious waste.
- 6.4 Site attendants, cashiers, facility supervisors, or officials of the KCSWD may deny entry to incoming loads under the following circumstances:
- A. Loads suspected of containing waste which is regulated hazardous/dangerous waste or any loads suspected of containing improperly handled waste, burning waste or untreated infectious waste may be denied entry until such time that a completed Waste Clearance Form is approved.
 - 1. The generator will produce, at the request of the Health Department or the KCSWD, laboratory test data from representative samples, material safety data sheets, or other documentation that the waste being disposed of is not a regulated hazardous/dangerous waste or otherwise being improperly handled. All such documentation will be attached to the Waste Clearance Form.
 - B. Waste which may cause damage to the KCSWD solid waste handling equipment or environmental protection systems may not be accepted for disposal, at the discretion of the KCSWD staff, e.g., bulky waste, non-containerized liquid waste or sticky, viscous materials.
 - 1. Bulky materials, such as rocks, tree trunks, concrete and asphalt, must be less than two feet in length on any side and weigh less than two hundred pounds. All materials must be 8 feet or less in length.
 - 2. Oil-contaminated soils containing total petroleum hydrocarbons in excess of 3 percent may cause damage to equipment operation or environmental protection system operation and may be denied entry.

- 6.5 If a load is denied entry, an official of the KCSWD will provide the hauler with a written and signed denial slip, including the time, name of hauler and generator, vehicle license plate number, description of the material, and reason for denial. A copy of the denial slip shall be retained by the KCSWD. The Health Department, or other agency(ies) with jurisdiction over the material being disposed, will also receive a copy of the slip. A sample Waste Material Denial Slip is attached to this Public Rule as Appendix 10.2
- 6.6 All incoming loads may be subject to the following conditions which will be set by an official of the KCSWD and delineated in a Waste Clearance Form:
 - A. A particular solid waste handling facility to which the waste must be taken may be specified.
 - B. A disposal schedule to which the hauler must adhere may be specified.
 - C. An acceptable haul route to which the hauler must adhere may be specified.
- 6.7 The number or types of loads accepted may be limited by weather constraints, such as frozen ground, heavy rains or high winds, or by operational constraints.
- 6.8 Materials which require special handling will be charged a special waste disposal fee as specified by King County ordinance.
- 6.9 Available daily and yearly landfill capacity, in terms of both numbers of incoming vehicles and total tonnages, is restricted for excavated soil/fill material, and industrial waste to quantities to be determined on an annual basis by the KCSWD.
 - A. The KCSWD reserves the right to allocate this capacity.
 - B. Generators wishing to dispose of solid waste in quantities exceeding fifty (50) cubic yards, or other allocation established by the KCSWD, must obtain written approval from the KCSWD and shall comply with the SEPA Rules, Chapter 197-11 WAC, including at a minimum, preparation of an environmental checklist.
- 6.10 Waste Clearance approval should be requested at least two weeks prior to the anticipated start of disposal activities.
- 6.11 If material being disposed is generated at regular intervals and is consistent in its composition, a Waste Clearance Form may be issued allowing daily, weekly, monthly, or other regular disposal over a period of one year or less.

- 6.12 Enforcement. The director of the Department of Public Works is authorized and responsible to enforce or seek enforcement through the prosecutor's office of this Public Rule pursuant to the civil penalty provisions of King County Code Title 23.

7.0 POLICIES - SPECIFIC:

7.1 Animal waste shall be disposed in the following manner:

- A. Animal excrement is not accepted at King County solid waste facilities.
- B. Dead animals weighing less than 15 pounds may be disposed in the general waste stream. Dead animals weighing more than 15 pounds are not accepted at King County solid waste facilities.
- C. All other animal waste will be accepted at the Cedar Hills Landfill or other designated facility and must be accompanied by an approved waste clearance form.

7.2 Asbestos-containing waste shall be disposed of in the following manner:

- A. Asbestos-containing waste shall be accepted only at the Cedar Hills Landfill.
- B. Asbestos-containing waste shall be disposed of in accordance with the King County Board of Health Code, Title 10.
- C. Loads of asbestos-containing waste will be accompanied by a PSAPCA Notice of Intent to Remove or Encapsulate Asbestos. If the asbestos containing material is not in a form which requires a PSAPCA Notice, a Waste Clearance Form must be requested from the KCSWD.
- D. Loads of asbestos-containing waste must be containerized as described in the King County Board of Health Code, Title 10.
- E. Landfill officials shall require 24 hour advance notification of all deliveries of asbestos-containing waste material. Notification shall consist of a telephone call from the generator, asbestos abatement contractor, or hauler to an official of the KCSWD at the landfill, providing the official with the name of the generator, quantity of asbestos-containing waste to be delivered, method of asbestos containment, and the date and time of projected delivery.
- F. Upon arrival, the hauler must check in at the cashier's booth and provide the cashier with a copy of the Waste Clearance Form or PSAPCA Notice of Intent to Remove or Encapsulate Asbestos.

- G. A landfill attendant will visually inspect the load before allowing access to the waste disposal area. The inspection process will:
 - 1. Check to see that all friable asbestos-containing waste is properly wetted and contained (i.e. sealed in a minimum of 6 mil. plastic or other Health Department approved method except drums).
 - 2. Estimate the quantity of waste to verify that the amount does not exceed that approved by PSAPCA.
 - 3. Note any irregularity on the back of the PSAPCA Notice.
 - 4. Require the date, time, and signature of the inspector to be placed in the lower right hand corner of the PSAPCA Notice.
 - H. After the inspection, the hauler shall be directed to the asbestos disposal area of the landfill and receive instructions on where to place the asbestos-containing waste in the trench prepared for the disposal. Items which contain only nonfriable asbestos may be unloaded mechanically. All other items must be unloaded by hand. During placement the hauler will:
 - 1. Place the asbestos-containing waste in the trench or container without rupture of the disposal bags.
 - 2. Place heavy containers and materials in an area of the trench or container dedicated to those materials. Heavy containers and materials will not be placed on top of plastic bags.
- 7.3 Quantities of containerized liquids must be delivered to the Cedar Hills Landfill and must be accompanied by an approved Waste Clearance Form. Containerized liquids will be accepted only if:
- A. The container has a capacity of five gallons or less, and;
 - B. The liquid is a household waste.
- 7.4 Contaminated soil will be disposed of in the following manner:
- A. Contaminated soil shall be accepted only at the Cedar Hills Landfill.
 - B. Loads of contaminated soil must be accompanied by a Waste Clearance Form approved by the Health Department and the KCSWD.

- C. All deliveries of contaminated soil to the Cedar Hills Landfill must be scheduled in advance with an official of the KCSWD at the landfill, providing the official with the name of the generator, quantity of soil to be delivered and the time of projected delivery. Landfill officials require a minimum 24-hour advance notification.
 - D. The hauler must check in at the cashiers booth upon arrival at the landfill and provide the cashier with a copy of the Waste Clearance Form. The cashier must be notified of all subsequent loads delivered under the same clearance.
- 7.5 Drum containers have a tendency to resurface in the landfill and therefore will be accepted only under the following conditions and will be accepted only at the Cedar Hills Landfill:
 - A. The drums are empty as defined in Section 5.6 of this Public Rule.
 - B. Full drums are regulated according to their contents.
 - C. Whether empty or full, plastic and metal drums must:
 - 1. Have at least one end removed, or
 - 2. Have been cut in half, or
 - 3. Have been crushed, and
 - 4. Be labeled non-hazardous.
 - D. All drums must be accompanied by an approved Waste Clearance Form.
- 7.6 Dusty material can cause difficulty in breathing for Solid Waste Division customers and employees. To minimize this impact, all dusty material shall be disposed of in the following manner:
 - A. To the extent possible, dusty material shall be separated from other forms of solid waste before being brought to the Cedar Hills Landfill.
 - B. Loads of dusty material shall be containerized in plastic bags or wetted to the extent that they are no longer dusty materials as defined in Section 5.5 of this Public Rule.
 - C. Dusty material will be accepted at transfer stations and landfills in mixed loads with other materials so that it is the lesser ingredient of the waste. KCSWD reserves the right to direct loads of dusty material to the Cedar Hills Landfill.

- D. Landfill officials shall require 24 hour advance notification of all deliveries of dusty material being delivered under the terms of a waste clearance. Notification shall consist of a telephone call from the generator to an official of the KCSWD at the landfill, providing the official with the name of the generator, quantity of dusty material to be delivered, and the time of projected delivery.
 - E. Upon arrival, the transporter must check in at the cashier's booth and provide the cashier with a copy of the approved Waste Clearance Form.
 - F. A landfill attendant will visually inspect the load to insure that the material is properly containerized or wetted.
- 7.7 Industrial Waste shall be disposed in the following manner:
- A. Industrial waste shall be accepted at the Cedar Hills Landfill or other designated facility as part of the Waste Clearance process.
 - B. Loads of industrial waste shall be accompanied by a Waste Clearance Form approved by the Health Department and the KCSWD.
- 7.8 Acceptance of infectious waste for disposal is regulated as follows:
- A. Untreated infectious waste is not accepted at any King County solid waste facility.
 - B. The following types of treated infectious waste are not accepted at King County solid waste facilities.
 - 1. Pathological waste.
 - 2. Liquid waste human blood and blood products.
 - 3. Animal carcasses.
 - C. The following types of treated infectious waste will be accepted only at the Cedar Hills Landfill, and must be accompanied by an approved Waste Clearance Form. If the Waste Clearance Form has been delivered with a previous load, the transporter of all subsequent loads must inform the landfill cashier of the type and source of the waste.
 - 1. Ash residue from the incineration of infectious waste. Please note that this material may also be classified as a "dusty material" necessitating that it also meet the requirements of Section 7.6 of this Public Rule.
 - 2. Sharps, including all laboratory glassware.

3. Waste that has come into contact with human body substances infected by anthrax, smallpox, rabies, plague and viral hemorrhagic fevers.
 4. Items or materials contaminated by human blood and blood products.
- D. Other types of treated infectious waste may be disposed in the general waste stream.

8.0 RESPONSIBILITIES

<u>Action by:</u>	<u>Action:</u>
Generator	8.1 Determines if Waste Clearance Form is needed and obtains form from the KCSWD or the Health Department. Returns completed form to the Health Department if the waste is contaminated soil or industrial waste. For all other waste requiring clearance, the completed form is returned to the KCSWD.
KCSWD	8.2 Reviews Waste Clearance Form received from generator. Completes form and returns to Generator. Keeps a copy of the form in files.
Health Dept.	8.3 Reviews Waste Clearance Form received from generator. Completes form and forwards to KCSWD. Keeps a copy of the form in files.
KCSWD	8.4 Completes form received from Health Department and returns to Generator. Sends copies of completed form to Region 10 of the Federal Environmental Protection Agency, the Northwest Regional Office of the State Department of Ecology, the Health Department, the generator, transporter and engineering consultant, if any. A copy of the completed form is kept in the SWD files.
Generator	8.5 If material is more than 50 cubic yards, request solid waste disposal environmental checklist from SWD. Complete and return to SWD. Reviews form and solid waste disposal
	8.6 SWD reviews form and solid waste disposal environmental checklist. Sends a letter to Generator approving or denying disposal at KCSWD facilities.
Generator	8.7 Presents completed Waste Clearance Form to KCSWD staff at landfill cashiers booth with first load of approved waste delivered.

9.0 PROCEDURES

- 9.1 All those generating solid waste for ultimate disposal at KCSWD disposal facilities are responsible for ensuring that the solid waste is not being improperly handled and that, when required, an approved Waste Clearance Form, accompanies the solid waste loads.
- 9.2 Haulers of solid waste to KCSWD facilities are responsible for not knowingly transporting improperly handled waste, and for presenting the appropriate Waste Clearance Form as requested by King County officials or facility attendants, if the form is provided to the hauler by the generator.
- 9.3 The KCSWD is responsible for requiring haulers to present an approved Waste Clearance Form at the disposal facility prior to unloading any materials which are covered by this Public Rule.
- 9.4 Officials at the KCSWD and Health Department are responsible for processing Waste Clearance Forms and for maintaining records of materials approved for disposal.

10.0 APPENDICES

- 10.1 Waste Clearance Form
- 10.2 Waste Material Denial Form

Appendix 10.1

WASTE CLEARANCE FORM

(Please print in ink or type)

Waste Clearance No. _____

(Agency Use)

PART A. TO BE COMPLETED BY THE GENERATOR:

Generator Name and Address:

Contact: _____

Tel. No: _____

EPA/State Identification Number, if available: _____

Hauler Name and Address:

Contact: _____

Tel. No: _____

FAX No: _____

If disposal fees will be paid by Solid Waste charge account, please give name of account holder and charge account number:

Name: _____ **Acct. No.** _____

For information on establishing a Solid Waste charge account, call 296-4448.

Description of Material: _____

Source of Material (give address and location at address):

Use of material prior to disposal: _____

Weight or volume of material to be disposed: _____

Frequency of disposal: _____

Requested disposal schedule (give dates): _____

TYPE OF MATERIAL: Please check category and provide requested information.

☐ **Animal waste**

☐ **Asbestos-containing waste**

Describe method of containerization: _____

Attach PSAPCA Notice of Intent to Remove or Encapsulate Asbestos, if applicable.

☐ **Containerized liquids**

List number and size of containers and contents of each container:

☐ **Contaminated soil, or industrial waste** (please circle applicable category of waste).

Maximum daily volume to be disposed: _____

Description of chemical characteristics, if known: _____

Have any chemical analyses been performed on this material? _____
If yes, please attach copy of data from representative samples.

If industrial waste, please describe the process which generates this waste and the ingredients of that process.

Attach Material Safety Data Sheet, if available.

☐ **Drum containers - empty**

Number/size: _____

Contents before emptying: _____

Method of emptying: _____

☐ **Dusty material**

Describe method of containerization: _____

☐ **Infectious Waste**

Describe treatment method: _____

Attach documentation of treatment of infectious waste, if available.

Include a completed environmental checklist (WAC 197-11-960) or other pertinent SEPA document for all materials in quantities greater than 50 cubic yards. Include any other pertinent reports or documents that have been prepared relating to this waste.

ATTACHMENTS

Please check if enclosed:

- ☐ PSAPCA Notice of Intent to Remove or Encapsulate Asbestos
- ☐ Material Safety Data Sheet
- ☐ Documentation of treatment of infectious waste
- ☐ Environmental checklist, other SEPA documents, reports or permits
- ☐ Analytical data
- ☐ Sampling map / soil logs

I, _____, hereby certify under penalty of perjury under the laws of the State of Washington, that all the information contained above is true and correct and that this waste fully complies with the regulations of the Seattle-King County Department of Public Health and the King County Solid Waste Division.

Waste Clearance Form
Part A - Generator

4

For soils or industrial waste, send completed form to:

Seattle-King County Department of Public Health
Waste Screening Program
172 - 20th Avenue
Seattle, WA 98122

Telephone: (206) 296-4633

FAX*: (206) 296-0188

For other wastes requiring clearance under this Rule, return completed form to:

King County Solid Waste Division,
Engineering Services, Waste Clearance Program
450 King County Administration Building
500 Fourth Avenue
Seattle, WA 98104

Telephone: (206) 296-4418

FAX*: (206) 296-0197

* Clearance Forms transmitted by FAX must be followed by mailed original.

PART B - TO BE COMPLETED BY AN OFFICIAL OF THE SEATTLE-KING COUNTY DEPARTMENT OF PUBLIC HEALTH (for contaminated soil, and/or industrial waste)

1. Is material described by generator a Dangerous Waste?

☐ Yes ☐ No

2. Does material have dangerous waste qualities?

☐ Yes ☐ No

If yes, specify: _____

3. Is material described by generator cleared for disposal at the Cedar Hills Landfill? If approval is denied, attach sheet stating reasons for denial.

☐ Yes ☐ No ☐ See attached sheet

4. Is additional information requested from the Generator? If yes, please attach sheet listing information requested.

☐ Yes ☐ No ☐ See attached sheet

5. Quantity approved for disposal: _____

6. Delivery frequency

☐ One time only

☐ Monthly

☐ Other (specify) _____

7. Expiration Date: _____

8. Is summary data attached?

☐ Yes ☐ No

Signature

Print Name

Title

Date

PART C. TO BE COMPLETED BY A REPRESENTATIVE OF THE KING COUNTY SOLID WASTE DIVISION (for asbestos-containing waste, dusty material, infectious waste, animal waste, containerized liquids, drum containers, materials that have been approved for disposal by the Health Department, and any other waste which is determined to require clearance for disposal).

1. Is material described by Generator approved for disposal? If approval is denied, attach sheet explaining reasons for denial.

☐ Yes ☐ No ☐ See attached sheet

2. Specify KCSWD disposal facility at which material may be disposed:

☐ Cedar Hills Regional Landfill

☐ Other (specify) _____

3. Route approved for hauling material for disposal:

☐ See attached map

☐ Other (specify) _____

4. Schedule approved for disposal: _____

5. If not included in Health Department approval, provide the following information:

- Quantity approved for disposal: _____

- Delivery frequency

☐ One time only

☐ Monthly

☐ Other (specify) _____

- Expiration Date: _____

6. Notification instructions:

☐ Call _____ at 296-4411 at least 5 working days prior to requested disposal date.

☐ Call _____ at 296-4490 24 hours prior to requested disposal date.

☐ Call Mel Andriesen on morning of the first day of delivery and on each subsequent day of delivery.

☐ Other (specify) _____
