SHEET 3/9

DATE 4/15/18

DESCRIPTION
Removal of existing fully decked section of pier amounting to 25x33-feet and 8x17-feet (961SF) with 32 associated creosote-treated wood piles. Replace with 25x33 (8315SF) 50% functional grated pier supported by 8 10-inch diameter galvanized steel piles.

This will result in a decrease of 24 piles, minimize the SF of piles (15-inch diameter creosote-treated wood piles down to 10-inch diameter galvanized steel), reduction of square footage by 1365SF, and introduction of 50% grated surface.

IN Quarter Master
NEAR AT Vashon island
COUNTY: King
STATE: WA
