

**King County**

**Parks and Recreation Division**

Department of Natural Resources and Parks

**Neighborhood Meeting Summary  
East Lake Sammamish Master Plan Trail –South Sammamish Segment A  
Contract No. C00796C13**

**August 5, 2014**

**5 –7 p.m.**

**East Lake Sammamish Trail at SE 33<sup>rd</sup> St.**

*(3315 Lake Sammamish Parkway SE to 3731 Sammamish Shore Lane SE)*

**Meeting Overview:**

- Frank Overton and Monica Leers, King County Parks, greeted attendees, introduced project staff, and explained the purpose of the meeting. King County is advancing design of the South Sammamish Segment A of the East Lake Sammamish Trail. Preliminary Trail Alignment Plans are now available and the design team is available tonight to explain the plans, answer questions, and collect comments. King County is committed to being a good neighbor and wants to hear from trail neighbors and the public early and often during design and construction. He encouraged attendees to submit comments and contact the project team anytime to provide comments or ask questions.
- All meeting attendees were asked to sign-in and received a packet of information that included recent newsletters for South and North Sammamish, informational project handouts, and a comment form. Trail neighbors received a personalized set of the design plans for the trail section adjacent to their home.
- Jenny Bailey, Parametrix provided an overview of the Preliminary Trail Alignment Plans and design criteria. Jenny explained that this segment is relatively unconstrained – there are only a few sections where the trail must shift closer to private properties to avoid impacts to environmentally sensitive areas, as required by local, state, and federal regulations. The design team is focusing on preserving trees as much as possible. An arborist will look at all trees within close proximity to the construction limits to assess overall tree health and determine whether the tree can be preserved. Preservation plans with these recommendations will be made available in August. Jenny explained that the centerline of the paved trail is staked to provide a visual cue of the proposed trail improvements. Jenny provided an overview of how to read the design plans and encouraged attendees to refer to their individual plan set throughout the meeting. Attendees were encouraged to ask questions and provide comments throughout the meeting.

## King County

### Parks and Recreation Division

Department of Natural Resources and Parks

#### Comment Summary:

- Approximately 7 trail neighbors attended the meeting and provided the following questions and comments.
  - Several questions focused on the proposed parking lot and bathrooms:
    - How will parking lot run off be mitigated?
    - Why do we need a sidewalk along the south side of 33<sup>rd</sup>?
    - Will the bathrooms be locked at night?
    - With the activity around 711 across the street, there are already issues with loitering.
    - What police jurisdiction will oversee the trail in case of an incident?
    - Homeowners understand that King County is not currently designing the parking lot or bathrooms but requested that King County engage them very early on in the conversation about design development of these facilities
  - There were several questions and comments related to trees and landscaping:
    - When will we know which trees will be removed?
    - What is the arborist measuring in its inspections and what do the metal markers mean?
    - When will the preservation plans be available and how do we access them?
  - What is being done to protect the private groundwater well used by residents?
    - Citizens requested a follow up meeting between the County and representatives from their neighborhood water district officers
  - Concern for bicycle speed and safety along the trail.
    - Several requests to install signs, speed bumps, or other measures to calm bicycle traffic.
    - Requests to make intersections a four-way stop for all trail and road users or retain a stop sign convention that requires trail users to stop rather than vehicles
    - Requests for the County to amend its policies about trail use after dark for bike commuters during the winter months.
  - Can the website be reorganized to be more user friendly? Or can emails provide direct hyperlinks to planning documents?
  - How long will the temporary fencing area adjacent to 33<sup>rd</sup> St. be set up? It is currently housing recyclable materials from the North segment.
  - Will there be fencing installed along this segment of the trail?
  - Request for drainage assessment and mitigation at 275+50
  - When and who will remove the invasive plant species along the trail?
  - Several questions regarding the Waverly Hills condo development across the street
    - Will trail construction impact the drainage easement used by the condo development?
    - Concern about traffic, SE 33<sup>rd</sup> is the only access point to Waverly Hills' recreational property on the lakeshore
  - How will we know when driveways will be closed and what is the usual length of a driveway closure?

**King County**

**Parks and Recreation Division**

Department of Natural Resources and Parks

- When will construction begin?

Neighborhood Meeting

Comment Form

Please provide your contact information:

Name: Leo Kosenkranius  
Address: 3233 E Lake Sammamish Shore Lane SE  
City, State, Zip: Sammamish WA 98075  
Email Address: [REDACTED]@gmail.com  
Phone: [REDACTED]

Please share your questions, comments, and concerns below:

- 1) I want to get a long term or permimant easement to my house on the road that has been used for 40+ years.
- 2) I want to make sure the parking lot & trail access is in the safest location. Not turning onto the Parkway in the middle of the curve, suggest having the access south of 33rd street where there is a turn lane.

Was today's meeting helpful?  Yes  No

Please share your thoughts below on the meeting content and format.

Dear Mr. Kosenkranius,

Thank you for your comments at King County's trail meetings this summer with homeowners in South Sammamish Segment A. All of the comments from the meetings were provided to the design team to be reviewed and considered as trail design advances.

Your comments have been received. KC responses are as follows:

**Comment:**

I want to get a long term or permanent easement to my house on the road that has been used for 40+ years.

**KC Response:**

Obtaining long term or permanent easement to your property is outside the scope of this project. Your comment has been sent to Kevin Workman, King County Parks Property Agent, for his review. Kevin will follow up with you directly on this issue.

**Comment:**

I want to make sure the parking lot and trail access is in the safest location. Not turning onto the Parkway in the middle of the curve. Suggest having the access south of 33<sup>rd</sup> Street where there is a turn lane.

**KC Response:**

Thank you for your suggestion regarding access to the parking lot. The County understands there is a great deal of community interest in the proposed parking lot. The County will continue to provide design updates and opportunities for community input with regard to trail design. The current timeline anticipates construction of the parking lot facility in 2018.

For additional information on the East Lake Sammamish Master Plan Trail project, please visit the project website at: [www.kingcounty.gov/eastlakesammamishtrail](http://www.kingcounty.gov/eastlakesammamishtrail).

You may follow our blog (<http://kingcountyparks.wordpress.com/>) for frequent updates about the East Lake Sammamish Trail and other King County Parks projects.

King County's public outreach staff are available to meet with you throughout the design and construction process. We encourage you to stay involved as design advances. You may set up an appointment by calling the project hotline at 1-888-668-4886 or emailing [ELST@kingcounty.gov](mailto:ELST@kingcounty.gov).

Sincerely,

Gina Auld  
Capital Project Manager
